HUREDT MODIN

#	Article	IF	CITATIONS
1	Influence of soil warming and Nâ€addition on sap flux density and stem radius variation in boreal stands in Quebec, Canada. Ecohydrology, 2021, 14, e2261.	2.4	1
2	Environmental and developmental factors driving xylem anatomy and microâ€density in black spruce. New Phytologist, 2021, 230, 957-971.	7.3	13
3	An indicator species highlights continuous deadwood supply is a key ecological attribute of boreal oldâ€growth forests. Ecosphere, 2021, 12, e03507.	2.2	10
4	Regionwide temporal gradients of carbon allocation allow for shoot growth and latewood formation in boreal black spruce. Global Ecology and Biogeography, 2021, 30, 1657-1670.	5.8	12
5	Spatiotemporal Dynamics of 20th-Century Spruce Budworm Outbreaks in Eastern Canada: Three Distinct Patterns of Outbreak Severity. Frontiers in Ecology and Evolution, 2021, 8, .	2.2	8
6	Linking radial growth patterns and moderateâ€severity disturbance dynamics in boreal oldâ€growth forests driven by recurrent insect outbreaks: A tale of opportunities, successes, and failures. Ecology and Evolution, 2021, 11, 566-586.	1.9	3
7	The role of plant hormones in tree-ring formation. Trees - Structure and Function, 2020, 34, 315-335.	1.9	46
8	Forest management has reduced the structural diversity of residual boreal old-growth forest landscapes in Eastern Canada. Forest Ecology and Management, 2020, 458, 117765.	3.2	23
9	Boreal old-growth forest structural diversity challenges aerial photographic survey accuracy. Canadian Journal of Forest Research, 2020, 50, 155-169.	1.7	9
10	Driving factors of conifer regeneration dynamics in eastern Canadian boreal old-growth forests. PLoS ONE, 2020, 15, e0230221.	2.5	23
11	Comparing the Cell Dynamics of Tree-Ring Formation Observed in Microcores and as Predicted by the Vaganov–Shashkin Model. Frontiers in Plant Science, 2020, 11, 1268.	3.6	23
12	Unveiling the Diversity of Tree Growth Patterns in Boreal Old-Growth Forests Reveals the Richness of Their Dynamics. Forests, 2020, 11, 252.	2.1	17
13	ls size an issue of time? Relationship between the duration of xylem development and cell traits. Annals of Botany, 2019, 123, 1257-1265.	2.9	35
14	Wood quality of black spruce and balsam fir trees defoliated by spruce budworm: A case study in the boreal forest of Quebec, Canada. Forest Ecology and Management, 2019, 437, 201-210.	3.2	10
15	Secondary disturbances of low and moderate severity drive the dynamics of eastern Canadian boreal old-growth forests. Annals of Forest Science, 2019, 76, 1.	2.0	24
16	Chilling and forcing temperatures interact to predict the onset of wood formation in Northern Hemisphere conifers. Global Change Biology, 2019, 25, 1089-1105.	9.5	72
17	Structural diversity and dynamics of boreal old-growth forests case study in Eastern Canada. Forest Ecology and Management, 2018, 422, 125-136.	3.2	39
18	Changes in Spatiotemporal Patterns of 20th Century Spruce Budworm Outbreaks in Eastern Canadian Boreal Forests. Frontiers in Plant Science, 2018, 9, 1905.	3.6	87

HUBERT MORIN

#	Article	IF	CITATIONS
19	The Physiological Mechanisms Behind the Earlywood-To-Latewood Transition: A Process-Based Modeling Approach. Frontiers in Plant Science, 2018, 9, 1053.	3.6	80
20	Radial Growth Response of Black Spruce Stands Ten Years after Experimental Shelterwoods and Seed-Tree Cuttings in Boreal Forest. Forests, 2016, 7, 240.	2.1	82
21	Effects of soil warming and nitrogen foliar applications on bud burst of black spruce. Trees - Structure and Function, 2016, 30, 87-97.	1.9	40
22	Woody biomass production lags stem-girth increase by over one month in coniferous forests. Nature Plants, 2015, 1, 15160.	9.3	294
23	Climateâ€induced changes in host tree–insect phenology may drive ecological stateâ€shift in boreal forests. Ecology, 2015, 96, 1480-1491.	3.2	138
24	High-resolution analysis of stem radius variations in black spruce [Picea mariana (Mill.) BSP] subjected to rain exclusion for three summers. Trees - Structure and Function, 2014, 28, 1257-1265.	1.9	20
25	The effects of N-enriched rain and warmer soil on the ectomycorrhizae of black spruce remain inconclusive in the short term. Annals of Forest Science, 2013, 70, 825-834.	2.0	19
26	Xylogenesis in black spruce: does soil temperature matter?. Tree Physiology, 2012, 32, 74-82.	3.1	50
27	Increasing nitrogen availability and soil temperature: effects on xylem phenology and anatomy of mature black spruce ¹ This article is one of a selection of papers from the 7th International Conference on Disturbance Dynamics in Boreal Forests Canadian Journal of Forest Research, 2012, 42, 1277-1288.	1.7	41
28	Episodic recruitment of the seedling banks in balsam fir and white spruce. American Journal of Botany, 2012, 99, 1942-1950.	1.7	11
29	Xylogenesis in black spruce subjected to rain exclusion in the field ¹ This article is one of a selection of papers from the 7th International Conference on Disturbance Dynamics in Boreal Forests Canadian Journal of Forest Research, 2012, 42, 1306-1315.	1.7	29
30	Demography and spatial dynamics in balsam fir stands after a spruce budworm outbreak. Canadian Journal of Forest Research, 2011, 41, 1112-1120.	1.7	16
31	Predicting xylem phenology in black spruce under climate warming. Global Change Biology, 2011, 17, 614-625.	9.5	141
32	Xylem phenology and wood production: resolving the chickenâ€orâ€egg dilemma. Plant, Cell and Environment, 2010, 33, 1721-1730.	5.7	140
33	Growth and productivity of black spruce in even- and uneven-aged stands at the limit of the closed boreal forest. Forest Ecology and Management, 2009, 258, 2153-2161.	3.2	27
34	The timing of spring rehydration and its relation with the onset of wood formation in black spruce. Agricultural and Forest Meteorology, 2009, 149, 1403-1409.	4.8	98
35	Critical temperatures for xylogenesis in conifers of cold climates. Global Ecology and Biogeography, 2008, 17, 696-707.	5.8	476
36	Conifers in cold environments synchronize maximum growth rate of treeâ€ring formation with day length. New Phytologist, 2006, 170, 301-310.	7.3	357

HUBERT MORIN

#	Article	IF	CITATIONS
37	Intra-annual tracheid production in balsam fir stems and the effect of meteorological variables. Trees - Structure and Function, 2005, 19, 402-408.	1.9	158
38	Daily weather response of balsam fir (Abies balsamea (L.) Mill.) stem radius increment from dendrometer analysis in the boreal forests of Qu�bec (Canada). Trees - Structure and Function, 2003, 17, 477-484.	1.9	224
39	Périodicité et synchronisme des épidémies de la tordeuse des bourgeons de l'épinette au Québec. Canadian Journal of Forest Research, 2003, 33, 1947-1961.	1.7	88
40	Cellular phenology of annual ring formation ofAbies balsameain the Quebec boreal forest (Canada). Canadian Journal of Forest Research, 2003, 33, 190-200.	1.7	244
41	Establishment and dynamics of the balsam fir seedling bank in old forests of northeastern Quebec. Canadian Journal of Forest Research, 2003, 33, 597-603.	1.7	37
42	Effects of adventitious roots on age determination in Balsam fir (<i>Abies balsamea</i>) regeneration. Canadian Journal of Forest Research, 2000, 30, 513-518.	1.7	49
43	Dynamics of balsam fir forests in relation to spruce budworm outbreaks in the Boreal Zone of Quebec. Canadian Journal of Forest Research, 1994, 24, 730-741.	1.7	163
44	Structure et croissance de peuplements d'épinette noire issus de régénération préétablie, une quarantaine d'années après coupe au Lac Saint-Jean, Québec. Forestry Chronicle, 1991, 67, 275-283.	0.6	17
