Frank Papenmeier

List of Publications by Year
in descending order

45 papers	654 citations	623734 14 h-index	642732 23 g-index
45 all docs	45 docs citations	45 times ranked	446 citing authors

#	ARTICLE	IF	CITATIONS
1	Studying visual attention using the multiple object tracking paradigm: A tutorial review. Attention, Perception, and Psychophysics, 2017, 79, 1255-1274.	1.3	84
2	Visual target detection is impaired at event boundaries. Visual Cognition, 2012, 20, 848-864.	1.6	49
3	Changes in situation models modulate processes of event perception in audiovisual narratives.. Journal of Experimental Psychology: Learning Memory and Cognition, 2014, 40, 1377-1388.	0.9	48
4	Brain activation during spatial updating and attentive tracking of moving targets. Brain and Cognition, 2012, 78, 105-113.	1.8	41
5	DynAOI: A tool for matching eye-movement data with dynamic areas of interest in animations and movies. Behavior Research Methods, 2010, 42, 179-187.	4.0	37
6	Eye movements across viewpoint changes in multiple object tracking. Visual Cognition, 2010, 18, 1368-1391.	1.6	36
7	Tracking by location and features: Object correspondence across spatiotemporal discontinuities during multiple object tracking.. Journal of Experimental Psychology: Human Perception and Performance, 2014, 40, 159-171.	0.9	32
8	Not FLEXible enough: Exploring the temporal dynamics of attentional reallocations with the multiple object tracking paradigm.. Journal of Experimental Psychology: Human Perception and Performance, 2016, 42, 776-787.	0.9	22
9	Fandom Biases Retrospective Judgments Not Perception. Scientific Reports, 2017, 7, 43083.	3.3	21
10	Interface and interaction design: How mobile touch devices foster cognitive offloading. Computers in Human Behavior, 2020, 108, 106317.	8.5	20
11	Consequences of cognitive offloading: Boosting performance but diminishing memory. Quarterly Journal of Experimental Psychology, 2021, 74, 1477-1496.	1.1	20
12	Spatial updating of dynamic scenes: Tracking multiple invisible objects across viewpoint changes. Attention, Perception, and Psychophysics, 2010, 72, 628-636.	1.3	17
13	Continuous visual cues trigger automatic spatial target updating in dynamic scenes. Cognition, 2011, 121, 73-82.	2.2	17
14	Goal saliency boosts infants' action prediction for human manual actions, but not for mechanical claws. , 2016, 44, 29-37.		17
15	Representation of dynamic spatial configurations in visual short-term memory. Attention, Perception, and Psychophysics, 2012, 74, 397-415.	1.3	16
16	Object-Based Integration of Motion Information during Attentive Tracking. Perception, 2013, 42, 119-121.	1.2	15
17	Individual differences in visual attention: A short, reliable, open-source, and multilingual test of multiple object tracking in PsychoPy. Behavior Research Methods, 2020, 52, 2556-2566.	4.0	15
18	From metacognitive beliefs to strategy selection: does fake performance feedback influence cognitive offloading?. Psychological Research, 2021, 85, 2654-2666.	1.7	12

#	Article	IF	Citations
19	It is time to integrate: The temporal dynamics of object motion and texture motion integration in multiple object tracking. Vision Research, 2013, 76, 25-30.	1.4	11
20	Learning from Animations: From 2D to 3D?. , 2017, , 31-49.		11
21	A Single Unexpected Change in Target- but Not Distractor Motion Impairs Multiple Object Tracking. I-Perception, 2013, 4, 81-83.	1.4	9
22	Viewpoint matters: Exploring the involvement of reference frames in multiple object tracking from a developmental perspective. Cognitive Development, 2016, 37, 1-8.	1.3	9
23	Human Understanding of Robot Motion: The Role of Velocity and Orientation. International Journal of Social Robotics, 2019, 11, 75-88.	4.6	9
24	Cross-codal integration of bridging-event information in narrative understanding. Memory and Cognition, 2020, 48, 942-956.	1.6	9
25	Filling the gap despite full attention: the role of fast backward inferences for event completion. Cognitive Research: Principles and Implications, 2019, 4, 3.	2.0	8
26	Construction and updating of event models in auditory event processing.. Journal of Experimental Psychology: Learning Memory and Cognition, 2018, 44, 307-320.	0.9	8
27	Spatial Reference in Multiple Object Tracking. Experimental Psychology, 2012, 59, 163-173.	0.7	7
28	Distractor Locations Influence Multiple Object Tracking Beyond Interobject Spacing. Experimental Psychology, 2015, 62, 170-180.	0.7	7
29	Seeing the unseen? Illusory causal filling in FIFA referees, players, and novices. Cognitive Research: Principles and Implications, 2016, 1, 7.	2.0	6
30	Event perception: From event boundaries to ongoing events.. Journal of Applied Research in Memory and Cognition, 2017, 6, 129-132.	1.1	6
31	Reorganization of spatial configurations in visual working memory. Memory and Cognition, 2019, 47, 1469-1480.	1.6	6
32	Viewpoint-dependent representation of contextual information in visual working memory. Attention, Perception, and Psychophysics, 2014, 76, 663-668.	1.3	5
33	If you watch it move, you'll recognize it in 3D: Transfer of depth cues between encoding and retrieval. Acta Psychologica, 2016, 164, 90-95.	1.5	5
34	Do group ensemble statistics bias visual working memory for individual items? A registered replication of Brady and Alvarez (2011). Attention, Perception, and Psychophysics, 2021, 83, 1329-1336.	1.3	5
35	Linguistic Information in Auditory Dynamic Events Contributes to the Detection of Fine, Not Coarse Event Boundaries. , 2019, 15, 30-40.		5
36	Action goal changes caused by agents and patients both induce global updating of event models.. Journal of Experimental Psychology: Learning Memory and Cognition, 2019, 45, 1441-1454.	0.9	3

#	Article	IF	Citations
37	Reorganization of spatial configurations in visual working memory: A matter of set size?. PLoS ONE, 2019, 14, e0225068.	2.5	2
38	Upside-down: Perceived space affects object-based attention.. Journal of Experimental Psychology: Human Perception and Performance, 2017, 43, 1269-1274.	0.9	2
39	(Re-)organisation of spatial configurations in visual working memory: The fate of objects rendered relevant or irrelevant by selective attention. Quarterly Journal of Experimental Psychology, 2020, 73, 2246-2259.	1.1	1
40	Framing cognitive offloading in terms of gains or losses: achieving a more optimal use of reminders. Cognitive Research: Principles and Implications, 2022, 7, .	2.0	1
41	Exploring the temporal dynamics of attentional reallocations with the multiple object tracking paradigm. Journal of Vision, 2016, 16, 1262.	0.3	0
42	Eye Movements Are Required to Process Spatial Configurations in Visual Working Memory. Journal of Vision, 2019, 19, 202a.	0.3	0
43	Eye Movements Support Processing Spatial Configurations in Visual Working Memory. Journal of Vision, 2020, 20, 3.	0.3	0
44	Is it art? Effects of framing images as art versus non-art on gaze behavior and aesthetic judgments.. Psychology of Aesthetics, Creativity, and the Arts, 0, , .	1.3	0
45	Stereo viewing upsets cinematic continuity: Filmic cuts are more salient in 3D than in 2D movies.. Psychology of Aesthetics, Creativity, and the Arts, 0, , .	1.3	0
