

John Wainwright

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2720839/john-wainwright-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

110
papers

#	Paper	IF	Citations
110	Two classes of functional connectivity in dynamical processes in networks. <i>Journal of the Royal Society Interface</i> , 2021 , 18, 20210486	4.1	0
109	The Seasonality of Wetland and Riparian Taskscapes at Atalhyk . <i>Near Eastern Archaeology</i> , 2020 , 83, 98-109	0.5	7
108	What do models tell us about water and sediment connectivity?. <i>Geomorphology</i> , 2020 , 367, 107300	4.3	22
107	A new framework for integrated, holistic, and transparent evaluation of inter-basin water transfer schemes. <i>Science of the Total Environment</i> , 2020 , 721, 137646	10.2	14
106	Atalhyk and Its Landscapes. <i>Near Eastern Archaeology</i> , 2020 , 83, 88-97	0.5	4
105	The problem of underpowered rivers. <i>Earth Surface Processes and Landforms</i> , 2020 , 45, 3869-3878	3.7	1
104	Toward understanding complexity of sediment dynamics in geomorphic systems. <i>Geomorphology</i> , 2019 , 330, 129-132	4.3	1
103	Multispectral Contrast of Archaeological Features: A Quantitative Evaluation. <i>Remote Sensing</i> , 2019 , 11, 913	5	19
102	Teleconnections and environmental determinism: Was there really a climate-driven collapse at Late Neolithic Atalhyk ?. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019 , 116, 3343-3344	11.5	7
101	Communicating risks to infrastructure due to soil erosion: A bottom-up approach. <i>Land Degradation and Development</i> , 2018 , 29, 1282-1294	4.4	11
100	Better models are more effectively connected models. <i>Earth Surface Processes and Landforms</i> , 2018 , 43, 1355-1360	3.7	13
99	The fate of suspended sediment and particulate organic carbon in transit through the channels of a river catchment. <i>Hydrological Processes</i> , 2018 , 32, 146-159	3.3	10
98	Virtual velocity of sand transport in water. <i>Earth Surface Processes and Landforms</i> , 2018 , 43, 755-761	3.7	3
97	Applying Pattern Oriented Sampling in current fieldwork practice to enable more effective model evaluation in fluvial landscape evolution research. <i>Earth Surface Processes and Landforms</i> , 2018 , 43, 2964-2980	3.7	7
96	The geomorphology of the Anthropocene: emergence, status and implications. <i>Earth Surface Processes and Landforms</i> , 2017 , 42, 71-90	3.7	140
95	Palaeoenvironmental reconstruction of the alluvial landscape of Neolithic Atalhyk , central southern Turkey: The implications for early agriculture and responses to environmental change. <i>Journal of Archaeological Science</i> , 2017 , 87, 30-43	2.9	28
94	Drift-dependent changes in iceberg size-frequency distributions. <i>Scientific Reports</i> , 2017 , 7, 15991	4.9	11

93	Overland flow resistances on varying slope gradients and partitioning on grassed slopes under simulated rainfall. <i>Water Resources Research</i> , 2016 , 52, 2490-2512	5.4	40
92	Seed-bank structure and plant-recruitment conditions regulate the dynamics of a grassland-shrubland Chihuahuan ecotone. <i>Ecology</i> , 2016 , 97, 2303-2318	4.6	24
91	Particle selectivity of sediment deposited over grass barriers and the effect of rainfall. <i>Water Resources Research</i> , 2016 , 52, 7963-7979	5.4	16
90	Connectivity in dryland landscapes: shifting concepts of spatial interactions. <i>Frontiers in Ecology and the Environment</i> , 2015 , 13, 20-27	5.5	124
89	What is suspended sediment?. <i>Earth Surface Processes and Landforms</i> , 2015 , 40, 1417-1420	3.7	22
88	The concept of transport capacity in geomorphology. <i>Reviews of Geophysics</i> , 2015 , 53, 1155-1202	23.1	39
87	Sediment connectivity: a framework for understanding sediment transfer at multiple scales. <i>Earth Surface Processes and Landforms</i> , 2015 , 40, 177-188	3.7	270
86	Experimental investigation into the impact of a liquid droplet onto a granular bed using three-dimensional, time-resolved, particle tracking. <i>Physical Review E</i> , 2014 , 89, 032201	2.4	39
85	The use of RFID in soil-erosion research. <i>Earth Surface Processes and Landforms</i> , 2014 , 39, n/a-n/a	3.7	2
84	Modelling Landscape Evolution 2013 , 309-331		5
83	Perceptions of desert landscape: a case study in southern New Mexico. <i>Area</i> , 2013 , 45, 459-468	1.7	1
82	The Anthropocene: is there a geomorphological case?. <i>Earth Surface Processes and Landforms</i> , 2013 , 38, 431-434	3.7	67
81	Finding Simplicity in Complexity in Biogeochemical Modelling 2013 , 277-289		4
80	Modelling and Model Building 2013 , 7-26		15
79	Time Series: Analysis and Modelling 2013 , 27-43		1
78	Non-Linear Dynamics, Self-Organization and Cellular Automata Models 2013 , 45-67		2
77	Spatial Modelling and Scaling Issues 2013 , 69-90		5
76	Environmental Applications of Computational Fluid Dynamics 2013 , 91-109		2

75	A new approach for simulating the redistribution of soil particles by water erosion: A marker-in-cell model. <i>Journal of Geophysical Research</i> , 2012 , 117, n/a-n/a		15
74	Linking runoff and erosion dynamics to nutrient fluxes in a degrading dryland landscape. <i>Journal of Geophysical Research</i> , 2012 , 117, n/a-n/a		15
73	Invasion of shrublands by exotic grasses: ecohydrological consequences in cold versus warm deserts. <i>Ecohydrology</i> , 2012 , 5, 160-173	2.5	61
72	Linking environmental regimes, space and time: Interpretations of structural and functional connectivity. <i>Geomorphology</i> , 2011 , 126, 387-404	4.3	216
71	Slope Systems 2011 , 209-233		1
70	Runoff Generation, Overland Flow and Erosion on Hillslopes 2011 , 235-267		9
69	Making connections: changing sediment sources and sinks in an upland catchment. <i>Earth Surface Processes and Landforms</i> , 2011 , 36, 1090-1104	3.7	29
68	Nitrogen and phosphorus dynamics during runoff events over a transition from grassland to shrubland in the south-western United States. <i>Hydrological Processes</i> , 2011 , 25, 1-17	3.3	25
67	Biotic and Abiotic Changes in Ecosystem Structure over a Shrub-Encroachment Gradient in the Southwestern USA. <i>Ecosystems</i> , 2010 , 13, 1239-1255	3.9	49
66	Mind, the gap in landscape-evolution modelling. <i>Earth Surface Processes and Landforms</i> , 2010 , 35, n/a-n/a	3.7	6
65	Using sediment travel distance to estimate medium-term erosion rates: a 16-year record. <i>Earth Surface Processes and Landforms</i> , 2010 , 35, 1694-1700	3.7	10
64	Standing proud: a response to 'Soil-erosion models: where do we really stand?' by Smith et al.. <i>Earth Surface Processes and Landforms</i> , 2010 , 35, 1349-1356	3.7	8
63	Earth-System Science 2009 , 143-167		5
62	Vegetation controls on small-scale runoff and erosion dynamics in a degrading dryland environment. <i>Hydrological Processes</i> , 2009 , 23, 1617-1630	3.3	59
61	Changes in hydrology and erosion over a transition from grassland to shrubland. <i>Hydrological Processes</i> , 2009 , 24, n/a-n/a	3.3	24
60	Response to Hairsine's and Sander's 'Comment on A transport-distance based approach to scaling erosion rates' Parts 1, 2 and 3 by Wainwright et al. <i>Earth Surface Processes and Landforms</i> , 2009 , 34, 886-890	3.7	6
59	Response to Kinnell's 'Comment on A transport-distance approach to scaling erosion rates: III. Evaluating scaling characteristics of Mahleran' <i>Earth Surface Processes and Landforms</i> , 2009 , 34, 1320-1327	3.7	2
58	Hydrological connectivity: Linking concepts with practical implications. <i>Catena</i> , 2009 , 79, 146-152	5.8	113

57	Can modelling enable us to understand the role of humans in landscape evolution?. <i>Geoforum</i> , 2008 , 39, 659-674	2.9	49
56	Internal testing of a numerical model of hillslope-channel coupling using laboratory flume experiments. <i>Hydrological Processes</i> , 2008 , 22, 2274-2291	3.3	9
55	A transport-distance approach to scaling erosion rates: 3. Evaluating scaling characteristics of Mahleran. <i>Earth Surface Processes and Landforms</i> , 2008 , 33, 1113-1128	3.7	39
54	A transport-distance approach to scaling erosion rates: 2. sensitivity and evaluation of Mahleran. <i>Earth Surface Processes and Landforms</i> , 2008 , 33, 962-984	3.7	35
53	A transport-distance approach to scaling erosion rates: 1. Background and model development. <i>Earth Surface Processes and Landforms</i> , 2008 , 33, 813-826	3.7	78
52	Is sediment delivery a fallacy? Reply. <i>Earth Surface Processes and Landforms</i> , 2008 , 33, 1630-1631	3.7	23
51	Scale relationships in hillslope runoff and erosion Reply. <i>Earth Surface Processes and Landforms</i> , 2008 , 33, 1637-1638	3.7	5
50	Impact of connectivity on the modeling of overland flow within semiarid shrubland environments. <i>Water Resources Research</i> , 2007 , 43,	5.4	65
49	Spatial variability of soil and nutrient characteristics of semi-arid grasslands and shrublands, Jornada Basin, New Mexico. <i>Ecohydrology</i> , 2007 , 1, 3	2.5	4
48	Upscaling understanding of nitrogen dynamics associated with overland flow in a semi-arid environment. <i>Biogeochemistry</i> , 2007 , 82, 265-278	3.8	32
47	Soil detachment and transport on field- and laboratory-scale interrill areas: erosion processes and the size-selectivity of eroded sediment. <i>Earth Surface Processes and Landforms</i> , 2006 , 31, 929-939	3.7	101
46	Scale relationships in hillslope runoff and erosion. <i>Earth Surface Processes and Landforms</i> , 2006 , 31, 1384-1393	3.7	187
45	Is sediment delivery a fallacy?. <i>Earth Surface Processes and Landforms</i> , 2006 , 31, 1325-1328	3.7	125
44	Depth distribution of interrill overland flow and the formation of rills. <i>Hydrological Processes</i> , 2006 , 20, 1511-1523	3.3	26
43	Spatial patterns of scour and fill in dryland sand bed streams. <i>Water Resources Research</i> , 2006 , 42,	5.4	11
42	Degrees of separation: Hillslope-channel coupling and the limits of palaeohydrological reconstruction. <i>Catena</i> , 2006 , 66, 93-106	5.8	35
41	Geomorphological equilibrium: myth and metaphor?. <i>Transactions of the Institute of British Geographers</i> , 2006 , 31, 167-178	2.5	66
40	Streambed scour and fill in low-order dryland channels. <i>Water Resources Research</i> , 2005 , 41,	5.4	25

39	An automated salt-tracing gauge for flow-velocity measurement. <i>Earth Surface Processes and Landforms</i> , 2005 , 30, 833-844	3.7	64
38	A conceptual model for determining soil erosion by water. <i>Earth Surface Processes and Landforms</i> , 2004 , 29, 1293-1302	3.7	91
37	Disposition of rainwater under creosotebush. <i>Hydrological Processes</i> , 2003 , 17, 2555-2566	3.3	32
36	Modelling the effects of hillslope-channel coupling on catchment hydrological response. <i>Earth Surface Processes and Landforms</i> , 2002 , 27, 1441-1457	3.7	64
35	Scaling land surface parameters for global-scale soil erosion estimation. <i>Water Resources Research</i> , 2002 , 38, 19-1-19-9	5.4	38
34	The effect of temporal variations in rainfall on scale dependency in runoff coefficients. <i>Water Resources Research</i> , 2002 , 38, 7-1-7-10	5.4	112
33	Plot-scale studies of vegetation, overland flow and erosion interactions: case studies from Arizona and New Mexico. <i>Hydrological Processes</i> , 2000 , 14, 2921-2943	3.3	226
32	Nutrient losses in runoff from grassland and shrubland habitats in Southern New Mexico: I. rainfall simulation experiments. <i>Biogeochemistry</i> , 1999 , 45, 21-34	3.8	122
31	Comparison of slope estimates from low resolution DEMs: scaling issues and a fractal method for their solution. <i>Earth Surface Processes and Landforms</i> , 1999 , 24, 763-779	3.7	103
30	Field and computer simulation experiments on the formation of desert pavement. <i>Earth Surface Processes and Landforms</i> , 1999 , 24, 1025-1037	3.7	35
29	Transmission losses in rills on dryland hillslopes. <i>Hydrological Processes</i> , 1999 , 13, 2897-2905	3.3	18
28	Nutrient losses in runoff from grassland and shrubland habitats in Southern New Mexico: I. rainfall simulation experiments. <i>Biogeochemistry</i> , 1999 , 45, 21-34	3.8	32
27	Comparison of slope estimates from low resolution DEMs: scaling issues and a fractal method for their solution 1999 , 24, 763		2
26	Distributed dynamic modelling of interrill overland flow. <i>Hydrological Processes</i> , 1997 , 11, 1833-1859	3.3	55
25	A simulation study of the role of raindrop erosion in the formation of desert pavements. <i>Earth Surface Processes and Landforms</i> , 1995 , 20, 277-291	3.7	41
24	Erosion of archaeological sites: Results and implications of a site simulation model. <i>Geoarchaeology - an International Journal</i> , 1994 , 9, 173-201	1.4	18
23	Tracing sediment movement in interrill overland flow on a semi-arid grassland hillslope using magnetic susceptibility. <i>Earth Surface Processes and Landforms</i> , 1993 , 18, 721-732	3.7	47
22	Introduction □ Understanding and managing landscape change through multiple lenses 1-7		

21	Pointers for the Future451-464		
20	Models in Policy Formulation and Assessment: The WadBOS Decision-Support System349-364		0
19	Stability and Instability in the Management of Mediterranean Desertification399-413		
18	Erosion and Sediment Transport: Finding Simplicity in a Complicated Erosion Model253-266		1
17	Spatial Population Models for Animals221-234		
16	Climate and Climate-System Modelling151-164		2
15	Data-Based Mechanistic Modelling and the Emulation of Large Environmental System Models111-131		
14	Landslides, Rockfalls and Sandpiles267-275		
13	Holistic approaches to palaeohydrology: Reconstructing and modelling the Neolithic River Bramba and the riverscape of Atalaya, Turkey. <i>Holocene</i> ,095968362110417	2.6	1
12	Soil and Hillslope (Eco)Hydrology165-181		1
11	Modelling Catchment and Fluvial Processes and their Interactions183-205		1
10	Modelling Plant Ecology207-220		2
9	Vegetation and Disturbance235-251		1
8	Representing Human Decision-Making in Environmental Modelling291-307		2
7	Models Supporting Decision-Making and Policy Evaluation333-348		1
6	Soil Erosion and Conservation365-378		21
5	Forest-Management Modelling379-398		11
4	Operational European Flood Forecasting415-434		10

3	Assessing Model Adequacy435-449	10
2	Stochastic versus Deterministic Approaches133-149	6
1	Stability and instability in Mediterranean landscapes99-120	1
