

Marisa Carrasco

List of Publications by Citations

Source: <https://exaly.com/author-pdf/2875243/marisa-carrasco-publications-by-citations.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
215	Visual attention: the past 25 years. <i>Vision Research</i> , 2011 , 51, 1484-525	2.1	1335
214	Attention alters appearance. <i>Nature Neuroscience</i> , 2004 , 7, 308-13	25.5	763
213	Attention improves or impairs visual performance by enhancing spatial resolution. <i>Nature</i> , 1998 , 396, 72-5	50.4	604
212	Emotion facilitates perception and potentiates the perceptual benefits of attention. <i>Psychological Science</i> , 2006 , 17, 292-9	7.9	590
211	Spatial covert attention increases contrast sensitivity across the CSF: support for signal enhancement. <i>Vision Research</i> , 2000 , 40, 1203-15	2.1	362
210	Voluntary attention enhances contrast appearance. <i>Psychological Science</i> , 2009 , 20, 354-62	7.9	325
209	The eccentricity effect: target eccentricity affects performance on conjunction searches. <i>Perception & Psychophysics</i> , 1995 , 57, 1241-61		260
208	Spatial attention improves performance in spatial resolution tasks. <i>Vision Research</i> , 1999 , 39, 293-306	2.1	257
207	Covert attention affects the psychometric function of contrast sensitivity. <i>Vision Research</i> , 2002 , 42, 949-67	2.1	237
206	Characterizing visual performance fields: effects of transient covert attention, spatial frequency, eccentricity, task and set size. <i>Spatial Vision</i> , 2001 , 15, 61-75		213
205	Cortical magnification neutralizes the eccentricity effect in visual search. <i>Vision Research</i> , 1997 , 37, 63-82.1		212
204	Attentional enhancement of spatial resolution: linking behavioural and neurophysiological evidence. <i>Nature Reviews Neuroscience</i> , 2013 , 14, 188-200	13.5	209
203	When size matters: attention affects performance by contrast or response gain. <i>Nature Neuroscience</i> , 2010 , 13, 1554-9	25.5	196
202	Covert attention increases spatial resolution with or without masks: support for signal enhancement. <i>Journal of Vision</i> , 2002 , 2, 467-79	0.4	184
201	Attention enhances contrast sensitivity at cued and impairs it at uncued locations. <i>Vision Research</i> , 2005 , 45, 1867-75	2.1	179
200	Sustained and transient covert attention enhance the signal via different contrast response functions. <i>Vision Research</i> , 2006 , 46, 1210-20	2.1	173
199	Transient attention enhances perceptual performance and fMRI response in human visual cortex. <i>Neuron</i> , 2005 , 45, 469-77	13.9	141

198	When sustained attention impairs perception. <i>Nature Neuroscience</i> , 2006 , 9, 1243-5	25.5	130
197	Attentional enhancement via selection and pooling of early sensory responses in human visual cortex. <i>Neuron</i> , 2011 , 72, 832-46	13.9	129
196	Feature-based attention modulates orientation-selective responses in human visual cortex. <i>Neuron</i> , 2007 , 55, 313-23	13.9	128
195	The temporal dynamics of visual search: Evidence for parallel processing in feature and conjunction searches.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 1999 , 25, 1517-1539	2.6	128
194	Attention alters the appearance of spatial frequency and gap size. <i>Psychological Science</i> , 2005 , 16, 644-51	7.9	124
193	Comparing the time course and efficacy of spatial and feature-based attention. <i>Vision Research</i> , 2007 , 47, 108-13	2.1	117
192	Attention trades off spatial acuity. <i>Vision Research</i> , 2009 , 49, 735-45	2.1	116
191	The locus of attentional effects in texture segmentation. <i>Nature Neuroscience</i> , 2000 , 3, 622-7	25.5	116
190	Vertical meridian asymmetry in spatial resolution: visual and attentional factors. <i>Psychonomic Bulletin and Review</i> , 2002 , 9, 714-22	4.1	113
189	How spatial and feature-based attention affect the gain and tuning of population responses. <i>Vision Research</i> , 2009 , 49, 1194-204	2.1	112
188	The contribution of covert attention to the set-size and eccentricity effects in visual search.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 1998 , 24, 673-692	2.6	108
187	Feature asymmetries in visual search: effects of display duration, target eccentricity, orientation and spatial frequency. <i>Vision Research</i> , 1998 , 38, 347-74	2.1	104
186	Rapid simultaneous enhancement of visual sensitivity and perceived contrast during saccade preparation. <i>Journal of Neuroscience</i> , 2012 , 32, 13744-52a	6.6	101
185	Bias and sensitivity in two-interval forced choice procedures: Tests of the difference model. <i>Vision Research</i> , 2008 , 48, 1837-51	2.1	101
184	Temporal performance fields: visual and attentional factors. <i>Vision Research</i> , 2004 , 44, 1351-65	2.1	100
183	Nonconscious fear is quickly acquired but swiftly forgotten. <i>Current Biology</i> , 2012 , 22, R477-9	6.3	96
182	Covert attention increases contrast sensitivity: Psychophysical, neurophysiological and neuroimaging studies. <i>Progress in Brain Research</i> , 2006 , 154, 33-70	2.9	91
181	On the automaticity and flexibility of covert attention: a speed-accuracy trade-off analysis. <i>Journal of Vision</i> , 2009 , 9, 30.1-10	0.4	90

180	Exogenous attention and color perception: performance and appearance of saturation and hue. <i>Vision Research</i> , 2006 , 46, 4032-47	2.1	87
179	Speed of visual processing increases with eccentricity. <i>Nature Neuroscience</i> , 2003 , 6, 699-700	25.5	87
178	How do attention and adaptation affect contrast sensitivity?. <i>Journal of Vision</i> , 2007 , 7, 9.1-12	0.4	85
177	On the flexibility of sustained attention and its effects on a texture segmentation task. <i>Vision Research</i> , 2008 , 48, 80-95	2.1	84
176	Isoeccentric locations are not equivalent: the extent of the vertical meridian asymmetry. <i>Vision Research</i> , 2012 , 52, 70-8	2.1	79
175	Acting without seeing: eye movements reveal visual processing without awareness. <i>Trends in Neurosciences</i> , 2015 , 38, 247-58	13.3	76
174	Transient attention does increase perceived contrast of suprathreshold stimuli: a reply to Prinzmetal, Long, and Leonhardt (2008). <i>Perception & Psychophysics</i> , 2008 , 70, 1151-64		72
173	Attention speeds processing across eccentricity: feature and conjunction searches. <i>Vision Research</i> , 2006 , 46, 2028-40	2.1	70
172	A population-coding model of attention's influence on contrast response: Estimating neural effects from psychophysical data. <i>Vision Research</i> , 2009 , 49, 1144-53	2.1	67
171	Signal detection theory applied to three visual search tasks--identification, yes/no detection and localization. <i>Spatial Vision</i> , 2004 , 17, 295-325		67
170	How attention enhances spatial resolution: evidence from selective adaptation to spatial frequency. <i>Perception & Psychophysics</i> , 2006 , 68, 1004-12		62
169	Apparent contrast differs across the vertical meridian: visual and attentional factors. <i>Journal of Vision</i> , 2008 , 8, 16.1-16	0.4	61
168	Attention Reorients Periodically. <i>Current Biology</i> , 2016 , 26, 1595-1601	6.3	60
167	Attention alters the appearance of motion coherence. <i>Psychonomic Bulletin and Review</i> , 2006 , 13, 1091-6	4.1	58
166	Voluntary attention increases perceived spatial frequency. <i>Attention, Perception, and Psychophysics</i> , 2010 , 72, 1510-21	2	54
165	Saccade Preparation Reshapes Sensory Tuning. <i>Current Biology</i> , 2016 , 26, 1564-1570	6.3	51
164	The role of attention and study time in explicit and implicit memory for unfamiliar visual stimuli. <i>Memory and Cognition</i> , 1998 , 26, 1187-95	2.2	51
163	Neural correlates of the visual vertical meridian asymmetry. <i>Journal of Vision</i> , 2006 , 6, 1294-306	0.4	51

162	Feature-based attention involuntarily and simultaneously improves visual performance across locations. <i>Journal of Vision</i> , 2011 , 11,	0.4	50
161	The effects of transient attention on spatial resolution and the size of the attentional cue. <i>Perception & Psychophysics</i> , 2008 , 70, 104-13		50
160	How Attention Affects Spatial Resolution. <i>Cold Spring Harbor Symposia on Quantitative Biology</i> , 2014 , 79, 149-60	3.9	49
159	Covert attention effects on spatial resolution. <i>Progress in Brain Research</i> , 2009 , 176, 65-86	2.9	48
158	Feature-based attention enhances performance by increasing response gain. <i>Vision Research</i> , 2012 , 74, 10-20	2.1	45
157	Covert attention enhances letter identification without affecting channel tuning. <i>Journal of Vision</i> , 2004 , 4, 22-31	0.4	43
156	The interaction of objective and subjective organizations in a localization search task. <i>Perception & Psychophysics</i> , 1995 , 57, 1134-50		43
155	Specific Visual Subregions of TPJ Mediate Reorienting of Spatial Attention. <i>Cerebral Cortex</i> , 2018 , 28, 2375-2390	5.1	42
154	Evaluating comparative and equality judgments in contrast perception: attention alters appearance. <i>Journal of Vision</i> , 2010 , 10, 6	0.4	42
153	Spatial attention alters visual appearance. <i>Current Opinion in Psychology</i> , 2019 , 29, 56-64	6.2	42
152	Attention model of binocular rivalry. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017 , 114, E6192-E6201	11.5	41
151	Adaptive deployment of spatial and feature-based attention before saccades. <i>Vision Research</i> , 2013 , 85, 26-35	2.1	40
150	Cue contrast modulates the effects of exogenous attention on appearance. <i>Vision Research</i> , 2009 , 49, 1825-37	2.1	40
149	Transient covert attention does alter appearance: a reply to Schneider (2006). <i>Perception & Psychophysics</i> , 2007 , 69, 1051-8		40
148	Tracking without perceiving: a dissociation between eye movements and motion perception. <i>Psychological Science</i> , 2011 , 22, 216-25	7.9	38
147	Humans incorporate attention-dependent uncertainty into perceptual decisions and confidence. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018 , 115, 11090-11095	11.5	38
146	Attention Modifies Spatial Resolution According to Task Demands. <i>Psychological Science</i> , 2017 , 28, 285-296		35
145	Exogenous spatial attention: evidence for intact functioning in adults with autism spectrum disorder. <i>Journal of Vision</i> , 2013 , 13,	0.4	35

144	"Transient structures": the effects of practice and distractor grouping on within-dimension conjunction searches. <i>Perception & Psychophysics</i> , 1998 , 60, 1243-58		34
143	Selective attention within the foveola. <i>Nature Neuroscience</i> , 2017 , 20, 1413-1417	25.5	33
142	Prestimulus Inhibition of Saccades in Adults With and Without Attention-Deficit/Hyperactivity Disorder as an Index of Temporal Expectations. <i>Psychological Science</i> , 2017 , 28, 835-850	7.9	32
141	Analysis of Perceptual Expertise in Radiology - Current Knowledge and a New Perspective. <i>Frontiers in Human Neuroscience</i> , 2019 , 13, 213	3.3	32
140	Priming impossible figures in the object decision test: The critical importance of perceived stimulus complexity. <i>Psychonomic Bulletin and Review</i> , 1996 , 3, 344-51	4.1	32
139	Occipital transcranial magnetic stimulation has an activity-dependent suppressive effect. <i>Journal of Neuroscience</i> , 2012 , 32, 12361-5	6.6	31
138	Attention enhances contrast appearance via increased input baseline of neural responses. <i>Journal of Vision</i> , 2014 , 14, 16	0.4	30
137	Visual performance fields: frames of reference. <i>PLoS ONE</i> , 2011 , 6, e24470	3.7	30
136	Attentional trade-offs maintain the tracking of moving objects across saccades. <i>Journal of Neurophysiology</i> , 2015 , 113, 2220-31	3.2	29
135	Perceptual asymmetries are preserved in short-term memory tasks. <i>Attention, Perception, and Psychophysics</i> , 2009 , 71, 1782-92	2	29
134	Exogenous attention facilitates location transfer of perceptual learning. <i>Journal of Vision</i> , 2015 , 15, 11	0.4	28
133	Exogenous Attention Enables Perceptual Learning. <i>Psychological Science</i> , 2015 , 26, 1854-62	7.9	28
132	Opportunities and challenges for a maturing science of consciousness. <i>Nature Human Behaviour</i> , 2019 , 3, 104-107	12.8	28
131	Transient covert attention and the perceived rate of flicker. <i>Journal of Vision</i> , 2006 , 6, 955-65	0.4	27
130	Differential effects of exogenous and endogenous attention on second-order texture contrast sensitivity. <i>Journal of Vision</i> , 2012 , 12,	0.4	27
129	Endogenous spatial attention: evidence for intact functioning in adults with autism. <i>Autism Research</i> , 2013 , 6, 108-18	5.1	26
128	Directing Voluntary Temporal Attention Increases Fixational Stability. <i>Journal of Neuroscience</i> , 2019 , 39, 353-363	6.6	26
127	Covert spatial attention is functionally intact in amblyopic human adults. <i>Journal of Vision</i> , 2016 , 16, 30	0.4	24

126	Attention flexibly trades off across points in time. <i>Psychonomic Bulletin and Review</i> , 2017 , 24, 1142-1151	4.1	23
125	Stimulus competition mediates the joint effects of spatial and feature-based attention. <i>Journal of Vision</i> , 2015 , 15, 7	0.4	23
124	The attentional effects of single cues and color singletons on visual sensitivity. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014 , 40, 639-52	2.6	23
123	Reach preparation enhances visual performance and appearance. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2013 , 368, 20130057	5.8	23
122	Interactions between voluntary and involuntary attention modulate the quality and temporal dynamics of visual processing. <i>Psychonomic Bulletin and Review</i> , 2015 , 22, 437-44	4.1	22
121	Learning one task by interleaving practice with another task. <i>Vision Research</i> , 2014 , 101, 118-24	2.1	22
120	Independent effects of adaptation and attention on perceived speed. <i>Psychological Science</i> , 2013 , 24, 150-9	7.9	22
119	Exogenous attention enhances 2nd-order contrast sensitivity. <i>Vision Research</i> , 2011 , 51, 1086-98	2.1	22
118	A test of the spatial-frequency explanation of the Müller-Lyer illusion. <i>Perception</i> , 1986 , 15, 553-62	1.2	22
117	Perceptual consequences of visual performance fields: the case of the line motion illusion. <i>Journal of Vision</i> , 2009 , 9, 13.1-17	0.4	21
116	Equality judgments cannot distinguish between attention effects on appearance and criterion: a reply to Schneider (2011). <i>Journal of Vision</i> , 2011 , 11,	0.4	21
115	Similar effects of feature-based attention on motion perception and pursuit eye movements at different levels of awareness. <i>Journal of Neuroscience</i> , 2012 , 32, 7594-601	6.6	21
114	Anxiety modulates the effects of emotion and attention on early vision. <i>Cognition and Emotion</i> , 2013 , 27, 166-76	2.3	20
113	Modeling visual performance differences around the visual field: A computational observer approach. <i>PLoS Computational Biology</i> , 2019 , 15, e1007063	5	19
112	The effects of task difficulty on visual search strategy in virtual 3D displays. <i>Journal of Vision</i> , 2013 , 13,	0.4	19
111	Oculomotor inhibition reflects temporal expectations. <i>NeuroImage</i> , 2019 , 184, 279-292	7.9	19
110	Temporal attention improves perception similarly at foveal and parafoveal locations. <i>Journal of Vision</i> , 2019 , 19, 12	0.4	18
109	Cross-modal attention enhances perceived contrast. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2009 , 106, 22039-40	11.5	18

108	Differential impact of endogenous and exogenous attention on activity in human visual cortex. <i>Scientific Reports</i> , 2020 , 10, 21274	4.9	18
107	Asymmetries in visual acuity around the visual field. <i>Journal of Vision</i> , 2021 , 21, 2	0.4	18
106	Differential impact of exogenous and endogenous attention on the contrast sensitivity function across eccentricity. <i>Journal of Vision</i> , 2020 , 20, 11	0.4	17
105	Deconstructing Interocular Suppression: Attention and Divisive Normalization. <i>PLoS Computational Biology</i> , 2015 , 11, e1004510	5	17
104	Feature-based attention potentiates recovery of fine direction discrimination in cortically blind patients. <i>Neuropsychologia</i> , 2019 , 128, 315-324	3.2	17
103	Distinct perceptual rhythms for feature and conjunction searches. <i>Journal of Vision</i> , 2017 , 17, 22	0.4	16
102	How visual spatial attention alters perception. <i>Cognitive Processing</i> , 2018 , 19, 77-88	1.5	16
101	Rapid and long-lasting reduction of crowding through training. <i>Journal of Vision</i> , 2015 , 15, 15	0.4	16
100	Stimulus-dependent contrast sensitivity asymmetries around the visual field. <i>Journal of Vision</i> , 2020 , 20, 18	0.4	15
99	Perceptual learning and dynamic changes in primary visual cortex. <i>Neuron</i> , 2008 , 57, 799-801	13.9	15
98	When attention is intact in adults with ADHD. <i>Psychonomic Bulletin and Review</i> , 2018 , 25, 1423-1434	4.1	15
97	Presaccadic attention improves or impairs performance by enhancing sensitivity to higher spatial frequencies. <i>Scientific Reports</i> , 2019 , 9, 2659	4.9	14
96	Perceptual learning modifies untrained pursuit eye movements. <i>Journal of Vision</i> , 2014 , 14, 8	0.4	14
95	Attention alters spatial resolution by modulating second-order processing. <i>Journal of Vision</i> , 2018 , 18, 2	0.4	14
94	Emotion and anxiety potentiate the way attention alters visual appearance. <i>Scientific Reports</i> , 2018 , 8, 5938	4.9	12
93	Emotional faces guide the eyes in the absence of awareness. <i>ELife</i> , 2019 , 8,	8.9	11
92	Extinguishing Exogenous Attention via Transcranial Magnetic Stimulation. <i>Current Biology</i> , 2020 , 30, 4078-4084.e3	6.3	11
91	Attention enhances apparent perceptual organization. <i>Psychonomic Bulletin and Review</i> , 2018 , 25, 1824-1832	11	11

90	Cortical magnification in human visual cortex parallels task performance around the visual field. <i>ELife</i> , 2021 , 10,	8.9	11
89	Colour vision in ADHD: part 1--testing the retinal dopaminergic hypothesis. <i>Behavioral and Brain Functions</i> , 2014 , 10, 38	4.1	10
88	Visual letter-matching and the time course of visual and acoustic codes. <i>Acta Psychologica</i> , 1988 , 69, 1-17	1.7	10
87	Endogenous spatial attention during perceptual learning facilitates location transfer. <i>Journal of Vision</i> , 2018 , 18, 7	0.4	10
86	On spatial attention and its field size on the repulsion effect. <i>Journal of Vision</i> , 2018 , 18, 8	0.4	10
85	Cross-dataset reproducibility of human retinotopic maps. <i>NeuroImage</i> , 2021 , 244, 118609	7.9	10
84	Crowding and Binding: Not All Feature Dimensions Behave in the Same Way. <i>Psychological Science</i> , 2019 , 30, 1533-1546	7.9	9
83	Exogenous attention facilitates perceptual learning in visual acuity to untrained stimulus locations and features. <i>Journal of Vision</i> , 2020 , 20, 18	0.4	9
82	Modeling pupil responses to rapid sequential events. <i>Behavior Research Methods</i> , 2020 , 52, 1991-2007	6.1	9
81	Spatial Covert Attention 2014 ,		9
80	Oculomotor inhibition precedes temporally expected auditory targets. <i>Nature Communications</i> , 2020 , 11, 3524	17.4	9
79	Different computations underlie overt presaccadic and covert spatial attention. <i>Nature Human Behaviour</i> , 2021 , 5, 1418-1431	12.8	9
78	Rapid and long-lasting learning of feature binding. <i>Cognition</i> , 2016 , 154, 130-138	3.5	9
77	Oculomotor freezing reflects tactile temporal expectation and aids tactile perception. <i>Nature Communications</i> , 2020 , 11, 3341	17.4	8
76	Feature singletons attract spatial attention independently of feature priming. <i>Journal of Vision</i> , 2017 , 17, 7	0.4	8
75	Perceptual learning while preparing saccades. <i>Vision Research</i> , 2018 , 152, 126-138	2.1	8
74	Endogenous attention improves perception in amblyopic macaques. <i>Journal of Vision</i> , 2018 , 18, 11	0.4	8
73	Visual space-time interactions: effects of adapting to spatial frequencies on temporal sensitivity. <i>Perception & Psychophysics</i> , 1990 , 48, 488-96		7

72	Voluntary attention improves performance similarly around the visual field. <i>Attention, Perception, and Psychophysics</i> , 2021 , 83, 2784-2794	2	7
71	How exogenous spatial attention affects visual representation. <i>Journal of Vision</i> , 2019 , 19, 4	0.4	6
70	Color vision in ADHD: part 2--does attention influence color perception?. <i>Behavioral and Brain Functions</i> , 2014 , 10, 39	4.1	6
69	Radial asymmetries around the visual field: From retina to cortex to behavior		6
68	A dynamic normalization model of temporal attention. <i>Nature Human Behaviour</i> , 2021 ,	12.8	6
67	To look or not to look: dissociating presaccadic and covert spatial attention. <i>Trends in Neurosciences</i> , 2021 , 44, 669-686	13.3	5
66	Cortical Magnification in Human Visual Cortex Parallels Task Performance around the Visual Field		4
65	Differential Effects of endogenous and exogenous attention on sensory tuning.. <i>Journal of Neuroscience</i> , 2021 ,	6.6	4
64	Cuing effects of faces are dependent on handedness and visual field. <i>Psychonomic Bulletin and Review</i> , 2010 , 17, 529-35	4.1	3
63	An unreported size illusion. <i>Perception</i> , 1993 , 22, 313-22	1.2	3
62	Asymmetries around the visual field: From retina to cortex to behavior.. <i>PLoS Computational Biology</i> , 2022 , 18, e1009771	5	3
61	Distinct mechanisms limit contrast sensitivity across retinal eccentricity and polar angle. <i>Journal of Vision</i> , 2019 , 19, 43	0.4	3
60	Voluntary attention improves performance similarly around the visual field		3
59	In search of exogenous feature-based attention. <i>Attention, Perception, and Psychophysics</i> , 2020 , 82, 312-329		3
58	An image-computable model of how endogenous and exogenous attention differentially alter visual perception. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021 , 118,	11.5	3
57	Presaccadic attention enhances contrast sensitivity, but not at the upper vertical meridian.. <i>IScience</i> , 2022 , 25, 103851	6.1	2
56	Presaccadic attention reshapes the sensory representation even when it impairs performance. <i>Journal of Vision</i> , 2018 , 18, 375	0.4	2
