#	ARTICLE	IF	CITATIONS
1	Stable carbon and nitrogen isotope values of bone and teeth reflect weaning age at the Medieval Wharram Percy site, Yorkshire, UK. <i>American Journal of Physical Anthropology</i> , 2002, 119, 205-210.	2.1	265
2	The Archaeology of Human Bones. , 0, , .		160
3	Dry-bone manifestations of rickets in infancy and early childhood. <i>International Journal of Osteoarchaeology</i> , 1998, 8, 45-55.	1.2	137
4	The Archaeology of Human Bones. , 0, , .		131
5	Skeletal manifestations of rickets in infants and young children in a historic population from England. <i>American Journal of Physical Anthropology</i> , 2006, 129, 362-374.	2.1	117
6	Age-dependent cortical bone loss in women from 18th and early 19th Century London. <i>American Journal of Physical Anthropology</i> , 2000, 112, 349-361.	2.1	93
7	Oxygen isotope analysis of human bone phosphate evidences weaning age in archaeological populations. <i>American Journal of Physical Anthropology</i> , 2015, 157, 226-241.	2.1	77
8	Spondylolysis, spondylolisthesis, and lumbo-sacral morphology in a medieval English skeletal population. <i>American Journal of Physical Anthropology</i> , 2006, 131, 352-362.	2.1	66
9	An investigation of skeletal indicators of vitamin D deficiency in adults: Effective markers for interpreting past living conditions and pollution levels in 18th and 19th century Birmingham, England. <i>American Journal of Physical Anthropology</i> , 2007, 132, 67-79.	2.1	65
10	Skeletal manifestations of vitamin D deficiency osteomalacia in documented historical collections. <i>International Journal of Osteoarchaeology</i> , 2005, 15, 389-403.	1.2	64
11	The Relationship Between Molar Wear and Age in an Early 19th Century AD Archaeological Human Skeletal Series of Documented Age at Death. <i>Journal of Archaeological Science</i> , 2002, 29, 861-871.	2.4	63
12	Child Bioarchaeology: Perspectives on the Past 10 Years. <i>Childhood in the Past</i> , 2017, 10, 38-56.	0.4	62
13	The effect of factors other than age upon skeletal age indicators in the adult. <i>Annals of Human Biology</i> , 2015, 42, 332-341.	1.0	54
14	Effects of age and occupation on cortical bone in a group of 18th-19th century British men. <i>American Journal of Physical Anthropology</i> , 2001, 116, 34-44.	2.1	53
15	How should we diagnose disease in palaeopathology? Some epistemological considerations. <i>International Journal of Paleopathology</i> , 2018, 20, 12-19.	1.4	51
16	Latitude, urbanization, age, and sex as risk factors for vitamin D deficiency disease in the Roman Empire. <i>American Journal of Physical Anthropology</i> , 2018, 167, 484-496.	2.1	40
17	Growth and vitamin D deficiency in a population from 19 th century Birmingham, England. <i>International Journal of Osteoarchaeology</i> , 2009, 19, 406-415.	1.2	31
18	The palaeopathology of scurvy in Europe. <i>International Journal of Paleopathology</i> , 2014, 5, 55-62.	1.4	30

#	ARTICLE	IF	CITATIONS
19	Estimation of stature in archaeological human skeletal remains from Britain. <i>American Journal of Physical Anthropology</i> , 2016, 161, 646-655.	2.1	30
20	Analysis of patterning in the occurrence of skeletal lesions used as indicators of vitamin D deficiency in subadult and adult skeletal remains. <i>International Journal of Paleopathology</i> , 2018, 23, 43-53.	1.4	29
21	Vitamin D deficiency in bioarchaeology and beyond: The study of rickets and osteomalacia in the past. <i>International Journal of Paleopathology</i> , 2018, 23, 1-5.	1.4	26
22	Skeletal evidence for hyperparathyroidism in a 19th century child with rickets. <i>International Journal of Osteoarchaeology</i> , 2007, 17, 73-81.	1.2	25
23	An investigation of age-related changes at the acetabulum in 18th-19th century adult skeletons from Christ Church Spitalfields, London. <i>American Journal of Physical Anthropology</i> , 2012, 149, 485-492.	2.1	25
24	Bone formers and bone losers in an archaeological population. <i>American Journal of Physical Anthropology</i> , 2016, 159, 577-584.	2.1	23
25	A Test of a Recently Devised Method of Estimating Skeletal Age at Death using Features of the Adult Acetabulum. <i>Journal of Forensic Sciences</i> , 2014, 59, 184-187.	1.6	21
26	The Effects of Infant Feeding Practices on Infant and Maternal Health in a Medieval Community. <i>Childhood in the Past</i> , 2010, 3, 63-78.	0.4	19
27	Scurvy as a factor in the loss of the 1845 Franklin expedition to the Arctic: a reconsideration. <i>International Journal of Osteoarchaeology</i> , 2015, 25, 334-344.	1.2	18
28	Lumbar vertebral morphology and isthmic spondylolysis in a British medieval population. <i>American Journal of Physical Anthropology</i> , 2010, 141, 273-280.	2.1	16
29	The Early Field Systems of the Stonehenge Landscape. <i>Landscapes (United Kingdom)</i> , 2017, 18, 120-140.	0.4	14
30	Evidence for End-stage Cannibalism on Sir John Franklin's Last Expedition to the Arctic, 1845. <i>International Journal of Osteoarchaeology</i> , 2016, 26, 778-786.	1.2	13
31	Lives before and after Stonehenge: An osteobiographical study of four prehistoric burials recently excavated from the Stonehenge World Heritage Site. <i>Journal of Archaeological Science: Reports</i> , 2018, 20, 692-710.	0.5	12
32	The epidemiology of rickets in the 17th-19th centuries: Some contributions from documentary sources and their value to palaeopathologists. <i>International Journal of Paleopathology</i> , 2018, 23, 88-95.	1.4	12
33	Resorption of mandibular alveolar bone following loss of molar teeth and its relationship to age at death in a human skeletal population. <i>American Journal of Physical Anthropology</i> , 2014, 153, 643-652.	2.1	11
34	A Study of the Potential of Deciduous Incisor Wear as an Indicator of Weaning Using a Human Skeletal Population. <i>International Journal of Osteoarchaeology</i> , 2016, 26, 725-731.	1.2	11
35	The Prevalence and Health Implications of <i>Concha Bullosa</i> in a Population from Mediaeval England. <i>International Journal of Osteoarchaeology</i> , 2014, 24, 614-622.	1.2	10
36	Mandibular morphology in two archaeological human skeletal samples from northwest Europe with different masticatory regimes. <i>HOMO- Journal of Comparative Human Biology</i> , 2015, 66, 203-215.	0.7	9

#	ARTICLE	IF	CITATIONS
37	Vitamin D deficiency and the ancient city: Skeletal evidence across the life course from the Roman period site of Isola Sacra, Italy. <i>Journal of Anthropological Archaeology</i> , 2019, 55, 101069.	1.6	9
38	Effects of age and body proportions on stature estimation. <i>American Journal of Physical Anthropology</i> , 2019, 168, 370-377.	2.1	8
39	Is dietary deficiency of calcium a factor in rickets? Use of current evidence for our understanding of the disease in the past. <i>International Journal of Paleopathology</i> , 2022, 36, 36-44.	1.4	8
40	An Unusual Erosive Arthropathy from Medieval England. <i>International Journal of Osteoarchaeology</i> , 2017, 27, 693-699.	1.2	7
41	A multidisciplinary study of a burnt and mutilated assemblage of human remains from a deserted Mediaeval village in England. <i>Journal of Archaeological Science: Reports</i> , 2017, 16, 441-455.	0.5	6
42	Middle Neolithic pits and a burial at West Amesbury, Wiltshire. <i>Archaeological Journal</i> , 2020, 177, 167-213.	0.6	6
43	Quantifying cortical bone in fragmentary archeological second metacarpals. <i>American Journal of Physical Anthropology</i> , 2021, 174, 812-821.	2.1	6
44	Age-Associated Reduction in Cortical Bone in Males, Trends from the Third Century AD to the Present Day. <i>Calcified Tissue International</i> , 2015, 96, 370-371.	3.1	5
45	A Case of Early Childhood Caries from Late Roman Ancaster, England. <i>International Journal of Osteoarchaeology</i> , 2016, 26, 555-560.	1.2	5
46	A test of a skeletal ageing method based on resorption of the alveolar crest following tooth loss using a skeletal population of documented age at death. <i>American Journal of Physical Anthropology</i> , 2017, 163, 242-251.	2.1	4
47	Bilateral scapular fracture in a likely case of assault from Mediaeval Ipswich, England. <i>International Journal of Paleopathology</i> , 2015, 10, 13-15.	1.4	3
48	The Ghostly Child in Medieval North-west Europe. <i>Childhood in the Past</i> , 2016, 9, 109-119.	0.4	3
49	A new approach to recording nasal fracture in skeletonized individuals. <i>International Journal of Paleopathology</i> , 2020, 30, 105-109.	1.4	2
50	Microcomputed tomography (laboratory and synchrotron) of intact archeological human second metacarpal bones and age at death. <i>International Journal of Osteoarchaeology</i> , 0, , .	1.2	1
51	Intact archeological human bones and age at death studied with transmission x-ray diffraction and small angle x-ray scattering. <i>International Journal of Osteoarchaeology</i> , 0, , .	1.2	1
