#	ARTICLE	IF	CITATIONS
1	Effect of the combined use of enamel matrix derivative and atelocollagen sponge scaffold on osteoblastic differentiation of mouse induced pluripotent stem cells in vitro. <i>Journal of Periodontal Research</i> , 2018, 53, 240-249.	2.7	12
2	Gorlin syndrome-derived induced pluripotent stem cells are hypersensitive to hedgehog-mediated osteogenic induction. <i>PLoS ONE</i> , 2017, 12, e0186879.	2.5	10
3	A novel GNAS-mutated human induced pluripotent stem cell model for understanding GNAS-mutated tumors. <i>Tumor Biology</i> , 2020, 42, 101042832096258.	1.8	8
4	The concurrent stimulation of Wnt and FGF8 signaling induce differentiation of dental mesenchymal cells into odontoblast-like cells. <i>Medical Molecular Morphology</i> , 2022, 55, 8-19.	1.0	6
5	Stage-dependent differential gene expression profiles of cranial neural crest-like cells derived from mouse-induced pluripotent stem cells. <i>Medical Molecular Morphology</i> , 2020, 53, 28-41.	1.0	4
6	Effects of intermittent treatment with parathyroid hormone (PTH) on osteoblastic differentiation and mineralization of mouse induced pluripotent stem cells in a 3D culture model. <i>Journal of Periodontal Research</i> , 2020, 55, 734-743.	2.7	2
7	The effect of BMP4, FGF8 and WNT3a on mouse iPS cells differentiating to odontoblast-like cells. <i>Medical Molecular Morphology</i> , 2022, 55, 199-209.	1.0	1
8	Keratinocytes from Gorlin Syndrome-induced pluripotent stem cells are resistant against UV radiation. <i>Medical Molecular Morphology</i> , 2021, 54, 69-78.	1.0	0
9	Induced pluripotent stem cells from homozygous Runx2-deficient mice show poor response to vitamin D during osteoblastic differentiation. <i>Medical Molecular Morphology</i> , 2022, , 1.	1.0	0
