#	ARTICLE	IF	CITATIONS
1	Changes in distribution, morphology and ultrastructure of chloride cell in Atlantic salmon during an AGD infection. <i>Journal of Fish Diseases</i> , 2019, 42, 1433-1446.	1.9	10
2	Evaluating the use of garlic (<i>Allium sativum</i>) for the remedy of <i>Cryptocaryon irritans</i> in guppies (<i>Poecilia reticulata</i>). <i>Aquaculture Research</i> , 2019, 50, 431-438.	1.8	10
3	Methacarn preserves mucus integrity and improves visualization of amoebae in gills of Atlantic salmon (<i>Salmo salar</i> L.). <i>Journal of Fish Diseases</i> , 2019, 42, 883-894.	1.9	9
4	First report of <i>Streptococcus parauberis</i> in a cultured freshwater ornamental fish, the ram cichlid <i>Mikrogeophagus ramirezi</i> (Myers & Harry, 1948). <i>Journal of Fish Diseases</i> , 2018, 41, 161-164.	1.9	6
5	Confocal scanning laser microscopy with complementary 3D image analysis allows quantitative studies of functional state of ionoregulatory cells in the Nile tilapia (<i>Oreochromis niloticus</i>) following salinity challenge. <i>Microscopy Research and Technique</i> , 2013, 76, 412-418.	2.2	5
6	A comparison of the use of different swab materials for optimal diagnosis of amoebic gill disease (AGD) in Atlantic salmon (<i>Salmo salar</i> L.). <i>Journal of Fish Diseases</i> , 2020, 43, 1463-1472.	1.9	4
7	Morphological and ultrastructural characterization of ionoregulatory cells in the teleost <i>Oreochromis niloticus</i> following salinity challenge combining complementary confocal scanning laser microscopy and transmission electron microscopy using a novel prefixation immunogold labeling technique. <i>Microscopy Research and Technique</i> , 2013, 76, 1016-1024.	2.2	2
8	Effects of different commercial diets on growth performance, health and resistance to <i>Tetrahymena</i> sp. infection in guppies, <i>Poecilia reticulata</i> (Peters). <i>Aquaculture Research</i> , 2016, 47, 2276-2286.	1.8	1
