#	ARTICLE	IF	CITATIONS
1	Antenatal psychological intervention for universal prevention of antenatal and postnatal depression: A systematic review and meta-analysis. <i>Journal of Affective Disorders</i> , 2020, 273, 231-239.	4.1	26
2	Psychoeducational interventions focused on maternal or infant sleep for pregnant women to prevent the onset of antenatal and postnatal depression: A systematic review. <i>Neuropsychopharmacology Reports</i> , 2021, 41, 2-13.	2.3	11
3	Psychological intervention for universal prevention of antenatal and postnatal depression among pregnant women: protocol for a systematic review and meta-analysis. <i>Systematic Reviews</i> , 2019, 8, 297.	5.3	8
4	Effectiveness of high-frequency left prefrontal repetitive transcranial magnetic stimulation in patients with treatment-resistant depression: A randomized clinical trial of 37.5-minute vs 18.75-minute protocol. <i>Neuropsychopharmacology Reports</i> , 2019, 39, 203-208.	2.3	7
5	Clinical Trajectories of Suicide Attempts and Self-harm in Patients Admitted to Acute-care Hospitals in Japan: A Nationwide Inpatient Database Study. <i>Journal of Epidemiology</i> , 2021, 31, 231-236.	2.4	7
6	A 12-month maintenance therapy using repetitive transcranial magnetic stimulation for Treatment-resistant Depression: A report of two cases. <i>Asian Journal of Psychiatry</i> , 2022, 68, 102970.	2.0	2
7	Laterality of prefrontal hemodynamic response measured by functional near-infrared spectroscopy before and after repetitive transcranial magnetic stimulation: a potential biomarker of clinical outcome. <i>Psychiatry Research</i> , 2022, 310, 114444.	3.3	2
8	Thumb twitch during repetitive transcranial magnetic stimulation in a case with medication-resistant depression: A potential role of caffeine. <i>Psychiatry and Clinical Neurosciences</i> , 2020, 74, 372-373.	1.8	0
9	Repetitive transcranial magnetic stimulation decreased effortful frontal activity for shifting in patients with major depressive disorder. <i>NeuroReport</i> , 2022, 33, 470-475.	1.2	0
