|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Acquired Amino Acid Deficiencies: A Focus on Arginine and Glutamine. <i>Nutrition in Clinical Practice</i> , 2017, 32, 30S-47S.                                                                                                                            | 1.1 | 110       |
| 2  | Clinical studies show no effects of soy protein or isoflavones on reproductive hormones in men: results of a meta-analysis. <i>Fertility and Sterility</i> , 2010, 94, 997-1007.                                                                           | 0.5 | 95        |
| 3  | Drug-Vitamin D Interactions. <i>Nutrition in Clinical Practice</i> , 2013, 28, 194-208.                                                                                                                                                                    | 1.1 | 93        |
| 4  | Effects of Immunonutrition for Cystectomy on Immune Response and Infection Rates: A Pilot Randomized Controlled Clinical Trial. <i>European Urology</i> , 2016, 69, 389-392.                                                                               | 0.9 | 79        |
| 5  | Summary Points and Consensus Recommendations From the International Protein Summit. <i>Nutrition in Clinical Practice</i> , 2017, 32, 142S-151S.                                                                                                           | 1.1 | 75        |
| 6  | Isoflavone-Rich Soy Protein Isolate Suppresses Androgen Receptor Expression without Altering Estrogen Receptor- $\beta$ Expression or Serum Hormonal Profiles in Men at High Risk of Prostate Cancer. <i>Journal of Nutrition</i> , 2007, 137, 1769-1775.  | 1.3 | 69        |
| 7  | Emerging Impact of Malnutrition on Surgical Patients: Literature Review and Potential Implications for Cystectomy in Bladder Cancer. <i>Journal of Urology</i> , 2017, 198, 511-519.                                                                       | 0.2 | 66        |
| 8  | Short-Term Soy Isoflavone Intervention in Patients with Localized Prostate Cancer: A Randomized, Double-Blind, Placebo-Controlled Trial. <i>PLoS ONE</i> , 2013, 8, e68331.                                                                                | 1.1 | 61        |
| 9  | Consumption of Quercetin and Quercetin-Containing Apple and Cherry Extracts Affects Blood Glucose Concentration, Hepatic Metabolism, and Gene Expression Patterns in Obese C57BL/6J High Fat-Fed Mice. <i>Journal of Nutrition</i> , 2016, 146, 1001-1007. | 1.3 | 56        |
| 10 | Effects of Soy Protein Isolate Consumption on Prostate Cancer Biomarkers in Men With HGPIN, ASAP, and Low-Grade Prostate Cancer. <i>Nutrition and Cancer</i> , 2007, 60, 7-13.                                                                             | 0.9 | 40        |
| 11 | Perioperative Immunonutrition Modulates Inflammatory Response after Radical Cystectomy: Results of a Pilot Randomized Controlled Clinical Trial. <i>Journal of Urology</i> , 2018, 200, 292-301.                                                           | 0.2 | 40        |
| 12 | Neither soy nor isoflavone intake affects male reproductive hormones: An expanded and updated meta-analysis of clinical studies. <i>Reproductive Toxicology</i> , 2021, 100, 60-67.                                                                        | 1.3 | 33        |
| 13 | Soy Protein Isolate Increases Urinary Estrogens and the Ratio of 2:16 $\beta$ -Hydroxyestrone in Men at High Risk of Prostate Cancer. <i>Journal of Nutrition</i> , 2007, 137, 2258-2263.                                                                  | 1.3 | 27        |
| 14 | Renal formulas pretreated with medications alters the nutrient profile. <i>Pediatric Nephrology</i> , 2015, 30, 1815-1823.                                                                                                                                 | 0.9 | 27        |
| 15 | Protein Requirements of the Critically Ill Pediatric Patient. <i>Nutrition in Clinical Practice</i> , 2017, 32, 128S-141S.                                                                                                                                 | 1.1 | 26        |
| 16 | Diet and polycystic kidney disease: A pilot intervention study. <i>Clinical Nutrition</i> , 2017, 36, 458-466.                                                                                                                                             | 2.3 | 25        |
| 17 | Consumption of <i>Lactobacillus acidophilus</i> and <i>Bifidobacterium longum</i> Does Not Alter Phytoestrogen Metabolism and Plasma Hormones in Men: A Pilot Study. <i>Journal of Alternative and Complementary Medicine</i> , 2006, 12, 887-894.         | 2.1 | 22        |
| 18 | Protein Requirements for Critically Ill Patients With Renal and Liver Failure. <i>Nutrition in Clinical Practice</i> , 2017, 32, 101S-111S.                                                                                                                | 1.1 | 19        |

| #  | ARTICLE                                                                                                                                                                                                                      | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Consumption of Walnuts in Combination with Other Whole Foods Produces Physiologic, Metabolic, and Gene Expression Changes in Obese C57BL/6J High-Fat Fed Male Mice. <i>Journal of Nutrition</i> , 2016, 146, 1641-1650.      | 1.3 | 16        |
| 20 | Tumor M2-PK: A novel urine marker of bladder cancer. <i>PLoS ONE</i> , 2019, 14, e0218737.                                                                                                                                   | 1.1 | 12        |
| 21 | Nutrition risk and assessment process in patients with bladder cancer undergoing radical cystectomy. <i>Urologic Oncology: Seminars and Original Investigations</i> , 2020, 38, 719-724.                                     | 0.8 | 10        |
| 22 | Experiences and Perspectives of Polycystic Kidney Disease Patients following a Diet of Reduced Osmoles, Protein, and Acid Precursors Supplemented with Water: A Qualitative Study. <i>PLoS ONE</i> , 2016, 11, e0161043.     | 1.1 | 9         |
| 23 | Feasibility of an intervention for men on androgen deprivation therapy: A research protocol. <i>Research in Nursing and Health</i> , 2019, 42, 324-333.                                                                      | 0.8 | 8         |
| 24 | Rapid Escalation of High-Volume Exercise during Caloric Restriction; Change in Visceral Adipose Tissue and Adipocytokines in Obese Sedentary Breast Cancer Survivors. <i>Cancers</i> , 2021, 13, 4871.                       | 1.7 | 8         |
| 25 | A randomized phase III double-blind clinical trial (S1600) evaluating the effect of immune-enhancing nutrition on radical cystectomy outcomes.. <i>Journal of Clinical Oncology</i> , 2018, 36, TPS529-TPS529.               | 0.8 | 7         |
| 26 | Feasibility of a Weight Management Program Tailored for Overweight Men with Localized Prostate Cancer – A Pilot Study. <i>Nutrition and Cancer</i> , 2021, 73, 2671-2686.                                                    | 0.9 | 5         |
| 27 | Optimizing Nutritional Status in Patients Undergoing Radical Cystectomy: A Systematic Scoping Review. <i>Bladder Cancer</i> , 2021, 7, 449-461.                                                                              | 0.2 | 5         |
| 28 | Weight Management to Reduce Prostate Cancer Risk: A Survey of Men's Needs and Interests. <i>Cancer and Clinical Oncology</i> , 2015, 5, 43.                                                                                  | 0.2 | 4         |
| 29 | Glycemic impact of a diet and lifestyle intervention on diabetics and prediabetics during treatment for non-muscle invasive bladder cancer. <i>Nutrition and Cancer</i> , 2020, 72, 1219-1224.                               | 0.9 | 4         |
| 30 | Sarcopenia in urologic oncology: Identification and strategies to improve patient outcomes. <i>Urologic Oncology: Seminars and Original Investigations</i> , 2022, 40, 474-480.                                              | 0.8 | 4         |
| 31 | Rural breast cancer survivors are able to maintain diet quality improvements during a weight loss maintenance intervention. <i>Journal of Cancer Survivorship</i> , 2020, 15, 576-584.                                       | 1.5 | 3         |
| 32 | Simulations for Teaching and Evaluating Nutrition-Focused Physical Exam Skills. <i>Journal of Nutrition Education and Behavior</i> , 2020, 52, 882-889.                                                                      | 0.3 | 3         |
| 33 | Patient-Centered Perspectives on the Access to Educational Opportunities Specific to Lifestyle Modification in Men at Risk for Primary or Secondary Prostate Cancer. <i>Journal of Cancer Education</i> , 2014, 29, 252-257. | 0.6 | 2         |
| 34 | Effect of Soy Protein on Testosterone Levels. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2007, 16, 2795-2795.                                                                                                    | 1.1 | 1         |
| 35 | Exploration of biomarkers from a pilot weight management study for men undergoing radical prostatectomy. <i>Urologic Oncology: Seminars and Original Investigations</i> , 2021, 39, 495.e7-495.e15.                          | 0.8 | 1         |
| 36 | Milk Intake Enhances Cerebral Antioxidant (Glutathione) Concentration in Older Adults: A Randomized Controlled Intervention Study. <i>Current Developments in Nutrition</i> , 2021, 5, 900.                                  | 0.1 | 0         |

| #  | ARTICLE                                                                                                                                                                        | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Soy protein isolate increases urinary estrogens and the ratio of 2:16 $\beta$ -hydroxyestrone in men at high risk of prostate cancer. FASEB Journal, 2007, 21, A58.            | 0.2 | 0         |
| 38 | Glucose metabolism and bladder cancer.. Journal of Clinical Oncology, 2017, 35, 359-359.                                                                                       | 0.8 | 0         |
| 39 | The DEAL trial: A diet and exercise intervention in (pre)-diabetics during treatment for non-muscle invasive bladder cancer.. Journal of Clinical Oncology, 2018, 36, 473-473. | 0.8 | 0         |
| 40 | Perioperative nutrition status of radical cystectomy patients.. Journal of Clinical Oncology, 2018, 36, 517-517.                                                               | 0.8 | 0         |
| 41 | Application-based perioperative management of the radical cystectomy patient.. Journal of Clinical Oncology, 2018, 36, 480-480.                                                | 0.8 | 0         |
| 42 | An Exploratory Study of Cognitive Function and Central Adiposity in Men Receiving Androgen Deprivation Therapy for Prostate Cancer. , 2022, 49, 142-150.                       |     | 0         |
