#	ARTICLE	IF	CITATIONS
1	How We Did It: Implementing a Trainee-Focused Surgical Research Curriculum and Infrastructure. <i>Journal of Surgical Education</i> , 2022, 79, 35-39.	2.5	2
2	533 Human Case Characterizations of Skin Burn Using Novel Multi-Spectral Short Wave Infrared Imaging. <i>Journal of Burn Care and Research</i> , 2022, 43, S101-S102.	0.5	0
3	A Multicenter Evaluation of the Seraph 100 Microbind Affinity Blood Filter for the Treatment of Severe COVID-19. , 2022, 4, e0662.		28
4	Telehealth and Burn Care: From Faxes to Augmented Reality. <i>Bioengineering</i> , 2022, 9, 211.	3.6	1
5	Neuron-to-vessel signaling is a required feature of aberrant stem cell commitment after soft tissue trauma. <i>Bone Research</i> , 2022, 10, .	11.5	16
6	BMP Ligand Trap ALK3-Fc Attenuates Osteogenesis and Heterotopic Ossification in Blast-Related Lower Extremity Trauma. <i>Stem Cells and Development</i> , 2021, 30, 91-105.	2.1	18
7	Novel Lineage-Tracing System to Identify Site-Specific Ectopic Bone Precursor Cells. <i>Stem Cell Reports</i> , 2021, 16, 626-640.	4.7	23
8	Teamwork at the Bench: Strategies for Collaborative Surgical Science in a Pandemic. <i>Journal of Surgical Research</i> , 2021, 261, 39-42.	1.6	0
9	High Frequency Spectral Ultrasound Imaging Detects Early Heterotopic Ossification in Rodents. <i>Stem Cells and Development</i> , 2021, 30, 473-484.	2.1	8
10	Dermal Nanoemulsion Treatment Reduces Burn Wound Conversion and Improves Skin Healing in a Porcine Model of Thermal Burn Injury. <i>Journal of Burn Care and Research</i> , 2021, 42, 1232-1242.	0.5	9
11	Murine muscle stem cell response to perturbations of the neuromuscular junction are attenuated with aging. <i>ELife</i> , 2021, 10, .	5.9	23
12	Histology Scoring System for Murine Cutaneous Wounds. <i>Stem Cells and Development</i> , 2021, 30, 1141-1152.	2.1	32
13	NGF-TrkA signaling dictates neural ingrowth and aberrant osteochondral differentiation after soft tissue trauma. <i>Nature Communications</i> , 2021, 12, 4939.	13.0	45
14	Short-wave infrared light imaging measures tissue moisture and distinguishes superficial from deep burns. <i>Wound Repair and Regeneration</i> , 2020, 28, 185-193.	3.2	4
15	Cellular Plasticity in Musculoskeletal Development, Regeneration, and Disease. <i>Journal of Orthopaedic Research</i> , 2020, 38, 708-718.	2.4	5
16	The role of neutrophil extracellular traps and TLR signaling in skeletal muscle ischemia reperfusion injury. <i>FASEB Journal</i> , 2020, 34, 15753-15770.	0.4	25
17	Mechanisms of bone development and repair. <i>Nature Reviews Molecular Cell Biology</i> , 2020, 21, 696-711.	36.9	553
18	Articular cartilage regeneration by activated skeletal stem cells. <i>Nature Medicine</i> , 2020, 26, 1583-1592.	29.9	212

#	ARTICLE	IF	CITATIONS
19	Perivascular Fibro-Adipogenic Progenitor Tracing during Post-Traumatic Osteoarthritis. <i>American Journal of Pathology</i> , 2020, 190, 1909-1920.	4.1	19
20	Activin A does not drive post-traumatic heterotopic ossification. <i>Bone</i> , 2020, 138, 115473.	3.0	29
21	Tuning Macrophage Phenotype to Mitigate Skeletal Muscle Fibrosis. <i>Journal of Immunology</i> , 2020, 204, 2203-2215.	0.8	40
22	Small molecule inhibition of non-canonical (TAK1-mediated) BMP signaling results in reduced chondrogenic ossification and heterotopic ossification in a rat model of blast-associated combat-related lower limb trauma. <i>Bone</i> , 2020, 139, 115517.	3.0	10
23	Self-reported baseline phenotypes from the International Fibrodysplasia Ossificans Progressiva (FOP) Association Global Registry. <i>Bone</i> , 2020, 134, 115274.	3.0	19
24	Regulation of heterotopic ossification by M1 macrophages in a mouse model of aberrant wound healing. <i>Nature Communications</i> , 2020, 11, 722.	13.0	119
25	Endogenous CCN family member WISP1 inhibits trauma-induced heterotopic ossification. <i>Journal of Clinical Investigation</i> , 2020, 5, .	6.6	12
26	Immobilization after injury alters extracellular matrix and stem cell fate. <i>Journal of Clinical Investigation</i> , 2020, 130, 5444-5460.	6.6	47
27	Disruption of Neutrophil Extracellular Traps (NETs) Links Mechanical Strain to Post-traumatic Inflammation. <i>Frontiers in Immunology</i> , 2019, 10, 2148.	4.8	29
28	Heterotopic Ossification: A Comprehensive Review. <i>JBMR Plus</i> , 2019, 3, e10172.	2.3	313
29	Investigation into Possible Association of Oxandrolone and Heterotopic Ossification Following Burn Injury. <i>Journal of Burn Care and Research</i> , 2019, 40, 398-405.	0.5	4
30	Injectable osteogenic microtissues containing mesenchymal stromal cells conformally fill and repair critical-size defects. <i>Biomaterials</i> , 2019, 208, 32-44.	11.7	105
31	Hypoxia-inducible factor 2 is a negative regulator of osteoblastogenesis and bone mass accrual. <i>Bone Research</i> , 2019, 7, 7.	11.5	42
32	Coordinating Tissue Regeneration Through Transforming Growth Factor- β 2 Activated Kinase 1 Inactivation and Reactivation. <i>Stem Cells</i> , 2019, 37, 766-778.	3.5	10
33	Mesenchymal VEGFA induces aberrant differentiation in heterotopic ossification. <i>Bone Research</i> , 2019, 7, 36.	11.5	41
34	Harnessing macrophage-mediated degradation of gelatin microspheres for spatiotemporal control of BMP2 release. <i>Biomaterials</i> , 2018, 161, 216-227.	11.7	115
35	High-frequency spectral ultrasound imaging (SUSI) visualizes early post-traumatic heterotopic ossification (HO) in a mouse model. <i>Bone</i> , 2018, 109, 49-55.	3.0	10
36	TGF- β 2 Family Signaling in Mesenchymal Differentiation. <i>Cold Spring Harbor Perspectives in Biology</i> , 2018, 10, a022202.	5.3	191

#	ARTICLE	IF	CITATIONS
37	Heterotopic ossification and the elucidation of pathologic differentiation. <i>Bone</i> , 2018, 109, 12-21.	3.0	61
38	Importance of Mineral and Bone Metabolism after Burn. , 2018, , 268-275.e2.		2
39	The Associations of Gender With Social Participation of Burn Survivors: A Life Impact Burn Recovery Evaluation Profile Study. <i>Journal of Burn Care and Research</i> , 2018, 39, 915-922.	0.5	21
40	Characterizing the Circulating Cell Populations in Traumatic Heterotopic Ossification. <i>American Journal of Pathology</i> , 2018, 188, 2464-2473.	4.1	30
41	Maestro macrophages conduct a widely disseminated symphony. <i>Science Translational Medicine</i> , 2018, 10, .	13.3	0
42	Scar Management of the Burned Hand. <i>Hand Clinics</i> , 2017, 33, 305-315.	1.1	32
43	Stem Cells and Tissue Engineering. <i>Clinics in Plastic Surgery</i> , 2017, 44, 635-650.	1.6	59
44	Sedation and Pain Management in Burn Patients. <i>Clinics in Plastic Surgery</i> , 2017, 44, 535-540.	1.6	84
45	Chemical, Electrical, and Radiation Injuries. <i>Clinics in Plastic Surgery</i> , 2017, 44, 657-669.	1.6	51
46	The traumatic bone: trauma-induced heterotopic ossification. <i>Translational Research</i> , 2017, 186, 95-111.	5.2	101
47	Hair follicle specific ACVR1/ALK2 critically affects skin morphogenesis and attenuates wound healing. <i>Wound Repair and Regeneration</i> , 2017, 25, 521-525.	3.2	9
48	Vermillion Reconstruction With Anal Verge Transitional Epithelium. <i>Journal of Burn Care and Research</i> , 2017, 39, 1.	0.5	0
49	Predicting Heterotopic Ossification Early After Burn Injuries. <i>Annals of Surgery</i> , 2017, 266, 179-184.	4.4	33
50	BMP-2-induced bone formation and neural inflammation. <i>Journal of Orthopaedics</i> , 2017, 14, 252-256.	1.4	57
51	Heterotopic Ossification Following Upper Extremity Injury. <i>Hand Clinics</i> , 2017, 33, 363-373.	1.1	25
52	Optimizing the Treatment of Burn Injuries of the Upper Extremity. <i>Hand Clinics</i> , 2017, 33, xiii.	1.1	0
53	Vascular patterning in human heterotopic ossification. <i>Human Pathology</i> , 2017, 63, 165-170.	2.3	30
54	Inhibition of Mammalian Target of Rapamycin Signaling with Rapamycin Prevents Trauma-Induced Heterotopic Ossification. <i>American Journal of Pathology</i> , 2017, 187, 2536-2545.	4.1	45

#	ARTICLE	IF	CITATIONS
55	Strategic Targeting of Multiple BMP Receptors Prevents Trauma-Induced Heterotopic Ossification. <i>Molecular Therapy</i> , 2017, 25, 1974-1987.	8.0	63
56	Peripheral Neuropathy and Nerve Compression Syndromes in Burns. <i>Clinics in Plastic Surgery</i> , 2017, 44, 793-803.	1.6	28
57	Traumatic muscle fibrosis. <i>Journal of Trauma and Acute Care Surgery</i> , 2017, 82, 174-184.	2.2	34
58	Heterotopic Ossification and Hypertrophic Scars. <i>Clinics in Plastic Surgery</i> , 2017, 44, 749-755.	1.6	31
59	Scleraxis-Lineage Cells Contribute to Ectopic Bone Formation in Muscle and Tendon. <i>Stem Cells</i> , 2017, 35, 705-710.	3.5	107
60	Surgical Excision of Heterotopic Ossification Leads to Re-Emergence of Mesenchymal Stem Cell Populations Responsible for Recurrence. <i>Stem Cells Translational Medicine</i> , 2017, 6, 799-806.	3.5	46
61	Combined reflectance and Raman spectroscopy to assess degree of inÂvivo angiogenesis after tissue injury. <i>Journal of Surgical Research</i> , 2017, 209, 174-177.	1.6	4
62	Evaluation of Salivary Cytokines for Diagnosis of both Trauma-Induced and Genetic Heterotopic Ossification. <i>Frontiers in Endocrinology</i> , 2017, 8, 74.	3.5	34
63	Macrophages take rheumatoid arthritis up a "Notch". <i>Science Translational Medicine</i> , 2017, 9, .	13.3	9
64	"TrkA"cking why "no pain, no gain" is the rule for bone formation. <i>Science Translational Medicine</i> , 2017, 9, .	13.3	5
65	"AMP(K)ed up recovery from ischemia-reperfusion injury. <i>Science Translational Medicine</i> , 2017, 9, .	13.3	1
66	Burn injuries cast their nets in blood vessels. <i>Science Translational Medicine</i> , 2017, 9, .	13.3	1
67	Macrophage magic: Why more is better for skin wound healing. <i>Science Translational Medicine</i> , 2017, 9, .	13.3	2
68	Problems with mast transit. <i>Science Translational Medicine</i> , 2017, 9, .	13.3	0
69	Breaking free from the NETs. <i>Science Translational Medicine</i> , 2017, 9, .	13.3	0
70	Early Development of the Mouse Morphome. <i>Journal of Craniofacial Surgery</i> , 2016, 27, 621-626.	0.7	2
71	The Use of CO2 Fractional Photothermolysis for the Treatment of Burn Scars. <i>Journal of Burn Care and Research</i> , 2016, 37, 106-114.	0.5	75
72	Analysis of Bone-Cartilage-Stromal Progenitor Populations in Trauma Induced and Genetic Models of Heterotopic Ossification. <i>Stem Cells</i> , 2016, 34, 1692-1701.	3.5	29

#	ARTICLE	IF	CITATIONS
73	Translational treatment paradigm for managing non- \bar{u} ions secondary to radiation injury utilizing adipose derived stem cells and angiogenic therapy. <i>Head and Neck</i> , 2016, 38, E837-43.	2.0	6
74	Trauma-induced heterotopic bone formation and the role of the immune system. <i>Journal of Trauma and Acute Care Surgery</i> , 2016, 80, 156-165.	2.2	88
75	Local and Circulating Endothelial Cells Undergo Endothelial to Mesenchymal Transition (EndMT) in Response to Musculoskeletal Injury. <i>Scientific Reports</i> , 2016, 6, 32514.	3.4	39
76	The role of the adaptive immune system in burn-induced heterotopic ossification and mesenchymal cell osteogenic differentiation. <i>Journal of Surgical Research</i> , 2016, 206, 53-61.	1.6	21
77	The potential roles for adipose tissue in peripheral nerve regeneration. <i>Microsurgery</i> , 2016, 36, 81-88.	1.3	23
78	Targeted stimulation of retinoic acid receptor- $\bar{3}$ mitigates the formation of heterotopic ossification in an established blast-related traumatic injury model. <i>Bone</i> , 2016, 90, 159-167.	3.0	51
79	Obesity inhibits the osteogenic differentiation of human adipose-derived stem cells. <i>Journal of Translational Medicine</i> , 2016, 14, 27.	4.5	28
80	Inhibition of Hif1 $\bar{1}$ prevents both trauma-induced and genetic heterotopic ossification. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, E338-47.	7.5	186
81	mTOR inhibition and BMP signaling act synergistically to reduce muscle fibrosis and improve myofiber regeneration. <i>Journal of Clinical Investigation</i> , 2016, 1, e89805.	6.6	22
82	Characterization of Cells Isolated from Genetic and Trauma-Induced Heterotopic Ossification. <i>PLoS ONE</i> , 2016, 11, e0156253.	2.5	17
83	Direct Mouse Trauma/Burn Model of Heterotopic Ossification. <i>Journal of Visualized Experiments</i> , 2015, , e52880.	0.3	33
84	Role of Gender in Burn-Induced Heterotopic Ossification and Mesenchymal Cell Osteogenic Differentiation. <i>Plastic and Reconstructive Surgery</i> , 2015, 135, 1631-1641.	1.6	33
85	Risk factors for the development of heterotopic ossification in seriously burned adults. <i>Journal of Trauma and Acute Care Surgery</i> , 2015, 79, 870-876.	2.2	56
86	Characterization of Heterotopic Ossification Using Radiographic Imaging: Evidence for a Paradigm Shift. <i>PLoS ONE</i> , 2015, 10, e0141432.	2.5	14
87	Wound Healing After Thermal Injury Is Improved by Fat and Adipose-Derived Stem Cell Isografts. <i>Journal of Burn Care and Research</i> , 2015, 36, 70-76.	0.5	51
88	Raman spectroscopy for label-free identification of calciphylaxis. <i>Journal of Biomedical Optics</i> , 2015, 20, 080501.	2.8	11
89	Diminished Chondrogenesis and Enhanced Osteoclastogenesis in Leptin-Deficient Diabetic Mice (<i>ob/ob</i>) Impair Pathologic, Trauma-Induced Heterotopic Ossification. <i>Stem Cells and Development</i> , 2015, 24, 2864-2872.	2.1	19
90	BMP signaling mediated by constitutively active Activin type 1 receptor (ACVR1) results in ectopic bone formation localized to distal extremity joints. <i>Developmental Biology</i> , 2015, 400, 202-209.	2.1	43

#	ARTICLE	IF	CITATIONS
91	Role of Anatomical Region and Hypoxia on Angiogenic Markers in Adipose-Derived Stromal Cells. <i>Journal of Reconstructive Microsurgery</i> , 2015, 31, 132-138.	2.0	10
92	Heterotopic Ossification: Basic-Science Principles and Clinical Correlates. <i>Journal of Bone and Joint Surgery - Series A</i> , 2015, 97, 1101-1111.	2.9	303
93	Morphomic analysis as an aid for preoperative risk stratification in patients undergoing major head and neck cancer surgery. <i>Journal of Surgical Research</i> , 2015, 194, 177-184.	1.6	4
94	Photoactivated miR-148b nanoparticle conjugates improve closure of critical size mouse calvarial defects. <i>Acta Biomaterialia</i> , 2015, 12, 166-173.	8.6	55
95	Effects of Aging on Osteogenic Response and Heterotopic Ossification Following Burn Injury in Mice. <i>Stem Cells and Development</i> , 2015, 24, 205-213.	2.1	32
96	Abdominal wall dynamics after component separation hernia repair. <i>Journal of Surgical Research</i> , 2015, 193, 497-503.	1.6	28
97	Bone Tissue Engineering and Regeneration. <i>BioMed Research International</i> , 2014, 2014, 1-2.	1.9	2
98	Adipose-Derived Mesenchymal Stem Cells from Ventral Hernia Repair Patients Demonstrate Decreased Vasculogenesis. <i>BioMed Research International</i> , 2014, 2014, 1-7.	1.9	6
99	Morphomic Analysis for Preoperative Donor Site Risk Assessment in Patients Undergoing Abdominal Perforator Flap Breast Reconstruction: A Proof of Concept Study. <i>Journal of Reconstructive Microsurgery</i> , 2014, 30, 635-640.	2.0	17
100	Treatment of heterotopic ossification through remote ATP hydrolysis. <i>Science Translational Medicine</i> , 2014, 6, 255ra132.	13.3	122
101	Temporalis muscle morphomics: the psoas of the craniofacial skeleton. <i>Journal of Surgical Research</i> , 2014, 186, 246-252.	1.6	66
102	Early detection of heterotopic ossification using near-infrared optical imaging reveals dynamic turnover and progression of mineralization following Achilles tenotomy and burn injury. <i>Journal of Orthopaedic Research</i> , 2014, 32, 1416-1423.	2.4	28
103	Targeting of ALK2, a Receptor for Bone Morphogenetic Proteins, Using the Cre/lox System to Enhance Osseous Regeneration by Adipose-Derived Stem Cells. <i>Stem Cells Translational Medicine</i> , 2014, 3, 1375-1380.	3.5	9
104	Biology and Principles of Scar Management and Burn Reconstruction. <i>Surgical Clinics of North America</i> , 2014, 94, 793-815.	1.6	104
105	Cross-sectional area of the abdomen predicts complication incidence in patients undergoing sternal reconstruction. <i>Journal of Surgical Research</i> , 2014, 192, 670-677.	1.6	15
106	Use of Morphometric Assessment of Body Composition to Quantify Risk of Surgical-Site Infection in Patients Undergoing Component Separation Ventral Hernia Repair. <i>Plastic and Reconstructive Surgery</i> , 2014, 133, 559e-566e.	1.6	32
107	Demystifying the U.S. Food and Drug Administration. <i>Plastic and Reconstructive Surgery</i> , 2014, 133, 1495-1501.	1.6	2
108	Burn Injury Enhances Bone Formation in Heterotopic Ossification Model. <i>Annals of Surgery</i> , 2014, 259, 993-998.	4.4	64

#	ARTICLE	IF	CITATIONS
109	Early detection of burn induced heterotopic ossification using transcutaneous Raman spectroscopy. <i>Bone</i> , 2013, 54, 28-34.	3.0	79
110	Molecular Analysis and Differentiation Capacity of Adipose-Derived Stem Cells from Lymphedema Tissue. <i>Plastic and Reconstructive Surgery</i> , 2013, 132, 580-589.	1.6	39
111	Temporal Morphomics as a Model for Determining Preoperative Risk of Blood Transfusion in Nonsyndromic Craniosynostosis Patients. <i>Plastic and Reconstructive Surgery</i> , 2013, 132, 403e-412e.	1.6	3
112	Outcomes of Tethered Cord Repair With a Layered Soft Tissue Closure. <i>Annals of Plastic Surgery</i> , 2013, 70, 74-78.	1.0	9
113	Novel Temporalis Muscle and Fat Pad Morphomic Analyses Aids Preoperative Risk Evaluation and Outcome Assessment in Nonsyndromic Craniosynostosis. <i>Journal of Craniofacial Surgery</i> , 2013, 24, 250-255.	0.7	16
114	Cranial Suture Biology. <i>Journal of Craniofacial Surgery</i> , 2012, 23, 13-19.	0.7	44
115	Brief Review of Models of Ectopic Bone Formation. <i>Stem Cells and Development</i> , 2012, 21, 655-667.	2.1	172
116	Heterotopic Ossification Following Burn Injury. <i>Journal of Burn Care and Research</i> , 2012, 33, 463-470.	0.5	35
117	Enhancement of Human Adipose-Derived Stromal Cell Angiogenesis through Knockdown of a BMP-2 Inhibitor. <i>Plastic and Reconstructive Surgery</i> , 2012, 129, 53-66.	1.6	28
118	In vivo directed differentiation of pluripotent stem cells for skeletal regeneration. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012, 109, 20379-20384.	7.5	119
119	Acute Skeletal Injury Is Necessary for Human Adipose-Derived Stromal Cell-Mediated Calvarial Regeneration. <i>Plastic and Reconstructive Surgery</i> , 2011, 127, 1118-1129.	1.6	38
120	Differences in Osteogenic Differentiation of Adipose-Derived Stromal Cells from Murine, Canine, and Human Sources In Vitro and In Vivo. <i>Plastic and Reconstructive Surgery</i> , 2011, 128, 373-386.	1.6	51
121	Role of Indian Hedgehog Signaling in Palatal Osteogenesis. <i>Plastic and Reconstructive Surgery</i> , 2011, 127, 1182-1190.	1.6	28
122	Studies in Adipose-Derived Stromal Cells: Migration and Participation in Repair of Cranial Injury after Systemic Injection. <i>Plastic and Reconstructive Surgery</i> , 2011, 127, 1130-1140.	1.6	30
123	Osteogenic Differentiation of Adipose-Derived Stromal Cells in Mouse and Human. <i>Journal of Craniofacial Surgery</i> , 2011, 22, 388-391.	0.7	8
124	CD105 Protein Depletion Enhances Human Adipose-derived Stromal Cell Osteogenesis through Reduction of Transforming Growth Factor β 1 (TGF- β 1) Signaling. <i>Journal of Biological Chemistry</i> , 2011, 286, 39497-39509.	3.5	147
125	Concise Review: Adipose-Derived Stromal Cells for Skeletal Regenerative Medicine. <i>Stem Cells</i> , 2011, 29, 576-582.	3.5	177
126	Dura Mater Stimulates Human Adipose-Derived Stromal Cells to Undergo Bone Formation in Mouse Calvarial Defects. <i>Stem Cells</i> , 2011, 29, 1241-1255.	3.5	96

#	ARTICLE	IF	CITATIONS
127	Nonintegrating Knockdown and Customized Scaffold Design Enhances Human Adipose-Derived Stem Cells in Skeletal Repair. <i>Stem Cells</i> , 2011, 29, 2018-2029.	3.5	59
128	Palatogenesis. <i>Organogenesis</i> , 2011, 7, 242-254.	1.3	41
129	Human Adipose-Derived Stromal Cells Stimulate Autogenous Skeletal Repair via Paracrine Hedgehog Signaling with Calvarial Osteoblasts. <i>Stem Cells and Development</i> , 2011, 20, 243-257.	2.1	57
130	A Comparative Analysis of Tissue Expander Reconstruction of Burned and Unburned Chest and Breasts Using Endoscopic and Open Techniques. <i>Plastic and Reconstructive Surgery</i> , 2010, 125, 547-556.	1.6	21
131	Divergent Modulation of Adipose-Derived Stromal Cell Differentiation by TGF- β 1 Based on Species of Derivation. <i>Plastic and Reconstructive Surgery</i> , 2010, 126, 412-425.	1.6	19
132	Use of Cross-Bone Strut Stabilization for Barrel Stave Osteotomies in Calvarial Reconstruction. <i>Journal of Craniofacial Surgery</i> , 2010, 21, 491-494.	0.7	8
133	Depot-Specific Variation in the Osteogenic and Adipogenic Potential of Human Adipose-Derived Stromal Cells. <i>Plastic and Reconstructive Surgery</i> , 2010, 126, 822-834.	1.6	54
134	Regulation of Human Adipose-Derived Stromal Cell Osteogenic Differentiation by Insulin-Like Growth Factor-1 and Platelet-Derived Growth Factor- β . <i>Plastic and Reconstructive Surgery</i> , 2010, 126, 41-52.	1.6	95
135	Human Adipose Derived Stromal Cells Heal Critical Size Mouse Calvarial Defects. <i>PLoS ONE</i> , 2010, 5, e11177.	2.5	255
136	Residents' Views of Plastic Surgery in the Geriatric Population. <i>Annals of Plastic Surgery</i> , 2009, 63, 314-317.	1.0	4
137	Utilization of the Buccal Fat Pad Flap for Congenital Cleft Palate Repair. <i>Plastic and Reconstructive Surgery</i> , 2009, 123, 1018-1021.	1.6	66
138	Diagnosis and Management of Pressure Ulcers. <i>Clinics in Plastic Surgery</i> , 2007, 34, 735-748.	1.6	14
