УЛ-НАМ СНИИ

#	Article	IF	CITATIONS
1	Racial/Ethnic Disparities in Environmental Endocrine Disrupting Chemicals and Women's Reproductive Health Outcomes: Epidemiological Examples Across the Life Course. Current Epidemiology Reports, 2016, 3, 161-180.	2.4	118
2	Urinary phthalate metabolites and ovarian reserve among women seeking infertility care. Human Reproduction, 2016, 31, 75-83.	0.9	102
3	The Environment and Reproductive Health (EARTH) Study: a prospective preconception cohort. Human Reproduction Open, 2018, 2018, .	5.4	90
4	Association Between Pesticide Residue Intake From Consumption of Fruits and Vegetables and Pregnancy Outcomes Among Women Undergoing Infertility Treatment With Assisted Reproductive Technology. JAMA Internal Medicine, 2018, 178, 17.	5.1	90
5	Racial differences in suicide deaths after cancer diagnosis: A SEER-based analysis of 2,336,949 patients Journal of Clinical Oncology, 2015, 33, 244-244.	1.6	89
6	Evaluating effects of prenatal exposure to phthalate mixtures on birth weight: A comparison of three statistical approaches. Environment International, 2018, 113, 231-239.	10.0	81
7	Secular trends in semen parameters among men attending a fertility center between 2000 and 2017: Identifying potential predictors. Environment International, 2018, 121, 1297-1303.	10.0	78
8	Association between serum folate and vitamin B-12 and outcomes of assisted reproductive technologies. American Journal of Clinical Nutrition, 2015, 102, 943-950.	4.7	70
9	Urinary concentrations of bisphenol A, parabens and phthalate metabolite mixtures in relation to reproductive success among women undergoing in vitro fertilization. Environment International, 2019, 126, 355-362.	10.0	70
10	Dietary patterns and outcomes of assisted reproduction. American Journal of Obstetrics and Gynecology, 2019, 220, 567.e1-567.e18.	1.3	67
11	Urinary bisphenol A concentrations and association with <i>in vitro</i> fertilization outcomes among women from a fertility clinic. Human Reproduction, 2015, 30, 2120-2128.	0.9	66
12	Intake of Fruits and Vegetables with Low-to-Moderate Pesticide Residues Is Positively Associated with Semen-Quality Parameters among Young Healthy Men. Journal of Nutrition, 2016, 146, 1084-1092.	2.9	66
13	A Systematic Review and Meta-Analysis Comparing Pigtail Catheter and Chest Tube as the Initial Treatment for Pneumothorax. Chest, 2018, 153, 1201-1212.	0.8	59
14	Diet and female fertility: doctor, what should I eat?. Fertility and Sterility, 2018, 110, 560-569.	1.0	56
15	Maternal whole grain intake and outcomes of inÂvitro fertilization. Fertility and Sterility, 2016, 105, 1503-1510.e4.	1.0	54
16	Trimester-Specific Urinary Bisphenol A Concentrations and Blood Glucose Levels Among Pregnant Women From a Fertility Clinic. Journal of Clinical Endocrinology and Metabolism, 2017, 102, 1350-1357.	3.6	53
17	Serum 25-hydroxyvitamin D concentrations and treatment outcomes of women undergoing assisted reproduction,. American Journal of Clinical Nutrition, 2016, 104, 729-735.	4.7	51
18	Overall and class-specific scores of pesticide residues from fruits and vegetables as a tool to rank intake of pesticide residues in United States: A validation study. Environment International, 2016, 92-93, 294-300.	10.0	48

#	Article	IF	CITATIONS
19	Urinary concentrations of parabens mixture and pregnancy glucose levels among women from a fertility clinic. Environmental Research, 2019, 168, 389-396.	7.5	46
20	Dietary folate intake and modification of the association of urinary bisphenol A concentrations with in vitro fertilization outcomes among women from a fertility clinic. Reproductive Toxicology, 2016, 65, 104-112.	2.9	40
21	Association between intake of fruits and vegetables by pesticide residue status and coronary heart disease risk. Environment International, 2019, 132, 105113.	10.0	40
22	Urinary paraben concentrations and inÂvitro fertilization outcomes among women from a fertility clinic. Fertility and Sterility, 2016, 105, 714-721.	1.0	37
23	Urinary concentrations of cyclohexane-1,2-dicarboxylic acid monohydroxy isononyl ester, a metabolite of the non-phthalate plasticizer di(isononyl)cyclohexane-1,2-dicarboxylate (DINCH), and markers of ovarian response among women attending a fertility center. Environmental Research, 2016, 151. 595-600.	7.5	36
24	Men's meat intake and treatment outcomes among couples undergoing assisted reproduction. Fertility and Sterility, 2015, 104, 972-979.	1.0	33
25	Soy Intake Modifies the Relation Between Urinary Bisphenol A Concentrations and Pregnancy Outcomes Among Women Undergoing Assisted Reproduction. Journal of Clinical Endocrinology and Metabolism, 2016, 101, 1082-1090.	3.6	33
26	Comparison of questionnaire-based estimation of pesticide residue intake from fruits and vegetables with urinary concentrations of pesticide biomarkers. Journal of Exposure Science and Environmental Epidemiology, 2018, 28, 31-39.	3.9	32
27	Intake of protein-rich foods in relation to outcomes of infertility treatment with assisted reproductive technologies. American Journal of Clinical Nutrition, 2018, 108, 1104-1112.	4.7	31
28	Trimester-specific phthalate concentrations and glucose levels among women from a fertility clinic. Environmental Health, 2018, 17, 55.	4.0	31
29	Type of underwear worn and markers of testicular function among men attending a fertility center. Human Reproduction, 2018, 33, 1749-1756.	0.9	29
30	Estimating the effect of nutritional interventions using observational data: the American Heart Association's 2020 Dietary Goals and mortality. American Journal of Clinical Nutrition, 2021, 114, 690-703.	4.7	28
31	Intake of fruits and vegetables by pesticide residue status in relation to cancer risk. Environment International, 2021, 156, 106744.	10.0	25
32	NextGen Voices: Quality mentoring. Science, 2018, 362, 22-24.	12.6	23
33	Urinary concentrations of benzophenone-3 and reproductive outcomes among women undergoing infertility treatment with assisted reproductive technologies. Science of the Total Environment, 2019, 678, 390-398.	8.0	22
34	Intake of fruits and vegetables according to pesticide residue status in relation to all-cause and disease-specific mortality: Results from three prospective cohort studies. Environment International, 2022, 159, 107024.	10.0	22
35	The Effect of Prenatal Treatments on Offspring Events in the Presence of Competing Events. Epidemiology, 2020, 31, 636-643.	2.7	20
36	Maternal intake of pesticide residues from fruits and vegetables in relation to fetal growth. Environment International, 2018, 119, 421-428.	10.0	16

#	Article	IF	CITATIONS
37	Impact of men's dairy intake on assisted reproductive technology outcomes among couples attending a fertility clinic. Andrology, 2016, 4, 277-283.	3.5	12
38	Waist circumference in relation to outcomes of infertility treatment with assisted reproductive technologies. American Journal of Obstetrics and Gynecology, 2019, 220, 578.e1-578.e13.	1.3	12
39	Pesticide residue intake from fruits and vegetables and alterations in the serum metabolome of women undergoing infertility treatment. Environment International, 2022, 160, 107061.	10.0	12
40	Men's Intake of Vitamin C and β-Carotene Is Positively Related to Fertilization Rate but Not to Live Birth Rate in Couples Undergoing Infertility Treatment. Journal of Nutrition, 2019, 149, 1977-1984.	2.9	11
41	Serum beta-carotene modifies the association between phthalate mixtures and insulin resistance: The National Health and Nutrition Examination Survey 2003–2006. Environmental Research, 2019, 178, 108729.	7.5	11
42	A prospective analysis of circulating saturated and monounsaturated fatty acids and risk of nonâ€Hodgkin lymphoma. International Journal of Cancer, 2018, 143, 1914-1922.	5.1	9
43	Dietary fat intake during early pregnancy is associated with cord blood DNA methylation at <i>IGF2</i> and <i>H19</i> genes in newborns. Environmental and Molecular Mutagenesis, 2021, 62, 388-398.	2.2	9
44	Intake of Antioxidants in Relation to Infertility Treatment Outcomes with Assisted Reproductive Technologies. Epidemiology, 2019, 30, 427-434.	2.7	8
45	Emulating a target trial of the comparative effectiveness of clomiphene citrate and letrozole for ovulation induction. Human Reproduction, 2022, 37, 793-805.	0.9	8
46	Effectiveness and safety of intrauterine insemination vs. assisted reproductive technology: emulating a target trial using an observational database of administrative claims. Fertility and Sterility, 2022, 117, 981-991.	1.0	8
47	Urinary concentrations of 3-(diethylcarbamoyl)benzoic acid (DCBA), a major metabolite of N,N-diethyl-m-toluamide (DEET) and semen parameters among men attending a fertility center. Human Reproduction, 2017, 32, 2532-2539.	0.9	6
48	Effects of intergenerational exposure interventions on adolescent outcomes: An application of inverse probability weighting to longitudinal preâ€birth cohort data. Paediatric and Perinatal Epidemiology, 2020, 34, 366-375.	1.7	6
49	Red blood cell membrane trans fatty acid levels and risk of non-Hodgkin lymphoma: a prospective nested case–control study. American Journal of Clinical Nutrition, 2020, 112, 1576-1583.	4.7	5
50	Pesticide Residue Intake From Fruit and Vegetable Consumption and Risk of Glioma. American Journal of Epidemiology, 2022, 191, 825-833.	3.4	5
51	OUP accepted manuscript. American Journal of Clinical Nutrition, 2021, , .	4.7	4
52	Response. Chest, 2018, 154, 726.	0.8	3
53	Association Between Intake of Fruits and Vegetables by Pesticide Residue Status and Total Cancer Risk. Current Developments in Nutrition, 2020, 4, nzaa044_048.	0.3	1
54	Pesticide Residue Intake From Fruit and Vegetable Consumption and Risk of Uterine Fibroids. Current Developments in Nutrition, 2021, 5, 1033.	0.3	0

#	Article	IF	CITATIONS
55	Determinants for no definitive therapy for early-stage non-small cell lung cancer in U.S. population Journal of Clinical Oncology, 2015, 33, 1590-1590.	1.6	0
56	Hypothetical 22-Year Diet Intervention: Adherence to the Dietary Approach to Stop Hypertension (DASH) Diet and Risk of Heart Failure in Swedish Men and Women. Current Developments in Nutrition, 2022, 6, 909.	0.3	0
