#	ARTICLE	IF	CITATIONS
1	Disentangling the effects of smartphone screen time, checking frequency, and problematic use on executive function: A structural equation modelling analysis. <i>Current Psychology</i> , 2023, 42, 4225-4242.	2.8	13
2	The influence of subjective socioeconomic status on executive functions in middle-aged and older adults. <i>Aging, Neuropsychology, and Cognition</i> , 2023, 30, 505-522.	1.3	0
3	Executive functions predict the trajectories of rumination in middle-aged and older adults: A latent growth curve analysis.. <i>Emotion</i> , 2023, 23, 776-786.	1.8	3
4	Common executive function predicts reappraisal ability but not frequency.. <i>Journal of Experimental Psychology: General</i> , 2022, 151, 643-664.	2.1	5
5	Testing theoretical assumptions underlying the relation between anxiety, mind wandering, and task-switching: A diffusion model analysis.. <i>Emotion</i> , 2022, 22, 493-510.	1.8	12
6	Code-Switching patterns differentially shape cognitive control: Testing the predictions of the adaptive control hypothesis. <i>Bilingualism</i> , 2022, 25, 521-535.	1.3	2
7	Executive function moderates the effect of reappraisal on life satisfaction: A latent variable analysis.. <i>Emotion</i> , 2022, 22, 554-571.	1.8	7
8	Socializing Targets of Older Adultsâ€™ SNS Use: Social Strain Mediates the Relations Between Older Adultsâ€™ SNS Use With Friends and Well-Being Outcomes. <i>Social Media and Society</i> , 2022, 8, 205630512210947.	3.0	2
9	Multidimensional Profiles of Addictive Smartphone Use: A Latent Profile Analysis. <i>Current Psychology</i> , 2022, 41, 8410-8423.	2.8	5
10	Inconsistent Media Mediation and Problematic Smartphone Use in Preschoolers: Maternal Conflict Resolution Styles as Moderators. <i>Children</i> , 2022, 9, 816.	1.5	5
11	Loneliness, Sense of Control, and Risk of Dementia in Healthy Older Adults: A Moderated Mediation Analysis. <i>Clinical Gerontologist</i> , 2021, 44, 392-405.	2.2	5
12	Coping strategies mediate the relation between executive functions and life satisfaction in middle and late adulthood: a structural equational analysis. <i>Aging, Neuropsychology, and Cognition</i> , 2021, , 1-20.	1.3	2
13	Seeking control during uncontrollable times: Control abilities and religiosity predict stress during COVID-19. <i>Personality and Individual Differences</i> , 2021, 175, 110675.	2.9	12
14	Mental disengagement mediates the effect of rumination on smartphone use: A latent growth curve analysis. <i>Computers in Human Behavior</i> , 2021, 120, 106757.	8.5	7
15	Interactional Effects of Multidimensional Perfectionism and Cognitive Emotion Regulation Strategies on Eating Disorder Symptoms in Female College Students. <i>Brain Sciences</i> , 2021, 11, 1374.	2.3	4
16	Smartphone Addiction and Checking Behaviors Predict Aggression: A Structural Equation Modeling Approach. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 13020.	2.6	5
17	Executive Function and Subjective Well-being in Middle and Late Adulthood. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 75, e69-e77.	3.9	21
18	Mitigation of a Prospective Association Between Early Language Delay at Toddlerhood and ADHD Among Bilingual Preschoolers: Evidence from the GUSTO Cohort. <i>Journal of Abnormal Child Psychology</i> , 2020, 48, 511-523.	3.5	5

#	ARTICLE	IF	CITATIONS
19	Similar but not quite the same: Differential unique associations of trait fear and trait anxiety with inhibitory control. <i>Personality and Individual Differences</i> , 2020, 155, 109718.	2.9	2
20	Effects of Social Media and Smartphone Use on Body Esteem in Female Adolescents: Testing a Cognitive and Affective Model. <i>Children</i> , 2020, 7, 148.	1.5	30
21	Social media use improves executive functions in middle-aged and older adults: A structural equation modeling analysis. <i>Computers in Human Behavior</i> , 2020, 111, 106388.	8.5	37
22	The role of bilingual interactional contexts in predicting interindividual variability in executive functions: A latent variable analysis.. <i>Journal of Experimental Psychology: General</i> , 2020, 149, 609-633.	2.1	46
23	Commentary: Influence of smartphone addiction proneness of young children on problematic behaviors and emotional intelligence: Mediating self-assessment effects of parents using smartphones. <i>Frontiers in Psychology</i> , 2019, 10, 115.	2.1	17
24	The effects of script variation, literacy skills, and immersion experience on executive attention: A comparison of matched monoscriptal and biscriptal bilinguals. <i>Bilingualism</i> , 2019, 22, 142-156.	1.3	8
25	Bilingualism Narrows Socioeconomic Disparities in Executive Functions and Self-Regulatory Behaviors During Early Childhood: Evidence From the Early Childhood Longitudinal Study. <i>Child Development</i> , 2019, 90, 1215-1235.	3.0	83
26	Does early active bilingualism enhance inhibitory control and monitoring? A propensity-matching analysis.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2019, 45, 360-378.	0.9	24
27	Context counts: The different implications of weekday and weekend video gaming for academic performance in mathematics, reading, and science. <i>Computers and Education</i> , 2018, 120, 51-63.	8.3	34
28	Bilingualism positively predicts mathematical competence: Evidence from two large-scale studies. <i>Learning and Individual Differences</i> , 2018, 61, 216-227.	2.7	18
29	Bilingualism confers advantages in task switching: Evidence from the dimensional change card sort task. <i>Bilingualism</i> , 2018, 21, 1091-1109.	1.3	5
30	An integrative approach to investigating bilingual advantages in cognitive decline: The Australian Longitudinal Study of Ageing. <i>International Journal of Geriatric Psychiatry</i> , 2018, 33, 1412-1414.	2.7	4
31	Are all interferences bad? Bilingual advantages in working memory are modulated by varying demands for controlled processing. <i>Bilingualism</i> , 2017, 20, 184-196.	1.3	21
32	Angry faces are more resistant to forgetting than are happy faces: directed forgetting effects on the identity of emotional faces. <i>Journal of Cognitive Psychology</i> , 2017, 29, 855-865.	0.9	11
33	The Complex Nature of Bilinguals' Language Usage Modulates Task-Switching Outcomes. <i>Frontiers in Psychology</i> , 2016, 7, 560.	2.1	44
34	Bilingual effects on deployment of the attention system in linguistically and culturally homogeneous children and adults. <i>Journal of Experimental Child Psychology</i> , 2016, 146, 121-136.	1.4	46
35	Sympathy fuels creativity: The beneficial effects of sympathy on originality. <i>Thinking Skills and Creativity</i> , 2016, 21, 132-143.	3.5	9
36	Is the smartphone a smart choice? The effect of smartphone separation on executive functions. <i>Computers in Human Behavior</i> , 2016, 64, 329-336.	8.5	91

#	ARTICLE	IF	CITATIONS
37	The importance of bilingual experience in assessing bilingual advantages in executive functions. <i>Cortex</i> , 2016, 75, 237-240.	2.4	31
38	Disparate bilingual experiences modulate task-switching advantages: A diffusion-model analysis of the effects of interactional context on switch costs. <i>Cognition</i> , 2016, 150, 10-19.	2.2	170
39	Age matters: The effect of onset age of video game play on task-switching abilities. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 1125-1136.	1.3	28
40	Positive affect facilitates the effect of a warning on false memory in the DRM paradigm. <i>Journal of Positive Psychology</i> , 2015, 10, 196-206.	4.0	7
41	A holistic intervention program for children from low socioeconomic status families. <i>Frontiers in Psychology</i> , 2014, 5, 797.	2.1	2
42	The relationship between phonological awareness and executive attention in Chinese-English bilingual children. <i>Cognitive Development</i> , 2014, 30, 65-80.	1.3	15
43	Positive affect facilitates task switching in the dimensional change card sort task: Implications for the shifting aspect of executive function. <i>Cognition and Emotion</i> , 2014, 28, 1242-1254.	2.0	20
44	Her Voice Lingers on and Her Memory Is Strategic: Effects of Gender on Directed Forgetting. <i>PLoS ONE</i> , 2013, 8, e64030.	2.5	7
45	Does bilingual fluency moderate the disruption effect of cultural cues on second-language processing?. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013, 110, E4403-E4403.	7.1	6
46	Positive affect improves working memory: Implications for controlled cognitive processing. <i>Cognition and Emotion</i> , 2013, 27, 474-482.	2.0	92
47	Effects of Emotional Prosody on Directed Forgetting. , 2012, , .		0
48	Malleable Creativity: Priming Content promotes Content-specific Creativity. , 2012, , .		0
49	Early childhood bilingualism leads to advances in executive attention: Dissociating culture and language. <i>Bilingualism</i> , 2011, 14, 412-422.	1.3	163
50	Do Cognitive Resources Matter for Eudaimonia? The Role of Inhibitory Control in Psychological Well-being. <i>Trends in Psychology</i> , 0, , .	1.2	0
