#	ARTICLE	IF	CITATIONS
1	The Impact of Early Human Migration on Brown Adipose Tissue Evolution and Its Relevance to the Modern Obesity Pandemic. <i>Journal of the Endocrine Society</i> , 2019, 3, 372-386.	0.2	6
2	FTO influences adipogenesis by regulating mitotic clonal expansion. <i>Nature Communications</i> , 2015, 6, 6792.	12.8	186
3	On the Evolutionary Origins of Obesity: A New Hypothesis. <i>Endocrinology</i> , 2014, 155, 1573-1588.	2.8	105
4	Fetal programming of adipose tissue function: an evolutionary perspective. <i>Mammalian Genome</i> , 2014, 25, 413-423.	2.2	11
5	Feeding the heat on brown fat. <i>Annals of the New York Academy of Sciences</i> , 2013, 1302, 11-23.	3.8	8
6	Orexin receptor-1 mediates brown fat developmental differentiation. <i>Adipocyte</i> , 2012, 1, 58-63.	2.8	34
7	Orexin Is Required for Brown Adipose Tissue Development, Differentiation, and Function. <i>Cell Metabolism</i> , 2012, 16, 550.	16.2	0
8	Orexin Is Required for Brown Adipose Tissue Development, Differentiation, and Function. <i>Cell Metabolism</i> , 2011, 14, 478-490.	16.2	225
9	Appetite regulatory mechanisms and food intake in mice are sensitive to mismatch in diets between pregnancy and postnatal periods. <i>Brain Research</i> , 2008, 1237, 146-152.	2.2	19
10	Sensitivity of housekeeping genes in the hypothalamus to mismatch in diets between pre- and postnatal periods in mice. <i>Neuroscience Letters</i> , 2008, 447, 54-57.	2.1	12
