| 1  | What's in a Name? A Cost-Effectiveness Analysis of the Noninvasive Follicular Thyroid Neoplasm with Papillary-Like Nuclear Features' Nomenclature Revision. <i>Thyroid</i> , 2022, 32, 421-428.                                                                                                                                                                                                                                                                                                                                                                               | 4.5  | 4         |
| 2  | <i>Letter to the Editor:</i> Sensitivity of Palpation for Detection of Thyroid Nodules with Attention to Size. <i>Thyroid</i> , 2022, 32, 599-601.                                                                                                                                                                                                                                                                                                                                                                                                                            | 4.5  | 2         |
| 3  | American Head and Neck Society Endocrine Surgery Section and International Thyroid Oncology Group consensus statement on mutational testing in thyroid cancer: Defining advanced thyroid cancer and its targeted treatment. <i>Head and Neck</i> , 2022, 44, 1277-1300.                                                                                                                                                                                                                                                                                                       | 2.0  | 41        |
| 4  | Radiofrequency ablation and related <sc>ultrasound</sc> guided</sc> ablation technologies for treatment of benign and malignant thyroid disease: An international multidisciplinary consensus statement of the American Head and Neck Society Endocrine Surgery Section with the Asia Pacific Society of Thyroid Surgery, Associazione Medici Endocrinologi, British Association of Endocrine and Thyroid Surgeons, European Thyroid Association, Italian Society of Endocrine Surgery Units, Korean Society of Thyroid Radiology,. <i>Head and Neck</i> , 2022, 44, 633-660. | 2.0  | 92        |
| 5  | How Will We Know When the â€œRightâ€•Number of People Choose Active Surveillance?:. <i>Thyroid</i> , 2022, 32, 750-751.                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 4.5  | 1         |
| 6  | Factors associated with physiciansâ€™™ recommendations for managing low-risk papillary thyroid cancer. <i>American Journal of Surgery</i> , 2021, 222, 111-118.                                                                                                                                                                                                                                                                                                                                                                                                               | 1.8  | 19        |
| 7  | Thyroid cancer in the USA: current trends and outstanding questions. <i>Lancet Diabetes and Endocrinology</i> ,the, 2021, 9, 11-12.                                                                                                                                                                                                                                                                                                                                                                                                                                           | 11.4 | 39        |
| 8  | Why are there different conclusions about thyroid cancer mortality?. <i>Head and Neck</i> , 2021, 43, 984-986.                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 2.0  | 0         |
| 9  | Current Trainee and Workforce Patterns for Thyroid and Parathyroid Surgery in the United States. <i>Endocrine Practice</i> , 2021, 27, 749-753.                                                                                                                                                                                                                                                                                                                                                                                                                               | 2.1  | 0         |
| 10 | Perioperative pain management and opioidâ€™reduction in head and neck endocrine surgery: An American Head and Neck Society Endocrine Surgery Section consensus statement. <i>Head and Neck</i> , 2021, 43, 2281-2294.                                                                                                                                                                                                                                                                                                                                                         | 2.0  | 11        |
| 11 | Face-to-Face Compared With Online Collected Accounts of Health and Illness Experiences: A Scoping Review. <i>Qualitative Health Research</i> , 2020, 30, 2092-2102.                                                                                                                                                                                                                                                                                                                                                                                                           | 2.1  | 77        |
| 12 | Racial Disparities in Cancer Presentation and Outcomes: The Contribution of Overdiagnosis. <i>JNCI Cancer Spectrum</i> , 2020, 4, pkaa001.                                                                                                                                                                                                                                                                                                                                                                                                                                    | 2.9  | 12        |
| 13 | Re: â€œA Prospective Mixed-Methods Study of Decision-Making on Surgery or Active Surveillance for Low-Risk Papillary Thyroid Cancerâ€•by Sawka et al.. <i>Thyroid</i> , 2020, 30, 1541-1542.                                                                                                                                                                                                                                                                                                                                                                                  | 4.5  | 0         |
| 14 | Harnessing the Synergy Between Improvement Science and Implementation Science in Cancer: A Call to Action. <i>Journal of Oncology Practice</i> , 2018, 14, 335-340.                                                                                                                                                                                                                                                                                                                                                                                                           | 2.5  | 51        |
| 15 | Long-term strategies for thyroid health monitoring after nuclear accidents: recommendations from an Expert Group convened by IARC. <i>Lancet Oncology</i> , The, 2018, 19, 1280-1283.                                                                                                                                                                                                                                                                                                                                                                                         | 10.7 | 23        |
| 16 | Experience of US Patients Who Self-identify as Having an Overdiagnosed Thyroid Cancer. <i>JAMA Otolaryngology - Head and Neck Surgery</i> , 2017, 143, 663.                                                                                                                                                                                                                                                                                                                                                                                                                   | 2.2  | 26        |
| 17 | Overdiagnosis of thyroid cancer. <i>BMJ</i> , The, 2016, 355, i6312.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 6.0  | 28        |
| 18 | Standards for Quality Improvement Reporting Excellence 2.0: revised publication guidelines from a detailed consensus process. <i>Journal of Surgical Research</i> , 2016, 200, 676-682.                                                                                                                                                                                                                                                                                                                                                                                       | 1.6  | 59        |
