#	Article	IF	CITATIONS
1	Disparate bilingual experiences modulate task-switching advantages: A diffusion-model analysis of the effects of interactional context on switch costs. Cognition, 2016, 150, 10-19.	2.2	170
2	Early childhood bilingualism leads to advances in executive attention: Dissociating culture and language. Bilingualism, 2011, 14, 412-422.	1.3	163
3	Positive affect improves working memory: Implications for controlled cognitive processing. Cognition and Emotion, 2013, 27, 474-482.	2.0	92
4	Is the smartphone a smart choice? The effect of smartphone separation on executive functions. Computers in Human Behavior, 2016, 64, 329-336.	8.5	91
5	Bilingualism Narrows Socioeconomic Disparities in Executive Functions and Selfâ€Regulatory Behaviors During Early Childhood: Evidence From the Early Childhood Longitudinal Study. Child Development, 2019, 90, 1215-1235.	3.0	83
6	Bilingual effects on deployment of the attention system in linguistically and culturally homogeneous children and adults. Journal of Experimental Child Psychology, 2016, 146, 121-136.	1.4	46
7	The role of bilingual interactional contexts in predicting interindividual variability in executive functions: A latent variable analysis Journal of Experimental Psychology: General, 2020, 149, 609-633.	2.1	46
8	The Complex Nature of Bilinguals' Language Usage Modulates Task-Switching Outcomes. Frontiers in Psychology, 2016, 7, 560.	2.1	44
9	Social media use improves executive functions in middle-aged and older adults: A structural equation modeling analysis. Computers in Human Behavior, 2020, 111, 106388.	8.5	37
10	Context counts: The different implications of weekday and weekend video gaming for academic performance in mathematics, reading, and science. Computers and Education, 2018, 120, 51-63.	8.3	34
11	The importance of bilingual experience in assessing bilingual advantages in executive functions. Cortex, 2016, 75, 237-240.	2.4	31
12	Effects of Social Media and Smartphone Use on Body Esteem in Female Adolescents: Testing a Cognitive and Affective Model. Children, 2020, 7, 148.	1.5	30
13	Age matters: The effect of onset age of video game play on task-switching abilities. Attention, Perception, and Psychophysics, 2016, 78, 1125-1136.	1.3	28
14	Does early active bilingualism enhance inhibitory control and monitoring? A propensity-matching analysis Journal of Experimental Psychology: Learning Memory and Cognition, 2019, 45, 360-378.	0.9	24
15	Are all interferences bad? Bilingual advantages in working memory are modulated by varying demands for controlled processing. Bilingualism, 2017, 20, 184-196.	1.3	21
16	Executive Function and Subjective Well-being in Middle and Late Adulthood. Journals of Gerontology - Series B Psychological Sciences and Social Sciences, 2020, 75, e69-e77.	3.9	21
17	Positive affect facilitates task switching in the dimensional change card sort task: Implications for the shifting aspect of executive function. Cognition and Emotion, 2014, 28, 1242-1254.	2.0	20
18	Bilingualism positively predicts mathematical competence: Evidence from two large-scale studies. Learning and Individual Differences, 2018, 61, 216-227.	2.7	18

#	Article	IF	CITATIONS
19	Commentary: Influence of smartphone addiction proneness of young children on problematic behaviors and emotional intelligence: Mediating self-assessment effects of parents using smartphones. Frontiers in Psychology, 2019, 10, 115.	2.1	17
20	The relationship between phonological awareness and executive attention in Chinese-English bilingual children. Cognitive Development, 2014, 30, 65-80.	1.3	15
21	Disentangling the effects of smartphone screen time, checking frequency, and problematic use on executive function: A structural equation modelling analysis. Current Psychology, 2023, 42, 4225-4242.	2.8	13
22	Seeking control during uncontrollable times: Control abilities and religiosity predict stress during COVID-19. Personality and Individual Differences, 2021, 175, 110675.	2.9	12
23	Testing theoretical assumptions underlying the relation between anxiety, mind wandering, and task-switching: A diffusion model analysis Emotion, 2022, 22, 493-510.	1.8	12
24	Angry faces are more resistant to forgetting than are happy faces: directed forgetting effects on the identity of emotional faces. Journal of Cognitive Psychology, 2017, 29, 855-865.	0.9	11
25	Sympathy fuels creativity: The beneficial effects of sympathy on originality. Thinking Skills and Creativity, 2016, 21, 132-143.	3.5	9
26	The effects of script variation, literacy skills, and immersion experience on executive attention: A comparison of matched monoscriptal and biscriptal bilinguals. Bilingualism, 2019, 22, 142-156.	1.3	8
27	Her Voice Lingers on and Her Memory Is Strategic: Effects of Gender on Directed Forgetting. PLoS ONE, 2013, 8, e64030.	2.5	7
28	Positive affect facilitates the effect of a warning on false memory in the DRM paradigm. Journal of Positive Psychology, 2015, 10, 196-206.	4.0	7
29	Mental disengagement mediates the effect of rumination on smartphone use: A latent growth curve analysis. Computers in Human Behavior, 2021, 120, 106757.	8.5	7
30	Executive function moderates the effect of reappraisal on life satisfaction: A latent variable analysis Emotion, 2022, 22, 554-571.	1.8	7
31	Does bilingual fluency moderate the disruption effect of cultural cues on second-language processing?. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, E4403-E4403.	7.1	6
32	Bilingualism confers advantages in task switching: Evidence from the dimensional change card sort task. Bilingualism, 2018, 21, 1091-1109.	1.3	5
33	Mitigation of a Prospective Association Between Early Language Delay at Toddlerhood and ADHD Among Bilingual Preschoolers: Evidence from the GUSTO Cohort. Journal of Abnormal Child Psychology, 2020, 48, 511-523.	3.5	5
34	Loneliness, Sense of Control, and Risk of Dementia in Healthy Older Adults: A Moderated Mediation Analysis. Clinical Gerontologist, 2021, 44, 392-405.	2.2	5
35	Common executive function predicts reappraisal ability but not frequency Journal of Experimental Psychology: General, 2022, 151, 643-664.	2.1	5
36	Smartphone Addiction and Checking Behaviors Predict Aggression: A Structural Equation Modeling Approach. International Journal of Environmental Research and Public Health, 2021, 18, 13020.	2.6	5

#	Article	IF	CITATIONS
37	Multidimensional Profiles of Addictive Smartphone Use: A Latent Profile Analysis. Current Psychology, 2022, 41, 8410-8423.	2.8	5
38	Inconsistent Media Mediation and Problematic Smartphone Use in Preschoolers: Maternal Conflict Resolution Styles as Moderators. Children, 2022, 9, 816.	1.5	5
39	An integrative approach to investigating bilingual advantages in cognitive decline: The Australian Longitudinal Study of Ageing. International Journal of Geriatric Psychiatry, 2018, 33, 1412-1414.	2.7	4
40	Interactional Effects of Multidimensional Perfectionism and Cognitive Emotion Regulation Strategies on Eating Disorder Symptoms in Female College Students. Brain Sciences, 2021, 11, 1374.	2.3	4
41	Executive functions predict the trajectories of rumination in middle-aged and older adults: A latent growth curve analysis Emotion, 2023, 23, 776-786.	1.8	3
42	A holistic intervention program for children from low socioeconomic status families. Frontiers in Psychology, 2014, 5, 797.	2.1	2
43	Similar but not quite the same: Differential unique associations of trait fear and trait anxiety with inhibitory control. Personality and Individual Differences, 2020, 155, 109718.	2.9	2
44	Coping strategies mediate the relation between executive functions and life satisfaction in middle and late adulthood: a structural equational analysis. Aging, Neuropsychology, and Cognition, 2021, , 1-20.	1.3	2
45	Code-Switching patterns differentially shape cognitive control: Testing the predictions of the adaptive control hypothesis. Bilingualism, 2022, 25, 521-535.	1.3	2
46	Socializing Targets of Older Adults' SNS Use: Social Strain Mediates the Relations Between Older Adults' SNS Use With Friends and Well-Being Outcomes. Social Media and Society, 2022, 8, 205630512210947.	3.0	2
47	Effects of Emotional Prosody on Directed Forgetting. , 2012, , .		0
48	Malleable Creativity: Priming Content promotes Content-specific Creativity., 2012,,.		0
49	The influence of subjective socioeconomic status on executive functions in middle-aged and older adults. Aging, Neuropsychology, and Cognition, 2023, 30, 505-522.	1.3	0
50	Do Cognitive Resources Matter for Eudaimonia? The Role of Inhibitory Control in Psychological Well-being. Trends in Psychology, 0, , .	1,2	0
