#	ARTICLE	IF	CITATIONS
1	Microparticles obtained by spray-drying technique containing ginger essential oil with the addition of cellulose nanofibrils extracted from the ginger vegetable fiber. <i>Drying Technology</i> , 2021, 39, 1912-1926.	1.7	10
2	Quality of honeys from different botanical origins. <i>Journal of Food Science and Technology</i> , 2021, 58, 4167-4177.	1.4	4
3	Spray-dried thyme essential oil microparticles using different polymeric matrices. <i>Drying Technology</i> , 2021, 39, 1883-1894.	1.7	7
4	Restructured Fish Cooked Ham: Effects of the Use of Carrageenan and Transglutaminase on Textural Properties. <i>Journal of Aquatic Food Product Technology</i> , 2021, 30, 451-461.	0.6	1
5	Oat bran and sweeteners in petit-suisse cheese: Technological and nutritional properties and consumer acceptance. <i>LWT - Food Science and Technology</i> , 2021, 146, 111318.	2.5	5
6	Properties of chitosan-papain biopolymers reinforced with cellulose nanofibers. <i>Journal of Food Processing and Preservation</i> , 2021, 45, e15740.	0.9	4
7	Effect of botanical origin on stability and crystallization of honey during storage. <i>British Food Journal</i> , 2021, ahead-of-print, .	1.6	1
8	Grape juice blends treated with gamma irradiation evaluated during storage. <i>Radiation Physics and Chemistry</i> , 2020, 168, 108570.	1.4	9
9	Hygroscopic, structural, and thermal properties of essential oil microparticles of sweet orange added with cellulose nanofibrils. <i>Journal of Food Processing and Preservation</i> , 2020, 44, e14365.	0.9	7
10	Encapsulation of camu-camu extracts using prebiotic biopolymers: Controlled release of bioactive compounds and effect on their physicochemical and thermal properties. <i>Food Research International</i> , 2020, 137, 109563.	2.9	20
11	Stability of camu-camu encapsulated with different prebiotic biopolymers. <i>Journal of the Science of Food and Agriculture</i> , 2020, 100, 3471-3480.	1.7	15
12	Effect of carrier oil on Î±-tocopherol encapsulation in ora-pro-nobis (<i>Pereskia aculeata</i> Miller) mucilage-whey protein isolate microparticles. <i>Food Hydrocolloids</i> , 2020, 105, 105716.	5.6	21
13	Optimization for sensory and nutritional quality of a mixed berry fruit juice elaborated with coconut water. <i>Food Science and Technology</i> , 2020, 40, 985-992.	0.8	8
14	Produção e caracterização de óleo bruto e refinado obtido de cabeças de tilápia sob diferentes temperaturas. <i>Research, Society and Development</i> , 2020, 9, e2709119837.	0.0	0
15	Physical-Mechanical and Antifungal Properties of Pectin Nanocomposites / Neem Oil Nanoemulsion for Seed Coating. <i>Food Biophysics</i> , 2019, 14, 456-466.	1.4	28
16	Production and efficacy of neem nanoemulsion in the control of <i>Aspergillus flavus</i> and <i>Penicillium citrinum</i> in soybean seeds. <i>European Journal of Plant Pathology</i> , 2019, 155, 1105-1116.	0.8	13
17	Extraction processes and characterization of the mucilage obtained from green fruits of <i>Pereskia aculeata</i> Miller. <i>Industrial Crops and Products</i> , 2019, 140, 111716.	2.5	35
18	Shelf life determination of frozen fish sausage produced with fillet and minced fish derived from the Nile tilapia processing. <i>Journal of Food Processing and Preservation</i> , 2019, 43, e13984.	0.9	3

#	ARTICLE	IF	CITATIONS
19	Berry Jelly: Optimization Through Desirability-Based Mixture Design. <i>Journal of Food Science</i> , 2019, 84, 1522-1528.	1.5	16
20	Mixed Brazilian Cerrado fruits preserves without added sugar: the effect of bodying agents. <i>British Food Journal</i> , 2019, 121, 1969-1981.	1.6	12
21	Development and characterization of biodegradable films based on <i>Pereskia aculeata</i> Miller mucilage. <i>Industrial Crops and Products</i> , 2019, 130, 499-510.	2.5	52
22	Ultrasound-assisted oil-in-water nanoemulsion produced from <i>Pereskia aculeata</i> Miller mucilage. <i>Ultrasonics Sonochemistry</i> , 2019, 50, 339-353.	3.8	56
23	Utility of Blended Polymeric Formulations Containing Cellulose Nanofibrils for Encapsulation and Controlled Release of Sweet Orange Essential Oil. <i>Food and Bioprocess Technology</i> , 2018, 11, 1188-1198.	2.6	39
24	Fruits from the Brazilian Cerrado region: Physico-chemical characterization, bioactive compounds, antioxidant activities, and sensory evaluation. <i>Food Chemistry</i> , 2018, 245, 305-311.	4.2	123
25	Infrared (IR) thermography applied in the freeze-drying of gelatin model solutions added with ethanol and carrier agents. <i>Journal of Food Engineering</i> , 2018, 221, 77-87.	2.7	10
26	Fish sausages prepared with inclusion of Nile tilapia minced: Correlation between nutritional, chemical, and physical properties. <i>Journal of Food Processing and Preservation</i> , 2018, 42, .	0.9	7
27	Measurement of water activities of foods at different temperatures using biospeckle laser. <i>Journal of Food Measurement and Characterization</i> , 2018, 12, 2230-2239.	1.6	5
28	Development and application of biopolymer coatings to specialty green coffee beans: Influence on water content, color and sensory quality. <i>LWT - Food Science and Technology</i> , 2018, 96, 274-280.	2.5	15
29	Mixed fruit juices from Cerrado. <i>British Food Journal</i> , 2018, 120, 2334-2348.	1.6	12
30	Influence of the Addition of Minced Fish on the Preparation of Fish Sausage: Effects on Sensory Properties. <i>Journal of Food Science</i> , 2017, 82, 492-499.	1.5	28
31	Ultrasound-assisted emulsions with biopolymers for spray-drying of lemongrass essential oil. <i>Pesquisa Agropecuaria Brasileira</i> , 0, 56, .	0.9	2
32	Maltodextrin- modified starch microparticles containing benzoic acid: Physical properties and thermal stability. <i>Acta Scientiarum - Technology</i> , 0, 44, e56598.	0.4	0
33	Fish breaded made with tilapia fillet and inclusion of minced fish derived from salmon processing: nutritional, technological, and sensory properties. <i>Food Science and Technology</i> , 0, 42, .	0.8	2
