| 173 all docs | 173 docs citations | 173 times ranked | 14519 citing authors |

| # | Article | IF | Citations |
|---|---------|-----|-----------|
| 1 | An independent, replicable, functional and significant risk variant block at intron 3 of *CACNA1C* for schizophrenia. Australian and New Zealand Journal of Psychiatry, 2022, 56, 385-397. | 1.3 | 9 |
| 2 | A novel heterozygous missense variant of the ARID4A gene identified in Han Chinese families with schizophrenia-diagnosed siblings that interferes with DNA-binding activity. Molecular Psychiatry, 2022, , . | 4.1 | 0 |
| 3 | Association between the volume of subregions of the amygdala and major depression with suicidal thoughts and anxiety in a Chinese cohort. Journal of Affective Disorders, 2022, 312, 39-45. | 2.0 | 3 |
| 4 | Sequential Multiple-Assignment Randomized Trials to Compare Antipsychotic Treatments (SMART-CAT) in first-episode schizophrenia patients: Rationale and trial design. Schizophrenia Research, 2021, 230, 87-94. | 1.1 | 2 |
| 5 | SNX29, a new susceptibility gene shared with major mental disorders in Han Chinese population. World Journal of Biological Psychiatry, 2021, 22, 526-534. | 1.3 | 10 |
| 6 | Cigarette smoking and schizophrenia: Mendelian randomisation study. British Journal of Psychiatry, 2021, 218, 98-103. | 1.7 | 6 |
| 7 | Influence and interaction of genetic, cognitive, neuroendocrine and personalistic markers to antidepressant response in Chinese patients with major depression. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2021, 104, 110036. | 2.5 | 12 |
| 8 | Interaction of CEND1 gene and life events in susceptibility to depressive symptoms in Chinese Han college students. Journal of Affective Disorders, 2021, 278, 570-575. | 2.0 | 2 |
| 9 | No Association Between SLC6A4 Gene Polymorphisms With Treatment Remission to Venlafaxine in Han Chinese Depressive Patients. Clinical Neuropharmacology, 2021, 44, 53-56. | 0.2 | 0 |
| 10 | Comparison of response to Chinese and Western videos of mental-health-related emotions in a representative Chinese sample. PeerJ, 2021, 9, e10440. | 0.9 | 1 |
| 11 | The Prevalence of Psychological Status During the COVID-19 Epidemic in China: A Systemic Review and Meta-Analysis. Frontiers in Psychology, 2021, 12, 614964. | 1.1 | 13 |
| 12 | Prevalence and dynamic features of psychological issues among Chinese healthcare workers during the COVID-19 pandemic: a systematic review and cumulative meta-analysis. Annals of General Psychiatry, 2021, 34, e100344. | 1.1 | 22 |
| 13 | Sp1 Targeted PARP1 Inhibition Protects Cardiomyocytes From Myocardial Ischemia–Reperfusion Injury via Downregulation of Autophagy. Frontiers in Cell and Developmental Biology, 2021, 9, 621906. | 1.8 | 6 |
| 14 | Middle temporal corpus callosum impairment as a predictor of eight-week treatment outcome of drug-naïve first-episode psychosis patients: A pilot longitudinal study. Schizophrenia Research, 2021, 232, 95-97. | 1.1 | 1 |
| 15 | Genetic risk of clozapine-induced leukopenia and neutropenia: a genome-wide association study. Translational Psychiatry, 2021, 11, 343. | 2.4 | 5 |
| 16 | Network pharmacology-based exploration of therapeutic mechanism of Liu-Yu-Tang in atypical antipsychotic drug-induced metabolic syndrome. Computers in Biology and Medicine, 2021, 134, 104452. | 3.9 | 9 |
| 17 | A study of negative life events driven depressive symptoms and academic engagement in Chinese college students. Scientific Reports, 2021, 11, 17160. | 1.6 | 14 |
| 18 | Prevalence of depressive disorders and treatment in China: a cross-sectional epidemiological study. Lancet Psychiatry,the, 2021, 8, 981-990. | 3.7 | 264 |

| # | Article | IF | Citations |
|---|---------|-----|-----------|
| 19 | Urotensin II Induces Cardiac Fibrosis through the TGF-β/Smad Signaling Pathway during the Development of Cardiac Hypertrophy. International Heart Journal, 2021, 62, 1135-1144. | 0.5 | 5 |
| 20 | The Association of Depressive Symptoms with Disability among Adults in China. Journal of Affective Disorders, 2021, 296, 189-197. | 2.0 | 5 |
| 21 | Barriers and facilitators to implementing measurement-based care for depression in Shanghai, China: a situational analysis. BMC Psychiatry, 2021, 21, 430. | 1.1 | 4 |
| 22 | Efficacy of Artificial Intelligence-Assisted Psychotherapy in Patients With Anxiety Disorders: A Prospective, National Multicenter Randomized Controlled Trial Protocol. Frontiers in Psychiatry, 2021, 12, 799917. | 1.3 | 4 |
| 23 | Impact of OXTR Polymorphisms on Subjective Well-Being: The Intermediary Role of Attributional Style. Frontiers in Genetics, 2021, 12, 763628. | 1.1 | 3 |
| 24 | The comorbidity of mental and physical disorders with self-reported chronic back or neck pain: Results from the China Mental Health Survey. Journal of Affective Disorders, 2020, 260, 334-341. | 2.0 | 17 |
| 25 | Mental Health Service Challenges during the Early Stage of the COVID-19 Pandemic: Experience and Best Practices from China. Canadian Journal of Psychiatry, 2020, 66, 070674372097225. | 0.9 | 5 |
| 26 | Challenges and opportunities in mental health services during the COVID-19 pandemic. Annals of General Psychiatry, 2020, 33, e100275. | 1.1 | 19 |
| 27 | &lt;p&gt;Individual Perceived Stress Mediates Psychological Distress in Medical Workers During COVID-19 Epidemic Outbreak in Wuhan&lt;/p&gt;. Neuropsychiatric Disease and Treatment, 2020, Volume 16, 2529-2537. | 1.0 | 18 |
| 28 | Mitigating mental health consequences during the <scp>COVID</scp>â€19 outbreak: Lessons from China. Psychiatry and Clinical Neurosciences, 2020, 74, 407-408. | 1.0 | 13 |
| 29 | Patients with mental health disorders in the COVID-19 epidemic. Lancet Psychiatry,the, 2020, 7, e21. | 3.7 | 1,053 |
| 30 | A nationwide survey of psychological distress among Chinese people in the COVID-19 epidemic: implications and policy recommendations. Annals of General Psychiatry, 2020, 33, e100213. | 1.1 | 2,951 |
| 31 | Neurochemical and brain functional changes in the ventromedial prefrontal cortex of first-episode psychosis patients: A combined functional magnetic resonance imagingâ€"proton magnetic resonance spectroscopy study. Australian and New Zealand Journal of Psychiatry, 2020, 54, 519-527. | 1.3 | 15 |
| 32 | Rethinking online mental health services in China during the COVID-19 epidemic. Asian Journal of Psychiatry, 2020, 50, 102015. | 0.9 | 151 |
| 33 | Role of rs454214 in Personality mediated Depression and Subjective Well-being. Scientific Reports, 2020, 10, 5702. | 1.6 | 10 |
| 34 | Multicenter randomized controlled trial of bifrontal, bitemporal, and right unilateral electroconvulsive therapy in major depressive disorder. Psychiatry and Clinical Neurosciences, 2019, 73, 636-641. | 1.0 | 13 |
| 35 | Genetic association between CELF4 rs1557341 polymorphism and neuroticism in Chinese Han population. Psychiatry Research, 2019, 279, 138-139. | 1.7 | 4 |
| 36 | Network pharmacology-based identification for therapeutic mechanism of Ling-Gui-Zhu-Gan decoction in the metabolic syndrome induced by antipsychotic drugs. Computers in Biology and Medicine, 2019, 110, 1-7. | 3.9 | 19 |

| # | Article | IF | Citations |
|---|---------|-----|-----------|
| 37 | &lt;p&gt;Repetitive transcranial magnetic stimulation as an adjunctive treatment for negative symptoms and cognitive impairment in patients with schizophrenia: a randomized, double-blind, sham-controlled trial&lt;/p&gt;. Neuropsychiatric Disease and Treatment, 2019, Volume 15, 1141-1150. | 1.0 | 27 |
| 38 | Prevalence of mental disorders in China: a cross-sectional epidemiological study. Lancet Psychiatry,the, 2019, 6, 211-224. | 3.7 | 1,273 |
| 39 | What is the optimal neuropsychological test battery for schizophrenia in China?. Schizophrenia Research, 2019, 208, 317-323. | 1.1 | 22 |
| 40 | CYP1A2 Genetic Polymorphism Is Associated With Treatment Remission to Antidepressant Venlafaxine in Han Chinese Population. Clinical Neuropharmacology, 2019, 42, 32-36. | 0.2 | 6 |
| 41 | Prediction of adolescent subjective well-being: A machine learning approach. Annals of General Psychiatry, 2019, 32, e100096. | 1.1 | 9 |
| 42 | Association study between LEPR, MC4R polymorphisms and overweight/obesity in Chinese Han adolescents. Gene, 2019, 692, 54-59. | 1.0 | 6 |
| 43 | The promoter polymorphisms in HTR2A gene associated with schizophrenia in Chinese of Han ethnicity. Psychiatry Research, 2018, 262, 636-637. | 1.7 | 0 |
| 44 | MicroRNA-223 protects neonatal rat cardiomyocytes and H9c2 cells from hypoxia-induced apoptosis and excessive autophagy via the Akt/mTOR pathway by targeting PARP-1. Journal of Molecular and Cellular Cardiology, 2018, 118, 133-146. | 0.9 | 82 |
| 45 | Striatal dysfunction in patients with schizophrenia and their unaffected first-degree relatives. Schizophrenia Research, 2018, 195, 215-221. | 1.1 | 33 |
| 46 | A case-control study of GRIN2B polymorphisms and major depressive disorder in the Chinese Han population. Psychiatry Research, 2018, 262, 626-627. | 1.7 | 0 |
| 47 | New journey, new mission: bolstering international communication about mental health. Annals of General Psychiatry, 2018, 31, e100002. | 1.1 | 1 |
| 48 | Ziprasidone, haloperidol and clonazepam intramuscular administration in the treatment of agitation symptoms in Chinese patients with schizophrenia: A network meta-analysis. Annals of General Psychiatry, 2018, 31, e000016. | 1.1 | 5 |
| 49 | HTR1A and HTR2A variants may not predict venlafaxine treatment response in China Han population with major depressive disorder. Psychiatry Research, 2018, 270, 1179-1180. | 1.7 | 4 |
| 50 | Glucose and Insulin-Related Traits, Type 2 Diabetes and Risk of Schizophrenia: A Mendelian Randomization Study. EBioMedicine, 2018, 34, 182-188. | 2.7 | 34 |
| 51 | Improvement of the Diagnosis of Left Ventricular Noncompaction Cardiomyopathy After Analyzing Both Advantages and Disadvantages of Echocardiography and CMRI. Progress in Cardiovascular Diseases, 2018, 61, 491-493. | 1.6 | 1 |
| 52 | Effect of Electroconvulsive Therapy on Medial Prefrontal Î³-Aminobutyric Acid Among Schizophrenia Patients. Journal of ECT, 2018, 34, 227-232. | 0.3 | 17 |
| 53 | Macrophage migration inhibitory factor mediates metabolic dysfunction induced by atypical antipsychotic therapy. Journal of Clinical Investigation, 2018, 128, 4997-5007. | 3.9 | 27 |
| 54 | Research Progress in Biological Studies of Schizophrenia in China in 2017. Shanghai Archives of Psychiatry, 2018, 30, 147-153. | 0.7 | 1 |

| # | Article | IF | Citations |
|---|---------|----|-----------|
| 55 | Impaired cue identification and intention retrieval underlie prospective memory deficits in patients with first-episode schizophrenia. Australian and New Zealand Journal of Psychiatry, 2017, 51, 270-277. | 1.3 | 12 |
| 56 | No association between SLC6A2, SLC6A3, DRD2 polymorphisms and schizophrenia in the Han Chinese population. Psychiatry Research, 2017, 253, 398-400. | 1.7 | 2 |
| 57 | Association study of the GLRX5 rs1007814 polymorphism with schizophrenia in the Han Chinese population. Psychiatric Genetics, 2017, 27, 76-77. | 0.6 | 2 |
| 58 | Association study of GRM7 polymorphisms with major depressive disorder in the Chinese Han population. Psychiatric Genetics, 2017, 27, 78-79. | 0.6 | 4 |
| 59 | Common variants in SLC6A2, SLC6A3, DRD2, and major depressive disorder. Psychiatric Genetics, 2017, 27, 103-104. | 0.6 | 6 |
| 60 | Genome-wide association analysis identifies 30 new susceptibility loci for schizophrenia. Nature Genetics, 2017, 49, 1576-1583. | 9.4 | 395 |
| 61 | Genome-wide significant, replicated and functional risk variants for Alzheimer's disease. Journal of Neural Transmission, 2017, 124, 1455-1471. | 1.4 | 10 |
| 62 | Common variants in GRIK4 and major depressive disorder: An association study in the Chinese Han population. Neuroscience Letters, 2017, 653, 239-243. | 1.0 | 4 |
| 63 | No association of GRIK4 polymorphisms with schizophrenia in the Chinese Han population. Psychiatric Genetics, 2017, 27, 159-160. | 0.6 | 3 |
| 64 | Association between the variability of the *ABCA13* gene and the risk of major depressive disorder and schizophrenia in the Han Chinese population. World Journal of Biological Psychiatry, 2017, 18, 550-556. | 1.3 | 9 |
| 65 | Dysfunction of Cognition Patterns Measured by MATRICS Consensus Cognitive Battery (MCCB) among First Episode Schizophrenia Patients and Their Biological Parents. Shanghai Archives of Psychiatry, 2017, 29, 154-160. | 0.7 | 7 |
| 66 | Improvement in social and cognitive functioning associated with paliperidone extended-release treatment in patients with schizophrenia: a 24-week, single arm, open-label study. Neuropsychiatric Disease and Treatment, 2016, Volume 12, 2095-2104. | 1.0 | 3 |
| 67 | Common variants in *QPCT* gene confer risk of schizophrenia in the Han Chinese population. American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2016, 171, 237-242. | 1.1 | 3 |
| 68 | No association of GRIA1 polymorphisms with schizophrenia in the Chinese Han population. Psychiatric Genetics, 2016, 26, 97-98. | 0.6 | 1 |
| 69 | Association study of NOS1 gene polymorphisms with the risk of schizophrenia in Chinese Han origin. Psychiatry Research, 2016, 246, 844-845. | 1.7 | 2 |
| 70 | The use of the SDQ with Chinese adolescents in the clinical context. Psychiatry Research, 2016, 246, 520-526. | 1.7 | 9 |
| 71 | Association between *SCAP* and *SREBF1* gene polymorphisms and metabolic syndrome in schizophrenia patients treated with atypical antipsychotics. World Journal of Biological Psychiatry, 2016, 17, 467-474. | 1.3 | 12 |
| 72 | Evaluations of treatment efficacy of depression from perspective of both patients' symptoms and general sense of mental health and wellbeing: A large scale, multi-centered, longitudinal study in China. Psychiatry Research, 2016, 241, 55-60. | 1.7 | 4 |

| # | Article | IF | Citations |
|---|---------|----|-----------|
| 73 | A study of single nucleotide polymorphisms of GRIN2B in schizophrenia from Chinese Han population. Neuroscience Letters, 2016, 630, 132-135. | 1.0 | 9 |
| 74 | Association study of dopamine receptor genes polymorphisms with the risk of schizophrenia in the Han Chinese population. Psychiatry Research, 2016, 245, 361-364. | 1.7 | 8 |
| 75 | A new method for identifying causal genes of schizophrenia and anti-tuberculosis drug-induced hepatotoxicity. Scientific Reports, 2016, 6, 32571. | 1.6 | 16 |
| 76 | Association study of 5-HT1A, 5-HT2A polymorphisms with schizophrenia and major depressive disorder in the Han Chinese population. Neuroscience Letters, 2016, 635, 39-43. | 1.0 | 11 |
| 77 | The China Mental Health Survey (CMHS): I. background, aims and measures. Social Psychiatry and Psychiatric Epidemiology, 2016, 51, 1559-1569. | 1.6 | 40 |
| 78 | The China Mental Health Survey: II. Design and field procedures. Social Psychiatry and Psychiatric Epidemiology, 2016, 51, 1547-1557. | 1.6 | 34 |
| 79 | Dysregulated 14-3-3 Family in Peripheral Blood Leukocytes of Patients with Schizophrenia. Scientific Reports, 2016, 6, 23791. | 1.6 | 17 |
| 80 | Role played by the SP4 gene in schizophrenia and major depressive disorder in the Han Chinese population. British Journal of Psychiatry, 2016, 208, 441-445. | 1.7 | 3 |
| 81 | A new risk locus in the ZEB2 gene for schizophrenia in the Han Chinese population. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2016, 66, 97-103. | 2.5 | 10 |
| 82 | Genome-wide Analysis of the Role of Copy Number Variation in Schizophrenia Risk in Chinese. Biological Psychiatry, 2016, 80, 331-337. | 0.7 | 55 |
| 83 | Analysis of association between common variants in the *SLCO6A1* gene with schizophrenia, bipolar disorder and major depressive disorder in the Han Chinese population. World Journal of Biological Psychiatry, 2016, 17, 140-146. | 1.3 | 4 |
| 84 | Abnormal white matter microstructure in drug-naive first episode schizophrenia patients before and after eight weeks of antipsychotic treatment. Schizophrenia Research, 2016, 172, 1-8. | 1.1 | 75 |
| 85 | Regional Abnormality of Grey Matter in Schizophrenia: Effect from the Illness or Treatment?. PLoS ONE, 2016, 11, e0147204. | 1.1 | 37 |
| 86 | Efficacy of Atypical Antipsychotics in the Management of Acute Agitation and Aggression in Hospitalized Patients with Schizophrenia or Bipolar Disorder: Results from a Systematic Review. Shanghai Archives of Psychiatry, 2016, 28, 241-252. | 0.7 | 4 |
| 87 | Increased Cognition Connectivity Network in Major Depression Disorder: A fMRI Study. Psychiatry Investigation, 2015, 12, 227. | 0.7 | 40 |
| 88 | The GSK3B gene confers risk for both major depressive disorder and schizophrenia in the Han Chinese population. Journal of Affective Disorders, 2015, 185, 149-155. | 2.0 | 34 |
| 89 | The NVL gene confers risk for both major depressive disorder and schizophrenia in the Han Chinese population. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2015, 62, 7-13. | 2.5 | 17 |
| 90 | Down-regulation of PRKCB1 expression in Han Chinese patients with subsyndromal symptomatic depression. Journal of Psychiatric Research, 2015, 69, 1-6. | 1.5 | 6 |

| # | Article | IF | Citations |
|---|---------|----|-----------| 
| 91 | The MATRICS Consensus Cognitive Battery (MCCB): Co-norming and standardization in China. Schizophrenia Research, 2015, 169, 109-115. | 1.1 | 176 |
| 92 | Association study of GRM7 polymorphisms and schizophrenia in the Chinese Han population. Neuroscience Letters, 2015, 604, 109-112. | 1.0 | 8 |
| 93 | Sleep problems among clinically depressed adults in China. Journal of Mental Health, 2015, 24, 43-47. | 1.0 | 1 |
| 94 | Association between SREBF2 gene polymorphisms and metabolic syndrome in clozapine-treated patients with schizophrenia. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2015, 56, 136-141. | 2.5 | 19 |
| 95 | Assessment of a six-week computer-based remediation program for social cognition in chronic schizophrenia. Shanghai Archives of Psychiatry, 2015, 27, 296-306. | 0.7 | 5 |
| 96 | Meta-Analysis-Based Preliminary Exploration of the Connection between ATDILI and Schizophrenia by GSTM1/T1 Gene Polymorphisms. PLoS ONE, 2015, 10, e0128643. | 1.1 | 16 |
| 97 | Neural Correlates of the Preserved Inhibition of Return in Schizophrenia. PLoS ONE, 2015, 10, e0119521. | 1.1 | 1 |
| 98 | Comparison of the density of gamma-aminobutyric acid in the ventromedial prefrontal cortex of patients with first-episode psychosis and healthy controls. Shanghai Archives of Psychiatry, 2015, 27, 341-7. | 0.7 | 13 |
| 99 | Comparison of Chinese and international psychiatrists' views on classification of mental disorders. Asia-Pacific Psychiatry, 2014, 6, 267-273. | 1.2 | 15 |
