|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Accumulation of natriuretic peptides is associated with protein energy wasting and activation of browning in white adipose tissue in chronic kidney disease. <i>Kidney International</i> , 2020, 98, 663-672. | 5.2 | 18        |
| 2 | Natriuretic Peptides as Predictors of Protein-Energy Wasting in Hemodialysis Population. , 2022, 32, 234-242.                                                                                                 |     | 6         |
| 3 | The protein-bound uremic toxin p-cresyl-sulfate promotes intracellular ROS production and lipid peroxidation in 3T3-L1 adipose cells. <i>Biochimie</i> , 2021, 189, 137-143.                                  | 2.6 | 6         |
| 4 | 3-methylhistidine and clinical outcomes in maintenance haemodialysis patients. <i>Nephrology Dialysis Transplantation</i> , 2022, 37, 1951-1961.                                                              | 0.7 | 5         |
| 5 | Is there still a place for prebiotics in chronic kidney disease?. <i>Nephrology Dialysis Transplantation</i> , 2019, 34, 1812-1816.                                                                           | 0.7 | 4         |
| 6 | Imported haemorrhagic fever with renal syndrome caused by Dobravaâ€“Belgrade hantavirus in France. <i>CKJ: Clinical Kidney Journal</i> , 2021, 14, 1014-1016.                                                 | 2.9 | 4         |
| 7 | MO461FGF19 IMPROVES GLUCOSE METABOLISM IN CKD MICE. <i>Nephrology Dialysis Transplantation</i> , 2021, 36, .                                                                                                  | 0.7 | 0         |
