Version: 2024-02-01

#	Article	IF	CITATIONS
1	Are cognitive g and academic achievement g one and the same g? An exploration on the Woodcock–Johnson and Kaufman tests. Intelligence, 2012, 40, 123-138.	3.0	159
2	Short-Term Estimates of Growth Using Curriculum-Based Measurement of Oral Reading Fluency: Estimating Standard Error of the Slope to Construct Confidence Intervals. School Psychology Review, 2006, 35, 108-127.	3.0	157
3	Sex differences in latent cognitive abilities ages 6 to 59: Evidence from the Woodcock–Johnson III tests of cognitive abilities. Intelligence, 2008, 36, 502-525.	3.0	130
4	Cattell–Horn–Carroll abilities and cognitive tests: What we've learned from 20 years of research. Psychology in the Schools, 2010, 47, 635-650.	1.8	79
5	Sex differences in achievement: Distributions matter. Personality and Individual Differences, 2017, 104, 272-278.	2.9	72
6	Confirmatory factor structure of the Kaufman Assessment Battery for ChildrenSecond Edition: Consistency with Cattell-Horn-Carroll theory School Psychology Quarterly, 2007, 22, 511-539.	2.0	61
7	A cross-battery, reference variable, confirmatory factor analytic investigation of the CHC taxonomy. Journal of School Psychology, 2013, 51, 535-555.	2.9	61
8	Higherâ€order factor structure of the Differential Ability Scales–II: Consistency across ages 4 to 17. Psychology in the Schools, 2010, 47, 676-697.	1.8	59
9	GENDER DIFFERENCES IN ACHIEVEMENT IN A LARGE, NATIONALLY REPRESENTATIVE SAMPLE OF CHILDREN AND ADOLESCENTS. Psychology in the Schools, 2015, 52, 335-348.	1.8	59
10	Multi-group and hierarchical confirmatory factor analysis of the Wechsler Intelligence Scale for Children—Fifth Edition: What does it measure?. Intelligence, 2017, 62, 31-47.	3.0	58
11	Sex differences in latent general and broad cognitive abilities for children and youth: Evidence from higher-order MG-MACS and MIMIC models. Intelligence, 2008, 36, 236-260.	3.0	57
12	Gender Differences in Academic Achievement: Is Writing an Exception to the Gender Similarities Hypothesis?. Journal of Genetic Psychology, 2015, 176, 211-234.	1.2	50
13	Spearman's law of diminishing returns in hierarchical models of intelligence for children and adolescents. Intelligence, 2007, 35, 267-281.	3.0	47
14	An alternative Cattell–Horn–Carroll (CHC) factor structure of the WAIS-IV: Age invariance of an alternative model for ages 70–90 Psychological Assessment, 2013, 25, 391-404.	1.5	44
15	Beyond individual intelligence tests: Application of Cattell-Horn-Carroll Theory. Intelligence, 2020, 79, 101433.	3.0	37
16	A dynamic developmental link between verbal comprehension-knowledge (Gc) and reading comprehension: Verbal comprehension-knowledge drives positive change in reading comprehension. Journal of School Psychology, 2012, 50, 841-863.	2.9	36
17	Sex differences in latent cognitive abilities ages 5 to 17: Evidence from the Differential Ability Scales—Second Edition. Intelligence, 2011, 39, 389-404.	3.0	34
18	Cognitive ability influences on written expression: Evidence for developmental and sex-based differences in school-age children. Journal of School Psychology, 2018, 67, 104-118.	2.9	33

MATTHEW R REYNOLDS

#	Article	IF	CITATIONS
19	Comparison of methods for factor extraction for cognitive test-like data: Which overfactor, which underfactor?. Intelligence, 2016, 54, 37-54.	3.0	32
20	Are the General Factors From Different Child And Adolescent Intelligence Tests the Same? Results From a Five-Sample, Six-Test Analysis. School Psychology Review, 2013, 42, 383-401.	3.0	30
21	The possible societal impact of the decrease in U.S. blood lead levels on adult IQ. Environmental Research, 2014, 132, 413-420.	7.5	30
22	Effects of cognitive abilities on child and youth academic achievement: Evidence from the WISC-V and WIAT-III. Intelligence, 2018, 68, 6-20.	3.0	29
23	Use of factor mixture modeling to capture Spearman's law of diminishing returnsâ~†. Intelligence, 2010, 38, 231-241.	3.0	28
24	How well is psychometric g indexed by global composites? Evidence from three popular intelligence tests Psychological Assessment, 2013, 25, 1314-1321.	1.5	27
25	Latent curve modeling of internalizing behaviors and interpersonal skills through elementary school School Psychology Quarterly, 2010, 25, 189-201.	2.0	25
26	Broad and Narrow CHC Abilities Measured and Not Measured by the Wechsler Scales. Journal of Psychoeducational Assessment, 2013, 31, 202-223.	1.5	25
27	Investigating the structure and invariance of the Wechsler Adult Intelligence Scales, Fourth Edition in a sample of adults with intellectual disabilities. Research in Developmental Disabilities, 2013, 34, 3235-3245.	2.2	23
28	Intelligence and Adaptive Behavior: A Meta-Analysis. School Psychology Review, 2020, 49, 85-110.	3.0	23
29	Interpreting the g loadings of intelligence test composite scores in light of Spearman's law of diminishing returns School Psychology Quarterly, 2013, 28, 63-76.	2.0	21
30	Digit Span Subscale Scores May Be Insufficiently Reliable for Clinical Interpretation: Distinguishing Between Stratified Coefficient Alpha and Omega Hierarchical. Assessment, 2019, 26, 1554-1563.	3.1	21
31	A Multigroup Investigation of Latent Cognitive Abilities and Reading Achievement Relations. School Psychology Review, 2014, 43, 385-406.	3.0	17
32	Enduring the tests of age and time: Wechsler constructs across versions and revisions. Intelligence, 2019, 77, 101403.	3.0	15
33	Global, Broad, or Specific Cognitive Differences? Using a MIMIC Model to Examine Differences in CHC Abilities in Children With Learning Disabilities. Journal of Learning Disabilities, 2014, 47, 224-236.	2.2	14
34	A Special Validity Study of the Woodcock–Johnson IV. , 2016, , 65-106.		14
35	A Multigroup Investigation of Latent Cognitive Abilities and Reading Achievement Relations. School Psychology Review, 2014, 43, 385-406.	3.0	14
36	IQs ARE VERY STRONG BUT IMPERFECT INDICATORS OF PSYCHOMETRIC <i>g</i> : RESULTS FROM JOINT CONFIRMATORY FACTOR ANALYSIS. Psychology in the Schools, 2014, 51, 801-813.	1.8	12

MATTHEW R REYNOLDS

#	Article	IF	CITATIONS
37	Scores in Space: Multidimensional Scaling of the WISC-V. Journal of Psychoeducational Assessment, 2018, 36, 562-575.	1.5	12
38	How Can General Intelligence Composites Most Accurately Index Psychometric g and What Might Be Good Enough?. Contemporary School Psychology, 2020, 24, 52-67.	1.3	11
39	Spearman's law of diminishing returns and the DAS-II: Do g effects on subtest scores depend on the level of g?. School Psychology Quarterly, 2011, 26, 275-289.	2.0	8
40	The sexes do not differ in general intelligence, but they do in some specifics. Intelligence, 2022, 92, 101651.	3.0	8
41	What Does the Shipley-2 Measure for Children and Adolescents? Integrated and Conjoint Confirmatory Factor Analysis With the WISC-IV. Assessment, 2016, 23, 23-41.	3.1	6
42	Working memory capacity development through childhood: A longitudinal analysis Developmental Psychology, 2022, 58, 1254-1263.	1.6	5
43	Gender Matters in Neuropsychological Assessment of Child and Adolescent Writing Skill. Journal of Pediatric Neuropsychology, 2019, 5, 103-118.	0.6	2
44	Beyond Simple Mean Differences: Analysis of Sex Similarities and Differences in Academic Achievement With the Kaufman Tests of Educational Achievement, Third Edition. Journal of Psychoeducational Assessment, 0, , 073428292211112.	1.5	1
