|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Impact of body mass index on the outcome of elderly patients treated with transcatheter aortic valve implantation. <i>Internal and Emergency Medicine</i> , 2022, 17, 369-376.                                                                                                                                                                      | 1.0 | 6         |
| 2  | COVID-19 pandemic, mechanical reperfusion and 30-day mortality in ST elevation myocardial infarction. <i>Heart</i> , 2022, 108, 458-466.                                                                                                                                                                                                            | 1.2 | 28        |
| 3  | Search for familial hypercholesterolemia patients in an Italian community: A real-life retrospective study. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2022, , .                                                                                                                                                                    | 1.1 | 3         |
| 4  | Complete versus culprit-only strategy in older MI patients with multivessel disease. <i>Catheterization and Cardiovascular Interventions</i> , 2022, 99, 970-978.                                                                                                                                                                                   | 0.7 | 4         |
| 5  | Red blood cell distribution width in patients undergoing transcatheter aortic valve implantation: Implications for outcomes. <i>International Journal of Clinical Practice</i> , 2021, 75, e14153.                                                                                                                                                  | 0.8 | 4         |
| 6  | Impact of renin-angiotensin system inhibitors on mortality during the COVID Pandemic among STEMI patients undergoing mechanical reperfusion: Insight from an international STEMI registry. <i>Biomedicine and Pharmacotherapy</i> , 2021, 138, 111469.                                                                                              | 2.5 | 3         |
| 7  | Complete Revascularization in Patients Undergoing a Pharmacoinvasive Strategy for ST-Segment Elevation Myocardial Infarction: Insights From the COMPLETE Trial. <i>Circulation: Cardiovascular Interventions</i> , 2021, 14, e010458.                                                                                                               | 1.4 | 2         |
| 8  | Impact of SARS-CoV-2 positivity on clinical outcome among STEMI patients undergoing mechanical reperfusion: Insights from the ISACS STEMI COVID 19 registry. <i>Atherosclerosis</i> , 2021, 332, 48-54.                                                                                                                                             | 0.4 | 28        |
| 9  | Renin-Angiotensin System inhibitors and mortality among diabetic patients with STEMI undergoing mechanical reperfusion during the COVID Pandemic. <i>Diabetes Epidemiology and Management</i> , 2021, 4, 100022.                                                                                                                                    | 0.4 | 1         |
| 10 | Comparison of long-term clinical outcomes in multivessel coronary artery disease patients treated either with bioresorbable polymer sirolimus-eluting stent or permanent polymer everolimus-eluting stent: 5-year results of the CENTURY II randomized clinical trial. <i>Catheterization and Cardiovascular Interventions</i> , 2020, 95, 175-184. | 0.7 | 8         |
| 11 | Complete revascularization reduces cardiovascular death in patients with ST-segment elevation myocardial infarction and multivessel disease: systematic review and meta-analysis of randomized clinical trials. <i>European Heart Journal</i> , 2020, 41, 4103-4110.                                                                                | 1.0 | 59        |
| 12 | Timing of Oral P2Y12 Inhibitor Administration in Patients With Non-ST-Segment Elevation Acute Coronary Syndrome. <i>Journal of the American College of Cardiology</i> , 2020, 76, 2450-2459.                                                                                                                                                        | 1.2 | 64        |
| 13 | Physiology-guided revascularization versus optimal medical therapy of nonculprit lesions in elderly patients with myocardial infarction: Rationale and design of the FIRE trial. <i>American Heart Journal</i> , 2020, 229, 100-109.                                                                                                                | 1.2 | 24        |
| 14 | Downstream or upstream administration of P2Y12 receptor blockers in non-ST elevated acute coronary syndromes: study protocol for a randomized controlled trial. <i>Trials</i> , 2020, 21, 966.                                                                                                                                                      | 0.7 | 1         |
| 15 | Impact of COVID-19 Pandemic on Mechanical Reperfusion for Patients With STEMI. <i>Journal of the American College of Cardiology</i> , 2020, 76, 2321-2330.                                                                                                                                                                                          | 1.2 | 154       |
| 16 | Kidney dysfunction and short term all-cause mortality after transcatheter aortic valve implantation. <i>European Journal of Internal Medicine</i> , 2020, 81, 32-37.                                                                                                                                                                                | 1.0 | 9         |
| 17 | Impact of COVID-19 pandemic and diabetes on mechanical reperfusion in patients with STEMI: insights from the ISACS STEMI COVID 19 Registry. <i>Cardiovascular Diabetology</i> , 2020, 19, 215.                                                                                                                                                      | 2.7 | 30        |
| 18 | Balloon aortic valvuloplasty as a palliative treatment in patients with severe aortic stenosis and limited life expectancy: a single center experience. <i>Aging</i> , 2020, 12, 16597-16608.                                                                                                                                                       | 1.4 | 4         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                     | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Angiographic control versus ischaemia-driven management of patients undergoing percutaneous revascularisation of the unprotected left main coronary artery with second-generation drug-eluting stents: rationale and design of the PULSE trial. <i>Open Heart</i> , 2020, 7, e001253.       | 0.9 | 1         |
| 20 | Impact of sex on comparative outcomes of bivalirudin versus unfractionated heparin in patients with acute coronary syndromes undergoing invasive management: a pre-specified analysis of the MATRIX trial. <i>EuroIntervention</i> , 2019, 15, e269-e278.                                   | 1.4 | 2         |
| 21 | Radial versus femoral access and bivalirudin versus unfractionated heparin in invasively managed patients with acute coronary syndrome (MATRIX): final 1-year results of a multicentre, randomised controlled trial. <i>Lancet, The</i> , 2018, 392, 835-848.                               | 6.3 | 215       |
| 22 | Acute Kidney Injury After Radial or Femoral Access for Invasive Acute Coronary Syndrome Management. <i>Journal of the American College of Cardiology</i> , 2017, 69, 2592-2603.                                                                                                             | 1.2 | 132       |
| 23 | Risk of Adverse Cardiac and Bleeding Events Following Cardiac and Noncardiac Surgery in Patients With Coronary Stent. <i>Circulation: Cardiovascular Quality and Outcomes</i> , 2016, 9, 39-47.                                                                                             | 0.9 | 40        |
| 24 | Same-day transfer for the invasive strategy of patients with non-ST-segment elevation acute coronary syndrome admitted to spoke hospitals: Data from the Emilia-Romagna Regional Network. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2016, 5, 428-434.                      | 0.4 | 10        |
| 25 | Design and rationale for the Minimizing Adverse haemorrhagic events by TRansradial access site and systemic Implementation of angioX program. <i>American Heart Journal</i> , 2014, 168, 838-845.e6.                                                                                        | 1.2 | 47        |
| 26 | Incidence and Outcome of High On-Treatment Platelet Reactivity in Patients With Non-ST Elevation Acute Coronary Syndromes Undergoing Percutaneous Coronary Intervention (from the VIP) <i>Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 462 T</i> 792-798.                                           | 0.7 | 12        |
| 27 | Coronary stenting using the radial approach in two women with situs viscerum inversus and acute myocardial infarction. <i>Cardiovascular Revascularization Medicine</i> , 2012, 13, 128-132.                                                                                                | 0.3 | 8         |
| 28 | Comparison of sirolimus-eluting and bare metal stent for treatment of patients with total coronary occlusions: results of the GISSOC II-GISE multicentre randomized trial. <i>European Heart Journal</i> , 2010, 31, 2014-2020.                                                             | 1.0 | 56        |
| 29 | Left Ventricular Function After ST-Elevation Myocardial Infarction in Patients Treated With Primary Percutaneous Coronary Intervention and Abciximab or Tirofiban (from the Facilitated Angioplasty) <i>Tj ETQq1 1 0.78 431 4 rgBT /Overlock</i>                                            | 1.0 | 56        |
| 30 | Response to Letters Regarding Article, "Two-Year Clinical Outcomes With Drug-Eluting Stents for Diabetic Patients With De Novo Coronary Lesions: Results From a Real-World Multicenter Registry" <i>Circulation</i> , 2008, 118, .                                                          | 1.6 | 0         |
| 31 | Clinical impact of an inter-hospital transfer strategy in patients with ST-elevation myocardial infarction undergoing primary angioplasty: the Emilia-Romagna ST-segment elevation acute myocardial infarction network. <i>European Heart Journal</i> , 2008, 29, 1834-1842.                | 1.0 | 56        |
| 32 | Randomized comparison between tirofiban and abciximab to promote complete ST-resolution in primary angioplasty: results of the facilitated angioplasty with tirofiban or abciximab (FATA) in ST-elevation myocardial infarction trial. <i>European Heart Journal</i> , 2008, 29, 2972-2980. | 1.0 | 41        |
| 33 | Two-Year Clinical Outcomes With Drug-Eluting Stents for Diabetic Patients With De Novo Coronary Lesions. <i>Circulation</i> , 2008, 117, 923-930.                                                                                                                                           | 1.6 | 66        |
| 34 | Time to treatment and ST-segment resolution in high-risk patients with acute myocardial infarction transferred from community hospitals for coronary angioplasty after pharmacological treatment. <i>Journal of Cardiovascular Medicine</i> , 2008, 9, 32-38.                               | 0.6 | 2         |
| 35 | Acute myocardial infarction due to spontaneous coronary artery dissection treated with primary coronary angioplasty: a case report. <i>Journal of Cardiovascular Medicine</i> , 2007, 8, 738-740.                                                                                           | 0.6 | 2         |
| 36 | Economic appraisal of the angioplasty procedures performed in 2004 in a high-volume diagnostic and interventional cardiology unit. <i>Journal of Cardiovascular Medicine</i> , 2007, 8, 792-798.                                                                                            | 0.6 | 1         |

| #  | ARTICLE                                                                                                                                                                                                                                | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Safety and Long-Term Efficacy of Sirolimus Eluting Stent in ST-elevation Acute Myocardial Infarction: The REAL (Registro REgionale AngiopLastiche Emilia-Romagna) Registry. <i>Cardiovascular Drugs and Therapy</i> , 2006, 20, 63-68. | 1.3 | 16        |
| 38 | Combined Abciximab REteplase Stent Study in acute myocardial infarction (CARESS in AMI). <i>American Heart Journal</i> , 2004, 148, 378-385.                                                                                           | 1.2 | 37        |
| 39 | No Evidence of Association Between Prothrombotic Gene Polymorphisms and the Development of Acute Myocardial Infarction at a Young Age. <i>Circulation</i> , 2003, 107, 1117-1122.                                                      | 1.6 | 191       |
| 40 | Results and complications of the carotid sinus massage performed according to the "method of symptoms". <i>American Journal of Cardiology</i> , 2002, 89, 599-601.                                                                     | 0.7 | 123       |
