#	ARTICLE	IF	CITATIONS
1	Anterior Cingulate Conflict Monitoring and Adjustments in Control. <i>Science</i> , 2004, 303, 1023-1026.	6.0	2,533
2	Decreased Conflict- and Error-Related Activity in the Anterior Cingulate Cortex in Subjects With Schizophrenia. <i>American Journal of Psychiatry</i> , 2005, 162, 1833-1839.	4.0	307
3	Specificity of Prefrontal Dysfunction and Context Processing Deficits to Schizophrenia in Never-Medicated Patients With First-Episode Psychosis. <i>American Journal of Psychiatry</i> , 2005, 162, 475-484.	4.0	301
4	Anterior cingulate and prefrontal cortex activity in an fMRI study of trial-to-trial adjustments on the Simon task. <i>NeuroImage</i> , 2006, 33, 399-405.	2.1	261
5	Cognitive impairments associated with formal thought disorder in people with schizophrenia.. <i>Journal of Abnormal Psychology</i> , 2002, 111, 211-224.	2.0	195
6	Schizotypy facets, cognitive control, and emotion.. <i>Journal of Abnormal Psychology</i> , 2006, 115, 418-427.	2.0	141
7	BRIEF REPORT. <i>Cognition and Emotion</i> , 2003, 17, 671-679.	1.2	137
8	Executive Functioning Component Mechanisms and Schizophrenia. <i>Biological Psychiatry</i> , 2008, 64, 26-33.	0.7	137
9	Positive Schizotypy and Emotion Processing.. <i>Journal of Abnormal Psychology</i> , 2005, 114, 392-401.	2.0	116
10	The Aberrant Salience Inventory: A new measure of psychosis proneness.. <i>Psychological Assessment</i> , 2010, 22, 688-701.	1.2	107
11	The influence of positive mood on different aspects of cognitive control. <i>Cognition and Emotion</i> , 2011, 25, 265-279.	1.2	94
12	Prefrontal Cortex Guides Context-Appropriate Responding during Language Production. <i>Neuron</i> , 2004, 43, 283-291.	3.8	68
13	Communication disturbances, working memory, and emotion in people with elevated disorganized schizotypy. <i>Schizophrenia Research</i> , 2008, 100, 172-180.	1.1	63
14	Cognitive impairments associated with formal thought disorder in people with schizophrenia. <i>Journal of Abnormal Psychology</i> , 2002, 111, 211-24.	2.0	54
15	Social and physical anhedonia and valence and arousal aspects of emotional experience.. <i>Journal of Abnormal Psychology</i> , 2008, 117, 735-746.	2.0	52
16	Aberrant semantic and affective processing in people at risk for psychosis.. <i>Journal of Abnormal Psychology</i> , 2000, 109, 728-732.	2.0	51
17	Prefrontal Dysfunction in First-Degree Relatives of Schizophrenia Patients during a Stroop Task. <i>Neuropsychopharmacology</i> , 2008, 33, 2619-2625.	2.8	51
18	Correspondence between psychometric and clinical high risk for psychosis in an undergraduate population.. <i>Psychological Assessment</i> , 2014, 26, 901-915.	1.2	51

#	ARTICLE	IF	CITATIONS
19	The relationship between formal thought disorder and executive functioning component processes.. Journal of Abnormal Psychology, 2003, 112, 339-352.	2.0	48
20	Word production in schizophrenia and its relationship to positive symptoms. Psychiatry Research, 1999, 87, 29-37.	1.7	47
21	Differential associations between schizotypy facets and emotion traits. Psychiatry Research, 2011, 187, 94-99.	1.7	45
22	Multidimensional Factor Structure of Positive Schizotypy. Journal of Personality Disorders, 2010, 24, 327-343.	0.8	42
23	The role of aberrant salience and self-concept clarity in psychotic-like experiences.. Personality Disorders: Theory, Research, and Treatment, 2013, 4, 33-42.	1.0	42
24	Alogia and formal thought disorder: Differential patterns of verbal fluency task performance. Journal of Psychiatric Research, 2011, 45, 1352-1357.	1.5	36
25	Aberrant Salience, Self-Concept Clarity, and Interview-Rated Psychotic-Like Experiences. Journal of Personality Disorders, 2015, 29, 79-99.	0.8	33
26	Cognitive correlates of schizophrenia signs and symptoms: I. verbal communication disturbances. Psychiatry Research, 2008, 159, 147-156.	1.7	32
27	Reinforcement learning deficits in people with schizophrenia persist after extended trials. Psychiatry Research, 2014, 220, 760-764.	1.7	28
28	Verbal communication impairments and cognitive control components in people with schizophrenia.. Journal of Abnormal Psychology, 2007, 116, 279-289.	2.0	26
29	Can Disorganized and Positive Schizotypy Be Discriminated From Dissociation?. Journal of Personality, 2010, 78, 1239-1270.	1.8	26
30	Social anhedonia, but not positive schizotypy, is associated with poor affective control.. Personality Disorders: Theory, Research, and Treatment, 2012, 3, 263-272.	1.0	25
31	Cognitive control components and speech symptoms in people with schizophrenia. Psychiatry Research, 2012, 196, 20-26.	1.7	25
32	Anomalous experiences, peculiarity, and psychopathology.. , 0, , 25-46.		25
33	Examining associations between psychosis risk, social anhedonia, and performance of striatum-related behavioral tasks.. Journal of Abnormal Psychology, 2015, 124, 507-518.	2.0	24
34	Cognitive correlates of schizophrenia signs and symptoms: III. Hallucinations and delusions. Psychiatry Research, 2008, 159, 163-166.	1.7	23
35	Psychosis risk is associated with decreased resting-state functional connectivity between the striatum and the default mode network. Cognitive, Affective and Behavioral Neuroscience, 2019, 19, 998-1011.	1.0	22
36	Social Anhedonia Is Not Just Extreme Introversion: Empirical Evidence of Distinct Constructs. Journal of Personality Disorders, 2016, 30, 451-468.	0.8	21

#	ARTICLE	IF	CITATIONS
37	Social anhedonia associated with poor evaluative processing but not with poor cognitive control. <i>Psychiatry Research</i> , 2010, 178, 419-424.	1.7	20
38	Social networking profile correlates of schizotypy. <i>Psychiatry Research</i> , 2012, 200, 641-646.	1.7	20
39	Examination of affective and cognitive interference in schizophrenia and relation to symptoms.. <i>Journal of Abnormal Psychology</i> , 2013, 122, 733-744.	2.0	20
40	Unpleasant and pleasant referential thinking: Relations with self-processing, paranoia, and other schizotypal traits. <i>Journal of Research in Personality</i> , 2011, 45, 208-218.	0.9	18
41	Evidence for the Discriminant Validity of the Revised Social Anhedonia Scale From Social Anxiety. <i>Assessment</i> , 2016, 23, 544-556.	1.9	18
42	An electrophysiological investigation of emotional abnormalities in groups at risk for schizophrenia-spectrum personality disorders. <i>Biological Psychology</i> , 2017, 124, 119-132.	1.1	18
43	The subjective-objective deficit paradox in schizotypy extends to emotion regulation and awareness. <i>Journal of Psychiatric Research</i> , 2019, 111, 160-168.	1.5	17
44	Probabilistic Category Learning and Striatal Functional Activation in Psychosis Risk. <i>Schizophrenia Bulletin</i> , 2019, 45, 396-404.	2.3	16
45	Emotional word usage in groups at risk for schizophrenia-spectrum disorders: An objective investigation of attention to emotion. <i>Psychiatry Research</i> , 2017, 252, 29-37.	1.7	14
46	Self-reported affective traits and current affective experiences of biological relatives of people with schizophrenia. <i>Schizophrenia Research</i> , 2015, 161, 340-344.	1.1	13
47	Evidence that communication impairment in schizophrenia is associated with generalized poor task performance. <i>Psychiatry Research</i> , 2017, 249, 172-179.	1.7	13
48	Affective processing in overwhelmed individuals: Strategic and task considerations. <i>Cognition and Emotion</i> , 2010, 24, 638-660.	1.2	11
49	Further examination of ambivalence in relation to the schizophrenia spectrum. <i>Schizophrenia Research</i> , 2014, 158, 261-263.	1.1	10
50	Daily-life affective instability in emotional distress disorders is associated with function and structure of posterior parietal cortex. <i>Psychiatry Research - Neuroimaging</i> , 2020, 296, 111028.	0.9	10
51	Experimental manipulation of cognitive control processes causes an increase in communication disturbances in healthy volunteers. <i>Psychological Medicine</i> , 2007, 37, 995-1004.	2.7	9
52	Distinct conflict resolution deficits related to different facets of Schizophrenia. <i>Psychological Research</i> , 2009, 73, 786-793.	1.0	8
53	An Experimental Examination of the Aberrant Salience Hypothesis Using a Salience Manipulation and a Behavioral Magical Thinking Task. <i>Journal of Experimental Psychopathology</i> , 2015, 6, 297-312.	0.4	7
54	Associations between Electrophysiological Evidence of Reward and Punishment-Based Learning and Psychotic Experiences and Social Anhedonia in At-Risk Groups. <i>Neuropsychopharmacology</i> , 2017, 42, 925-932.	2.8	7

#	ARTICLE	IF	CITATIONS
55	Prospective Study Examining the Effects of Extreme Drinking on Brain Structure in Emerging Adults. <i>Alcoholism: Clinical and Experimental Research</i> , 2020, 44, 2200-2211.	1.4	7
56	Positive schizotypy, maladaptive openness, and openness facets.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2021, 12, 51-58.	1.0	6
57	Self-reported Ambivalence in Schizophrenia and Associations With Negative Mood. <i>Journal of Nervous and Mental Disease</i> , 2014, 202, 70-73.	0.5	5
58	Daily-Life Negative Affect in Emotional Distress Disorders Associated with Altered Frontoinsular Emotion Regulation Activation and Cortical Gyrfication. <i>Cognitive Therapy and Research</i> , 2021, 45, 1-18.	1.2	5
59	Functional connectivity between the ventral anterior cingulate and amygdala during implicit emotional conflict regulation and daily-life emotion dysregulation. <i>Neuropsychologia</i> , 2021, 158, 107905.	0.7	5
60	Twenty-first birthday drinking: Extreme-drinking episodes and white matter microstructural changes in the fornix and corpus callosum.. <i>Experimental and Clinical Psychopharmacology</i> , 2020, 28, 553-566.	1.3	5
61	Can Structural Neuroimaging be Used to Define Phenotypes and Course of Schizophrenia?. <i>Psychiatric Clinics of North America</i> , 2012, 35, 633-644.	0.7	4
62	Differentiating positive schizotypy and mania risk scales and their associations with spontaneous eye blink rate. <i>Psychiatry Research</i> , 2018, 264, 58-66.	1.7	4
63	Alcohol use in young adults associated with cortical gyrfication. <i>Drug and Alcohol Dependence</i> , 2020, 209, 107925.	1.6	4
64	Striatum-related functional activation during reward- versus punishment-based learning in psychosis risk. <i>Neuropsychopharmacology</i> , 2019, 44, 1967-1974.	2.8	3
65	Explicit and Implicit Affect and Judgment in Schizotypy. <i>Frontiers in Psychology</i> , 2019, 10, 1491.	1.1	3
66	Psychosis risk is associated with decreased white matter integrity in limbic network corticostriatal tracts. <i>Psychiatry Research - Neuroimaging</i> , 2020, 301, 111089.	0.9	3
67	Alcohol use in emerging adults associated with lower rich-club connectivity and greater connectome network disorganization. <i>Drug and Alcohol Dependence</i> , 2022, 230, 109198.	1.6	3
68	Examining associations between two different jumping to conclusions scores with positive schizotypy and recent distress. <i>Cognitive Neuropsychiatry</i> , 2020, 25, 45-56.	0.7	2
69	Cluster A Personality Disorders. , 2020, , 195-211.		2
70	Associations between long-term psychosis risk, probabilistic category learning, and attenuated psychotic symptoms with cortical surface morphometry. <i>Brain Imaging and Behavior</i> , 2022, 16, 91-106.	1.1	2
