

# Theodoros Dimitroulas

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/2568962/theodoros-dimitroulas-publications-by-citations.pdf>

**Version:** 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

138  
papers

| #   | Paper                                                                                                                                                                                                                                                        | IF   | Citations |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 138 | Neuropathic pain in osteoarthritis: a review of pathophysiological mechanisms and implications for treatment. <i>Seminars in Arthritis and Rheumatism</i> , <b>2014</b> , 44, 145-54                                                                         | 5.3  | 108       |
| 137 | Individualised exercise improves endothelial function in patients with rheumatoid arthritis. <i>Annals of the Rheumatic Diseases</i> , <b>2014</b> , 73, 748-51                                                                                              | 2.4  | 80        |
| 136 | Cardiovascular magnetic resonance in rheumatology: Current status and recommendations for use. <i>International Journal of Cardiology</i> , <b>2016</b> , 217, 135-48                                                                                        | 3.2  | 76        |
| 135 | The role of multimodality imaging in the evaluation of Takayasu arteritis. <i>Seminars in Arthritis and Rheumatism</i> , <b>2013</b> , 42, 401-12                                                                                                            | 5.3  | 64        |
| 134 | Biologic therapies and systemic bone loss in rheumatoid arthritis. <i>Autoimmunity Reviews</i> , <b>2013</b> , 12, 958-66                                                                                                                                    | 6.6  | 64        |
| 133 | Inflammatory bowel diseases and spondyloarthropathies: From pathogenesis to treatment. <i>World Journal of Gastroenterology</i> , <b>2019</b> , 25, 2162-2176                                                                                                | 5.6  | 58        |
| 132 | N-terminal pro-brain natriuretic peptide levels are elevated in patients with acute ischemic stroke. <i>Angiology</i> , <b>2005</b> , 56, 723-30                                                                                                             | 2.1  | 48        |
| 131 | Cardiovascular risk in rheumatoid arthritis: assessment, management and next steps. <i>Therapeutic Advances in Musculoskeletal Disease</i> , <b>2016</b> , 8, 86-101                                                                                         | 3.8  | 40        |
| 130 | Early detection of cardiac involvement in systemic sclerosis assessed by tissue-Doppler echocardiography: relationship with neurohormonal activation and endothelial dysfunction. <i>Journal of Rheumatology</i> , <b>2010</b> , 37, 993-9                   | 4.1  | 40        |
| 129 | Symptom-based stratification of patients with primary Sjögren's syndrome: multi-dimensional characterisation of international observational cohorts and reanalyses of randomised clinical trials. <i>Lancet Rheumatology, The</i> , <b>2019</b> , 1, e85-e94 | 14.2 | 38        |
| 128 | Endothelial injury in rheumatoid arthritis: a crosstalk between dimethylarginines and systemic inflammation. <i>Arthritis Research and Therapy</i> , <b>2017</b> , 19, 32                                                                                    | 5.7  | 37        |
| 127 | Asymmetrical dimethylarginine in systemic sclerosis-related pulmonary arterial hypertension. <i>Rheumatology</i> , <b>2008</b> , 47, 1682-5                                                                                                                  | 3.9  | 37        |
| 126 | Cardiovascular magnetic resonance imaging pattern at the time of diagnosis of treatment naïve patients with connective tissue diseases. <i>International Journal of Cardiology</i> , <b>2017</b> , 236, 151-156                                              | 3.2  | 34        |
| 125 | Significance of serum uric acid in pulmonary hypertension due to systemic sclerosis: a pilot study. <i>Rheumatology International</i> , <b>2011</b> , 31, 263-7                                                                                              | 3.6  | 32        |
| 124 | The Role of Statins in Disease Modification and Cardiovascular Risk in Rheumatoid Arthritis. <i>Frontiers in Medicine</i> , <b>2018</b> , 5, 24                                                                                                              | 4.9  | 30        |
| 123 | Asymmetric dimethylarginine as a surrogate marker of endothelial dysfunction and cardiovascular risk in patients with systemic rheumatic diseases. <i>International Journal of Molecular Sciences</i> , <b>2012</b> , 13, 12315-35                           | 6.3  | 27        |
| 122 | The role of nailfold capillaroscopy in the assessment of internal organ involvement in systemic sclerosis: A critical review. <i>Autoimmunity Reviews</i> , <b>2017</b> , 16, 787-795                                                                        | 13.6 | 26        |

|     |                                                                                                                                                                                                                                                            |      |    |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----|
| 121 | A critical view on cardiovascular risk in systemic sclerosis. <i>Rheumatology International</i> , <b>2017</b> , 37, 85-95                                                                                                                                  | 3.6  | 26 |
| 120 | Imaging modalities for the diagnosis of pulmonary hypertension in systemic sclerosis. <i>Nature Reviews Rheumatology</i> , <b>2012</b> , 8, 203-13                                                                                                         | 8.1  | 26 |
| 119 | Left atrial volume and N-terminal pro-B type natriuretic peptide are associated with elevated pulmonary artery pressure in patients with systemic sclerosis. <i>Clinical Rheumatology</i> , <b>2010</b> , 29, 957-64                                       | 3.9  | 26 |
| 118 | Micro- and macrovascular treatment targets in scleroderma heart disease. <i>Current Pharmaceutical Design</i> , <b>2014</b> , 20, 536-44                                                                                                                   | 3.3  | 26 |
| 117 | Cumulative inflammation associates with asymmetric dimethylarginine in rheumatoid arthritis: a 6 year follow-up study. <i>Rheumatology</i> , <b>2015</b> , 54, 1145-52                                                                                     | 3.9  | 25 |
| 116 | Multimodality imaging and the emerging role of cardiac magnetic resonance in autoimmune myocarditis. <i>Autoimmunity Reviews</i> , <b>2012</b> , 12, 305-12                                                                                                | 13.6 | 25 |
| 115 | Lack of association between asymmetric dimethylarginine and in vivo microvascular and macrovascular endothelial function in patients with rheumatoid arthritis. <i>Clinical and Experimental Rheumatology</i> , <b>2012</b> , 30, 388-96                   | 2.2  | 25 |
| 114 | Heart involvement in rheumatoid arthritis: multimodality imaging and the emerging role of cardiac magnetic resonance. <i>Seminars in Arthritis and Rheumatism</i> , <b>2013</b> , 43, 314-24                                                               | 5.3  | 23 |
| 113 | Effects of renin-angiotensin system inhibition on left atrial function of hypertensive patients: an echocardiographic tissue deformation imaging study. <i>American Journal of Hypertension</i> , <b>2010</b> , 23, 556-61                                 | 2.3  | 23 |
| 112 | Clinical remission following treatment with tumour necrosis factor-alpha antagonists is not accompanied by changes in asymmetric dimethylarginine in patients with rheumatoid arthritis. <i>Clinical Biochemistry</i> , <b>2012</b> , 45, 1399-403         | 3.5  | 22 |
| 111 | Cardiac and muscular involvement in idiopathic inflammatory myopathies: noninvasive diagnostic assessment and the role of cardiovascular and skeletal magnetic resonance imaging. <i>Inflammation and Allergy: Drug Targets</i> , <b>2014</b> , 13, 206-16 |      | 20 |
| 110 | Complementary role of cardiovascular imaging and laboratory indices in early detection of cardiovascular disease in systemic lupus erythematosus. <i>Lupus</i> , <b>2017</b> , 26, 227-236                                                                 | 2.6  | 19 |
| 109 | Natriuretic peptides in systemic sclerosis-related pulmonary arterial hypertension. <i>Seminars in Arthritis and Rheumatism</i> , <b>2010</b> , 39, 278-84                                                                                                 | 5.3  | 18 |
| 108 | Neurohormonal activation in patients with systemic sclerosis-related pulmonary arterial hypertension. <i>International Journal of Cardiology</i> , <b>2007</b> , 121, 135-7                                                                                | 3.2  | 18 |
| 107 | Osteoarthritis pain has a significant neuropathic component: an exploratory in vivo patient model. <i>Rheumatology International</i> , <b>2014</b> , 34, 315-20                                                                                            | 3.6  | 17 |
| 106 | N-terminal probrain natriuretic peptide as a biochemical marker in the evaluation of bosentan treatment in systemic-sclerosis-related pulmonary arterial hypertension. <i>Clinical Rheumatology</i> , <b>2008</b> , 27, 655-8                              | 3.9  | 17 |
| 105 | Biologic drugs as analgesics for the management of osteoarthritis. <i>Seminars in Arthritis and Rheumatism</i> , <b>2017</b> , 46, 687-691                                                                                                                 | 5.3  | 16 |
| 104 | Novel insights into the role of inflammasomes in autoimmune and metabolic rheumatic diseases. <i>Rheumatology International</i> , <b>2018</b> , 38, 1345-1354                                                                                              | 3.6  | 16 |

|     |                                                                                                                                                                                                                                                   |     |    |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| 103 | Predictors of asymmetric dimethylarginine levels in patients with rheumatoid arthritis: the role of insulin resistance. <i>Scandinavian Journal of Rheumatology</i> , <b>2013</b> , 42, 176-81                                                    | 1.9 | 16 |
| 102 | Cardiac magnetic resonance predicts ventricular arrhythmias in scleroderma: the Scleroderma Arrhythmia Clinical Utility Study (SAnCtUS). <i>Rheumatology</i> , <b>2020</b> , 59, 1938-1948                                                        | 3.9 | 16 |
| 101 | Prevalence of comorbidities in systemic sclerosis versus rheumatoid arthritis: a comparative, multicenter, matched-cohort study. <i>Arthritis Research and Therapy</i> , <b>2018</b> , 20, 267                                                    | 5.7 | 16 |
| 100 | Can cardiovascular magnetic resonance prompt early cardiovascular/rheumatic treatment in autoimmune rheumatic diseases? Current practice and future perspectives. <i>Rheumatology International</i> , <b>2018</b> , 38, 949-958                   | 3.6 | 15 |
| 99  | Derangement of hemostasis in rheumatoid arthritis: association with demographic, inflammatory and metabolic factors. <i>Clinical Rheumatology</i> , <b>2013</b> , 32, 1357-64                                                                     | 3.9 | 14 |
| 98  | Predictors and long-term outcome in Greek adults with juvenile idiopathic arthritis: a 17-year continuous follow-up study. <i>Rheumatology</i> , <b>2017</b> , 56, 1928-1938                                                                      | 3.9 | 14 |
| 97  | Rheumatoid arthritis: an autoimmune disease with female preponderance and cardiovascular risk equivalent to diabetes mellitus: role of cardiovascular magnetic resonance. <i>Inflammation and Allergy: Drug Targets</i> , <b>2014</b> , 13, 81-93 |     | 14 |
| 96  | Cardiovascular Magnetic Resonance Identifies High-Risk Systemic Sclerosis Patients with Normal Echocardiograms and Provides Incremental Prognostic Value. <i>Diagnostics</i> , <b>2019</b> , 9,                                                   | 3.8 | 14 |
| 95  | Platelets in Systemic Sclerosis: the Missing Link Connecting Vasculopathy, Autoimmunity, and Fibrosis?. <i>Current Rheumatology Reports</i> , <b>2019</b> , 21, 15                                                                                | 4.9 | 13 |
| 94  | Cardiac Tissue Characterization and Imaging in Autoimmune Rheumatic Diseases. <i>JACC: Cardiovascular Imaging</i> , <b>2017</b> , 10, 1387-1396                                                                                                   | 8.4 | 13 |
| 93  | Subjective and Objective Measures of Dryness Symptoms in Primary Sjögren's Syndrome: Capturing the Discrepancy. <i>Arthritis Care and Research</i> , <b>2017</b> , 69, 1714-1723                                                                  | 4.7 | 12 |
| 92  | Molecular and cellular pathways as treatment targets for biologic therapies in systemic sclerosis. <i>Current Medicinal Chemistry</i> , <b>2015</b> , 22, 1943-55                                                                                 | 4.3 | 12 |
| 91  | Systemic sclerosis-related pulmonary hypertension: unique characteristics and future treatment targets. <i>Current Pharmaceutical Design</i> , <b>2012</b> , 18, 1457-64                                                                          | 3.3 | 12 |
| 90  | Phenotyping Exercise Limitation in Systemic Sclerosis: The Use of Cardiopulmonary Exercise Testing. <i>Respiration</i> , <b>2016</b> , 91, 115-23                                                                                                 | 3.7 | 11 |
| 89  | Better outcomes of COVID-19 in vaccinated compared to unvaccinated patients with systemic rheumatic diseases. <i>Annals of the Rheumatic Diseases</i> , <b>2021</b> ,                                                                             | 2.4 | 11 |
