86	Informal Care and Economic Stressors11In this chapter, I use the term informal care because it is a standard term used in the academic literature. The term is intended to distinguish care from family members and friends, who are typically untrained and unpaid, from formal care, in which care is provided by paid, and usually trained, semiprofessionals or professionals who have no preexisting personal relationship with the care recipient. An alternative term is family caregiver, but I prefer the term informal. , 2015, , 105-133.		5
