#	Article	IF	CITATIONS
1	Pan-immune-inflammation value at diagnosis independently predicts all-cause mortality in patients with antineutrophil cytoplasmic antibody-associated vasculitis. Clinical and Experimental Rheumatology, 2021, 39, 88-93.	0.4	14
2	Detection of intracellular monosodium urate crystals in gout synovial fluid using optical diffraction tomography. Scientific Reports, 2021, 11, 10019.	1.6	9
3	Male Sex Is a Significant Predictor of All-cause Mortality in Patients with Antineutrophil Cytoplasmic Antibody-associated Vasculitis. Journal of Korean Medical Science, 2021, 36, e120.	1.1	8
4	Atherogenic index of plasma predicts cerebrovascular accident occurrence in antineutrophil cytoplasmic antibody-associated vasculitis. Lipids in Health and Disease, 2020, 19, 184.	1.2	7
5	Fibrinogen to albumin ratio reflects the activity of antineutrophil cytoplasmic antibodyâ€associated vasculitis. Journal of Clinical Laboratory Analysis, 2021, 35, e23731.	0.9	7
6	The significance of cytoplasmic antinuclear antibody patterns in autoimmune liver disease. PLoS ONE, 2021, 16, e0244950.	1.1	5
7	Systemic inflammation response index predicts all-cause mortality in patients with antineutrophil cytoplasmic antibody-associated vasculitis. International Urology and Nephrology, 2021, 53, 1631-1638.	0.6	4
8	Efficacy of the fibrosis index for predicting endâ€stage renal disease in patients with antineutrophil cytoplasmic antibodyâ€associated vasculitis. International Journal of Clinical Practice, 2021, 75, e13929.	0.8	4
9	Clinical significance of large unstained cell count in estimating the current activity of antineutrophil cytoplasmic antibodyâ€associated vasculitis. International Journal of Clinical Practice, 2021, 75, e14512.	0.8	3
10	Predictive Ability of Serum IL-27 Level for Assessing Activity of Antineutrophil Cytoplasmic Antibody-Associated Vasculitis. Mediators of Inflammation, 2021, 2021, 1-8.	1.4	2
11	The novel fibrosis index at diagnosis may predict all-cause mortality in patients with antineutrophil cytoplasmic antibody-associated vasculitis without substantial liver diseases. Clinics, 2021, 76, e2501.	0.6	2
12	The Efficacy of Mycophenolate Mofetil in Remission Maintenance Therapy for Microscopic Polyangiitis and Granulomatosis with Polyangiitis. Yonsei Medical Journal, 2021, 62, 494.	0.9	2
13	Correlation between serum cysteine-rich protein 61 and disease activity of antineutrophil cytoplasmic antibody–associated vasculitis. Clinical Rheumatology, 2021, 40, 3703-3710.	1.0	1
14	Total Haemolytic Complement Activity at Diagnosis as an Indicator of the Baseline Activity of Antineutrophil Cytoplasmic Antibody-associated Vasculitis. Journal of Rheumatic Diseases, 2021, 28, 85-93.	0.4	1
15	Serum progranulin as a predictive marker for high activity of antineutrophil cytoplasmic antibodyâ€associated vasculitis. Journal of Clinical Laboratory Analysis, 2021, 35, e24048.	0.9	1
16	Pan-immune-inflammation value at diagnosis independently predicts all-cause mortality in patients with antineutrophil cytoplasmic antibody-associated vasculitis. Clinical and Experimental Rheumatology, 2021, 39 Suppl 129, 88-93.	0.4	1
17	Serum galectin-9 could be a potential biomarker in assessing the disease activity of antineutrophil cytoplasmic antibody-associated vasculitis. Clinical and Experimental Rheumatology, 0, , .	0.4	1
18	Association Between Idiopathic Cutaneous Leukocytoclastic Angiitis and ANCA-negative Microscopic Polyangiitis. Journal of Rheumatic Diseases, 2022, 29, 40-45.	0.4	0
