

# Susan E Maloney

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/280077/susan-e-maloney-publications-by-year.pdf>

**Version:** 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

37  
papers

1,144  
citations

13  
h-index

33  
g-index

46  
ext. papers

1,397  
ext. citations

6.7

L-index

#	Paper	IF	Citations
37	Fluoxetine exposure throughout neurodevelopment differentially influences basilar dendritic morphology in the motor and prefrontal cortices.. <i>Scientific Reports</i> , <b>2022</b> , 12, 7605	4.9	
36	Identification of disease-linked hyperactivating mutations in UBE3A through large-scale functional variant analysis. <i>Nature Communications</i> , <b>2021</b> , 12, 6809	17.4	1
35	A MYT1L syndrome mouse model recapitulates patient phenotypes and reveals altered brain development due to disrupted neuronal maturation. <i>Neuron</i> , <b>2021</b> , 109, 3775-3792.e14	13.9	5
34	Loss of Quaking RNA binding protein disrupts the expression of genes associated with astrocyte maturation in mouse brain. <i>Nature Communications</i> , <b>2021</b> , 12, 1537	17.4	4
33	Shared developmental gait disruptions across two mouse models of neurodevelopmental disorders. <i>Journal of Neurodevelopmental Disorders</i> , <b>2021</b> , 13, 10	4.6	1
32	Oxytocin receptor activation does not mediate associative fear deficits in a Williams Syndrome model. <i>Genes, Brain and Behavior</i> , <b>2021</b> , e12750	3.6	1
31	Altered neuronal physiology, development, and function associated with a common chromosome 15 duplication involving CHRNA7. <i>BMC Biology</i> , <b>2021</b> , 19, 147	7.3	2
30	Ontogenetic Oxycodone Exposure Affects Early Life Communicative Behaviors, Sensorimotor Reflexes, and Weight Trajectory in Mice. <i>Frontiers in Behavioral Neuroscience</i> , <b>2021</b> , 15, 615798	3.5	1
29	The trajectory of gait development in mice. <i>Brain and Behavior</i> , <b>2020</b> , 10, e01636	3.4	10
28	In utero exposure to transient ischemia-hypoxemia promotes long-term neurodevelopmental abnormalities in male rat offspring. <i>JCI Insight</i> , <b>2020</b> , 5,	9.9	5
27	Functions of Gtf2i and Gtf2ird1 in the developing brain: transcription, DNA binding and long-term behavioral consequences. <i>Human Molecular Genetics</i> , <b>2020</b> , 29, 1498-1519	5.6	5
26	A viral toolkit for recording transcription factor-DNA interactions in live mouse tissues. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2020</b> , 117, 10003-10014	11.5	7
25	Gtf2i and Gtf2ird1 mutation do not account for the full phenotypic effect of the Williams syndrome critical region in mouse models. <i>Human Molecular Genetics</i> , <b>2019</b> , 28, 3443-3465	5.6	11
24	Loss of CELF6 RNA binding protein impairs cocaine conditioned place preference and contextual fear conditioning. <i>Genes, Brain and Behavior</i> , <b>2019</b> , 18, e12593	3.6	6
23	Erroneous inference based on a lack of preference within one group: Autism, mice, and the social approach task. <i>Autism Research</i> , <b>2019</b> , 12, 1171-1183	5.1	15
22	Repeated neonatal isoflurane exposures in the mouse induce apoptotic degenerative changes in the brain and relatively mild long-term behavioral deficits. <i>Scientific Reports</i> , <b>2019</b> , 9, 2779	4.9	19
21	Maternal Fluoxetine Exposure Alters Cortical Hemodynamic and Calcium Response of Offspring to Somatosensory Stimuli. <i>ENeuro</i> , <b>2019</b> , 6,	3.9	1

20	Using animal models to evaluate the functional consequences of anesthesia during early neurodevelopment. <i>Neurobiology of Learning and Memory</i> , <b>2019</b> , 165, 106834	3.1	12
19	Characterization of early communicative behavior in mouse models of neurofibromatosis type 1. <i>Autism Research</i> , <b>2018</b> , 11, 44-58	5.1	21
18	Examining the Reversibility of Long-Term Behavioral Disruptions in Progeny of Maternal SSRI Exposure. <i>ENeuro</i> , <b>2018</b> , 5,	3.9	17
17	Abnormal Microglia and Enhanced Inflammation-Related Gene Transcription in Mice with Conditional Deletion of in -Expressing Neurons. <i>Journal of Neuroscience</i> , <b>2018</b> , 38, 200-219	6.6	38
16	Characterization of a Mouse Model of Břeson-Forsman-Lehmann Syndrome. <i>Cell Reports</i> , <b>2018</b> , 25, 1404-1414.e6	10.6	11
15	The RNA-binding protein Celf6 is highly expressed in diencephalic nuclei and neuromodulatory cell populations of the mouse brain. <i>Brain Structure and Function</i> , <b>2016</b> , 221, 1809-31	4	9
14	Anti-tau antibody reduces insoluble tau and decreases brain atrophy. <i>Annals of Clinical and Translational Neurology</i> , <b>2015</b> , 2, 278-88	5.3	119
13	Smoking in schizophrenic patients: A critique of the self-medication hypothesis. <i>World Journal of Psychiatry</i> , <b>2015</b> , 5, 35-46	3	45
12	Antisense reduction of tau in adult mice protects against seizures. <i>Journal of Neuroscience</i> , <b>2013</b> , 33, 12887-97	6.6	198
11	Anti-tau antibodies that block tau aggregate seeding in vitro markedly decrease pathology and improve cognition in vivo. <i>Neuron</i> , <b>2013</b> , 80, 402-414	13.9	387
10	The disruption of Celf6, a gene identified by translational profiling of serotonergic neurons, results in autism-related behaviors. <i>Journal of Neuroscience</i> , <b>2013</b> , 33, 2732-53	6.6	77
9	Identifying essential cell types and circuits in autism spectrum disorders. <i>International Review of Neurobiology</i> , <b>2013</b> , 113, 61-96	4.4	16
8	Translational profiling of hypocretin neurons identifies candidate molecules for sleep regulation. <i>Genes and Development</i> , <b>2013</b> , 27, 565-78	12.6	73
7	Adrenal steroids uniquely influence sexual motivation behavior in male rats. <i>Behavioral Sciences (Basel, Switzerland)</i> , <b>2012</b> , 2, 195-206	2.3	2
6	Long-term Effects of Multiple Glucocorticoid Exposures in Neonatal Mice. <i>Behavioral Sciences (Basel, Switzerland)</i> , <b>2011</b> , 1, 4-30	2.3	18
5	The trajectory of gait development in mice		1
4	Ontogenetic Oxycodone Exposure Affects Early-Life Communicative Behaviors, Sensorimotor Reflexes, and Weight Trajectory in Mice		1
3	Shared developmental gait disruptions across two mouse models of neurodevelopmental disorders		1

2	Erroneous inference based on a lack of preference within one group: autism, mice, and the Social Approach Task	2
1	Gtf2i and Gtf2ird1 mutation are not sufficient to reproduce mouse phenotypes caused by the Williams Syndrome critical region	1
