#	ARTICLE	IF	CITATIONS
1	Adolescent Health and Healthy China 2030: A Review. <i>Journal of Adolescent Health</i> , 2020, 67, S24-S31.	2.5	40
2	Effect of childhood phthalates exposure on the risk of overweight and obesity: A nested case-control study in China. <i>Environment International</i> , 2022, 158, 106886.	10.0	22
3	Greenness alleviates the effects of ambient particulate matter on the risks of high blood pressure in children and adolescents. <i>Science of the Total Environment</i> , 2022, 812, 152431.	8.0	22
4	Association between Body Fat and Elevated Blood Pressure among Children and Adolescents Aged 7–17 Years: Using Dual-Energy X-ray Absorptiometry (DEXA) and Bioelectrical Impedance Analysis (BIA) from a Cross-Sectional Study in China. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 9254.	2.6	16
5	Comprehensive physical fitness and high blood pressure in children and adolescents: A national cross-sectional survey in China. <i>Journal of Science and Medicine in Sport</i> , 2020, 23, 800-806.	1.3	14
6	Association between Fruit Consumption and Lipid Profile among Children and Adolescents: A National Cross-Sectional Study in China. <i>Nutrients</i> , 2022, 14, 63.	4.1	14
7	Adiposity Status, Trajectories, and Earlier Puberty Onset: Results From a Longitudinal Cohort Study. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2022, 107, 2462-2472.	3.6	13
8	Association of high birth weight with overweight and obesity in Chinese students aged 6–18 years: a national, cross-sectional study in China. <i>BMJ Open</i> , 2019, 9, e024532.	1.9	11
9	Association between pubertal development and elevated blood pressure in children. <i>Journal of Clinical Hypertension</i> , 2021, 23, 1498-1505.	2.0	11
10	Association between urinary phthalate metabolites and dyslipidemia in children: Results from a Chinese cohort study. <i>Environmental Pollution</i> , 2022, 295, 118632.	7.5	9
11	Could greenness modify the effects of physical activity and air pollutants on overweight and obesity among children and adolescents?. <i>Science of the Total Environment</i> , 2022, 832, 155117.	8.0	9
12	Relationship between parental overweight and obesity and childhood metabolic syndrome in their offspring: result from a cross-sectional analysis of parent-offspring trios in China. <i>BMJ Open</i> , 2020, 10, e036332.	1.9	7
13	Association between birth weight and risk of abdominal obesity in children and adolescents: a school-based epidemiology survey in China. <i>BMC Public Health</i> , 2020, 20, 1686.	2.9	6
14	Association Between Maternal Lifestyle and Risk of Metabolic Syndrome in Offspring—A Cross-Sectional Study From China. <i>Frontiers in Endocrinology</i> , 2020, 11, 552054.	3.5	6
15	The Association Between Single-Child Status and Risk of Abdominal Obesity: Result From a Cross-Sectional Study of China. <i>Frontiers in Pediatrics</i> , 2021, 9, 697047.	1.9	6
16	The Association between Breastfeeding Duration and Lipid Profile among Children and Adolescents. <i>Nutrients</i> , 2021, 13, 2728.	4.1	6
17	Low Birthweight Is Associated with Higher Risk of High Blood Pressure in Chinese Girls: Results from a National Cross-Sectional Study in China. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 2898.	2.6	5
18	Associations Between Single-Child Status and Metabolic Syndrome in Children and Adolescents in China. <i>Frontiers in Pediatrics</i> , 2021, 9, 661164.	1.9	5

#	ARTICLE	IF	CITATIONS
19	The association between growth patterns and blood pressure in children and adolescents: A cross-sectional study of seven provinces in China. <i>Journal of Clinical Hypertension</i> , 2021, 23, 2053-2064.	2.0	5
20	Trends in associations between socioeconomic development and urban-rural disparity with high blood pressure in Chinese children and adolescents over two decades. <i>Journal of Human Hypertension</i> , 2021, , .	2.2	3
21	Prepubertal BMI, pubertal growth patterns, and long-term BMI: Results from a longitudinal analysis in Chinese children and adolescents from 2005 to 2016. <i>European Journal of Clinical Nutrition</i> , 2022, 76, 1432-1439.	2.9	3
22	Ambient gaseous pollutant exposure and incidence of visual impairment among children and adolescents: findings from a longitudinal, two-center cohort study in China. <i>Environmental Science and Pollution Research</i> , 2022, 29, 73262-73270.	5.3	3
23	Parental Adherence to Ideal Cardiovascular Health Status Was Associated With a Substantially Lower Prevalence of Overweight and Obesity in Their Offspring Aged 6-18 Years. <i>Frontiers in Nutrition</i> , 2021, 8, 715171.	3.7	2
24	Association between healthy lifestyle pattern and early onset of puberty: based on a longitudinal follow-up study. <i>British Journal of Nutrition</i> , 2022, 128, 2320-2329.	2.3	2
