#	ARTICLE	IF	CITATIONS
1	Organization of Selective Protection against Single-Phase Ground Faults in Autonomous Power Supply Networks of Oil Production Facilities. , 2019, , .		4
2	Study of the Efficiency of the Invariant Protection Against Single-Phase Ground Faults in the Microprocessor Terminals. , 2019, , .		2
3	Efficiency Estimation of Hybrid Electrical Complex for Voltage and Current Waveform Correction in Power Systems of Oil Enterprises. , 2019, , .		3
4	Synchronisation of Islanded Networks with Distributed Generation Using SST. , 2019, , .		2
5	Mathematical Modelling of High-Frequency Electrical Motors with Harmonic Elimination Filters for Technological Complexes. , 2018, , .		2
6	Selection of Shunt Active Filter Main Parameters in Conditions of Centralized and Distributed Power Supply Systems. , 2018, , .		4
7	The Hybrid Correction System, Based on Active and Passive Filters for Harmonic Compensation in Networks of Oil Enterprises. , 2018, , .		2
8	Maintenance problems of PWM-inverters in power networks with distributed generation. MATEC Web of Conferences, 2018, 161, 02010.	0.2	4
9	Electrical complex of combined power supply on the base of renewables and hybrid correction device. , 2017, , .		7
10	The structure selection of hybrid correction device for centralized and distributed electrical networks. , 2017, , .		2
11	The control algorithm for active and hybrid correction systems of voltage and current waveforms. , 2016, , .		6
12	Modeling harmonic compensation modes of active correction systems. , 2015, , .		1
13	Intelligent power system on the base of active-adaptive control and interaction between elements. , 2015, , .		1
14	The application of modern information technologies for power monitoring and control in conditions of distributed generation. , 2014, , .		9
