citing authors

#	ARTICLE	IF	CITATIONS
1	A healthy dietary pattern with a low inflammatory potential reduces the risk of gestational diabetes mellitus. <i>European Journal of Nutrition</i> , 2022, 61, 1477-1490.	3.9	16
2	Serum CathepsinD in pregnancy: Relation with metabolic and inflammatory markers and effects of fish oils and probiotics. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2022, , .	2.6	0
3	Iodine status in pregnant women and infants in Finland. <i>European Journal of Nutrition</i> , 2022, 61, 2919-2927.	3.9	8
4	Distinct Diet-Microbiota-Metabolism Interactions in Overweight and Obese Pregnant Women: a Metagenomics Approach. <i>Microbiology Spectrum</i> , 2022, , e0089321.	3.0	3
5	Potential pathobionts in vaginal microbiota are affected by fish oil and/or probiotics intervention in overweight and obese pregnant women. <i>Biomedicine and Pharmacotherapy</i> , 2022, 149, 112841.	5.6	9
6	Metagenomics analysis of gut microbiota in response to diet intervention and gestational diabetes in overweight and obese women: a randomised, double-blind, placebo-controlled clinical trial. <i>Gut</i> , 2021, 70, gutjnl-2020-321643.	12.1	37
7	Weight gain and body composition during pregnancy: a randomised pilot trial with probiotics and/or fish oil. <i>British Journal of Nutrition</i> , 2021, 126, 541-551.	2.3	6
8	Impact of combined consumption of fish oil and probiotics on the serum metabolome in pregnant women with overweight or obesity. <i>EBioMedicine</i> , 2021, 73, 103655.	6.1	11
9	The Impacts of Fish Oil and/or Probiotic Intervention on Low-Grade Inflammation, IGFBP-1 and MMP-8 in Pregnancy: A Randomized, Placebo-Controlled, Double-Blind Clinical Trial. <i>Biomolecules</i> , 2021, 11, 5.	4.0	7
10	Interactions of dietary fat with the gut microbiota: Evaluation of mechanisms and metabolic consequences. <i>Clinical Nutrition</i> , 2020, 39, 994-1018.	5.0	61
11	Distinct Metabolic Profile in Early Pregnancy of Overweight and Obese Women Developing Gestational Diabetes. <i>Journal of Nutrition</i> , 2020, 150, 31-37.	2.9	41
12	Early pregnancy serum IGFBP-1 relates to lipid profile in overweight and obese women. <i>Heliyon</i> , 2020, 6, e04788.	3.2	5
13	Distinct Metabolomic Profile Because of Gestational Diabetes and its Treatment Mode in Women with Overweight and Obesity. <i>Obesity</i> , 2020, 28, 1637-1644.	3.0	9
14	A carbohydrate-active enzyme (CAZy) profile links successful metabolic specialization of <i>Prevotella</i> to its abundance in gut microbiota. <i>Scientific Reports</i> , 2020, 10, 12411.	3.3	22
15	GlycA, a novel marker for low grade inflammation, reflects gut microbiome diversity and is more accurate than high sensitive CRP in reflecting metabolomic profile. <i>Metabolomics</i> , 2020, 16, 76.	3.0	23
16	Body composition measurement by air displacement plethysmography in pregnancy: Comparison of predicted versus measured thoracic gas volume. <i>Nutrition</i> , 2019, 60, 227-229.	2.4	5
17	Overall Dietary Quality Relates to Gut Microbiota Diversity and Abundance. <i>International Journal of Molecular Sciences</i> , 2019, 20, 1835.	4.1	61
18	Efficacy of Fish Oil and/or Probiotic Intervention on the Incidence of Gestational Diabetes Mellitus in an At-Risk Group of Overweight and Obese Women: A Randomized, Placebo-Controlled, Double-Blind Clinical Trial. <i>Diabetes Care</i> , 2019, 42, 1009-1017.	8.6	94

#	ARTICLE	IF	CITATIONS
19	Dietary quality influences body composition in overweight and obese pregnant women. <i>Clinical Nutrition</i> , 2019, 38, 1613-1619.	5.0	4
20	Overweight and obesity status in pregnant women are related to intestinal microbiota and serum metabolic and inflammatory profiles. <i>Clinical Nutrition</i> , 2018, 37, 1955-1966.	5.0	32
21	Increased intestinal permeability, measured by serum zonulin, is associated with metabolic risk markers in overweight pregnant women. <i>Metabolism: Clinical and Experimental</i> , 2017, 69, 43-50.	3.4	52
22	Gut microbiota aberrations precede diagnosis of gestational diabetes mellitus. <i>Acta Diabetologica</i> , 2017, 54, 1147-1149.	2.5	73
23	Dietary intake of fat and fibre according to reference values relates to higher gut microbiota richness in overweight pregnant women. <i>British Journal of Nutrition</i> , 2017, 118, 343-352.	2.3	93
24	Gut Microbiota Richness and Composition and Dietary Intake of Overweight Pregnant Women Are Related to Serum Zonulin Concentration, a Marker for Intestinal Permeability. <i>Journal of Nutrition</i> , 2016, 146, 1694-1700.	2.9	105
25	<i>Bifidobacterium lactis</i> 420 and fish oil enhance intestinal epithelial integrity in Caco-2 cells. <i>Nutrition Research</i> , 2016, 36, 246-252.	2.9	27
