#	ARTICLE	IF	CITATIONS
1	Biocontrol of Avian Gastrointestinal Parasites Using Predatory Fungi: Current Status, Challenges, and Opportunities. <i>Parasitologia</i> , 2022, 2, 37-44.	1.3	5
2	Evaluation of nematophagous fungal mycelial growth and interactions with bovine gastrointestinal parasitic nematodes. <i>German Journal of Veterinary Research</i> , 2022, 2, 39-45.	1.2	0
3	Formulating fungal spores to prevent infection by trichostrongylids in a zoological park: Practical approaches to a persisting problem. <i>Biological Control</i> , 2021, 152, 104466.	3.0	5
4	Implementation of Mini-FLOTAC in Routine Diagnosis of Coccidia and Helminth Infections in Domestic and Exotic Birds. <i>Veterinary Sciences</i> , 2021, 8, 160.	1.7	5
5	Recent Advances in the Control of Helminths of Domestic Animals by Helminthophagous Fungi. <i>Parasitologia</i> , 2021, 1, 168-176.	1.3	27
6	Gastrointestinal Parasitism in Miranda Donkeys: Epidemiology and Selective Control of Strongyles Infection in the Northeast of Portugal. <i>Animals</i> , 2021, 11, 155.	2.3	6
7	The Control of Zoonotic Soil-Transmitted Helminthoses Using Saprophytic Fungi. <i>Pathogens</i> , 2020, 9, 1071.	2.8	6
8	The efficacy of predatory fungi on the control of gastrointestinal parasites in domestic and wild animals – A systematic review. <i>Veterinary Parasitology</i> , 2020, 283, 109173.	1.8	18
9	Integrating the control of helminths in dairy cattle: Deworming, rotational grazing and nutritional pellets with parasiticide fungi. <i>Veterinary Parasitology</i> , 2020, 278, 109038.	1.8	14
10	Gastrointestinal Parasites of Free-Range Chickens – A Worldwide Issue. <i>Bulletin of University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca: Veterinary Medicine</i> , 2019, 76, 110.	0.0	5
11	Biological control of soil transmitted helminths (STHs) in a zoological park by using saprophytic fungi. <i>Biological Control</i> , 2018, 122, 24-30.	3.0	13
12	Potential Usefulness of Filamentous Fungi to Prevent Zoonotic Soil-Transmitted Helminths. <i>Vector-Borne and Zoonotic Diseases</i> , 2018, 18, 690-696.	1.5	10
13	Implementation of Biological Control to the Integrated Control of Strongyle Infection among Wild Captive Equids in a Zoological Park. <i>BioMed Research International</i> , 2018, 2018, 1-7.	1.9	10
14	A combined effort to avoid strongyle infection in horses in an oceanic climate region: rotational grazing and parasiticide fungi. <i>Parasites and Vectors</i> , 2018, 11, 240.	2.5	16
15	Effect of the Filamentous Fungus <i>Mucor circinelloides</i> On The Development of Eggs of the Rumen Fluke <i>Calicophoron daubneyi</i> (Paramphistomidae). <i>Journal of Parasitology</i> , 2017, 103, 199-206.	0.7	6
16	Isolation of Ovicidal Fungi from Fecal Samples of Captive Animals Maintained in a Zoological Park. <i>Journal of Fungi (Basel, Switzerland)</i> , 2017, 3, 29.	3.5	13
17	Feeding horses with industrially manufactured pellets with fungal spores to promote nematode integrated control. <i>Veterinary Parasitology</i> , 2016, 229, 37-44.	1.8	22
18	The capability of the fungus <i>Mucor circinelloides</i> to maintain parasiticide activity after the industrial feed pelleting enhances the possibilities of biological control of livestock parasites. <i>Biological Control</i> , 2016, 92, 38-44.	3.0	17

#	ARTICLE	IF	CITATIONS
19	Riesgo de exposición a Fasciola hepática en ganado vacuno en extensivo de Uruguay y Portugal determinado mediante ELISA y un antígeno recombinante. Archivos De Medicina Veterinaria, 2015, 47, 201-208.	0.2	4
20	Analysis of the effect of soil saprophytic fungi on the eggs of Baylisascaris procyonis. Parasitology Research, 2015, 114, 2443-2450.	1.6	19
21	Potential use of <i>Mucor circinelloides</i> for the biological control of certain helminths affecting livestock reared in a care farm. Biocontrol Science and Technology, 2015, 25, 1443-1452.	1.3	15
22	Determination of exposure to Fasciola hepatica in horses from Uruguay using a recombinant-based ELISA. Veterinarni Medicina, 2015, 60, 483-488.	0.6	5
23	Zoonotic Neglected Tropical Diseases: New Approaches to Combat Old Enemies. BioMed Research International, 2014, 2014, 1-2.	1.9	1
24	Antigen characterization from second instars of oestrid bot flies for the detection of anti- <i>Cephenemyia stimulator</i> antibodies by ELISA in roe deer (<i>Capreolus</i>)	0.0	0
25	Reliability of an ELISA Test for Diagnosing Oestrosis in Iberian Ibx. Journal of Parasitology, 2014, 100, 235-238.	0.7	5
26	Trematodes enhance the development of the nematode-trapping fungus <i>Arthrobotrys</i> (<i>Duddingtonia</i>) <i>flagrans</i> . Fungal Biology, 2013, 117, 540-544.	2.5	8
27	A Preliminary Study of the Biological Control of Strongyles Affecting Equids in a Zoological Park. Journal of Equine Veterinary Science, 2013, 33, 1115-1120.	0.9	15
28	Relationship between exposure to Fasciola hepatica in roe deer (<i>Capreolus capreolus</i>) and cattle extensively reared in an endemic area. Research in Veterinary Science, 2013, 95, 1031-1035.	1.9	13
29	Infection by Paramphistomidae trematodes in cattle from two agricultural regions in NW Uruguay and NW Spain. Veterinary Parasitology, 2013, 191, 165-171.	1.8	16
30	Epidemiology, chronobiology and taxonomic updates of <i>Rhinoestrus</i> spp. infestation in horses of Sardinia Isle, Western Mediterranean (Italy). Veterinary Parasitology, 2013, 192, 240-246.	1.8	8
31	The efficacy of four anthelmintics against <i>Calicophoron daubneyi</i> in naturally infected dairy cattle. Veterinary Parasitology, 2013, 197, 126-129.	1.8	38
32	Mixed Production of Filamentous Fungal Spores for Preventing Soil-Transmitted Helminth Zoonoses: A Preliminary Analysis. BioMed Research International, 2013, 2013, 1-8.	1.9	23
33	Detection of Antibodies In Wild Ruminants To Evaluate Exposure To Liver Trematodes. Journal of Parasitology, 2012, 98, 754-759.	0.7	11
34	Preliminary Analysis of the Results of Selective Therapy Against Strongyles in Pasturing Horses. Journal of Equine Veterinary Science, 2012, 32, 274-280.	0.9	16
35	Exposure to <i>Sarcocystis</i> spp. in horses from Spain determined by Western blot analysis using <i>Sarcocystis neurona</i> merozoites as heterologous antigen. Veterinary Parasitology, 2012, 185, 301-304.	1.8	11
36	Enzyme-linked immunosorbent assays for the detection of equine antibodies specific to a recombinant <i>Fasciola hepatica</i> surface antigen in an endemic area. Parasitology Research, 2012, 110, 1001-1007.	1.6	16

#	ARTICLE	IF	CITATIONS
37	Efficacy of Ivermectin Pour-on Against Nematodes Infecting Foals on Pasture: Coprological and Biochemical Analysis. <i>Journal of Equine Veterinary Science</i> , 2011, 31, 530-535.	0.9	8
38	Ability of the fungus <i>Duddingtonia flagrans</i> to adapt to the cyathostomin egg-output by spreading chlamydo spores. <i>Veterinary Parasitology</i> , 2011, 179, 277-282.	1.8	47
39	Prevalence of mixed trematode infections in an abattoir receiving cattle from northern Portugal and north-west Spain. <i>Veterinary Record</i> , 2011, 168, 408-408.	0.3	50
40	Isolation of Potentially Useful Antigens from Cyathostomin Third-Stage Larvae by Using a Fast Protein Liquid Chromatography One-Step Method. <i>Vaccine Journal</i> , 2011, 18, 1462-1466.	3.1	1
41	A novel second instar <i>Gasterophilus</i> excretory/secretory antigen-based ELISA for the diagnosis of gasterophilosis in grazing horses. <i>Veterinary Parasitology</i> , 2010, 171, 314-320.	1.8	8
42	An Approach of the Laboratory to the Field: Assessment of the Influence of Cattle Management on the Seroprevalence of Fascioliasis by Using Polyclonal- and Recombinant-Based ELISAs. <i>Journal of Parasitology</i> , 2010, 96, 626-631.	0.7	14
43	Application of the Analysis of Serum Antibodies (Immunoglobulins M and G) to Estimate the Seroprevalence of Ovine Oestrosis and to Evaluate the Effect of Chemotherapy. <i>Journal of Medical Entomology</i> , 2010, 47, 477-481.	1.8	6
44	A recombinant-based ELISA evaluating the efficacy of netobimin and albendazole in ruminants with naturally acquired fascioliasis. <i>Veterinary Journal</i> , 2009, 182, 73-78.	1.7	10
45	Silvopastoralism and autochthonous equine livestock: Analysis of the infection by endoparasites. <i>Veterinary Parasitology</i> , 2009, 164, 357-362.	1.8	16
46	Human <i>Oestrussp.</i> Infection, Canary Islands. <i>Emerging Infectious Diseases</i> , 2007, 13, 950-952.	4.3	10
47	Risk periods of infection by <i>Calicophoron daubneyi</i> (Digenea:Paramphistomidae) in cattle from oceanic climate areas. <i>Parasitology Research</i> , 2007, 101, 339-342.	1.6	28
48	CONTROL DE PARASITOSIS EQUINAS: SOSTENIBILIDAD VS. FARMACOLOGÍA. , 0, , 166-176.		0
