

# Antonio Cavaliere

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/2545965/antonio-cavaliere-publications-by-year.pdf>

**Version:** 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

|                   |                         |                |                 |
|-------------------|-------------------------|----------------|-----------------|
| 21<br>papers      | 1,151<br>citations      | 11<br>h-index  | 22<br>g-index   |
| 22<br>ext. papers | 1,306<br>ext. citations | 5.5<br>avg, IF | 4.53<br>L-index |

| #  | Paper                                                                                                                                                                                                                                            | IF   | Citations |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 21 | Mini-Review: Heat Transfer Mechanisms in MILD Combustion Systems. <i>Frontiers in Mechanical Engineering</i> , <b>2021</b> , 7,                                                                                                                  | 2.6  | 2         |
| 20 | Thermo-chemical manifold reduction for tabulated chemistry modeling. Temperature and dilution constraints for smooth combustion reactors. <i>Proceedings of the Combustion Institute</i> , <b>2021</b> , 38, 5393-5402                           | 5.9  | 7         |
| 19 | Diffusion Ignition Processes in MILD Combustion: A Mini-Review. <i>Frontiers in Mechanical Engineering</i> , <b>2020</b> , 6,                                                                                                                    | 2.6  | 7         |
| 18 | Ammonia oxidation features in a Jet Stirred Flow Reactor. The role of NH <sub>2</sub> chemistry.. <i>Fuel</i> , <b>2020</b> , 276, 118054                                                                                                        | 7.1  | 15        |
| 17 | The role of dilution level and canonical configuration in the modeling of MILD combustion systems with internal recirculation. <i>Fuel</i> , <b>2020</b> , 264, 116840                                                                           | 7.1  | 15        |
| 16 | Propane oxidation in a Jet Stirred Flow Reactor. The effect of H <sub>2</sub> O as diluent species. <i>Experimental Thermal and Fluid Science</i> , <b>2018</b> , 95, 35-43                                                                      | 3    | 17        |
| 15 | Numerical Study of a Cyclonic Combustor under Moderate or Intense Low-Oxygen Dilution Conditions Using Non-adiabatic Tabulated Chemistry. <i>Energy &amp; Fuels</i> , <b>2018</b> , 32, 10256-10265                                              | 4.1  | 12        |
| 14 | Distributed combustion in a cyclonic burner <b>2017</b> ,                                                                                                                                                                                        |      | 1         |
| 13 | Numerical investigation of the ignition and annihilation of CH <sub>4</sub> /N <sub>2</sub> /O <sub>2</sub> mixtures under MILD operative conditions with detailed chemistry. <i>Combustion Theory and Modelling</i> , <b>2017</b> , 21, 120-136 | 1.5  | 11        |
| 12 | The Effect of Diluent on the Sustainability of MILD Combustion in a Cyclonic Burner. <i>Flow, Turbulence and Combustion</i> , <b>2016</b> , 96, 449-468                                                                                          | 2.5  | 48        |
| 11 | Development of a Novel Cyclonic Flow Combustion Chamber for Achieving MILD/Flameless Combustion. <i>Energy Procedia</i> , <b>2015</b> , 66, 141-144                                                                                              | 2.3  | 18        |
| 10 | MILD Combustion <b>2010</b> , 237                                                                                                                                                                                                                |      | 6         |
| 9  | PYROLYTIC AND OXIDATIVE STRUCTURES IN HDDI MILD COMBUSTION. <i>International Journal of Energy for A Clean Environment</i> , <b>2010</b> , 11, 21-34                                                                                             | 1.5  | 3         |
| 8  | Highly Preheated Lean Combustion <b>2008</b> , 55-94                                                                                                                                                                                             |      | 9         |
| 7  | Breakup and breakdown of bent kerosene jets in gas turbine conditions. <i>Proceedings of the Combustion Institute</i> , <b>2007</b> , 31, 2231-2238                                                                                              | 5.9  | 26        |
| 6  | DILUTION EFFECTS IN NATURAL GAS MILD COMBUSTION. <i>Clean Air</i> , <b>2006</b> , 7, 127-139                                                                                                                                                     |      | 3         |
| 5  | Mild Combustion. <i>Progress in Energy and Combustion Science</i> , <b>2004</b> , 30, 329-366                                                                                                                                                    | 33.6 | 833       |

|   |                                                                                                                                                                                   |     |    |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| 4 | REACTOR CHARACTERISTICS RELATED TO MODERATE OR INTENSE LOW-OXYGEN DILUTION FOR CLEAN/CLEANING COMBUSTION PLANTS. <i>Clean Air</i> , <b>2003</b> , 4, 1-20                         |     | 5  |
| 3 | Zero-dimensional analysis of diluted oxidation of methane in rich conditions. <i>Proceedings of the Combustion Institute</i> , <b>2000</b> , 28, 1639-1646                        | 5.9 | 70 |
| 2 | AIR DILUTION EFFECTS ON TETRADECANE SPRAY AUTOIGNITION IN TRANSCRITICAL AND SUPERCRITICAL REGIMES. <i>Atomization and Sprays</i> , <b>1999</b> , 9, 153-172                       | 1.2 | 4  |
| 1 | Drop Sizing by Laser Light Scattring Exploiting Intensity Angular Oscillation in the mie regime. <i>Particle and Particle Systems Characterization</i> , <b>1990</b> , 7, 221-225 | 3.1 | 39 |
