citing authors

#	ARTICLE	IF	CITATIONS
1	Equivalent Modelling of Hybrid RES Plant for Power System Transient Stability Studies. IEEE Transactions on Power Systems, 2022, 37, 847-859.	4.6	8
2	Equivalent Modelling of Wind Farms for Probabilistic Harmonic Propagation Studies. IEEE Transactions on Power Delivery, 2022, 37, 603-611.	2.9	11
3	Forecasting voltage harmonic distortion in residential distribution networks using smart meter data. International Journal of Electrical Power and Energy Systems, 2022, 136, 107653.	3.3	31
4	Composite Index for Comprehensive Assessment of Power System Transient Stability. IEEE Transactions on Power Systems, 2022, 37, 2847-2857.	4.6	4
5	Distributed control of battery energy storage systems in distribution networks for voltage regulation at transmission distribution network interconnection points. Control Engineering Practice, 2022, 119, 104988.	3.2	15
6	Estimation of Harmonics in Partly Monitored Residential Distribution Networks With Unknown Parameters and Topology. IEEE Transactions on Smart Grid, 2022, 13, 3014-3027.	6.2	5
7	Probabilistic Harmonic Estimation in Uncertain Transmission Networks Using Sequential ANNs. , 2022, , .		5
8	Accuracy of Probabilistic Harmonic Estimation in Sparsely Monitored Transmission Networks. , 2022, , .		1
9	Probabilistic Assessment of the Effect of a Spatially Distributed Hybrid Renewable Energy Source Plant on System Transient Stability. , 2022, , .		0
10	Probabilistic Sizing of Islanded Microgrid Considering Temperature Effect on PV Array. , 2022, , .		2
11	Methodology for Optimal Deployment of Corrective Control Measures to Ensure Transient Stability of Uncertain Power Systems. IEEE Transactions on Power Systems, 2021, 36, 1677-1687.	4.6	8
12	Assessment of the robustness of cyber-physical systems using small-worldness of weighted complex networks. International Journal of Electrical Power and Energy Systems, 2021, 125, 106486.	3.3	8
13	Definition and Classification of Power System Stability " Revisited & Extended. IEEE Transactions on Power Systems, 2021, 36, 3271-3281.	4.6	404
14	Modelling of Supercapacitor Banks for Power System Dynamics Studies. IEEE Transactions on Power Systems, 2021, 36, 3987-3996.	4.6	15
15	Risk-Constrained Minimization of Combined Event Detection and Decision Time for Online Transient Stability Assessment. IEEE Transactions on Smart Grid, 2021, 12, 4564-4572.	6.2	7
16	Assessment of the Impact of Load Modelling and DSM on Combined Power System Angular and Frequency Stability Using Composite Stability Index. , 2021, , .		0
17	Comparative Analysis of Integral-Based Indices for On-line Assessment of Power System Transient Stability. , 2021, , .		1
18	Multi-Objective Demand Side Management at Distribution Network Level in Support of Transmission Network Operation. IEEE Transactions on Power Systems, 2020, 35, 1822-1833.	4.6	25

#	ARTICLE	IF	CITATIONS
19	Probabilistic Assessment of Harmonics in a Residential Network. , 2020, , .		5
20	Influence of Transformer Rating on Power Quality Indices in Low Voltage Residential Networks. , 2020, , .		2
21	Identification of transient stability boundaries for power systems with multidimensional uncertainties using index-specific parametric space. International Journal of Electrical Power and Energy Systems, 2020, 123, 106152.	3.3	12
22	Methodology for Reliability Assessment of Smart Grid Considering Risk of Failure of Communication Architecture. IEEE Transactions on Smart Grid, 2020, 11, 4358-4365.	6.2	17
23	Distributed Control of Battery Energy Storage Systems for Improved Frequency Regulation. IEEE Transactions on Power Systems, 2020, 35, 3729-3738.	4.6	43
24	The Influence of Advanced DSM on Performance of Distribution Networks with Renewable Generation. , 2020, , .		1
25	Non-heuristic Identification of the Optimal Number of Oscillation Patterns in Uncertain Power Systems. , 2020, , .		0
26	Towards Optimal Management and Control of Virtual Storage Plants for Flexible Operation in Future Power Networks. , 2019, , .		0
27	Effect of load models on angular and frequency stability of low inertia power networks. IET Generation, Transmission and Distribution, 2019, 13, 1520-1526.	1.4	14
28	Analysis of Angular Threshold Criteria for Transient Instability Identification in Uncertain Power Systems. , 2019, , .		7
29	The Role of Energy Storage Systems in Reducing Effect of Load Models on Frequency Dynamics and Large Disturbance Rotor Angle Stability. , 2019, , .		1
30	Practical Approaches to Assessment of Harmonics Along Radial Distribution Feeders. IEEE Transactions on Power Delivery, 2019, 34, 1184-1192.	2.9	19
31	Ranking and quantifying the effects of load model parameters on power system stability. IET Generation, Transmission and Distribution, 2019, 13, 4650-4658.	1.4	12
32	Identifying Critical Load Locations for Power System Voltage, Angular and Frequency Stability. , 2019, , .		3
33	Contribution of Advanced Demand Side Management to Angular Stability of Interconnected Transmission Networks. , 2019, , .		2
34	Review of GB electricity distribution system's electricity security of supply, reliability and power quality in meeting UK industrial strategy requirements. IET Generation, Transmission and Distribution, 2019, 13, 3513-3523.	1.4	12
35	Increased Frequency and Voltage Interactions Affecting Frequency and Transient Stability in Networks with Large Penetration of Renewable Generation. , 2019, , .		0
36	Assessing the Applicability of Complex Network Theory Models and Importance Measures to Vulnerability Studies of Cyber-physical Systems. , 2019, , .		2

#	ARTICLE	IF	CITATIONS
37	Existing Approaches to Wide-scale DSM Deployment to Facilitate Transmission Network Flexibility - Results of the Survey in South-East Europe. , 2019, , .		2
38	Flexibility Exchange Strategy to Facilitate Congestion and Voltage Profile Management in Power Networks. IEEE Transactions on Smart Grid, 2019, 10, 4786-4794.	6.2	10
39	Existing approaches and trends in uncertainty modelling and probabilistic stability analysis of power systems with renewable generation. Renewable and Sustainable Energy Reviews, 2019, 101, 168-180.	8.2	126
40	Identification of Critical Parameters Affecting Voltage and Angular Stability Considering Load-Renewable Generation Correlations. IEEE Transactions on Power Systems, 2019, 34, 2859-2869.	4.6	49
41	Techno-economic analysis of global power quality mitigation strategy for provision of differentiated quality of supply. International Journal of Electrical Power and Energy Systems, 2019, 107, 159-166.	3.3	9
42	Forecasting Demand Flexibility of Aggregated Residential Load Using Smart Meter Data. IEEE Transactions on Power Systems, 2018, 33, 5446-5455.	4.6	93
43	Measurement Based Method for Online Characterization of Generator Dynamic Behaviour in Systems With Renewable Generation. IEEE Transactions on Power Systems, 2018, 33, 6466-6475.	4.6	6
44	Probabilistic Estimation of Distribution Network Performance With Respect to Voltage Sags and Interruptions Considering Network Protection Settingâ€”Part I: The Methodology. IEEE Transactions on Power Delivery, 2018, 33, 42-51.	2.9	30
45	Probabilistic Estimation of Distribution Network Performance With Respect to Voltage Sags and Interruptions Considering Network Protection Settingâ€”Part II: Economic Assessment. IEEE Transactions on Power Delivery, 2018, 33, 52-61.	2.9	24
46	The Influence of Load on Risk-Based Small-Disturbance Security Profile of a Power System. IEEE Transactions on Power Systems, 2018, 33, 557-566.	4.6	25
47	Modeling of Interconnected Critical Infrastructure Systems Using Complex Network Theory. IEEE Transactions on Smart Grid, 2018, 9, 4637-4648.	6.2	60
48	Probabilistic Framework for Online Identification of Dynamic Behavior of Power Systems With Renewable Generation. IEEE Transactions on Power Systems, 2018, 33, 45-54.	4.6	39
49	Estimation and Validation of Characteristic Load Profile Through Smart Grid Trials in a Medium Voltage Distribution Network. IEEE Transactions on Power Systems, 2018, 33, 1848-1859.	4.6	35
50	Automatic Identification of Power System Load Models Based on Field Measurements. IEEE Transactions on Power Systems, 2018, 33, 3162-3171.	4.6	38
51	A Survey on Demand Side Management Potential in South-East Europe to Support Transmission Network Flexibility. , 2018, , .		8
52	The Influence of Load on Risk-Based Small-Disturbance Security Profile of a Power System. , 2018, , .		0
53	Statistical Assessment of the Impact of Renewable Energy Sources on Transient Stability. , 2018, , .		5
54	Impact of Demand Side Management on Angular Stability of Power Systems with Renewable Generation. , 2018, , .		0

#	ARTICLE	IF	CITATIONS
55	A Survey on Electrical Energy Storage Potential in South-East Europe to Support Transmission Network Flexibility. , 2018, , .		0
56	Compound index for power quality evaluation and benchmarking. IET Generation, Transmission and Distribution, 2018, 12, 4269-4275.	1.4	13
57	Recommended Parameter Values and Ranges of Most Frequently Used Static Load Models. IEEE Transactions on Power Systems, 2018, 33, 5923-5934.	4.6	46
58	Influence of uncertainties and parameter structural dependencies in distribution system state estimation. IET Generation, Transmission and Distribution, 2018, 12, 3279-3285.	1.4	1
59	Voltage Sag Estimation in Sparsely Monitored Power Systems Based on Deep Learning and System Area Mapping. IEEE Transactions on Power Delivery, 2018, 33, 3162-3172.	2.9	53
60	Zonal Mitigation of Power Quality Using FACTS Devices for Provision of Differentiated Quality of Electricity Supply in Networks With Renewable Generation. IEEE Transactions on Power Delivery, 2017, 32, 1975-1985.	2.9	30
61	Methodology for the analysis of voltage unbalance in networks with singleâ€phase distributed generation. IET Generation, Transmission and Distribution, 2017, 11, 550-559.	1.4	14
62	On capability of different FACTS devices to mitigate a range of power quality phenomena. IET Generation, Transmission and Distribution, 2017, 11, 1202-1211.	1.4	33
63	Study of harmonic propagation in transmission networks with high penetration of power electronics devices. , 2017, , .		3
64	Application of data analytics for advanced demand profiling of residential load using smart meter data. , 2017, , .		9
65	Efficient identification of critical load model parameters affecting power system voltage stability. , 2017, , .		3
66	Assessment of the impact of demand side management on power system small signal stability. , 2017, , .		10
67	Quasi-independent voltage-reactive power zone controller. , 2017, , .		0
68	Identification of critical parameters affecting voltage stability in networks with renewable generations using sensitivity analysis methods. , 2017, , .		4
69	Feasibility of different corrective control options for the improvement of transient stability. , 2017, , .		5
70	An approach to controlled islanding based on PMU measurements. , 2017, , .		1
71	Interdependency modeling of cyber-physical systems using a weighted complex network approach. , 2017, , .		12
72	Probabilistic stability analysis: the way forward for stability analysis of sustainable power systems. Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences, 2017, 375, 20160296.	1.6	34

#	ARTICLE	IF	CITATIONS
73	Priority Ranking of Critical Uncertainties Affecting Small-Disturbance Stability Using Sensitivity Analysis Techniques. IEEE Transactions on Power Systems, 2017, 32, 2629-2639.	4.6	72
74	Probabilistic Framework for Transient Stability Assessment of Power Systems With High Penetration of Renewable Generation. IEEE Transactions on Power Systems, 2017, 32, 3078-3088.	4.6	129
75	Cyber-physical system failure analysis based on Complex Network theory. , 2017, , .		10
76	Fast online identification of power system dynamic behavior. , 2017, , .		2
77	Optimal monitor placement for voltage unbalance based on distribution network state estimation. , 2017, , .		0
78	Probabilistic assessment of voltage control zones and visualization using choropleth map. , 2017, , .		3
79	Optimal compensation of transmission lines based on minimisation of the risk of subsynchronous resonance. , 2016, , .		4
80	Probabilistic ranking of power system loads for voltage stability studies in networks with renewable generation. , 2016, , .		3
81	Feasibility study of applicability of recurrence quantification analysis for clustering of power system dynamic responses. , 2016, , .		1
82	Assessment of Power quality performance in distribution networks part I - Measurement campaign and initial analysis. , 2016, , .		8
83	Assessment of Power Quality performance in distribution networks part II - Performance Indices and ranking of network buses. , 2016, , .		5
84	Application of sequential testing problem to online detection of transient stability status for power systems. , 2016, , .		2
85	Optimisation framework for development of cost-effective monitoring in distribution networks. IET Generation, Transmission and Distribution, 2016, 10, 240-246.	1.4	8
86	Study of frequency response in power system with renewable generation and energy storage. , 2016, , .		23
87	The influence of different storage technologies on large power system frequency response. , 2016, , .		8
88	A framework to assess the effect of reduction in inertia on system frequency response. , 2016, , .		21
89	Pathway to cost-efficient state estimation of future distribution networks. , 2016, , .		11
90	Optimal Compensation of Transmission Lines Based on Minimisation of the Risk of Subsynchronous Resonance. IEEE Transactions on Power Systems, 2016, 31, 1038-1047.	4.6	21

#	ARTICLE	IF	CITATIONS
91	Quantification of Uncertainty in End-of-Life Failure Models of Power Transformers for Transmission Systems Reliability Studies. IEEE Transactions on Power Systems, 2016, 31, 4047-4056.	4.6	17
92	Day-Ahead Prediction and Shaping of Dynamic Response of Demand at Bulk Supply Points. IEEE Transactions on Power Systems, 2016, 31, 3100-3108.	4.6	26
93	Online Identification of Power System Dynamic Signature Using PMU Measurements and Data Mining. IEEE Transactions on Power Systems, 2016, 31, 1760-1768.	4.6	116
94	Efficient Estimation of the Probability of Small-Disturbance Instability of Large Uncertain Power Systems. IEEE Transactions on Power Systems, 2016, 31, 1063-1072.	4.6	56
95	Assessing the Applicability of Uncertainty Importance Measures for Power System Studies. IEEE Transactions on Power Systems, 2016, 31, 2076-2084.	4.6	59
96	Probabilistic risk assessment of rotor angle instability using fuzzy inference systems. , 2015, , .		0
97	Framework for sensitivity analysis of stability of torsional modes. , 2015, , .		0
98	A step-by-step data processing guideline for load model development based on field measurements. , 2015, , .		11
99	Assessment of the Economic Value of Voltage Sag Mitigation Devices to Sensitive Industrial Plants. IEEE Transactions on Power Delivery, 2015, 30, 2374-2382.	2.9	44
100	Impact of penetration of non-synchronous generators on power system dynamics. , 2015, , .		10
101	Identification of Weak Areas of Power Network Based on Exposure to Voltage Sagsâ€”Part I: Development of Sag Severity Index for Single-Event Characterization. IEEE Transactions on Power Delivery, 2015, 30, 2392-2400.	2.9	26
102	Identification of Weak Areas of Network Based on Exposure to Voltage Sagsâ€”Part II: Assessment of Network Performance Using Sag Severity Index. IEEE Transactions on Power Delivery, 2015, 30, 2401-2409.	2.9	39
103	Methodology for Estimation of Dynamic Response of Demand Using Limited Data. IEEE Transactions on Power Systems, 2015, 30, 1288-1297.	4.6	24
104	Probabilistic Assessment of Financial Losses in Distribution Network Due to Fault-Induced Process Interruptions Considering Process Immunity Time. IEEE Transactions on Power Delivery, 2015, 30, 1478-1486.	2.9	55
105	Impact of measurement signals on the accuracy of online identification of power system dynamic signature. , 2015, , .		2
106	Overview of power system reliability assessment considering age related failure of equipment. , 2015, , .		7
107	Probabilistic Risk Assessment of Rotor Angle Instability Using Fuzzy Inference Systems. IEEE Transactions on Power Systems, 2015, 30, 1747-1757.	4.6	14
108	Risk-Based Small-Disturbance Security Assessment of Power Systems. IEEE Transactions on Power Delivery, 2015, 30, 590-598.	2.9	39

#	ARTICLE	IF	CITATIONS
109	The Influence of Modeling Transformer Age Related Failures on System Reliability. IEEE Transactions on Power Systems, 2015, 30, 970-979.	4.6	47
110	Artificial-Intelligence-Based Methodology for Load Disaggregation at Bulk Supply Point. IEEE Transactions on Power Systems, 2015, 30, 795-803.	4.6	64
111	Probabilistic assessment of the impact of distributed generation and non-linear load on harmonic propagation in power networks. , 2014, , .		6
112	Applying process immunity time to assess annual industrial process trips. , 2014, , .		1
113	The effect of temporal and spatial variation of harmonic sources on annual harmonic performance of distribution networks. , 2014, , .		1
114	Accuracy of ANN based methodology for load composition forecasting at bulk supply buses. , 2014, , .		7
115	Probabilistic Framework for Assessing the Accuracy of Data Mining Tool for Online Prediction of Transient Stability. IEEE Transactions on Power Systems, 2014, 29, 377-385.	4.6	113
116	Guidelines for Power quality monitoring - Results from CIGRE/CIREN JWG C4.112. , 2014, , .		10
117	Probabilistic Indicators for Assessing Age- and Loading-Based Criticality of Transformers to Cascading Failure Events. IEEE Transactions on Power Systems, 2014, 29, 2558-2566.	4.6	17
118	Probabilistic Small-Disturbance Stability Assessment of Uncertain Power Systems Using Efficient Estimation Methods. IEEE Transactions on Power Systems, 2014, 29, 2509-2517.	4.6	56
119	Methodology for Evaluation of Risk of Subsynchronous Resonance in Meshed Compensated Networks. IEEE Transactions on Power Systems, 2014, 29, 815-823.	4.6	9
120	Tuning of a Damping Controller for Multiterminal VSC-HVDC Grids Using the Probabilistic Collocation Method. IEEE Transactions on Power Delivery, 2014, 29, 318-326.	2.9	69
121	Identifying Generators at Risk of SSR in Meshed Compensated AC/DC Power Networks. IEEE Transactions on Power Systems, 2013, 28, 4438-4447.	4.6	17
122	The Probabilistic Collocation Method for Power-System Damping and Voltage Collapse Studies in the Presence of Uncertainties. IEEE Transactions on Power Systems, 2013, 28, 2253-2262.	4.6	41
123	International Industry Practice on Power System Load Modeling. IEEE Transactions on Power Systems, 2013, 28, 3038-3046.	4.6	230
124	Validation of Equivalent Dynamic Model of Active Distribution Network Cell. IEEE Transactions on Power Systems, 2013, 28, 2101-2110.	4.6	86
125	Generic Model of Active Distribution Network for Large Power System Stability Studies. IEEE Transactions on Power Systems, 2013, 28, 3126-3133.	4.6	105
126	Quantification of aleatory and epistemic uncertainty in bulk power system reliability evaluation. , 2013, , .		7

#	ARTICLE	IF	CITATIONS
127	Foreword for the Special Section on Analysis and Simulation of Very Large Power Systems. IEEE Transactions on Power Systems, 2013, 28, 4885-4887.	4.6	2
128	Index for ranking generators based on risk of subsynchronous resonance in the network. , 2013, , .		0
129	Probabilistic Evaluation of Damping Controller in Networks With Multiple VSC-HVDC Lines. IEEE Transactions on Power Systems, 2013, 28, 367-376.	4.6	50
130	Damping of inter-area oscillations in mixed AC/DC networks using WAMS based supplementary controller. IEEE Transactions on Power Systems, 2013, 28, 1160-1169.	4.6	122
131	Wind Farm Model Aggregation Using Probabilistic Clustering. IEEE Transactions on Power Systems, 2013, 28, 309-316.	4.6	163
132	Monitor Placement for Reliable Estimation of Voltage Sags in Power Networks. IEEE Transactions on Power Delivery, 2012, 27, 936-944.	2.9	24
133	Techno-Economic Contribution of FACTS Devices to the Operation of Power Systems With High Level of Wind Power Integration. IEEE Transactions on Power Systems, 2012, 27, 1414-1421.	4.6	67
134	Statistical Estimation of the Source and Level of Voltage Unbalance in Distribution Networks. IEEE Transactions on Power Delivery, 2012, 27, 1450-1460.	2.9	57
135	Current practice and future challenges for power quality monitoring - CIGRE WG C4.112 perspective. , 2012, , .		17
136	Probabilistic assessment of wind farm annual energy production. Electric Power Systems Research, 2012, 89, 70-79.	2.1	30
137	A heuristic approach for optimal monitor placement for fault location. , 2011, , .		1
138	Software tool for automated design and cost benefit analysis of offshore grid. , 2011, , .		2
139	Risk-Based Assessment of Financial Losses Due to Voltage Sag. IEEE Transactions on Power Delivery, 2011, 26, 492-500.	2.9	46
140	Estimation of Cost of Downtime of Industrial Process Due to Voltage Sags. IEEE Transactions on Power Delivery, 2011, 26, 576-587.	2.9	41
141	Assessment of techno-economic contribution of FACTS devices to power system operation. Electric Power Systems Research, 2010, 80, 1247-1255.	2.1	42
142	Probabilistic clustering of wind generators. , 2010, , .		16
143	Modeling of FACTS Devices for Voltage Sag Mitigation Studies in Large Power Systems. IEEE Transactions on Power Delivery, 2010, 25, 3044-3052.	2.9	71
144	Global Voltage Sag Mitigation With FACTS-Based Devices. IEEE Transactions on Power Delivery, 2010, 25, 2842-2850.	2.9	62

#	ARTICLE	IF	CITATIONS
145	Global Minimization of Financial Losses Due to Voltage Sags With FACTS Based Devices. IEEE Transactions on Power Delivery, 2010, 25, 298-306.	2.9	89
146	Dynamic Contribution of DFIG-Based Wind Plants to System Frequency Disturbances. IEEE Transactions on Power Systems, 2009, 24, 859-867.	4.6	380
147	Generic Failure-Risk Assessment of Industrial Processes due to Voltage Sags. IEEE Transactions on Power Delivery, 2009, 24, 2405-2414.	2.9	27
148	Dynamic load modelling based on measurements in medium voltage distribution network. Electric Power Systems Research, 2008, 78, 228-238.	2.1	70
149	The Influence of Induction Motors on Voltage Sag Propagationâ€”Part I: Accounting for the Change in Sag Characteristics. IEEE Transactions on Power Delivery, 2008, 23, 1063-1071.	2.9	45
150	Overview and Comparative Analysis of Gas Turbine Models for System Stability Studies. IEEE Transactions on Power Systems, 2008, 23, 108-118.	4.6	150
151	Methodology for assessment of financial losses due to voltage sags and short interruptions. , 2007, , .		22
152	Minimization of Voltage Sag Costs by Optimal Reconfiguration of Distribution Network Using Genetic Algorithms. IEEE Transactions on Power Delivery, 2007, 22, 2271-2278.	2.9	61
153	Reactive Power Control Strategies for DFIG-Based Plants. IEEE Transactions on Energy Conversion, 2007, 22, 389-396.	3.7	271
154	On unreliability of exponential load models. Electric Power Systems Research, 1999, 49, 1-9.	2.1	26
