917 peer-reviewed articles	51,128 peer-reviewed citations	1416 104 peer-reviewed h-index	465805 4.03 score
951 documents	58581 doc citations	1440 113 h-index	86808 citing authors

#	Article	IF	Citations
1	Association between family history with lung cancer incidence and mortality risk in the Asia Cohort Consortium. International Journal of Cancer, 2025, 156, 723-733.	2.8	6
2	Associations between prediagnostic plasma metabolites and biliary tract cancer risk in the prospective UK Biobank cohort. American Journal of Epidemiology, 2025, 194, 2394-2401.	2.4	3
3	Associations of alcohol intake with gut microbiome: a prospective study in a predominantly low-income Black/African American population. American Journal of Clinical Nutrition, 2025, 121, 134-140.	3.2	6
4	Associations of Blood Lipid-Related Polygenic Scores, Lifestyle Factors and Their Combined Effects with Risk of Coronary Artery Disease in the UK Biobank Cohort. Journal of Cardiovascular Translational Research, 2025, 18, 331-340.	1.3	2
5	Reproductive and Hormonal Factors and Thyroid Cancer Risk: Pooled Analysis of Prospective Cohort Studies in the Asia Cohort Consortium. Cancer Prevention Research, 2025, 18, 209-221.	1.2	1
6	Circulating microRNAs and alcohol consumption in the multiethnic cohort study. Alcohol, 2025, 124, 105-110.	0.7	0
7	Association of social support and religiosity with survival among women with breast cancer in a low-income population in the Southeastern United States. BMC Public Health, 2025, 25, .	2.1	6
8	Topology of gut Microbiota Network and Guild-Based Analysis in Chinese Adults. Phenomics, 2025, 5, 91-108.	2.2	5
9	HSA Adductomics in the Shanghai Women's Health Study Links Lung Cancer in Never-Smokers with Air Pollution, Redox Biology, and One-Carbon Metabolism. Antioxidants, 2025, 14, 335.	4.6	8
10	A dietary pattern promoting gut sulfur metabolism is associated with increased mortality and altered circulating metabolites in low-income American adults. EBioMedicine, 2025, 115, 105690.	6.6	11
11	Plant-based diets and mortality in Black and low-income Americans: findings from a large prospective cohort study. American Journal of Clinical Nutrition, 2025, 121, 1346-1353.	3.2	6
12	Blood metabolic biomarkers and colorectal cancer risk: results from large prospective cohort and Mendelian randomisation analyses. British Journal of Cancer, 2025, 133, 94-103.	4.1	10
13	Association of Cigarette Smoking and Alcohol Drinking With Risk of 12 Common Cancers Among Low-Income American Adults in the Southeastern United States. Cancer Control, 2025, 32, .	1.5	1
14	Urinary metabolites in association with kidney cancer risk. Carcinogenesis, 2025, 46, .	2.2	2
15	Factors influencing intent to receive COVID-19 vaccination among Black and White adults in the southeastern United States, October – December 2020. Human Vaccines and Immunotherapeutics, 2024, 17, 4761-4798.	2.1	13
16	Prevalence of metabolic syndrome among Vietnamese adult employees. Nutrition, Metabolism and Cardiovascular Diseases, 2024, 34, 326-333.	2.1	7
17	Lung Cancer Risk Prediction Models for Asian Ever-Smokers. Journal of Thoracic Oncology, 2024, 19, 451-464.	1.5	28
18	Obesity is associated with biliary tract cancer mortality and incidence: A pooled analysis of 21 cohort studies in the Asia Cohort Consortium. International Journal of Cancer, 2024, 154, 1174-1190.	2.8	14

#	Article	IF	Citations
19	Associations between Plasma Tocopherols and Lung Cancer Risk: Results from the Southern Community Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 480-488.	0.6	1
20	Lifestyle factors, genetic susceptibility to obesity and their interactions on coronary artery disease risk: A cohort study in the UK Biobank. Preventive Medicine, 2024, 180, 107886.	1.7	10
21	Gut microbiome in association with chemotherapy-induced toxicities among patients with breast cancer. Cancer, 2024, 130, 2014-2030.	2.7	23
22	Genetic correlation and causal associations between circulating C-reactive protein levels and lung cancer risk. Cancer Causes and Control, 2024, 35, 897-906.	1.2	0
23	Gut Microbiome of Patients With Breast Cancer in Vietnam. JCO Global Oncology, 2024, , .	1.8	9
24	Association between reproductive factors with lung cancer incidence and mortality: A pooled analysis of over 308,000 females in the Asia cohort consortium. International Journal of Cancer, 2024, 154, 2090-2105.	2.8	10
25	Large-Scale Cancer Genomic Analysis Reveals Significant Disparities between Microsatellite Instability and Tumor Mutational Burden. Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 712-720.	0.6	6
26	Impacts of Poverty and Lifestyles on Mortality: A Cohort Study in Predominantly Low-Income Americans. American Journal of Preventive Medicine, 2024, 67, 15-23.	2.3	20
27	Association of female reproductive and hormonal factors with gallbladder cancer risk in Asia: A pooled analysis of the Asia Cohort Consortium. International Journal of Cancer, 2024, 155, 240-250.	2.8	9
28	Hypertension and Risk of Endometrial Cancer: A Pooled Analysis in the Epidemiology of Endometrial Cancer Consortium (E2C2). Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 788-795.	0.6	20
29	Circulating microRNAs in association with pancreatic cancer risk within 5 years. International Journal of Cancer, 2024, 155, 519-531.	2.8	12
30	Diabetes is associated with increased liver cancer incidence and mortality in adults: A report from Asia Cohort Consortium. International Journal of Cancer, 2024, 155, 854-870.	2.8	9
31	Blood Lipids, Lipoproteins, and Apolipoproteins With Risk of Coronary Heart Disease: A Prospective Study Among Racially Diverse Populations. Journal of the American Heart Association, 2024, 13, .	3.1	7
32	Large-Scale Alternative Polyadenylation-Wide Association Studies to Identify Putative Cancer Susceptibility Genes. Cancer Research, 2024, 84, 2707-2719.	2.6	8
33	Case-Case Genome-Wide Analyses Identify Subtype-Informative Variants That Confer Risk for Breast Cancer. Cancer Research, 2024, 84, 2533-2548.	2.6	5
34	Dietary intake, obesity, and physical activity in association with biliary tract cancer risk: Results from meta-analyses of individual-level data from prospective cohort studies of 723,326 adults. International Journal of Cancer, 2024, 155, 1721-1730.	2.8	4
35	Genome-Wide Analysis to Assess if Heavy Alcohol Consumption Modifies the Association between SNPs and Pancreatic Cancer Risk. Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 1229-1239.	0.6	2
36	Circulating Metabolite Profiles and Risk of Coronary Heart Disease Among Racially and Geographically Diverse Populations. Circulation Genomic and Precision Medicine, 2024, 17, .	1.9	11

#	Article	IF	Citations
37	"Some Thoughts on Lung Cancer Risk Prediction Models for Long-Term Smokers in Asia". Journal of Thoracic Oncology, 2024, 19, e14-e15.	1.5	1
38	Occupational Benzene Exposure and Cancer Risk among Chinese Men: A Report from the Shanghai Men's Health Study. Cancer Epidemiology Biomarkers and Prevention, 2024, 33, 1465-1474.	0.6	6
39	Influence of Peanut Consumption on the Gut Microbiome: A Randomized Clinical Trial. Nutrients, 2024, 16, 3313.	3.2	3
40	Age at menarche by birth cohort: A pooled analysis of half a million women in Asia. Public Health, 2024, 237, 130-134.	1.7	3
41	Associations of lifestyle with physical, hearing, visual, and mental functional impairments among older adults: Findings from two prospective cohort studies. Archives of Gerontology and Geriatrics, 2023, 105, 104848.	2.4	2
42	Tea Consumption and Gut Microbiome in Older Chinese Adults. Journal of Nutrition, 2023, 153, 293-300.	2.3	5
43	Risk prediction models for endometrial cancer: development and validation in an international consortium. Journal of the National Cancer Institute, 2023, 115, 552-559.	3.2	22
44	Correlates of Taxane-Induced Neuropathy, an Electronic Health Record Based Observational Study. Cancers, 2023, 15, 754.	2.7	8
45	Serum Lipid Profiles and Cholesterol-Lowering Medication Use in Relation to Subsequent Risk of Colorectal Cancer in the UK Biobank Cohort. Cancer Epidemiology Biomarkers and Prevention, 2023, 32, 524-530.	0.6	23
46	Prospective Cohort Study of Ginseng Consumption in Association with Cancer Risk: Shanghai Women's Health Study. Journal of Nutrition, 2023, 153, 1170-1177.	2.3	6
47	Prediagnostic 25-Hydroxyvitamin D in Association with Cancer-specific and All-cause Mortality among Low-income, Non-Hispanic Black Americans with Colorectal Cancer. Cancer Epidemiology Biomarkers and Prevention, 2023, 32, 1061-1068.	0.6	2
48	Association between Sleep Duration and Colorectal Adenomas: Findings from a Case–Control Study in Vietnam. Cancer Epidemiology Biomarkers and Prevention, 2023, 32, 1160-1168.	0.6	3
49	Association between chronic pain and quality of life in long-term breast cancer survivors: a prospective analysis. Breast Cancer, 2023, 30, 785-795.	1.7	7
50	Genetic Susceptibility to Nonalcoholic Fatty Liver Disease and Risk for Pancreatic Cancer: Mendelian Randomization. Cancer Epidemiology Biomarkers and Prevention, 2023, 32, 1265-1269.	0.6	7
51	Nontargeted Metabolomics Revealed Novel Association Between Serum Metabolites and Incident Acute Coronary Syndrome: A Mendelian Randomization Study. Journal of the American Heart Association, 2023, 12, .	3.1	7
52	Associations between Longer Leukocyte Telomere Length and Increased Lung Cancer Risk among Never Smokers in Urban China. Cancer Epidemiology Biomarkers and Prevention, 2023, 32, 1734-1737.	0.6	3
53	Oral microbiome and ischemic stroke risk among elderly Chinese women. Journal of Oral Microbiology, 2023, 15, .	4.0	13
54	Metabolite Signature of Life's Essential 8 and Risk of Coronary Heart Disease Among Low-Income Black and White Americans. Circulation Genomic and Precision Medicine, 2023, 16, .	1.9	11

#	Article	IF	Citations
55	Reduction in total and major cause-specific mortality from tobacco smoking cessation: a pooled analysis of 16 population-based cohort studies in Asia. International Journal of Epidemiology, 2022, 50, 2070-2081.	2.8	24
56	Coffee and tea consumption and mortality from all causes, cardiovascular disease and cancer: a pooled analysis of prospective studies from the Asia Cohort Consortium. International Journal of Epidemiology, 2022, 51, 626-640.	2.8	89
57	Outcomes of robotic-assisted liver surgery versus laparoscopic liver surgery for treatment of stage I hepatocellular carcinoma. Cancer, 2022, 128, 762-769.	2.7	29
58	Phytoestrogens and lung cancer risk: a nested case-control study in never-smoking Chinese women. American Journal of Clinical Nutrition, 2022, 115, 643-651.	3.2	18
59	Prospective study of oral microbiome and gastric cancer risk among Asian, African American and European American populations. International Journal of Cancer, 2022, 150, 916-927.	2.8	37
60	Associations of Dietary Intakes of Calcium, Magnesium, and Soy Isoflavones With Bone Fracture Risk in Men: A Prospective Study. JBMR Plus, 2022, 6, .	1.5	11
61	Nut consumption in association with overall mortality and recurrence/disease-specific mortality among long-term breast cancer survivors. International Journal of Cancer, 2022, 150, 572-579.	2.8	16
62	Oral and gastric microbiome in relation to gastric intestinal metaplasia. International Journal of Cancer, 2022, 150, 928-940.	2.8	67
63	TBX1functions as a putative oncogene of breast cancer through promoting cell cycle progression. Carcinogenesis, 2022, 43, 12-20.	2.2	6
64	Associations of genetic susceptibility to 16 cancers with risk of breast cancer overall and by intrinsic subtypes. Human Genetics and Genomics Advances, 2022, 3, 100077.	0.8	4
65	Body Mass Index and Thyroid Cancer Risk: A Pooled Analysis of Half a Million Men and Women in the Asia Cohort Consortium. Thyroid, 2022, 32, 306-314.	3.0	55
66	Common variants in breast cancer risk loci predispose to distinct tumor subtypes. Breast Cancer Research, 2022, 24, .	3.4	30
67	Oncotype DX Risk Recurrence Score and Total Mortality for Early-Stage Breast Cancer by Race/Ethnicity. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 821-830.	0.6	22
68	A pooled case-only analysis of obesity and breast cancer subtype among Black women in the southeastern United States. Cancer Causes and Control, 2022, 33, 515-524.	1.2	5
69	Association between body mass index and oesophageal cancer mortality: a pooled analysis of prospective cohort studies with >800000 individuals in the Asia Cohort Consortium. International Journal of Epidemiology, 2022, 51, 1190-1203.	2.8	17
70	Quality of dietary carbohydrate is more important than its quantity in lipid peroxidation. American Journal of Clinical Nutrition, 2022, 116, 189-196.	3.2	10
71	Prediagnosis Leisure-Time Physical Activity and Lung Cancer Survival: A Pooled Analysis of 11 Cohorts. JNCI Cancer Spectrum, 2022, 6, .	2.2	18
72	The Role of Thoracic Radiation Therapy Dosing in the Treatment of Limited-Stage Small Cell Lung Cancer: A Study Based on the National Cancer Database. Advances in Radiation Oncology, 2022, 7, 100907.	1.1	0

#	Article	IF	Citations
73	A polygenic risk score improves risk stratification of coronary artery disease: a large-scale prospective Chinese cohort study. European Heart Journal, 2022, 43, 1702-1711.	2.6	163
74	UACA locus is associated with breast cancer chemoresistance and survival. Npj Breast Cancer, 2022, 8, .	4.7	16
75	Incorporating Polygenic Risk Scores and Nongenetic Risk Factors for Breast Cancer Risk Prediction Among Asian Women. JAMA Network Open, 2022, 5, e2149030.	5.2	26
76	Large-scale Integrated Analysis of Genetics and Metabolomic Data Reveals Potential Links Between Lipids and Colorectal Cancer Risk. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 1216-1226.	0.6	5
77	Polygenic risk scores for prediction of breast cancer risk in Asian populations. Genetics in Medicine, 2022, 24, 586-600.	3.3	62
78	Evaluating breast cancer predisposition genes in women of African ancestry. Genetics in Medicine, 2022, 24, 1468-1475.	3.3	8
79	Endogenous sex hormones, aromatase activity and lung cancer risk in postmenopausal never-smoking women. International Journal of Cancer, 2022, 151, 699-707.	2.8	11
80	Findings from the first colorectal cancer screening among 103 542 individuals in Vietnam with systematic review of colorectal cancer screening programs in Asia-Pacific region. Japanese Journal of Clinical Oncology, 2022, 52, 707-715.	1.3	5
81	Association of Fruit, Vegetable, and Animal Food Intakes with Breast Cancer Risk Overall and by Molecular Subtype among Vietnamese Women. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 1026-1035.	0.6	10
82	Mendelian randomization analyses of 23 known and suspected risk factors and biomarkers for breast cancer overall and by molecular subtypes. International Journal of Cancer, 2022, 151, 372-380.	2.8	62
83	Lipid peroxidation biomarkers associated with height and obesity measures in the opposite direction in women. Obesity, 2022, 30, 1257-1267.	2.8	8
84	Multi-ancestry genetic study of type 2 diabetes highlights the power of diverse populations for discovery and translation. Nature Genetics, 2022, 54, 560-572.	14.1	713
85	Relevance of the MHC region for breast cancer susceptibility in Asians. Breast Cancer, 2022, 29, 869-879.	1.7	2
86	Tooth Loss and Risk of Lung Cancer among Urban Chinese Adults: A Cohort Study with Meta-Analysis. Cancers, 2022, 14, 2428.	2.7	7
87	Associations of lung cancer risk with biomarkers of Helicobacter pylori infection. Carcinogenesis, 2022, 43, 538-546.	2.2	8
88	Association of Marital Status With Total and Cause-Specific Mortality in Asia. JAMA Network Open, 2022, 5, e2214181.	5.2	54
89	Distinct Reproductive Risk Profiles for Intrinsic-Like Breast Cancer Subtypes: Pooled Analysis of Population-Based Studies. Journal of the National Cancer Institute, 2022, 114, 1706-1719.	3.2	44
90	Tea Consumption and Gut Microbiome in Chinese Men and Women. Current Developments in Nutrition, 2022, 6, 1035.	0.3	0

#	Article	IF	Citations
91	Associations of Pre-Diagnostic Serum Levels of Total Bilirubin and Albumin With Lung Cancer Risk: Results From the Southern Community Cohort Study. Frontiers in Oncology, 2022, 12, .	1.7	14
92	Healthy Lifestyles and the Risk of Alzheimer's Disease and Related Dementias among Low-Income Black and White Americans. Current Developments in Nutrition, 2022, 6, 967.	0.3	1
93	Dietary Polyphenols and the Risk of Alzheimer's Disease and Related Dementias Among Low-income Black and White Americans. Current Developments in Nutrition, 2022, 6, 814.	0.3	1
94	Developing and validating polygenic risk scores for colorectal cancer risk prediction in East Asians. International Journal of Cancer, 2022, 151, 1726-1736.	2.8	13
95	Racial/Ethnic Disparities in Mortality Related to Access to Care for Major Cancers in the United States. Cancers, 2022, 14, 3390.	2.7	27
96	Prospective Proteomic Study Identifies Potential Circulating Protein Biomarkers for Colorectal Cancer Risk. Cancers, 2022, 14, 3261.	2.7	18
97	Association of serum high-sensitivity C reactive protein with risk of mortality in an Asian population: the Health Examinees cohort. BMJ Open, 2022, 12, e052630.	1.2	6
98	Association between Body Mass Index and Risk of Gastric Cancer by Anatomic and Histologic Subtypes in Over 500,000 East and Southeast Asian Cohort Participants. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 1727-1734.	0.6	25
99	Associations between circulating proteins and risk of breast cancer by intrinsic subtypes: a Mendelian randomisation analysis. British Journal of Cancer, 2022, 127, 1507-1514.	4.1	20
100	The Association of Serum High-Sensitivity C-Reactive Protein Level With the Risk of Site-Specific Cancer Mortality: The Health Examinees (HEXA) Study Cohort. American Journal of Epidemiology, 2022, 191, 2002-2013.	2.4	5
101	Chronic pain and its correlates among long-term breast cancer survivors. Journal of Cancer Survivorship, 2022, 17, 460-467.	1.4	18
102	A Dynamic Bayesian Model for Breast Cancer Survival Prediction. IEEE Journal of Biomedical and Health Informatics, 2022, 26, 5716-5727.	4.2	22
103	Coffee consumption and risk of endometrial cancer: a pooled analysis of individual participant data in the Epidemiology of Endometrial Cancer Consortium (E2C2). American Journal of Clinical Nutrition, 2022, 116, 1219-1228.	3.2	20
104	Multiplex immunohistochemistry and high-throughput image analysis for evaluation of spatial tumor immune cell markers in human breast cancer. Cancer Biomarkers, 2022, 35, 193-206.	0.7	3
105	Associations of Dietary Intakes of Carotenoids and Vitamin A with Lung Cancer Risk in a Low-Income Population in the Southeastern United States. Cancers, 2022, 14, 5159.	2.7	11
106	Chemotherapy-Induced Toxicities and Their Associations with Clinical and Non-Clinical Factors among Breast Cancer Patients in Vietnam. Current Oncology, 2022, 29, 8269-8284.	2.0	44
107	Pre-diagnostic circulating p53 autoantibodies and subsequent lung cancer risk in low-income African and European Americans. Cancer Epidemiology, 2022, 81, 102288.	1.6	6
108	Association of urinary prostaglandin E2 metabolite and mortality among adults. Scientific Reports, 2022, 12, .	2.7	3

#	Article	IF	Citations
109	Polygenic Risk Scores Associated with Tumor Immune Infiltration in Common Cancers. Cancers, 2022, 14, 5571.	2.7	3
110	A Bidirectional and Phase-Dependent Effect of Oxidative Stress on Colorectal Cancer: First Evidence in Humans. Free Radical Biology and Medicine, 2022, 192, 109.	2.6	0
111	Integrating transcription factor occupancy with transcriptome-wide association analysis identifies susceptibility genes in human cancers. Nature Communications, 2022, 13, .	10.8	42
112	Physical activity in association with mortality among Black women diagnosed with breast cancer in the Southern Community Cohort Study. Cancer Causes and Control, 2022, 34, 277-286.	1.2	2
113	Combined Associations of a Polygenic Risk Score and Classical Risk Factors With Breast Cancer Risk. Journal of the National Cancer Institute, 2021, 113, 329-337.	3.2	56
114	Quantifying the association of low-intensity and late initiation of tobacco smoking with total and cause-specific mortality in Asia. Tobacco Control, 2021, 30, 328-335.	1.8	9
115	Dietary fatty acids and colorectal cancer risk in men: A report from the Shanghai Men's Health Study and a meta-analysis. International Journal of Cancer, 2021, 148, 77-89.	2.8	36
116	Mendelian randomization analyses suggest a role for cholesterol in the development of endometrial cancer. International Journal of Cancer, 2021, 148, 307-319.	2.8	57
117	Associations of Depressive Symptoms With All-Cause and Cause-Specific Mortality by Race in a Population of Low Socioeconomic Status: A Report From the Southern Community Cohort Study. American Journal of Epidemiology, 2021, 190, 562-575.	2.4	7
118	Adherence to treatment guidelines as a major determinant of survival disparities between black and white patients with ovarian cancer. Gynecologic Oncology, 2021, 160, 10-15.	2.3	36
119	A retrospective approach to evaluating potential adverse outcomes associated with delay of procedures for cardiovascular and cancer-related diagnoses in the context of COVID-19. Journal of Biomedical Informatics, 2021, 113, 103657.	3.0	22
120	Racial/Ethnic Disparities in All-Cause Mortality among Patients Diagnosed with Triple-Negative Breast Cancer. Cancer Research, 2021, 81, 1163-1170.	2.6	34
121	Associations of coffee and tea consumption with lung cancer risk. International Journal of Cancer, 2021, 148, 2457-2470.	2.8	22
122	Multi-ancestry genome-wide association study accounting for gene-psychosocial factor interactions identifies novel loci for blood pressure traits. Human Genetics and Genomics Advances, 2021, 2, 100013.	0.8	10
123	Pregnancy outcomes and risk of endometrial cancer: A pooled analysis of individual participant data in the Epidemiology of Endometrial Cancer Consortium. International Journal of Cancer, 2021, 148, 2068-2078.	2.8	25
124	Radiotherapy after breast-conserving surgery for elderly patients with early-stage breast cancer: A national registry-based study. International Journal of Cancer, 2021, 148, 857-867.	2.8	12
125	Racial disparities in mortality for patients with prostate cancer after radical prostatectomy. Cancer, 2021, 127, 1517-1528.	2.7	35
126	MicroRNA-374b inhibits breast cancer progression through regulating CCND1 and TGFA genes. Carcinogenesis, 2021, 42, 528-536.	2.2	16

#	Article	IF	Citations
127	CYP3A7*1C allele: linking premenopausal oestrone and progesterone levels with risk of hormone receptor-positive breast cancers. British Journal of Cancer, 2021, 124, 842-854.	4.1	9
128	Long-term diet quality is associated with gut microbiome diversity and composition among urban Chinese adults. American Journal of Clinical Nutrition, 2021, 113, 684-694.	3.2	72
129	Multi-omics analysis to identify susceptibility genes for colorectal cancer. Human Molecular Genetics, 2021, 30, 321-330.	2.1	29
130	Sub-multiplicative interaction between polygenic risk score and household coal use in relation to lung adenocarcinoma among never-smoking women in Asia. Environment International, 2021, 147, 105975.	6.5	22
131	Prospective study of plasma levels of coenzyme Q10 and lung cancer risk in a low-income population in the Southeastern United States. Cancer Medicine, 2021, 10, 1439-1447.	2.0	15
132	A multilayered post-GWAS assessment on genetic susceptibility to pancreatic cancer. Genome Medicine, 2021, 13, .	5.9	34
133	Smoking Modifies Pancreatic Cancer Risk Loci on 2q21.3. Cancer Research, 2021, 81, 3134-3143.	2.6	16
134	Incorporating both genetic and tobacco smoking data to identify high-risk smokers for lung cancer screening. Carcinogenesis, 2021, 42, 874-879.	2.2	13
135	Prediction models for breast cancer prognosis among Asian women. Cancer, 2021, 127, 1758-1769.	2.7	11
136	Healthy lifestyles, genetic modifiers, and colorectal cancer risk: a prospective cohort study in the UK Biobank. American Journal of Clinical Nutrition, 2021, 113, 810-820.	3.2	66
137	Incorporating European GWAS findings improve polygenic risk prediction accuracy of breast cancer among East Asians. Genetic Epidemiology, 2021, 45, 471-484.	2.4	10
138	Multi-ancestry genome-wide gene–sleep interactions identify novel loci for blood pressure. Molecular Psychiatry, 2021, 26, 6293-6304.	5.2	23
139	A Prospective Investigation of Circulating Metabolome Identifies Potential Biomarkers for Gastric Cancer Risk. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 1634-1642.	0.6	18
