1	PERCEPTIONS OF PARTICIPATION AND PREDICTORS OF PERCEIVED PROBLEMS WITH PARTICIPATION IN PERSONS WITH SPINAL CORD INJURY. Journal of Rehabilitation Medicine, 2005, 37, 3-8.	1.1	100
2	The complexity of participation in daily life: A qualitative study of the experiences of persons with acquired brain injury. Acta Dermato-Venereologica, 2008, 40, 89-95.	1.3	96
3	Perceived participation and problems in participation are determinants of life satisfaction in people with spinal cord injury. Disability and Rehabilitation, 2007, 29, 1417-1422.	1.8	62
4	Impact on participation and autonomy questionnaire: internal scale validity of the Swedish version for use in people with spinal cord injury. Acta Dermato-Venereologica, 2007, 39, 156-162.	1.3	50
5	Difficulties in using everyday technology after acquired brain injury: a qualitative analysis. Scandinavian Journal of Occupational Therapy, 2010, 17, 233-243.	1.7	43
6	Patients' perceptions of their participation in rehabilitation planning and professionals' view of their strategies to encourage it. Occupational Therapy International, 2001, 8, 151-167.	0.7	36
7	Constantly Changing Lives: Experiences of People With Multiple Sclerosis. American Journal of Occupational Therapy, 2009, 63, 772-781.	0.3	36
8	Perceived participation in life situations in persons with late effects of polio. Journal of Rehabilitation Medicine, 2008, 40, 659-664.	1.1	33
9	Relationship between participation in life situations and life satisfaction in persons with late effects of polio. Disability and Rehabilitation, 2009, 31, 1592-1597.	1.8	33
10	Perceived difficulties using everyday technology after acquired brain injury: Influence on activity and participation. Scandinavian Journal of Occupational Therapy, 2010, 17, 267-275.	1.7	30
11	A positive turning point in life - how persons with late effects of polio experience the influence of an interdisciplinary rehabilitation programme. Journal of Rehabilitation Medicine, 2010, 42, 559-565.	1.1	29
12	Using everyday technology to compensate for difficulties in task performance in daily life: experiences in persons with acquired brain injury and their significant others. Disability and Rehabilitation: Assistive Technology, 2011, 6, 402-411.	2.2	26
13	Perceived difficulty in use of everyday technology in persons with acquired brain injury of different severity: A comparison with controls. Journal of Rehabilitation Medicine, 2014, 46, 635-641.	1.1	24
14	The challenges of everyday technology in the workplace for persons with acquired brain injury. Scandinavian Journal of Occupational Therapy, 2013, 20, 272-281.	1.7	23
15	Effects of a social internet-based intervention programme for older adults: An explorative randomised crossover study. British Journal of Occupational Therapy, 2016, 79, 629-636.	0.9	23
16	Internet Based Activities (IBAs): Seniors' Experiences of the Conditions Required for the Performance of and the Influence of these Conditions on their Own Participation in Society. Educational Gerontology, 2013, 39, 155-167.	1.3	22
17	Participation and occupation in occupational therapy models of practice: A discussion of possibilities and challenges. Scandinavian Journal of Occupational Therapy, 2017, 24, 393-397.	1.7	22
18	Occupational challenges in a digital society: A discussion inspiring occupational therapy to cross thresholds and embrace possibilities. Scandinavian Journal of Occupational Therapy, 2020, 27, 550-553.	1.7	22

#	Article	IF	Citations
19	Associations between perceptions of environmental barriers and participation in persons with late effects of polio. Scandinavian Journal of Occupational Therapy, 2009, 16, 194-204.	1.7	21
20	Participation in social internet-based activities: Five seniors' intervention processes. Scandinavian Journal of Occupational Therapy, 2013, 20, 471-480.	1.7	21
21	Influences of the social environment on engagement in occupations: The experience of persons with rheumatoid arthritis. Scandinavian Journal of Occupational Therapy, 2007, 14, 63-72.	1.7	20
22	Perceived occupational balance in people with stroke. Disability and Rehabilitation, 2021, 43, 553-558.	1.8	20
23	Occupational Life in the Home Environment: The Experiences of People with Disabilities. Canadian Journal of Occupational Therapy, 2004, 71, 243-251.	1.3	18
24	Response actions to difficulties in using everyday technology after acquired brain injury. Scandinavian Journal of Occupational Therapy, 2012, 19, 164-175.	1.7	18
25	Participation after acquired brain injury: Associations with everyday technology and activities in daily life. Scandinavian Journal of Occupational Therapy, 2015, 22, 366-376.	1.7	18
26	Perceived difficulty in the use of everyday technology: relationships with everyday functioning in people with acquired brain injury with a special focus on returning to work. Disability and Rehabilitation, 2014, 36, 1618-1625.	1.8	17
27	Ability to manage everyday technology after acquired brain injury. Brain Injury, 2013, 27, 1583-1588.	1.2	16
28	Improvements of task performance in daily life after acquired brain injury using commonly available everyday technology. Disability and Rehabilitation: Assistive Technology, 2011, 6, 214-224.	2.2	15
29	The digital society: Occupational therapists need to act proactively to meet the growing demands of digital competence. British Journal of Occupational Therapy, 2018, 81, 733-735.	0.9	14
30	Everyday activities outside the home are a struggle: Narratives from two persons with acquired brain injury. Scandinavian Journal of Occupational Therapy, 2020, 27, 194-203.	1.7	14
31	Occupational Adaptation in People with Multiple Sclerosis. OTJR Occupation, Participation and Health, 2011, 31, 127-134.	0.8	13
32	The rehabilitation plan can support clientsâ€™ active engagement and facilitate the process of change â€“ experiences from people with late effects of polio participating in a rehabilitation programme. Disability and Rehabilitation, 2016, 38, 329-336.	1.8	13
33	Occupational therapists' experiences of improvement work: a journey towards sustainable evidence-based practice. Scandinavian Journal of Occupational Therapy, 2014, 21, 90-97.	1.7	12
34	Difficulties in using everyday technology after acquired brain injury: a qualitative analysis. Scandinavian Journal of Occupational Therapy, 2010, 17, 1-11.	1.7	12
35	Occupations outside the home: Experiences of people with acquired brain injury. British Journal of Occupational Therapy, 2017, 80, 486-493.	0.9	10
36	Skill clusters of ability to manage everyday technology among people with and without cognitive impairment, dementia and acquired brain injury. Scandinavian Journal of Occupational Therapy, 2018, 25, 99-107.	1.7	10

#	Article	IF	Citations
37	Life Satisfaction in Persons with Late Effects of Polio. Applied Research in Quality of Life, 2011, 6, 71-80.	2.4	9
38	The match between everyday technology in public space and the ability of working-age people with acquired brain injury to use it. British Journal of Occupational Therapy, 2016, 79, 26-34.	0.9	9
39	Interventions aimed at improving the ability to use everyday technology in work after brain injury. Scandinavian Journal of Occupational Therapy, 2016, 23, 147-157.	1.7	9
40	Gender and diagnostic impact on everyday technology use: a differential item functioning (DIF) analysis of the Everyday Technology Use Questionnaire (ETUQ). Disability and Rehabilitation, 2019, 41, 2688-2694.	1.8	9
41	Patterns of participation: Facilitating and hindering aspects related to places for activities outside the home after stroke. Scandinavian Journal of Occupational Therapy, 2020, 27, 204-212.	1.7	9
42	A process for developing sustainable evidence-based occupational therapy practice. Scandinavian Journal of Occupational Therapy, 2014, 21, 429-437.	1.7	8
43	The association between perceived and observed ability to use everyday technology in people of working age with ABI. Scandinavian Journal of Occupational Therapy, 2014, 21, 465-472.	1.7	7
44	Perceived occupational value in people with acquired brain injury. Scandinavian Journal of Occupational Therapy, 2021, 28, 391-398.	1.7	7
45	Self-initiated management approaches in everyday occupations used by people with acquired cognitive impairment. Scandinavian Journal of Occupational Therapy, 2022, 29, 139-151.	1.7	7
46	Places visited for activities outside the home after stroke: Relationship with the severity of disability. British Journal of Occupational Therapy, 2020, 83, 405-412.	0.9	6
47	Return to work in people with acquired brain injury: association with observed ability to use everyday technology. Scandinavian Journal of Occupational Therapy, 2017, 24, 281-289.	1.7	5
48	Optimising the development of sustainable internet-based occupational therapy interventions: Important key actions and perspectives to consider. Scandinavian Journal of Occupational Therapy, 2022, 29, 259-269.	1.7	5
49	Strategies for Empowering activities in Everyday life (SEE 1.0): study protocol for a feasibility study of an Internet-based occupational therapy intervention for people with stroke. Pilot and Feasibility Studies, 2021, 7, 187.	1.2	5
50	Work and everyday life in a digitalized time: Experiences of people with subjective cognitive difficulties related to neurological disorders. PLoS ONE, 2021, 16, e0260013.	2.5	3
51	Stability of person ability measures in people with acquired brain injury in the use of everyday technology: the testâ€“retest reliability of the Management of Everyday Technology Assessment (META). Disability and Rehabilitation: Assistive Technology, 2016, 11, 395-399.	2.2	2
52	Team-based rehabilitation after traumatic brain injury: a qualitative synthesis of evidence of experiences of the rehabilitation process. Journal of Rehabilitation Medicine, 2022, 54, jrm00253.	1.1	2
53	Accessing public space in the digital society: relationship between the use of everyday technology and places visited outside the home after acquired brain injury. Disability and Rehabilitation, 2022, 44, 7059-7068.	1.8	1
54	Associations between perceptions of environmental barriers and participation in persons with late effects of polio. Scandinavian Journal of Occupational Therapy, 0, , 1-11.	1.7	1
