

Andrea Minuti

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2690410/andrea-minuti-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
77	Effect of a feed additive containing yeast cell walls, clove and coriander essential oils and Hibiscus sabdariffa administered to mid-lactating dairy cows on productive performance, rumen fluid composition and metabolic conditions. <i>Italian Journal of Animal Science</i> , 2022 , 21, 86-96	2.2	
76	In-line near-infrared analysis of milk coupled with machine learning methods for the daily prediction of blood metabolic profile in dairy cattle.. <i>Scientific Reports</i> , 2022 , 12, 8058	4.9	2
75	The Transition Period Updated: A Review of the New Insights into the Adaptation of Dairy Cows to the New Lactation. <i>Dairy</i> , 2021 , 2, 617-636	2.6	1
74	Suitability of rumination time during the first week after calving for detecting metabolic status and lactation performance in simmental dairy cows: a cluster-analytic approach. <i>Italian Journal of Animal Science</i> , 2021 , 20, 1909-1923	2.2	0
73	Drying-off cows with low somatic cell count with or without antibiotic therapy: A pilot study addressing the effects on immunometabolism and performance in the subsequent lactation. <i>Livestock Science</i> , 2021 , 254, 104740	1.7	1
72	Genetic Regulation of Biomarkers as Stress Proxies in Dairy Cows. <i>Genes</i> , 2021 , 12,	4.2	2
71	Changes of Plasma Analytes Reflecting Metabolic Adaptation to the Different Stages of the Lactation Cycle in Healthy Multiparous Holstein Dairy Cows Raised in High-Welfare Conditions. <i>Animals</i> , 2021 , 11,	3.1	3
70	Plasma albumin-to-globulin ratio before dry-off as a possible index of inflammatory status and performance in the subsequent lactation in dairy cows. <i>Journal of Dairy Science</i> , 2021 , 104, 8228-8242	4	6
69	Age-related metabolic changes of pre-weaned Simmental calves fed whole bulk milk and ad libitum calf starter. <i>Research in Veterinary Science</i> , 2021 , 135, 237-243	2.5	2
68	Effects of supplementing <i>Saccharomyces cerevisiae</i> fermentation products to dairy cows from the day of dry-off through early lactation. <i>Journal of Dairy Science</i> , 2021 , 104, 11673-11685	4	0
67	Gene network expression of whole blood leukocytes in dairy cows with different milk yield at dry-off. <i>PLoS ONE</i> , 2021 , 16, e0260745	3.7	1
66	Effects of Whole Plant Homogenate on Lipid Metabolism, Inflammatory Conditions and Liver Function of Dairy Cows during the Transition Period. <i>Animals</i> , 2020 , 10,	3.1	4
65	Effect of litter size on prepartum metabolic and amino acidic profile in rabbit does. <i>Animal</i> , 2020 , 14, 2109-2115	3.1	3
64	Technical note: Capillary electrophoresis as a rapid test for the quantification of immunoglobulin G in serum of newborn lambs. <i>Journal of Dairy Science</i> , 2020 , 103, 6583-6587	4	2
63	Short communication: Inflammation, migration, and cell-cell interaction-related gene network expression in leukocytes is enhanced in Simmental compared with Holstein dairy cows after calving. <i>Journal of Dairy Science</i> , 2020 , 103, 1908-1913	4	9
62	Methyl donor supply to heat stress-challenged polymorphonuclear leukocytes from lactating Holstein cows enhances 1-carbon metabolism, immune response, and cytoprotective gene network abundance. <i>Journal of Dairy Science</i> , 2020 , 103, 10477-10493	4	2
61	Evaluation of circulating leukocyte transcriptome and its relationship with immune function and blood markers in dairy cows during the transition period. <i>Functional and Integrative Genomics</i> , 2020 , 20, 293-305	3.8	12

60	Post-weaning rumen fermentation of Simmental calves in response to weaning age and relationship with rumination time measured by the Hr-Tag rumination-monitoring system. <i>Livestock Science</i> , 2020 , 232, 103918	1.7	5
59	Prepartum dietary energy intake alters adipose tissue transcriptome profiles during the periparturient period in Holstein dairy cows. <i>Journal of Animal Science and Biotechnology</i> , 2020 , 11, 1	6	32
58	Inflammatory status and metabolic changes at dry-off in high-yield dairy cows. <i>Italian Journal of Animal Science</i> , 2020 , 19, 51-65	2.2	11
57	Association of postpartum uterine diseases with lying time and metabolic profiles of multiparous Holstein dairy cows in the transition period. <i>Veterinary Journal</i> , 2020 , 263, 105533	2.5	5
56	A mycotoxin-deactivating feed additive counteracts the adverse effects of regular levels of Fusarium mycotoxins in dairy cows. <i>Journal of Dairy Science</i> , 2020 , 103, 11314-11331	4	10
55	The effect of parity number on the metabolism, inflammation, and oxidative status of dairy sheep during the transition period. <i>Journal of Dairy Science</i> , 2020 , 103, 8564-8575	4	6
54	Role of nutraceuticals during the transition period of dairy cows: a review. <i>Journal of Animal Science and Biotechnology</i> , 2020 , 11, 96	6	11
53	Pegbovigrastim Treatment around Parturition Enhances Postpartum Immune Response Gene Network Expression of whole Blood Leukocytes in Holstein and Simmental Cows. <i>Animals</i> , 2020 , 10,	3.1	6
52	Administration of an Immune Stimulant during the Transition Period Improved Lipid Metabolism and Rumination without Affecting Inflammatory Status. <i>Animals</i> , 2019 , 9,	3.1	2
51	Exploring Fourier transform mid-infra-red spectrometry to predict biochemical parameters in horse blood. <i>Italian Journal of Animal Science</i> , 2019 , 18, 1223-1230	2.2	1
50	Monensin controlled-release capsule administered in late-pregnancy differentially affects rumination patterns, metabolic status, and cheese-making properties of the milk in primiparous and multiparous cows. <i>Italian Journal of Animal Science</i> , 2019 , 18, 1271-1283	2.2	4
49	Application of a NIR device for precision feeding in dairy farms: effect on metabolic conditions and milk production. <i>Italian Journal of Animal Science</i> , 2019 , 18, 754-765	2.2	7
48	The role of altered immune function during the dry period in promoting the development of subclinical ketosis in early lactation. <i>Journal of Dairy Science</i> , 2019 , 102, 9241-9258	4	23
47	Immunometabolic status and productive performance differences between periparturient Simmental and Holstein dairy cows in response to pegbovigrastim. <i>Journal of Dairy Science</i> , 2019 , 102, 9312-9327	4	19
46	A heritable subset of the core rumen microbiome dictates dairy cow productivity and emissions. <i>Science Advances</i> , 2019 , 5, eaav8391	14.3	87
45	Effect of Pegbovigrastim on Hematological Profile of Simmental Dairy Cows during the Transition Period. <i>Animals</i> , 2019 , 9,	3.1	5
44	Effects of Linoleic Acid on Gut-Derived DSM 20213: A Transcriptomic Approach. <i>Microorganisms</i> , 2019 , 7,	4.9	5
43	Effects of defoliation on whole-plant maize characteristics as forage and energy crop. <i>Grass and Forage Science</i> , 2019 , 74, 65-77	2.3	1

42	Daily rumination pattern recorded by an automatic rumination-monitoring system in pre-weaned calves fed whole bulk milk and ad libitum calf starter. <i>Livestock Science</i> , 2018 , 212, 127-130	1.7	11
41	Effect of hot season on blood parameters, fecal fermentative parameters, and occurrence of <i>Clostridium tyrobutyricum</i> spores in feces of lactating dairy cows. <i>Journal of Dairy Science</i> , 2018 , 101, 4437-4447	4	7
40	Plasma fructosamine during the transition period and its relationship with energy metabolism and inflammation biomarkers in dairy cows. <i>Livestock Science</i> , 2018 , 216, 138-147	1.7	12
39	Innate immune responses to metabolic stress can be detected in rumen fluids. <i>Research in Veterinary Science</i> , 2018 , 117, 65-73	2.5	10
38	What we have lost: Mastitis resistance in Holstein Friesians and in a local cattle breed. <i>Research in Veterinary Science</i> , 2018 , 116, 88-98	2.5	38
37	Assessment of the innate immune response in the periparturient cow. <i>Research in Veterinary Science</i> , 2018 , 116, 47-54	2.5	54
36	Differential effects of coconut versus soy oil on gut microbiota composition and predicted metabolic function in adult mice. <i>BMC Genomics</i> , 2018 , 19, 808	4.5	26
35	Dietary supplement of conjugated linoleic acids or polyunsaturated fatty acids suppressed the mobilization of body fat reserves in dairy cows at early lactation through different pathways. <i>Journal of Dairy Science</i> , 2018 , 101, 7954-7970	4	8
34	Supplementation with rumen-protected methionine or choline during the transition period influences whole-blood immune response in periparturient dairy cows. <i>Journal of Dairy Science</i> , 2017 , 100, 3958-3968	4	31
33	Reference intervals for hematological and biochemical parameters, acute phase proteins and markers of oxidation in Holstein dairy cows around 3 and 30days after calving. <i>Research in Veterinary Science</i> , 2017 , 114, 322-331	2.5	11
32	Breed and adaptive response modulate bovine peripheral blood cells' transcriptome. <i>Journal of Animal Science and Biotechnology</i> , 2017 , 8, 11	6	3
31	Impact of cystic fibrosis disease on archaea and bacteria composition of gut microbiota. <i>FEMS Microbiology Ecology</i> , 2017 , 93,	4.3	20
30	Administration of Aloe arborescens homogenate to cattle: interaction with rumen fermentation and gut absorption of aloin. <i>Italian Journal of Animal Science</i> , 2016 , 15, 233-240	2.2	5
29	Assessment of the main plasma parameters included in a metabolic profile of dairy cow based on Fourier Transform mid-infrared spectroscopy: preliminary results. <i>BMC Veterinary Research</i> , 2016 , 12, 4	2.7	36
28	1716 Effects of protected methionine supplementation during dry period of seasonally synchronized goats on blood parameters and the subsequent lactation. <i>Journal of Animal Science</i> , 2016 , 94, 836-836	0.7	2
27	Postoperative Changes in Fecal Bacterial Communities and Fermentation Products in Obese Patients Undergoing Bilio-Intestinal Bypass. <i>Frontiers in Microbiology</i> , 2016 , 7, 200	5.7	67
26	Abundance of ruminal bacteria, epithelial gene expression, and systemic biomarkers of metabolism and inflammation are altered during the peripartal period in dairy cows. <i>Journal of Dairy Science</i> , 2015 , 98, 8940-51	4	48
25	Acute mammary and liver transcriptome responses after an intramammary <i>Escherichia coli</i> lipopolysaccharide challenge in postpartal dairy cows. <i>Physiological Reports</i> , 2015 , 3, e12388	2.6	17

24	Metabolic and biochemical changes in plasma of the periparturient rabbit does with different litter size. <i>Animal</i> , 2015 , 9, 614-21	3.1	7
23	Pro-Inflammatory Cytokine Profile in Dairy Cows: Consequences for New Lactation. <i>Italian Journal of Animal Science</i> , 2015 , 14, 3862	2.2	46
22	Assessment of immune response in periparturient dairy cows using ex vivo whole blood stimulation assay with lipopolysaccharides and carrageenan skin test. <i>Veterinary Immunology and Immunopathology</i> , 2015 , 165, 119-26	2	28
21	Immune system, inflammation and nutrition in dairy cattle. <i>Animal Production Science</i> , 2015 , 55, 943	1.4	30
20	Early post-partum hematological changes in Holstein dairy cows with retained placenta. <i>Animal Reproduction Science</i> , 2015 , 152, 17-25	2.1	15
19	Gut response induced by weaning in piglet features marked changes in immune and inflammatory response. <i>Functional and Integrative Genomics</i> , 2014 , 14, 657-71	3.8	36
18	Estimation of dry matter intake by n-alkanes in dairy cows fed TMR: effect of dosing technique and faecal collection time. <i>Animal Production Science</i> , 2014 , 54, 1747	1.4	5
17	Can a single rumen sample really diagnose SARA in commercial farms?. <i>Animal Production Science</i> , 2014 , 54, 1268	1.4	4
16	Experimental acute rumen acidosis in sheep: consequences on clinical, rumen, and gastrointestinal permeability conditions and blood chemistry. <i>Journal of Animal Science</i> , 2014 , 92, 3966-77	0.7	56
15	Effect of dietary starch level and high rumen-undegradable protein on endocrine-metabolic status, milk yield, and milk composition in dairy cows during early and late lactation. <i>Journal of Dairy Science</i> , 2014 , 97, 7788-803	4	24
14	Effects of Hybrid and Maturity Stage on in Vitro Rumen Digestibility of Immature Corn Grain. <i>Italian Journal of Animal Science</i> , 2014 , 13, 3149	2.2	2
13	Rumination time around calving: an early signal to detect cows at greater risk of disease. <i>Journal of Dairy Science</i> , 2014 , 97, 3635-47	4	71
12	Nutrition and Ageing. <i>Studies in Health Technology and Informatics</i> , 2014 , 203, 112-21	0.5	1
11	Relation of inflammation and liver function with the plasma cortisol response to adrenocorticotropin in early lactating dairy cows. <i>Journal of Dairy Science</i> , 2013 , 96, 5712-22	4	35
10	The nutrigenomic investigation of C57BL/6N mice fed a short-term high-fat diet highlights early changes in clock genes expression. <i>Genes and Nutrition</i> , 2013 , 8, 465-74	4.3	7
9	In Vitro Rumen Fermentation Characteristics of Some Naturally Occurring and Synthetic Sugars. <i>Italian Journal of Animal Science</i> , 2013 , 12, e57	2.2	13
8	Assessment of gastrointestinal permeability by lactulose test in sheep after repeated indomethacin treatment. <i>Journal of Animal Science</i> , 2013 , 91, 5646-53	0.7	10
7	Short-term modifications in the distal gut microbiota of weaning mice induced by a high-fat diet. <i>Microbiology (United Kingdom)</i> , 2012 , 158, 983-992	2.9	24

6	In vivo expansion of the mammary stem/ progenitor cell population by xanthosine infusion. <i>Experimental Biology and Medicine</i> , 2009 , 234, 475-82	3.7	38
5	Adrenal responsiveness to a low-dose ACTH challenge in early and late lactating dairy cows. <i>Italian Journal of Animal Science</i> , 2009 , 8, 661-663	2.2	4
4	In vitro digestibility of field pea as influenced by processing methods. <i>Italian Journal of Animal Science</i> , 2009 , 8, 259-261	2.2	2
3	Change of digesta passage rate in dairy cows after different acute stress situations. <i>Italian Journal of Animal Science</i> , 2007 , 6, 377-379	2.2	6
2	Genetic and environmental influences on in vitro digestibility of alfalfa. <i>Italian Journal of Animal Science</i> , 2007 , 6, 251-253	2.2	2
1	Variations of some blood parameters in rabbit reared under different environmental conditions. <i>Italian Journal of Animal Science</i> , 2005 , 4, 535-537	2.2	2
