#	ARTICLE	IF	CITATIONS
1	<i>DD</i> -Classifier: Nonparametric Classification Procedure Based on <i>DD</i> -Plot. Journal of the American Statistical Association, 2012, 107, 737-753.	3.1	108
2	New Nonparametric Tests of Multivariate Locations and Scales Using Data Depth. Statistical Science, 2004, 19, 686.	2.8	63
3	A New Process Control Chart for Monitoring Short-Range Serially Correlated Data. Technometrics, 2020, 62, 71-83.	1.9	36
4	Nonparametric dynamic screening system for monitoring correlated longitudinal data. IIE Transactions, 2016, 48, 772-786.	2.1	35
5	Two-sample and ANOVA tests for high dimensional means. Annals of Statistics, 2019, 47, .	2.6	30
6	Nonparametric multivariate CUSUM control charts for location and scale changes. Journal of Nonparametric Statistics, 2013, 25, 1-20.	0.9	29
7	Multivariate spacings based on data depth: I. Construction of nonparametric multivariate tolerance regions. Annals of Statistics, 2008, 36, .	2.6	28
8	Construction of an efficient multivariate dynamic screening system. Quality and Reliability Engineering International, 2017, 33, 1969-1981.	2.3	23
9	Nonparametric adaptive CUSUM chart for detecting arbitrary distributional changes. Journal of Quality Technology, 2021, 53, 154-172.	2.5	22
10	Can CRISPR gene drive work in pest and beneficial haplodiploid species?. Evolutionary Applications, 2020, 13, 2392-2403.	3.1	20
11	Nonparametric multivariate statistical process control charts: a hypothesis testing-based approach. Journal of Nonparametric Statistics, 2015, 27, 384-400.	0.9	16
12	Nonparametric Tests for Homogeneity of Species Assemblages: A Data Depth Approach. Biometrics, 2011, 67, 1481-1488.	1.4	15
13	Asymptotic normality of interpoint distances for high-dimensional data with applications to the two-sample problem. Biometrika, 2018, 105, 529-546.	2.4	15
14	A Nonparametric Test of Missing Completely at Random for Incomplete Multivariate Data. Psychometrika, 2015, 80, 707-726.	2.1	14
15	A wavelet-based nonparametric CUSUM control chart for autocorrelated processes with applications to network surveillance. Quality and Reliability Engineering International, 2019, 35, 644-658.	2.3	11
16	Approximate and generalized pivotal quantities for deriving confidence intervals for the offset between two clocks. Statistical Methodology, 2009, 6, 97-107.	0.5	6
17	A two-stage online monitoring procedure for high-dimensional data streams. Journal of Quality Technology, 2019, 51, 392-406.	2.5	6
18	Comparing Species Assemblages Via Species Accumulation Curves. Biometrics, 2009, 65, 1063-1067.	1.4	5

#	ARTICLE	IF	CITATIONS
19	Efficient global monitoring statistics for high-dimensional data. Quality and Reliability Engineering International, 2020, 36, 18-32.	2.3	5
20	EDF goodness-of-fit tests based on centre-outward ordering. Journal of Nonparametric Statistics, 2018, 30, 973-989.	0.9	4
21	Asymptotic distribution-free change-point detection based on interpoint distances for high-dimensional data. Journal of Nonparametric Statistics, 2020, 32, 157-184.	0.9	3
22	Adaptive CUSUM chart with cautious parameter learning. Quality and Reliability Engineering International, 2022, 38, 3135-3156.	2.3	3
23	Sequential Fixed Width Confidence Intervals for the Offset Between Two Network Clocks. Sequential Analysis, 2009, 28, 475-487.	0.5	2
24	Estimation and Confidence Intervals for Clock Offset in Networks with Bivariate Exponential Delays. Communications in Statistics - Theory and Methods, 2013, 42, 1024-1041.	1.0	2
25	Simultaneous Confidence Inference on Species Accumulation Curves. Journal of Agricultural, Biological, and Environmental Statistics, 2012, 17, 1-14.	1.4	1
26	Simple and efficient adaptive two-sample tests for high-dimensional data. Communications in Statistics - Theory and Methods, 2021, 50, 4428-4447.	1.0	1
27	Combining dependent tests based on data depth with applications to the two-sample problem for data of arbitrary types. Journal of Nonparametric Statistics, 2022, 34, 113-140.	0.9	0
