#	ARTICLE	IF	CITATIONS
1	A two-parameter block triangular preconditioner for double saddle point problem arising from liquid crystal directors modeling. Numerical Algorithms, 2022, 89, 987-1006.	1.1	9
2	Minimum residual modified HSS iteration method for a class of complex symmetric linear systems. Numerical Algorithms, 2021, 86, 1543-1559.	1.1	4
3	How to compute the minimum norm least squares solution of singular linear system by using the preconditioned HSS method?. Numerical Algorithms, 2020, 83, 1205-1221.	1.1	1
4	A parameterized deteriorated PSS preconditioner and its optimization for nonsymmetric saddle point problems. Computers and Mathematics With Applications, 2020, 79, 1420-1434.	1.4	3
5	Convergence of a generalized PMHSS method for a class of singular block two-by-two linear systems. Computational and Applied Mathematics, 2020, 39, 1.	1.0	0
6	On the convergence of the minimum residual HSS iteration method. Applied Mathematics Letters, 2019, 94, 210-216.	1.5	3
7	Minimum residual Hermitian and skew-Hermitian splitting iteration method for non-Hermitian positive definite linear systems. BIT Numerical Mathematics, 2019, 59, 299-319.	1.0	11
8	Convergence analysis of modified PGSS methods for singular saddle-point problems. Computers and Mathematics With Applications, 2019, 77, 93-104.	1.4	1
9	Scaled norm minimization method for computing the parameters of the HSS and the two-parameter HSS preconditioners. Numerical Linear Algebra With Applications, 2018, 25, e2169.	0.9	21
10	Preconditioned HSS iteration method and its non-alternating variant for continuous Sylvester equations. Computers and Mathematics With Applications, 2018, 75, 1095-1106.	1.4	4
11	How to compute the optimal parameters of the parameterized PMHSS preconditioner?. Applied Mathematics Letters, 2018, 86, 8-13.	1.5	1
12	A New Uzawa-Type Iteration Method for Non-Hermitian Saddle-Point Problems. East Asian Journal on Applied Mathematics, 2017, 7, 211-226.	0.4	3
13	Two modified block-triangular splitting preconditioners for generalized saddle-point problems. Computers and Mathematics With Applications, 2017, 74, 1176-1197.	1.4	1
14	A relaxed block-triangular splitting preconditioner for generalized saddle-point problems. International Journal of Computer Mathematics, 2017, 94, 1609-1623.	1.0	5
15	The modified shift-splitting preconditioners for nonsymmetric saddle-point problems. Applied Mathematics Letters, 2016, 59, 109-114.	1.5	22
16	Modified parameterized inexact Uzawa method for singular saddle-point problems. Numerical Algorithms, 2016, 72, 325-339.	1.1	8
17	Preconditioning analysis of nonuniform incremental unknowns method for two dimensional elliptic problems. Applied Mathematical Modelling, 2015, 39, 5436-5451.	2.2	1
18	General constraint preconditioning iteration method for singular saddle-point problems. Journal of Computational and Applied Mathematics, 2015, 282, 157-166.	1.1	10

#	ARTICLE	IF	CITATIONS
19	Parameterized preconditioned Hermitian and skew-Hermitian splitting iteration method for a class of linear matrix equations. <i>Computers and Mathematics With Applications</i> , 2015, 70, 1357-1367.	1.4	3
20	On semi-convergence of the Uzawa-HSS method for singular saddle-point problems. <i>Applied Mathematics and Computation</i> , 2015, 252, 88-98.	1.4	31
21	On generalized parameterized inexact Uzawa methods for singular saddle-point problems. <i>Numerical Algorithms</i> , 2015, 69, 579-593.	1.1	15
22	On semi-convergence of generalized skew-Hermitian triangular splitting iteration methods for singular saddle-point problems. <i>Linear Algebra and Its Applications</i> , 2014, 459, 493-510.	0.4	10
23	A Generalized HSS Iteration Method for Continuous Sylvester Equations. <i>Journal of Applied Mathematics</i> , 2014, 2014, 1-9.	0.4	2
24	Parameterized preconditioned Hermitian and skew-Hermitian splitting iteration method for saddle-point problems. <i>International Journal of Computer Mathematics</i> , 2014, 91, 1224-1238.	1.0	18
25	Preconditioning analysis of the one dimensional incremental unknowns method on nonuniform meshes. <i>Journal of Applied Mathematics and Computing</i> , 2014, 44, 379-395.	1.2	1
26	The semi-convergence properties of MHSS method for a class of complex nonsymmetric singular linear systems. <i>Numerical Algorithms</i> , 2014, 66, 705-719.	1.1	9
27	Modified accelerated parameterized inexact Uzawa method for singular and nonsingular saddle point problems. <i>Applied Mathematics and Computation</i> , 2014, 244, 552-560.	1.4	19
28	Lopsided PMHSS iteration method for a class of complex symmetric linear systems. <i>Numerical Algorithms</i> , 2014, 66, 555-568.	1.1	69
29	The Uzawa-HSS method for saddle-point problems. <i>Applied Mathematics Letters</i> , 2014, 38, 38-42.	1.5	34
30	Algebraic preconditioning analysis of the multilevel block incremental unknowns method for anisotropic elliptic operators. <i>Mathematical and Computer Modelling</i> , 2013, 57, 512-524.	2.0	3
31	Incremental unknowns methods for the alternating directional implicit and semi-implicit schemes. <i>Interdisciplinary Mathematical Sciences</i> , 2013, , 143-157.	0.4	0
32	Multilevel wavelet-like block incremental unknowns methods for a class of reaction-diffusion equations. <i>Interdisciplinary Mathematical Sciences</i> , 2013, , 205-223.	0.4	0
33	Bi-parameter incremental unknowns ADI iterative methods for elliptic problems. <i>Numerical Algorithms</i> , 2012, 60, 483-499.	1.1	3
34	Pinning adaptive anti-synchronization between two general complex dynamical networks with non-delayed and delayed coupling. <i>Applied Mathematics and Computation</i> , 2012, 218, 7445-7452.	1.4	42
35	Newton-MHSS methods for solving systems of nonlinear equations with complex symmetric Jacobian matrices. <i>Numerical Algebra, Control and Optimization</i> , 2012, 2, 839-853.	1.0	14
36	Uniform convergence analysis of finite difference approximations for advection-reaction-diffusion problem on adaptive grids. <i>International Journal of Computer Mathematics</i> , 2011, 88, 3292-3307.	1.0	5
