|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Clinical Features and Outcomes of Pulmonary Artery Sarcoma. <i>Heart Lung and Circulation</i> , 2022, 31, 230-238.                                                                                                                                   | 0.2 | 4         |
| 2  | Examining the Development of Chronic Thromboembolic Pulmonary Hypertension at the Single-Cell Level. <i>Hypertension</i> , 2022, 79, 562-574.                                                                                                        | 1.3 | 7         |
| 3  | Possible immune regulation mechanisms for the progression of chronic thromboembolic pulmonary hypertension. <i>Thrombosis Research</i> , 2021, 198, 122-131.                                                                                         | 0.8 | 11        |
| 4  | Expression of miR-93-5p as a Potential Predictor of the Severity of Chronic Thromboembolic Pulmonary Hypertension. <i>BioMed Research International</i> , 2021, 2021, 1-7.                                                                           | 0.9 | 5         |
| 5  | Refractory pleural effusion as a rare complication of pulmonary vascular stenosis induced by fibrosing mediastinitis: a case report and literature review. <i>Journal of International Medical Research</i> , 2021, 49, 0300060521110100.            | 0.4 | 6         |
| 6  | Cell landscape atlas for patients with chronic thromboembolic pulmonary hypertension after pulmonary endarterectomy constructed using single-cell RNA sequencing. <i>Aging</i> , 2021, 13, 16485-16499.                                              | 1.4 | 10        |
| 7  | Haemodynamic effects of riociguat in CTEPH and PAH: a 10-year observational study. <i>ERJ Open Research</i> , 2021, 7, 00082-2021.                                                                                                                   | 1.1 | 3         |
| 8  | Mouse model of experimental pulmonary hypertension: Lung angiogram and right heart catheterization. <i>Pulmonary Circulation</i> , 2021, 11, 1-17.                                                                                                   | 0.8 | 8         |
| 9  | Hsa_circ_0046159 is involved in the development of chronic thromboembolic pulmonary hypertension. <i>Journal of Thrombosis and Thrombolysis</i> , 2020, 49, 386-394.                                                                                 | 1.0 | 21        |
| 10 | hsa-miR-106b-5p participates in the development of chronic thromboembolic pulmonary hypertension via targeting matrix metalloproteinase 2. <i>Pulmonary Circulation</i> , 2020, 10, 1-10.                                                            | 0.8 | 8         |
| 11 | Clinical and imaging manifestations of Takayasu's arteritis with pulmonary hypertension: A retrospective cohort study in China. <i>International Journal of Cardiology</i> , 2019, 276, 224-229.                                                     | 0.8 | 24        |
| 12 | DNA methylation signatures of pulmonary arterial smooth muscle cells in chronic thromboembolic pulmonary hypertension. <i>Physiological Genomics</i> , 2018, 50, 313-322.                                                                            | 1.0 | 23        |
| 13 | Echocardiographic characteristics of pulmonary artery involvement in Takayasu arteritis. <i>Echocardiography</i> , 2017, 34, 340-347.                                                                                                                | 0.3 | 16        |
| 14 | Follistatin-like 1 protects against hypoxia-induced pulmonary hypertension in mice. <i>Scientific Reports</i> , 2017, 7, 45820.                                                                                                                      | 1.6 | 19        |
| 15 | Microarray Analysis and Detection of MicroRNAs Associated with Chronic Thromboembolic Pulmonary Hypertension. <i>BioMed Research International</i> , 2017, 2017, 1-9.                                                                                | 0.9 | 17        |
| 16 | P16 and Ki-67 expression improves the diagnostic accuracy of cervical lesions but not predict persistent high risk human papillomavirus infection with CIN1. <i>International Journal of Clinical and Experimental Pathology</i> , 2015, 8, 2979-86. | 0.5 | 12        |
| 17 | Differentially Expressed Plasma MicroRNAs and the Potential Regulatory Function of Let-7b in Chronic Thromboembolic Pulmonary Hypertension. <i>PLoS ONE</i> , 2014, 9, e101055.                                                                      | 1.1 | 50        |
