#	ARTICLE	IF	CITATIONS
1	Efficacy of Folic Acid Therapy in Primary Prevention of Stroke Among Adults With Hypertension in China. <i>JAMA - Journal of the American Medical Association</i> , 2015, 313, 1325.	3.8	577
2	African Origin of Modern Humans in East Asia: A Tale of 12,000 Y Chromosomes. <i>Science</i> , 2001, 292, 1151-1153.	6.0	310
3	Trans-ancestry genome-wide association study identifies 12 genetic loci influencing blood pressure and implicates a role for DNA methylation. <i>Nature Genetics</i> , 2015, 47, 1282-1293.	9.4	294
4	Meta-analysis of genome-wide association studies in East Asian-ancestry populations identifies four new loci for body mass index. <i>Human Molecular Genetics</i> , 2014, 23, 5492-5504.	1.4	192
5	Management of morning hypertension: a consensus statement of an Asian expert panel. <i>Journal of Clinical Hypertension</i> , 2018, 20, 39-44.	1.0	49
6	Arterial Stiffness and Asymptomatic Intracranial Large Arterial Stenosis and Calcification in Hypertensive Chinese. <i>American Journal of Hypertension</i> , 2011, 24, 304-309.	1.0	40
7	Osteoglycin attenuates cardiac fibrosis by suppressing cardiac myofibroblast proliferation and migration through antagonizing lysophosphatidic acid 3/matrix metalloproteinase 2/epidermal growth factor receptor signalling. <i>Cardiovascular Research</i> , 2018, 114, 703-712.	1.8	29
8	Developmental and functional characteristics of the thoracic aorta perivascular adipocyte. <i>Cellular and Molecular Life Sciences</i> , 2019, 76, 777-789.	2.4	23
9	Association of Body Mass Index with Cause Specific Deaths in Chinese Elderly Hypertensive Patients: Minhang Community Study. <i>PLoS ONE</i> , 2013, 8, e71223.	1.1	22
10	Macrophages activate iNOS signaling in adventitial fibroblasts and contribute to adventitia fibrosis. <i>Nitric Oxide - Biology and Chemistry</i> , 2016, 61, 20-28.	1.2	19
11	The interaction of transient receptor potential melastatin 7 with macrophages promotes vascular adventitial remodeling in transverse aortic constriction rats. <i>Hypertension Research</i> , 2014, 37, 35-42.	1.5	18
12	Association of Inter-arm Blood Pressure Difference with Asymptomatic Intracranial and Extracranial Arterial Stenosis in Hypertension Patients. <i>Scientific Reports</i> , 2016, 6, 29894.	1.6	13
13	Association of Lp-PLA2 Mass and Aysmptomatic Intracranial and Extracranial Arterial Stenosis in Hypertension Patients. <i>PLoS ONE</i> , 2015, 10, e0130473.	1.1	12
14	Amlodipine/valsartan 5/160mg versus valsartan 160mg in Chinese hypertensives. <i>International Journal of Cardiology</i> , 2013, 167, 2024-2030.	0.8	9
15	Association of Homocysteine with Aysmptomatic Intracranial and Extracranial Arterial Stenosis in Hypertension Patients. <i>Scientific Reports</i> , 2018, 8, 595.	1.6	9
16	Efficacy and tolerability of a single-pill combination of telmisartan 80 mg and hydrochlorothiazide 25 mg according to age, gender, race, hypertension severity, and previous antihypertensive use: planned analyses of a randomized trial. <i>Integrated Blood Pressure Control</i> , 2013, 6, 1.	0.4	8
17	A randomized, double-blind study to evaluate the efficacy and safety of a single-pill combination of telmisartan 80 mg/amlodipine 5 mg versus amlodipine 5 mg in hypertensive Asian patients. <i>Journal of International Medical Research</i> , 2014, 42, 52-66.	0.4	8
18	Prevalence of hyperhomocysteinemia (HHcy) and its major determinants among hypertensive patients over 35 years of age. <i>European Journal of Clinical Nutrition</i> , 2021, . .	1.3	6

#	ARTICLE	IF	CITATIONS
19	Mechanisms of Improved Aortic Stiffness by Arotinolol in Spontaneously Hypertensive Rats. PLoS ONE, 2014, 9, e88722.	1.1	6
20	Association of Brachial-Ankle Pulse Wave Velocity with Asymptomatic Intracranial Arterial Stenosis in Hypertension Patients. Journal of Stroke and Cerebrovascular Diseases, 2016, 25, 1922-1928.	0.7	5
21	Transient Receptor Potential Melastatin 7 Promotes Vascular Adventitial Fibroblasts Phenotypic Transformation and Inflammatory Reaction Induced by Mechanical Stretching Stress via p38 MAPK/JNK Pathway. Journal of Vascular Research, 2021, 58, 108-120.	0.6	4
22	Linkage analysis of a region on chromosome 2 with essential hypertension in Chinese families. Chinese Medical Journal, 2002, 115, 654-7.	0.9	4
23	Efficacy and Tolerability of Telmisartan Plus Amlodipine in Asian Patients Not Adequately Controlled on Either Monotherapy or on Low-Dose Combination Therapy. International Journal of Hypertension, 2014, 2014, 1-11.	0.5	3
24	An Evaluation of Laboratory Efficiency in Shanghai Emergency by Turn Around Times Level. Journal of Clinical Laboratory Analysis, 2015, 29, 334-341.	0.9	3
25	Association of <i>ATP2B1</i> common variants with asymptomatic intracranial and extracranial large artery stenosis in hypertension patients. Clinical and Experimental Hypertension, 2019, 41, 323-329.	0.5	3
26	Urine albumin-to-creatinine ratio and asymptomatic intracranial atherosclerotic stenosis in hypertensive patients. Journal of Human Hypertension, 2019, 33, 482-488.	1.0	2
27	Predictive value of attended automated office blood pressure and resting pulse rate for mortality in community-dwelling octogenarians: Minhang study. Journal of Clinical Hypertension, 2021, 23, 1239-1245.	1.0	2
28	Associations between various attended automated office blood pressure estimations and all-cause and cardiovascular mortality: Minhang study. Journal of Hypertension, 2020, 38, 1072-1079.	0.3	2
29	SINGLE-PILL COMBINATION OF TELMISARTAN 80 MG/AMLODIPINE 5 MG PROVIDES SUPERIOR BLOOD PRESSURE REDUCTIONS TO AMLODIPINE 5 MG IN HYPERTENSIVE PATIENTS WHO WERE UNCONTROLLED ON AMLODIPINE 5 MG MONOTHERAPY. Heart, 2012, 98, E254.3-E254.	1.2	1
30	Predictive value of within-visit and visit-to-visit blood pressure variability for all-cause mortality: the Minhang Study. Journal of Hypertension, 2021, 39, 1844-1851.	0.3	0
