#	ARTICLE	IF	CITATIONS
1	Differences in code terminology and frequency of findings in meat inspection of finishing pigs in seven European countries. <i>Food Control</i> , 2022, 132, 108394.	5.5	12
2	Assessment of risk to humans related to Salmonella from bile on pig carcasses. <i>Food Control</i> , 2022, 131, 108415.	5.5	2
3	Determination of an optimal ELISA cut-off for the diagnosis of <i>Toxoplasma gondii</i> infection in pigs using Bayesian latent class modelling of data from multiple diagnostic tests. <i>Preventive Veterinary Medicine</i> , 2022, 201, 105606.	1.9	8
4	Investigating ways of detecting and handling findings indicating prior septicaemia in bovines. <i>Food Control</i> , 2022, 137, 108901.	5.5	0
5	Modernising meat inspection of pigs – A review of the Danish process from 2006-2020. <i>Food Control</i> , 2021, 119, 107450.	5.5	15
6	Drivers, opportunities, and challenges of the European risk-based meat safety assurance system. <i>Food Control</i> , 2021, 124, 107870.	5.5	59
7	A longitudinal study of <i>Toxoplasma gondii</i> seroconversion on four large Danish sow farms. <i>Veterinary Parasitology</i> , 2021, 295, 109460.	1.8	2
8	Assessment of Evaluation Tools for Integrated Surveillance of Antimicrobial Use and Resistance Based on Selected Case Studies. <i>Frontiers in Veterinary Science</i> , 2021, 8, 620998.	2.2	22
9	Challenges and opportunities in the implementation of new meat inspection systems in Europe. <i>Trends in Food Science and Technology</i> , 2021, 116, 460-467.	15.1	17
10	Assessing the value of bacteriological examination as a diagnostic tool in relation to meat inspection in cattle. <i>International Journal of Food Microbiology</i> , 2021, 338, 108997.	4.7	4
11	Herd typologies based on multivariate analysis of biosecurity, productivity, antimicrobial and vaccine use data from Danish sow herds. <i>Preventive Veterinary Medicine</i> , 2020, 181, 104487.	1.9	15
12	Risk-based surveillance for meat-borne parasites. <i>Experimental Parasitology</i> , 2020, 208, 107808.	1.2	18
13	The Use of Antimicrobials in Italian Heavy Pig Fattening Farms. <i>Antibiotics</i> , 2020, 9, 892.	3.7	14
14	Classification of Vertebral Osteomyelitis and Associated Judgment Applied during Post-Mortem Inspection of Swine Carcasses in Portugal. <i>Foods</i> , 2020, 9, 1502.	4.3	10
15	Seroprevalence of <i>Toxoplasma gondii</i> infection in sows and finishers from conventional and organic herds in Denmark: Implications for potential future serological surveillance. <i>Preventive Veterinary Medicine</i> , 2020, 185, 105149.	1.9	10
16	Evaluating integrated surveillance of antimicrobial resistance: experiences from use of three evaluation tools. <i>Clinical Microbiology and Infection</i> , 2020, 26, 1606-1611.	6.0	21
17	From traditional meat inspection to development of meat safety assurance programs in pig abattoirs – The European situation. <i>Food Control</i> , 2019, 106, 106705.	5.5	34
18	Additive Bayesian Network analysis of associations between antimicrobial consumption, biosecurity, vaccination and productivity in Danish sow herds. <i>Preventive Veterinary Medicine</i> , 2019, 169, 104702.	1.9	6

#	ARTICLE	IF	CITATIONS
19	International Commission on Trichinellosis: Recommendations on pre-harvest control of <i>Trichinella</i> in food animals. <i>Food and Waterborne Parasitology</i> , 2019, 15, e00039.	2.7	10
20	Seroprevalence of <i>Toxoplasma gondii</i> in domestic pigs, sheep, cattle, wild boars, and moose in the Nordic-Baltic region: A systematic review and meta-analysis. <i>Parasite Epidemiology and Control</i> , 2019, 5, e00100.	1.8	39
21	Comparison of international legislation and standards on veterinary drug residues in food of animal origin. <i>Journal of Public Health Policy</i> , 2019, 40, 308-341.	2.0	9
22	A register-based study on associations between vaccination, antimicrobial use and productivity in conventional Danish finisher pig herds during 2011 to 2014. <i>Preventive Veterinary Medicine</i> , 2019, 164, 33-40.	1.9	9
23	Assessing the Adoption of Recommended Standards, Novel Approaches, and Best Practices for Animal Health Surveillance by Decision Makers in Europe. <i>Frontiers in Veterinary Science</i> , 2019, 6, 375.	2.2	0
24	Improving antimicrobial residue surveillance in finishing pigs by risk-based sampling designs. <i>Food Control</i> , 2019, 98, 126-132.	5.5	2
25	Modernizing the antimicrobial residue monitoring programs for pig meat in Europe – The balance between flexibility and harmonization. <i>Food Control</i> , 2018, 86, 403-414.	5.5	16
26	Expert opinion on livestock antimicrobial usage indications and patterns in Denmark, Portugal and Switzerland. <i>Veterinary Record Open</i> , 2018, 5, e000288.	1.0	7
27	Veterinary Expert Opinion on Potential Drivers and Opportunities for Changing Antimicrobial Usage Practices in Livestock in Denmark, Portugal, and Switzerland. <i>Frontiers in Veterinary Science</i> , 2018, 5, 29.	2.2	27
28	Comparison of Alternative Meat Inspection Regimes for Pigs From Non-Controlled Housing – Considering the Cost of Error. <i>Frontiers in Veterinary Science</i> , 2018, 5, 92.	2.2	7
29	Sero-prevalence of <i>Toxoplasma gondii</i> in Danish pigs. <i>Veterinary Parasitology: Regional Studies and Reports</i> , 2017, 10, 136-138.	0.5	11
30	Assessment of the Risk to Public Health due to Use of Antimicrobials in Pigs – An Example of Pleuromutilins in Denmark. <i>Frontiers in Veterinary Science</i> , 2017, 4, 74.	2.2	27
31	Comparison of the antimicrobial consumption in weaning pigs in Danish sow herds with different vaccine purchase patterns during 2013. <i>Porcine Health Management</i> , 2016, 2, 23.	2.6	24
32	Comparison of risk-based versus random sampling in the monitoring of antimicrobial residues in Danish finishing pigs. <i>Preventive Veterinary Medicine</i> , 2016, 128, 87-94.	1.9	15
33	The costs of preventive activities for exotic contagious diseases – A Danish case study of foot and mouth disease and swine fever. <i>Preventive Veterinary Medicine</i> , 2016, 131, 111-120.	1.9	7
34	Ensuring a negligible risk of <i>Trichinella</i> in pig farming from a control perspective. <i>Veterinary Parasitology</i> , 2016, 231, 137-144.	1.8	13
35	Spatio-temporal modeling of the invasive potential of wild boar – a conflict-prone species – using multi-source citizen science data. <i>Preventive Veterinary Medicine</i> , 2016, 124, 34-44.	1.9	29
36	No Clear Effect of Initiating Vaccination against Common Endemic Infections on the Amounts of Prescribed Antimicrobials for Danish Weaner and Finishing Pigs during 2007 – 2013. <i>Frontiers in Veterinary Science</i> , 2016, 3, 120.	2.2	23

#	ARTICLE	IF	CITATIONS
37	A comparison between lesions found during meat inspection of finishing pigs raised under organic/free-range conditions and conventional, indoor conditions. <i>Porcine Health Management</i> , 2015, 1, 4.	2.6	30
38	Comparison of output-based approaches used to substantiate bovine tuberculosis free status in Danish cattle herds. <i>Preventive Veterinary Medicine</i> , 2015, 121, 21-29.	1.9	13
39	Assessment of human health risk associated with pyaemia in Danish finisher pigs when conducting visual-only inspection of the lungs. <i>International Journal of Food Microbiology</i> , 2015, 196, 32-39.	4.7	15
40	Risk-based surveillance of antimicrobial residues in pigs – Identification of potential risk indicators. <i>Preventive Veterinary Medicine</i> , 2014, 114, 88-95.	1.9	12
41	A human health risk assessment for macrolide-resistant <i>Campylobacter</i> associated with the use of macrolides in Danish pig production. <i>Preventive Veterinary Medicine</i> , 2008, 83, 115-129.	1.9	43
42	Towards a risk-based surveillance for <i>Trichinella</i> spp. in Danish pig production. <i>Preventive Veterinary Medicine</i> , 2008, 87, 340-357.	1.9	48
43	Longitudinal Study of <i>Salmonella enterica</i> Serotype Typhimurium Infection in Three Danish Farrow-to-Finish Swine Herds. <i>Journal of Clinical Microbiology</i> , 2003, 41, 2282-2288.	3.9	141
