#	Article	IF	CITATIONS
1	European pollen-based REVEALS land-cover reconstructions for the Holocene: methodology, mapping and potentials. Earth System Science Data, 2022, 14, 1581-1619.	9.9	42
2	60. Peat bog Vodniza, Rila Mountains (Bulgaria). Grana, 2022, 61, 307-309.	0.8	0
3	Holocene wildfire regimes in western Siberia: interaction between peatland moisture conditions and the composition of plant functional types. Climate of the Past, 2022, 18, 1255-1274.	3.4	10
4	55. Lake Ribno Banderishko, Pirin Mountains (Bulgaria). Grana, 2021, 60, 404-406.	0.8	0
5	Patterns in recent and Holocene pollen accumulation rates across Europe – the Pollen Monitoring Programme Database as a tool for vegetation reconstruction. Biogeosciences, 2021, 18, 4511-4534.	3.3	5
6	46.Lake Panichishte, Rila Mountains (Bulgaria). Grana, 2020, 59, 396-398.	0.8	0
7	Fire hazard modulation by long-term dynamics in land cover and dominant forest type in eastern and central Europe. Biogeosciences, 2020, 17, 1213-1230.	3.3	52
8	The Eurasian Modern Pollen Database (EMPD), version 2. Earth System Science Data, 2020, 12, 2423-2445.	9.9	34
9	Fire frequency and intensity associated with functional traits of dominant forest type in the Balkans during the Holocene. European Journal of Forest Research, 2019, 138, 1049-1066.	2.5	9
10	44. Peat bog Vapsko-2, Rila Mountains (Bulgaria). Grana, 2019, 58, 393-395.	0.8	2
11	On the Holocene vegetation history of the Central Rila Mountains, Bulgaria: The palaeoecological record of peat bog Vodniza (2113 m). Review of Palaeobotany and Palynology, 2018, 250, 16-26.	1.5	7
12	38. Peat bog Vapsko-1, Rila mountains (Bulgaria). Grana, 2018, 57, 158-160.	0.8	2
13	Pollenâ€derived biomes in the Eastern Mediterranean–Black Sea–Caspianâ€Corridor. Journal of Biogeography, 2018, 45, 484-499.	3.0	28
14	30. Peat bog Kumata-1, Vitosha Mountain (Bulgaria). Grana, 2016, 55, 250-252.	0.8	0
15	Lateglacial to Holocene vegetation development in the Central Rila Mountains, Bulgaria. Holocene, 2016, 26, 17-28.	1.7	8
16	Long-term pollen monitoring experiments for the period 1994-2008 in the Rila Mountains, Bulgaria. Eurasian Journal of Forest Science, 2016, 4, 1-16.	0.6	3
17	A 5000-year pollen and plant macrofossil record from the Osogovo Mountain, Southwestern Bulgaria: Vegetation history and human impact. Review of Palaeobotany and Palynology, 2015, 223, 1-9.	1.5	6
18	25. Mire Gyola, Belasitsa Mountain (south-western Bulgaria). Grana, 2014, 53, 312-314.	0.8	4

Spassimir Tonkov

#	Article	IF	CITATIONS
19	A 30,000-year pollen record from Mire Kupena, Western Rhodopes Mountains (south Bulgaria). Review of Palaeobotany and Palynology, 2014, 209, 41-51.	1.5	9
20	Validation of climate model-inferred regional temperature change for late-glacial Europe. Nature Communications, 2014, 5, 4914.	12.8	129
21	Climate variability and associated vegetation response throughout Central and Eastern Europe (CEE) between 60 and 8Âka. Quaternary Science Reviews, 2014, 106, 206-224.	3.0	188
22	Holocene palaeoecology and human–environmental interactions at the coastal Black Sea Lake Durankulak, northeastern Bulgaria. Quaternary International, 2014, 328-329, 277-286.	1.5	15
23	The European Modern Pollen Database (EMPD) project. Vegetation History and Archaeobotany, 2013, 22, 521-530.	2.1	101
24	Postglacial vegetation history as recorded from the subalpine Lake Ribno (NW Rila Mts), Bulgaria. Open Life Sciences, 2013, 8, 64-77.	1.4	7
25	18. Lake Blatisto, Rhodopes Mountains (South Bulgaria). Grana, 2013, 52, 78-80.	0.8	3
26	19. Mire Kupena, Western Rhodopes Mountains (South Bulgaria). Grana, 2013, 52, 238-240.	0.8	4
27	Holocene anthropogenic landscapes in the Balkans: the palaeobotanical evidence from southwestern Bulgaria. Vegetation History and Archaeobotany, 2012, 21, 413-427.	2.1	57
28	A tribute to Prof. DSc Elissaveta Bozilova on the occasion of her 80th birthday. Vegetation History and Archaeobotany, 2012, 21, 243-244.	2.1	0
29	14. Lake Sedmo Rilsko (Bulgaria): Lateglacial vegetation history. Grana, 2011, 50, 232-234.	0.8	10
30	12. Western Rhodopes Mountains (Bulgaria): peat bog Beliya Kanton. Grana, 2011, 50, 162-164.	0.8	7
31	The pace of Holocene vegetation change – testing for synchronous developments. Quaternary Science Reviews, 2011, 30, 2805-2814.	3.0	88
32	The Lateglacial in the Rila Mountains (Bulgaria) revisited: The pollen record of Lake Ribno (2184 m). Review of Palaeobotany and Palynology, 2011, 166, 1-11.	1.5	16
33	Palaeoecological studies at the Kaliakra area, northeastern Bulgarian Black Sea coast: 6000Âyears of natural and anthropogenic change. Vegetation History and Archaeobotany, 2011, 20, 29-40.	2.1	7
34	Variation in annual pollen accumulation rates of Fagus along a N–S transect in Europe based on pollen traps. Vegetation History and Archaeobotany, 2010, 19, 259-270.	2.1	41
35	Comparing pollen spectra from modified Tauber traps and moss samples: examples from a selection of woodlands across Europe. Vegetation History and Archaeobotany, 2010, 19, 271-283.	2.1	65
36	The European Pollen Database: past efforts and current activities. Vegetation History and Archaeobotany, 2009, 18, 417-424.	2.1	106

#	Article	IF	CITATIONS
37	6. Peat-bog Begbunar (Osogovo Mountains, south-west Bulgaria): Four millennia of vegetation history. Grana, 2009, 48, 147-149.	0.8	5
38	7. Mire Straldza (Southeastern Bulgaria): Late Holocene vegetation history. Grana, 2009, 48, 235-237.	0.8	3
39	A contribution to the postglacial vegetation history of the Rila Mountains, Bulgaria: The pollen record of Lake Trilistnika. Quaternary International, 2008, 190, 58-70.	1.5	32
40	The lateglacial vegetation and radiocarbon dating of Lake Trilistnika, Rila Mountains (Bulgaria). Vegetation History and Archaeobotany, 2006, 16, 15-22.	2.1	23
41	Pollen and plant macrofossil analyses of radiocarbon dated mid-Holocene profiles from two subalpine lakes in the Rila Mountains, Bulgaria. Holocene, 2005, 15, 663-671.	1.7	36
42	Holocene palaeovegetation of the Northwestern Pirin Mountains (Bulgaria) as reconstructed from pollen analysis. Review of Palaeobotany and Palynology, 2003, 124, 51-61.	1.5	30
43	The Holocene vegetation history of Northern Pirin Mountain, southwestern Bulgaria: pollen analysis and radiocarbon dating of a core from Lake Ribno Ban derishko. Holocene, 2002, 12, 201-210.	1.7	48
44	Pollen monitoring in the central Rila Mountains, Southwestern Bulgaria: comparisons between pollen traps and surface samples for the period 1993–1999. Review of Palaeobotany and Palynology, 2001, 117, 167-182.	1.5	36
45	Pollen from Lake Sedmo Rilsko reveals southeast European postglacial vegetation in the highest mountain area of the Balkans. New Phytologist, 2000, 148, 315-325.	7.3	77
46	Palynological study of Holocene sediments from Lake Doirani in northern Greece. Journal of Paleolimnology, 2000, 24, 331-342.	1.6	23
47	Towards the vegetation and settlement history of the southern Dobrudza coastal region, north-eastern Bulgaria: A pollen diagram from Lake Durankulak. Vegetation History and Archaechetary, 1998, 7, 141, 148	2.1	15
