

Javier Bonet

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2600621/javier-bonet-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
101	A New Updated Reference Lagrangian Smooth Particle Hydrodynamics algorithm for isothermal elasticity and elasto-plasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2022 , 392, 114680	5.7	0
100	Mathematical models of supersonic and intersonic crack propagation in linear elastodynamics. <i>International Journal of Fracture</i> , 2021 , 229, 55-75	2.3	1
99	An entropy-stable Smooth Particle Hydrodynamics algorithm for large strain thermo-elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2021 , 379, 113736	5.7	4
98	A first order hyperbolic framework for large strain computational solid dynamics. Part III: Thermo-elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2021 , 373, 113505	5.7	7
97	A parameter-free total Lagrangian smooth particle hydrodynamics algorithm applied to problems with free surfaces. <i>Computational Particle Mechanics</i> , 2021 , 8, 859-892	3	2
96	A new energy-momentum time integration scheme for non-linear thermo-mechanics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 372, 113395	5.7	5
95	An upwind vertex centred finite volume algorithm for nearly and truly incompressible explicit fast solid dynamic applications: Total and Updated Lagrangian formulations. <i>Journal of Computational Physics: X</i> , 2019 , 3, 100025	1	3
94	A hybridizable discontinuous Galerkin method for both thin and 3D nonlinear elastic structures. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 352, 561-585	5.7	8
93	Towards an efficient computational strategy for electro-activation in cardiac mechanics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 356, 220-260	5.7	6
92	A new computational framework for electro-activation in cardiac mechanics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 348, 796-845	5.7	8
91	A Total Lagrangian upwind Smooth Particle Hydrodynamics algorithm for large strain explicit solid dynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 344, 209-250	5.7	14
90	Unified one-fluid formulation for incompressible flexible solids and multiphase flows: Application to hydrodynamics using the immersed structural potential method (ISPM). <i>International Journal for Numerical Methods in Fluids</i> , 2018 , 86, 78-106	1.9	10
89	A curvilinear high order finite element framework for electromechanics: From linearised electro-elasticity to massively deformable dielectric elastomers. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2018 , 329, 75-117	5.7	23
88	An upwind cell centred Total Lagrangian finite volume algorithm for nearly incompressible explicit fast solid dynamic applications. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2018 , 340, 684-727	5.7	14
87	A first-order hyperbolic framework for large strain computational solid dynamics: An upwind cell centred Total Lagrangian scheme. <i>International Journal for Numerical Methods in Engineering</i> , 2017 , 109, 407-456	2.4	20
86	A variationally consistent Streamline Upwind Petrov-Galerkin Smooth Particle Hydrodynamics algorithm for large strain solid dynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2017 , 318, 514-536	5.7	15
85	On a tensor cross product based formulation of large strain solid mechanics. <i>International Journal of Solids and Structures</i> , 2016 , 84, 49-63	3.1	50

84	A computational framework for polyconvex large strain elasticity for geometrically exact beam theory. <i>Computational Mechanics</i> , 2016 , 57, 277-303	4	15
83	A first order hyperbolic framework for large strain computational solid dynamics. Part II: Total Lagrangian compressible, nearly incompressible and truly incompressible elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2016 , 300, 146-181	5-7	42
82	Nonlinear Solid Mechanics for Finite Element Analysis: Statics 2016 ,		18
81	A new Jameson-Schmidt-Turkel Smooth Particle Hydrodynamics algorithm for large strain explicit fast dynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2016 , 311, 71-111	5-7	29
80	An upwind vertex centred Finite Volume solver for Lagrangian solid dynamics. <i>Journal of Computational Physics</i> , 2015 , 300, 387-422	4-1	38
79	A computational framework for polyconvex large strain elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2015 , 283, 1061-1094	5-7	79
78	A first order hyperbolic framework for large strain computational solid dynamics. Part I: Total Lagrangian isothermal elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2015 , 283, 689-732	5-7	62
77	A vertex centred Finite Volume Jameson-Schmidt-Turkel (JST) algorithm for a mixed conservation formulation in solid dynamics. <i>Journal of Computational Physics</i> , 2014 , 259, 672-699	4-1	49
76	A two-step Taylor-Galerkin formulation for fast dynamics. <i>Engineering Computations</i> , 2014 , 31, 366-387	1-4	16
75	Multiple-Fluid SPH Simulation Using a Mixture Model. <i>ACM Transactions on Graphics</i> , 2014 , 33, 1-11	7-6	62
74	A mortar approach for Fluid-Structure interaction problems: Immersed strategies for deformable and rigid bodies. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2014 , 278, 853-882	5-7	27
73	A stabilised Petrov-Galerkin formulation for linear tetrahedral elements in compressible, nearly incompressible and truly incompressible fast dynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2014 , 276, 659-690	5-7	54
72	Development of a stabilised Petrov-Galerkin formulation for conservation laws in Lagrangian fast solid dynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2014 , 268, 40-64	5-7	45
71	An enhanced Immersed Structural Potential Method for fluid-structure interaction. <i>Journal of Computational Physics</i> , 2013 , 250, 178-205	4-1	29
70	Development of a cell centred upwind finite volume algorithm for a new conservation law formulation in structural dynamics. <i>Computers and Structures</i> , 2013 , 118, 13-38	4-5	56
69	On continuum immersed strategies for Fluid-Structure Interaction. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2012 , 247-248, 51-64	5-7	27
68	A note on upper bound formulations in limit analysis. <i>International Journal for Numerical Methods in Engineering</i> , 2012 , 91, 896-908	2-4	11
67	The formation of wrinkles in single-layer graphene sheets under nanoindentation. <i>Journal of Physics Condensed Matter</i> , 2010 , 22, 145302	1-8	27

66	A variationally consistent mesh adaptation method for triangular elements in explicit Lagrangian dynamics. <i>International Journal for Numerical Methods in Engineering</i> , 2010 , 82, 1073-1113	2.4	19
65	Finite element superplastic forming (FE-SPF) of patient-specific maxillofacial prostheses. <i>International Journal for Numerical Methods in Biomedical Engineering</i> , 2010 , 26, 139-155	2.6	5
64	The Immersed Structural Potential Method for haemodynamic applications. <i>Journal of Computational Physics</i> , 2010 , 229, 8613-8641	4.1	39
63	Partitioned block-Gauss-Seidel coupling for dynamic fluid-structure interaction. <i>Computers and Structures</i> , 2010 , 88, 1367-1382	4.5	43
62	Upper and lower bounds in limit analysis: Adaptive meshing strategies and discontinuous loading. <i>International Journal for Numerical Methods in Engineering</i> , 2009 , 77, 471-501	2.4	74
61	Discontinuous Galerkin solution of the Navier-Stokes equations on deformable domains. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2009 , 198, 1585-1595	5.7	143
60	Mesh adaptive computation of upper and lower bounds in limit analysis. <i>International Journal for Numerical Methods in Engineering</i> , 2008 , 75, 899-944	2.4	141
59	A partitioned coupling approach for dynamic fluid-structure interaction with applications to biological membranes. <i>International Journal for Numerical Methods in Fluids</i> , 2008 , 57, 555-581	1.9	16
58	Nonlinear Continuum Mechanics for Finite Element Analysis 2008 ,		322
57	Stabilized updated Lagrangian corrected SPH for explicit dynamic problems. <i>International Journal for Numerical Methods in Engineering</i> , 2007 , 69, 2687-2710	2.4	55
56	Dynamic refinement and boundary contact forces in SPH with applications in fluid flow problems. <i>International Journal for Numerical Methods in Engineering</i> , 2007 , 72, 295-324	2.4	150
55	Finite element analysis of partly wrinkled reinforced prestressed membranes. <i>Computational Mechanics</i> , 2007 , 40, 595-615	4	10
54	A High Order Discontinuous Galerkin Method for Fluid-Structure Interaction 2007 ,		10
53	Discontinuous Galerkin Solution of the Navier-Stokes Equations on Deformable Domains 2007 ,		7
52	Finite element analysis of prestressed structural membranes. <i>Finite Elements in Analysis and Design</i> , 2006 , 42, 683-697	2.2	17
51	UPDATED LAGRANGIAN FORMULATION FOR CORRECTED SMOOTH PARTICLE HYDRODYNAMICS. <i>International Journal of Computational Methods</i> , 2006 , 03, 383-399	1.1	6
50	The computation of bounds for linear-functional outputs of weak solutions to the two-dimensional elasticity equations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2006 , 195, 406-429	5.7	66
49	Simulating superplastic forming. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2006 , 195, 6580-6603	5.7	43

48	Hamiltonian formulation of the variable-h SPH equations. <i>Journal of Computational Physics</i> , 2005 , 209, 541-558	4.1	20
47	Continuous blending of SPH with finite elements. <i>Computers and Structures</i> , 2005 , 83, 1448-1458	4.5	38
46	A variationally consistent fractional time-step integration method for incompressible and nearly incompressible Lagrangian dynamics. <i>International Journal for Numerical Methods in Engineering</i> , 2005 , 63, 1371-1395	2.4	17
45	A corrected smooth particle hydrodynamics formulation of the shallow-water equations. <i>Computers and Structures</i> , 2005 , 83, 1396-1410	4.5	87
44	Alternative techniques for casting process simulation. <i>International Journal of Numerical Methods for Heat and Fluid Flow</i> , 2004 , 14, 145-166	4.5	25
43	Optimisation of the superplastic forming of a dental implant for bone augmentation using finite element simulations. <i>Dental Materials</i> , 2004 , 20, 409-18	5.7	18
42	A variational formulation based contact algorithm for rigid boundaries in two-dimensional SPH applications. <i>Computational Mechanics</i> , 2004 , 33, 316-325	4	107
41	A corrected smooth particle hydrodynamics method for the simulation of debris flows. <i>Numerical Methods for Partial Differential Equations</i> , 2004 , 20, 140-163	2.5	27
40	Variational formulation for the smooth particle hydrodynamics (SPH) simulation of fluid and solid problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1245-1256	5.7	66
39	Computing Bounds for Linear Functionals of Exact Weak Solutions to Poisson's Equation. <i>SIAM Journal on Numerical Analysis</i> , 2004 , 42, 1610-1630	2.4	42
38	10th anniversary conference of ACME-UK. <i>Communications in Numerical Methods in Engineering</i> , 2003 , 19, 657-657		0
37	High pressure die casting simulation using a Lagrangian particle method. <i>Communications in Numerical Methods in Engineering</i> , 2003 , 19, 679-687		31
36	Numerical simulation of the superplastic forming of dental and medical prostheses. <i>Biomechanics and Modeling in Mechanobiology</i> , 2002 , 1, 177-96	3.8	9
35	The efficient computation of bounds for functionals of finite element solutions in large strain elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 4807-4826	5.7	8
34	A simplified approach to enhance the performance of smooth particle hydrodynamics methods. <i>Applied Mathematics and Computation</i> , 2002 , 126, 133-155	2.7	43
33	Alternative Total Lagrangian Formulations for Corrected Smooth Particle Hydrodynamics (CSPH) Methods in Large Strain Dynamic Problems. <i>Revue Europeenne Des Elements</i> , 2002 , 11, 893-912		5
32	Stability and comparison of different linear tetrahedral formulations for nearly incompressible explicit dynamic applications. <i>International Journal for Numerical Methods in Engineering</i> , 2001 , 50, 119-134	2.4	53
31	Remarks on tension instability of Eulerian and Lagrangian corrected smooth particle hydrodynamics (CSPH) methods. <i>International Journal for Numerical Methods in Engineering</i> , 2001 , 52, 1203-1220	2.4	74

30	An averaged nodal deformation gradient linear tetrahedral element for large strain explicit dynamic applications. <i>Communications in Numerical Methods in Engineering</i> , 2001 , 17, 551-561		98
29	Large strain viscoelastic constitutive models. <i>International Journal of Solids and Structures</i> , 2001 , 38, 2953-2968		77
28	Form finding of membrane structures by the updated reference method with minimum mesh distortion. <i>International Journal of Solids and Structures</i> , 2001 , 38, 5469-5480	3.1	15
27	Correction and stabilization of smooth particle hydrodynamics methods with applications in metal forming simulations. <i>International Journal for Numerical Methods in Engineering</i> , 2000 , 47, 1189-1214	2.4	343
26	Finite increment gradient stabilization of point integrated meshless methods for elliptic equations. <i>Communications in Numerical Methods in Engineering</i> , 2000 , 16, 475-483		2
25	Finite element analysis of air supported membrane structures. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 190, 579-595	5.7	109
24	Variational and momentum preservation aspects of Smooth Particle Hydrodynamic formulations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1999 , 180, 97-115	5.7	503
23	A simple orthotropic, transversely isotropic hyperelastic constitutive equation for large strain computations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1998 , 162, 151-164	5.7	92
22	Recent developments in the incremental flow formulation for the numerical simulation of metal forming processes. <i>Engineering Computations</i> , 1998 , 15, 345-356	1.4	5
21	Finite element analysis of the superplastic forming of thick sheet using the incremental flow formulation. <i>International Journal for Numerical Methods in Engineering</i> , 1997 , 40, 3205-3228	2.4	14
20	A review of the numerical analysis of superplastic forming. <i>Journal of Materials Processing Technology</i> , 1996 , 60, 45-53	5.3	31
19	The incremental flow formulation for the numerical analysis of 3-dimensional viscous deformation processes: continuum formulation and computational aspects. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1995 , 122, 51-68	5.7	11
18	Smoothing stress resultants in adaptive finite element shell analysis. <i>Computers and Structures</i> , 1995 , 54, 835-849	4.5	4
17	A uniform deformation gradient hexahedron element with artificial hourglass control. <i>International Journal for Numerical Methods in Engineering</i> , 1995 , 38, 2809-2828	2.4	34
16	Error estimators and enrichment procedures for the finite element analysis of thin sheet large deformation processes. <i>International Journal for Numerical Methods in Engineering</i> , 1994 , 37, 1573-1591	2.4	14
15	Incremental flow procedures for the finite-element analysis of thin sheet superplastic forming processes. <i>Journal of Materials Processing Technology</i> , 1994 , 42, 147-165	5.3	8
14	The incremental flow formulation for the finite element analysis of 3-dimensional superplastic forming processes. <i>Journal of Materials Processing Technology</i> , 1994 , 45, 243-248	5.3	6
13	The incremental flow formulation for the numerical analysis of plane stress and thin sheet viscous forming processes. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1994 , 114, 103-122	5.7	14

12	Pressure-control algorithms for the numerical simulation of superplastic forming. <i>International Journal of Mechanical Sciences</i> , 1994 , 36, 297-309	5.5	36
11	Adaptive mesh refinement for faceted shells. <i>Communications in Applied Numerical Methods</i> , 1992 , 8, 319-329		7
10	An alternating digital tree (ADT) algorithm for 3D geometric searching and intersection problems. <i>International Journal for Numerical Methods in Engineering</i> , 1991 , 31, 1-17	2.4	293
9	Numerical simulation of the superplastic forming of thin sheet components using the finite element method. <i>International Journal for Numerical Methods in Engineering</i> , 1990 , 30, 1719-1737	2.4	36
8	A pressure cycle control algorithm for superplastic forming. <i>Communications in Applied Numerical Methods</i> , 1989 , 5, 121-128		17
7	LARGE ELASTO-PLASTIC DEFORMATIONS188-215		
6	STRESS AND EQUILIBRIUM134-154		
5	HYPERELASTICITY155-187		
4	LINEARIZED EQUILIBRIUM EQUATIONS216-236		
3	ANALYSIS OF THREE-DIMENSIONAL TRUSS STRUCTURES63-93		
2	DISCRETIZATION AND SOLUTION237-265		
1	COMPUTER IMPLEMENTATION266-311
