

Lewis G Spurgin

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2813817/lewis-g-spurgin-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
37	Using high-resolution contact networks to evaluate SARS-CoV-2 transmission and control in large-scale multi-day events.. <i>Nature Communications</i> , 2022 , 13, 1956	17.4	1
36	Genetic pest management and the background genetics of release strains. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2021 , 376, 20190805	5.8	8
35	Tribolium beetles as a model system in evolution and ecology. <i>Heredity</i> , 2021 , 126, 869-883	3.6	7
34	Genomic variation, population history and within-archipelago adaptation between island bird populations. <i>Royal Society Open Science</i> , 2021 , 8, 201146	3.3	1
33	Telomere heritability and parental age at conception effects in a wild avian population. <i>Molecular Ecology</i> , 2021 ,	5.7	11
32	Polyandry provides reproductive and genetic benefits in colonising populations. <i>Ecology and Evolution</i> , 2020 , 10, 10851-10857	2.8	3
31	Using a real-world network to model localized COVID-19 control strategies. <i>Nature Medicine</i> , 2020 , 26, 1616-1622	50.5	97
30	Temporal dynamics of competitive fertilization in social groups of red junglefowl (<i>Gallus gallus</i>) shed new light on avian sperm competition. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2020 , 375, 20200081	5.8	3
29	Conservation: The Costs of Inbreeding and of Being Inbred. <i>Current Biology</i> , 2019 , 29, R796-R798	6.3	1
28	Response to Perrier and Charmantier: On the importance of time scales when studying adaptive evolution. <i>Evolution Letters</i> , 2019 , 3, 248-253	5.3	
27	The Genomic Complexity of a Large Inversion in Great Tits. <i>Genome Biology and Evolution</i> , 2019 , 11, 1870-1881	5.5	6
26	Breeders that receive help age more slowly in a cooperatively breeding bird. <i>Nature Communications</i> , 2019 , 10, 1301	17.4	34
25	Differential female sociality is linked with the fine-scale structure of sexual interactions in replicate groups of red junglefowl,. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2019 , 286, 20191734	4.4	7
24	Adaptive landscape genetics and malaria across divergent island bird populations. <i>Ecology and Evolution</i> , 2019 , 9, 12482-12502	2.8	1
23	Genomic associations with bill length and disease reveal drift and selection across island bird populations. <i>Evolution Letters</i> , 2018 , 2, 22-36	5.3	14
22	Spatio-temporal variation in lifelong telomere dynamics in a long-term ecological study. <i>Journal of Animal Ecology</i> , 2018 , 87, 187-198	4.7	50
21	Lineages evolved under stronger sexual selection show superior ability to invade conspecific competitor populations. <i>Evolution Letters</i> , 2018 , 2, 511-523	5.3	7

20	Joint care can outweigh costs of nonkin competition in communal breeders. <i>Behavioral Ecology</i> , 2018 , 29, 169-178	2.3	4
19	Pre- and postcopulatory sexual selection favor aggressive, young males in polyandrous groups of red junglefowl. <i>Evolution; International Journal of Organic Evolution</i> , 2017 , 71, 1653-1669	3.8	29
18	Kinship and familiarity mitigate costs of social conflict between Seychelles warbler neighbors. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017 , 114, E9036-E9045	11.5	20
17	Recent natural selection causes adaptive evolution of an avian polygenic trait. <i>Science</i> , 2017 , 358, 365-368	5.3	101
16	Telomere length reveals cumulative individual and transgenerational inbreeding effects in a passerine bird. <i>Molecular Ecology</i> , 2016 , 25, 2949-60	5.7	33
15	What are We Learning about Speciation and Extinction from the Canary Islands?. <i>Ardeola</i> , 2016 , 63, 15	1.1	35
14	Landscape-scale variation in an anthropogenic factor shapes immune gene variation within a wild population. <i>Molecular Ecology</i> , 2016 , 25, 4234-46	5.7	13
13	Sexual selection protects against extinction. <i>Nature</i> , 2015 , 522, 470-3	50.4	107
12	Senescence in the wild: Insights from a long-term study on Seychelles warblers. <i>Experimental Gerontology</i> , 2015 , 71, 69-79	4.5	39
11	Drift, not selection, shapes toll-like receptor variation among oceanic island populations. <i>Molecular Ecology</i> , 2015 , 24, 5852-63	5.7	33
10	454 screening of individual MHC variation in an endemic island passerine. <i>Immunogenetics</i> , 2015 , 67, 149-62	3.2	13
9	Genetic and phenotypic divergence in an island bird: isolation by distance, by colonization or by adaptation?. <i>Molecular Ecology</i> , 2014 , 23, 1028-39	5.7	73
8	Museum DNA reveals the demographic history of the endangered Seychelles warbler. <i>Evolutionary Applications</i> , 2014 , 7, 1134-43	4.8	43
7	Comment on Gohli et al. (2013): "Does promiscuity explain differences in levels of genetic diversity across passerine birds?". <i>Evolution; International Journal of Organic Evolution</i> , 2013 , 67, 3071-2	3.8	5
6	Biogeographical patterns and co-occurrence of pathogenic infection across island populations of Berthelot's pipit (<i>Anthus berthelotii</i>). <i>Oecologia</i> , 2012 , 168, 691-701	2.9	40
5	Gene conversion rapidly generates major histocompatibility complex diversity in recently founded bird populations. <i>Molecular Ecology</i> , 2011 , 20, 5213-25	5.7	71
4	How pathogens drive genetic diversity: MHC, mechanisms and misunderstandings. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2010 , 277, 979-88	4.4	485
3	Using high-resolution contact networks to evaluate SARS-CoV-2 transmission and control in large-scale multi-day events		2

2	Combining fine-scale social contact data with epidemic modelling reveals interactions between contact tracing, quarantine, testing and physical distancing for controlling COVID-19	14
1	The great tit HapMap project: a continental-scale analysis of genomic variation in a songbird	6
