#	Article	IF	Citations
1	Association of type D personality and level of coronary artery calcification. Journal of Psychosomatic Research, 2020, 139, 110265.	1.2	15
2	The Influence of Personality Type D on Cardiovascular Prognosis in Patients After Coronary Artery Bypass Grafting: Data from a 5-Year-Follow-up Study. International Journal of Behavioral Medicine, 2022, 29, 46-56.	0.8	15
3	Impact of recipient-related factors on structural dysfunction of xenoaortic bioprosthetic heart valves. Patient Preference and Adherence, 2015, 9, 389.	0.8	13
4	Preexisting Right Ventricular Diastolic Dysfunction and Postoperative Cardiac Complications in Patients Undergoing Nonemergency Coronary Artery Bypass Surgery. Journal of Cardiothoracic and Vascular Anesthesia, 2021, 35, 799-806.	0.6	12
5	Neuromuscular electrical stimulation in early rehabilitation of patients with postoperative complications after cardiovascular surgery. Medicine (United States), 2020, 99, e22769.	0.4	10
6	The impact of comorbidities and age on the nosocomial outcomes of patients undergoing coronary artery bypass grafting. Cardiovascular Therapy and Prevention (Russian Federation), 2019, 18, 58-64.	0.4	10
7	PRE-SURGERY STATUS AND IN-HOSPITAL COMPLICATIONS OF CORONARY BYPASS GRAFTING IN PREDIABETES AND TYPE 2 DIABETES PATIENTS. Russian Journal of Cardiology, 2018, , 40-48.	0.4	8
8	Cardio-Ankle Vascular Index in the Persons with Pre-Diabetes and Diabetes Mellitus in the Population Sample of the Russian Federation. Diagnostics, 2021, 11, 474.	1.3	7
9	Current trends in routine myocardial revascularization. Complex Issues of Cardiovascular Diseases, 2021, 10, 25-35.	0.3	7
10	The role of newly diagnosed diabetes mellitus for poor in-hospital prognosis of coronary artery bypass grafting. Diabetes Mellitus, 2018, 21, 344-355.	0.5	7
11	Factors Determining the Functional State of Cardiac Surgery Patients with Complicated Postoperative Period. International Journal of Environmental Research and Public Health, 2022, 19, 4329.	1.2	6
12	Assessment of Arterial Stiffness by Cardio-Ankle Vascular Index for Prediction of Five-Year Cardiovascular Events After Coronary Artery Bypass Surgery. Global Heart, 2021, 16, 90.	0.9	6
13	Impaired right ventricular filling in patients with a chronic coronary syndrome. Medical Ultrasonography, 2021, 23, 311-318.	0.4	5
14	Evaluation of Coping Strategies among Students with Type D Personality. International Journal of Environmental Research and Public Health, 2022, 19, 4918.	1.2	5
15	Is the problem of intact coronary arteries still or is it close to solving?. Russian Journal of Cardiology, 2021, 26, 4139.	0.4	4
16	Assessment of Arterial Stiffness Using the Cardio-Ankle Vascular Index â€" What We Know and What We Strive for. Rational Pharmacotherapy in Cardiology, 2021, 17, 619-627.	0.3	4
17	Screening for Glucose Metabolism Disorders, Assessment the Disse Insulin Resistance Index and Hospital Prognosis of Coronary Artery Bypass Surgery. Journal of Personalized Medicine, 2021, 11, 802.	1.1	3
18	Assessment of skeletal muscle in patients with stable coronary artery disease: clinical significance and associations. Cardiovascular Therapy and Prevention (Russian Federation), 2020, 19, 24-31.	0.4	3

#	Article	IF	Citations
19	Evaluating Right Ventricular Function To Reveal Cancer Therapy Cardiotoxicity. Russian Open Medical Journal, 2021, 10, .	0.1	2
20	Factors associated with abnormal cardio-ankle vascular index in patients with type 2 diabetes and prediabetes. Diabetes Mellitus, 2016, 19, 132-140.	0.5	2
21	Markers right ventricular diastolic dysfunction in patients with pulmonary hypertension.. Klinicheskaia Meditsina, 2018, 96, 30-37.	0.2	2
22	Renal function and non-coronary atherosclerosis progression in patients with coronary artery disease one year after coronary artery bypass. Russian Journal of Cardiology, 2019, 24, 39-47.	0.4	2
23	Role of clinical evaluation in the identification of coronary obstructive disorders in patients with stable coronary artery disease. Part I. Russian Journal of Cardiology, 2019, , 95-100.	0.4	2
24	Is the concept of type D personality a component of personalized medicine or a prognostic factor in the treatment of cardiovascular diseases?. Russian Journal of Cardiology, 2020, 25, 3996.	0.4	2
25	Approaches to reduce the risk of progression of peripheral artery disease from the standpoint of a cardiologist. Complex Issues of Cardiovascular Diseases, 2021, 10, 55-64.	0.3	1
26	Personality type D, stress reactivity and autonomic balance in healthy young people: gender and ethnic characteristics. Arterial Hypertension (Russian Federation), 2021, 26, 665-675.	0.1	1
27	Fructosamine as a marker for carbohydrate metabolism and its relationship with in-hospital outcomes after coronary artery bypass grafting. Kreativnaya Kardiologiya, 2017, 1, 31-44.	0.2	1
28	Place of clinical evaluation in the identification of obstructive coronary arteries lesions in patients with stable coronary artery disease: Part II. Russian Journal of Cardiology, 2019, , 111-115.	0.4	1
29	Genetic basis of anthracyclines cardiotoxicity: Literature review. Acta Biomedica Scientifica, 2021, 6, 27-38.	0.1	1
30	POSITIVE RESULT OF THE STRESS-TEST IN SCINTIGRAPHICS OF MYOCARDIUM AND OBSTRUCTIVE DEFEAT OF CORONARY ARTERIES: ARE THE ASSOCIATED FACTORS COINCIDED?. Siberian Medical Review, 2018, , 56-64.	0.1	1
31	Coronary calcinosis and psychological distress association, by the data from ESSE-RF study in Kemerovskaya Region. Cardiovascular Therapy and Prevention (Russian Federation), 2018, 17, 65-71.	0.4	1
32	Factors associated with the presence of chronic mitral regurgitation in patients with stable coronary artery disease. Complex Issues of Cardiovascular Diseases, 2020, 8, 51-61.	0.3	1
33	Assessment of Pre-test and Clinical Probability in the Diagnosis of Chronic Coronary Syndrome â€" What's New?. Rational Pharmacotherapy in Cardiology, 2022, 18, 92-96.	0.3	1
34	Indicators of the Right Ventricle Systolic and Diastolic Function 18 Months after Coronary Bypass Surgery. Journal of Clinical Medicine, 2022, 11, 3994.	1.0	1
35	Assessment of left ventricular diastolic dysfunction following anthracyclinebased chemotherapy in breast cancer patients. Acta Biomedica Scientifica, 2022, 7, 121-133.	0.1	1
36	Authors' reply to â€œRe: Association of type D personality and level of coronary artery calcificationâ€• Journal of Psychosomatic Research, 2021, 141, 110341.	1.2	0

#	Article	IF	Citations
37	GENDER AND AGE CHARACTERISTICS OF COMORBID PATHOLOGY IN PATIENTS UNDERGONE CORONARY BYPASS GRAFTING. Siberian Medical Review, 2019, , 14-22.	0.1	0
38	The possibility of using skeletal muscle electrical stimulation in the rehabilitation of patients after cardiac surgery. Complex Issues of Cardiovascular Diseases, 2020, 8, 70-81.	0.3	0
39	Assessment of skeletal muscle in patients with stable coronary artery disease: clinical significance and associations. Cardiovascular Therapy and Prevention (Russian Federation), 2020, 19, 24-31.	0.4	0
40	Skeletal muscle status, autonomic balance and short-term results of cardiac surgery. Russian Open Medical Journal, 2020, 9, .	0.1	0
41	Right ventricular dysfunction during chemotherapy in patients with breast cancer. Cardiovascular Therapy and Prevention (Russian Federation), 2022, 21, 3182.	0.4	0
