

Harold A Sackeim

List of Publications by Citations

Source: <https://exaly.com/author-pdf/2925362/harold-a-sackeim-publications-by-citations.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

91

#	Paper	IF	Citations
91	Acute and longer-term outcomes in depressed outpatients requiring one or several treatment steps: a STAR*D report. <i>American Journal of Psychiatry</i> , 2006 , 163, 1905-17	11.9	3098
90	Efficacy and safety of transcranial magnetic stimulation in the acute treatment of major depression: a multisite randomized controlled trial. <i>Biological Psychiatry</i> , 2007 , 62, 1208-16	7.9	1074
89	Effects of stimulus intensity and electrode placement on the efficacy and cognitive effects of electroconvulsive therapy. <i>New England Journal of Medicine</i> , 1993 , 328, 839-46	59.2	741
88	Sequenced treatment alternatives to relieve depression (STAR*D): rationale and design. <i>Contemporary Clinical Trials</i> , 2004 , 25, 119-42		725
87	Daily left prefrontal transcranial magnetic stimulation therapy for major depressive disorder: a sham-controlled randomized trial. <i>Archives of General Psychiatry</i> , 2010 , 67, 507-16		644
86	Hemispheric asymmetry in the expression of positive and negative emotions. Neurologic evidence. <i>Archives of Neurology</i> , 1982 , 39, 210-8		595
85	A prospective, randomized, double-blind comparison of bilateral and right unilateral electroconvulsive therapy at different stimulus intensities. <i>Archives of General Psychiatry</i> , 2000 , 57, 425-34		593
84	Vagus nerve stimulation (VNS) for treatment-resistant depressions: a multicenter study. <i>Biological Psychiatry</i> , 2000 , 47, 276-86	7.9	482
83	Report by the ACNP Task Force on response and remission in major depressive disorder. <i>Neuropsychopharmacology</i> , 2006 , 31, 1841-53	8.7	469
82	Continuation pharmacotherapy in the prevention of relapse following electroconvulsive therapy: a randomized controlled trial. <i>JAMA - Journal of the American Medical Association</i> , 2001 , 285, 1299-307	27.4	445
81	Vagus nerve stimulation for treatment-resistant depression: a randomized, controlled acute phase trial. <i>Biological Psychiatry</i> , 2005 , 58, 347-54	7.9	439
80	The cognitive effects of electroconvulsive therapy in community settings. <i>Neuropsychopharmacology</i> , 2007 , 32, 244-54	8.7	370
79	Vagus nerve stimulation (VNS) for treatment-resistant depression: efficacy, side effects, and predictors of outcome. <i>Neuropsychopharmacology</i> , 2001 , 25, 713-28	8.7	358
78	Effects of pulse width and electrode placement on the efficacy and cognitive effects of electroconvulsive therapy. <i>Brain Stimulation</i> , 2008 , 1, 71-83	5.1	355
77	Antidepressant-induced neurogenesis in the hippocampus of adult nonhuman primates. <i>Journal of Neuroscience</i> , 2007 , 27, 4894-901	6.6	344
76	Neuropsychiatric applications of transcranial magnetic stimulation: a meta analysis. <i>International Journal of Neuropsychopharmacology</i> , 2002 , 5, 73-103	5.8	335
75	Effects of 12 months of vagus nerve stimulation in treatment-resistant depression: a naturalistic study. <i>Biological Psychiatry</i> , 2005 , 58, 355-63	7.9	288

74	Decreased regional brain metabolism after ect. <i>American Journal of Psychiatry</i> , 2001 , 158, 305-8	11.9	267
73	Seizure threshold in electroconvulsive therapy. Effects of sex, age, electrode placement, and number of treatments. <i>Archives of General Psychiatry</i> , 1987 , 44, 355-60		267
72	A one-year comparison of vagus nerve stimulation with treatment as usual for treatment-resistant depression. <i>Biological Psychiatry</i> , 2005 , 58, 364-73	7.9	264
71	Two-year outcome of vagus nerve stimulation (VNS) for treatment of major depressive episodes. <i>Journal of Clinical Psychiatry</i> , 2005 , 66, 1097-104	4.6	258
70	Titrated moderately suprathreshold vs fixed high-dose right unilateral electroconvulsive therapy: acute antidepressant and cognitive effects. <i>Archives of General Psychiatry</i> , 2000 , 57, 438-44		250
69	The impact of medication resistance and continuation pharmacotherapy on relapse following response to electroconvulsive therapy in major depression. <i>Journal of Clinical Psychopharmacology</i> , 1990 , 10, 96-104	1.7	242
68	Daily left prefrontal repetitive transcranial magnetic stimulation in the acute treatment of major depression: clinical predictors of outcome in a multisite, randomized controlled clinical trial. <i>Neuropsychopharmacology</i> , 2009 , 34, 522-34	8.7	219
67	Regional cerebral blood flow in mood disorders. I. Comparison of major depressives and normal controls at rest. <i>Archives of General Psychiatry</i> , 1990 , 47, 60-70		217
66	Medication resistance and clinical response to electroconvulsive therapy. <i>Psychiatry Research</i> , 1990 , 31, 287-96	9.9	209
65	Safety and feasibility of magnetic seizure therapy (MST) in major depression: randomized within-subject comparison with electroconvulsive therapy. <i>Neuropsychopharmacology</i> , 2003 , 28, 1852-65	8.7	197
64	Effectiveness of electroconvulsive therapy in community settings. <i>Biological Psychiatry</i> , 2004 , 55, 301-12	7.9	191
63	Effect of concomitant pharmacotherapy on electroconvulsive therapy outcomes: short-term efficacy and adverse effects. <i>Archives of General Psychiatry</i> , 2009 , 66, 729-37		184
62	Necessity of hippocampal neurogenesis for the therapeutic action of antidepressants in adult nonhuman primates. <i>PLoS ONE</i> , 2011 , 6, e17600	3.7	178
61	The effects of electroconvulsive therapy on quantitative electroencephalograms. Relationship to clinical outcome. <i>Archives of General Psychiatry</i> , 1996 , 53, 814-24		159
60	EEG manifestations during ECT: effects of electrode placement and stimulus intensity. <i>Biological Psychiatry</i> , 1993 , 34, 321-30	7.9	152
59	Magnetic seizure therapy of major depression. <i>Archives of General Psychiatry</i> , 2001 , 58, 303-5		145
58	Behavioral Syndromes in Alzheimer's Disease. <i>International Psychogeriatrics</i> , 1992 , 4, 161-184	3.4	134
57	ECT in bipolar and unipolar depression: differences in speed of response. <i>Bipolar Disorders</i> , 2001 , 3, 95-104	10.4	124

56	Toward an Evidence-Based, Operational Definition of Treatment-Resistant Depression: When Enough Is Enough. <i>JAMA Psychiatry</i> , 2017 , 74, 9-10	14.5	122
55	Adequacy of antidepressant treatment after discharge and the occurrence of suicidal acts in major depression: a prospective study. <i>American Journal of Psychiatry</i> , 2002 , 159, 1746-51	11.9	108
54	The Anticonvulsant Hypothesis of the Mechanisms of Action of ECT. <i>Journal of ECT</i> , 1999 , 15, 577-26	2	96
53	Predictors of remission after electroconvulsive therapy in unipolar major depression. <i>Journal of Clinical Psychiatry</i> , 2005 , 66, 1043-9	4.6	93
52	A multisite, naturalistic, observational study of transcranial magnetic stimulation for patients with pharmacoresistant major depressive disorder: durability of benefit over a 1-year follow-up period. <i>Journal of Clinical Psychiatry</i> , 2014 , 75, 1394-401	4.6	84
51	A computer algorithm for calculating the adequacy of antidepressant treatment in unipolar and bipolar depression. <i>Journal of Clinical Psychiatry</i> , 2003 , 64, 825-33	4.6	79
50	Combined treatment with sertraline and lithium in major depression: a randomized, double-blind, placebo-controlled trial. <i>Archives of General Psychiatry</i> , 2007 , 64, 679-88		78
49	Durability of antidepressant response to vagus nerve stimulation (VNS). <i>International Journal of Neuropsychopharmacology</i> , 2007 , 10, 817-26	5.8	75
48	Convulsant and anticonvulsant properties of electroconvulsive therapy: towards a focal form of brain stimulation. <i>Clinical Neuroscience Research</i> , 2004 , 4, 39-57		75
47	Modern Electroconvulsive Therapy: Vastly Improved yet Greatly Underused. <i>JAMA Psychiatry</i> , 2017 , 74, 779-780	14.5	69
46	Effects of major depression on estimates of intelligence. <i>Neuropsychology, Development and Cognition Section A: Journal of Clinical and Experimental Neuropsychology</i> , 1992 , 14, 268-88		65
45	A feasibility study of a new method for electrically producing seizures in man: focal electrically administered seizure therapy [FEAST]. <i>Brain Stimulation</i> , 2013 , 6, 403-8	5.1	55
44	Autobiographical memory and electroconvulsive therapy: do not throw out the baby. <i>Journal of ECT</i> , 2014 , 30, 177-86	2	55
43	Pharmacological strategies in the prevention of relapse after electroconvulsive therapy. <i>Journal of ECT</i> , 2013 , 29, 3-12	2	55
42	Who responds to electroconvulsive therapy? A comparison of effective and ineffective forms of treatment. <i>British Journal of Psychiatry</i> , 1996 , 169, 322-8	5.4	55
41	Subjective evaluation of the therapeutic and cognitive effects of electroconvulsive therapy. <i>Brain Stimulation</i> , 2008 , 1, 16-26	5.1	45
40	Repetitive transcranial magnetic stimulation: what are the next steps?. <i>Biological Psychiatry</i> , 2000 , 48, 959-61	7.9	37
39	Long-term efficacy of repeated daily prefrontal transcranial magnetic stimulation (TMS) in treatment-resistant depression. <i>Depression and Anxiety</i> , 2012 , 29, 883-90	8.4	35

38	Self-evaluation of the cognitive effects of electroconvulsive therapy. <i>Journal of ECT</i> , 2011 , 27, 59-66	2	31
37	Naloxone in the prevention of the adverse cognitive effects of ECT: a within-subject, placebo controlled study. <i>Neuropsychopharmacology</i> , 1999 , 21, 285-93	8.7	28
36	Determining the duration of antidepressant treatment: application of signal detection methodology and the need for duration adaptive designs (DAD). <i>Biological Psychiatry</i> , 2006 , 59, 483-92	7.9	27
35	The assessment of resistance to antidepressant treatment: Rationale for the Antidepressant Treatment History Form: Short Form (ATHF-SF). <i>Journal of Psychiatric Research</i> , 2019 , 113, 125-136	5.2	25
34	Optimal length of antidepressant trials in late-life depression. <i>Journal of Clinical Psychopharmacology</i> , 2005 , 25, S34-7	1.7	24
33	Subjective Side Effects Acutely Following ECT: Associations with Treatment Modality and Clinical Response. <i>Convulsive Therapy</i> , 1987 , 3, 100-110		24
32	Gray-matter degeneration in presenile Alzheimer's disease. <i>Annals of Neurology</i> , 1989 , 25, 117-24	9.4	22
31	Clinical outcomes in a large registry of patients with major depressive disorder treated with Transcranial Magnetic Stimulation. <i>Journal of Affective Disorders</i> , 2020 , 277, 65-74	6.6	22
30	Length of the ECT course in bipolar and unipolar depression. <i>Journal of ECT</i> , 2005 , 21, 195-7	2	18
29	Regional cerebral blood flow changes associated with focal electrically administered seizure therapy (FEAST). <i>Brain Stimulation</i> , 2014 , 7, 483-5	5.1	14
28	Simple Electroencephalographic Treatment-Emergent Marker Can Predict Repetitive Transcranial Magnetic Stimulation Antidepressant Response-A Feasibility Study. <i>Journal of ECT</i> , 2018 , 34, 274-282	2	13
27	Accelerated iTBS treatment applied to the left DLPFC in depressed patients results in a rapid volume increase in the left hippocampal dentate gyrus, not driven by brain perfusion. <i>Brain Stimulation</i> , 2020 , 13, 1211-1217	5.1	11
26	Effects of mood on lacrimal flow: sex differences and asymmetry. <i>Psychophysiology</i> , 1987 , 24, 550-6	4.1	10
25	Not all seizures are created equal: The importance of ECT dose-response variables. <i>Behavioral and Brain Sciences</i> , 1984 , 7, 32-33	0.9	10
24	A two-site, open-label, non-randomized trial comparing Focal Electrically-Administered Seizure Therapy (FEAST) and right unilateral ultrabrief pulse electroconvulsive therapy (RUL-UBP ECT). <i>Brain Stimulation</i> , 2020 , 13, 1416-1425	5.1	10
23	Neurophysiological Variability in the Effects of the ECT Stimulus. <i>Convulsive Therapy</i> , 1986 , 2, 267-276		10
22	Serial dexamethasone suppression tests in initial suppressors and nonsuppressors treated with electroconvulsive therapy. <i>Biological Psychiatry</i> , 1987 , 22, 463-72	7.9	9
21	Electroconvulsive Therapy in Mania: A Review of 80 Years of Clinical Experience. <i>American Journal of Psychiatry</i> , 2021 , 178, 229-239	11.9	9

20	Optimizing Unilateral Electroconvulsive Therapy. <i>Convulsive Therapy</i> , 1991 , 7, 201-212		9
19	Reply regarding "efficacy and safety of transcranial magnetic stimulation in the acute treatment of major depression: a multisite randomized controlled trial". <i>Biological Psychiatry</i> , 2010 , 67, e15-7	7.9	8
18	A prospective, multi-center randomized, controlled, blinded trial of vagus nerve stimulation for difficult to treat depression: A novel design for a novel treatment. <i>Contemporary Clinical Trials</i> , 2020 , 95, 106066	2.3	7
17	The benefits and costs of changing treatment technique in electroconvulsive therapy due to insufficient improvement of a major depressive episode. <i>Brain Stimulation</i> , 2020 , 13, 1284-1295	5.1	7
16	The efficacy of ECT in double depression. <i>Depression</i> , 1993 , 1, 38-44		6
15	Autobiographical Memory and Electroconvulsive Therapy: Final Thoughts on the Bathwater. <i>Journal of ECT</i> , 2014 , 30, 189-190	2	4
14	Response to Rosenman et al. Electroconvulsive therapy stimulus titration: Not all it seems. <i>Australian and New Zealand Journal of Psychiatry</i> , 2018 , 52, 711-712	2.6	3
13	Brain stimulation, revolutions, and the shifting time domain of depression. <i>Biological Psychiatry</i> , 2008 , 64, 447-8	7.9	3
12	In Reply: Stimulus Dosing Strategies and the Efficacy of Unilateral ECT. <i>Convulsive Therapy</i> , 1992 , 8, 46-52		3
11	The Long and Winding Road of Vagus Nerve Stimulation: Challenges in Developing an Intervention for Difficult-to-Treat Mood Disorders. <i>Neuropsychiatric Disease and Treatment</i> , 2020 , 16, 3081-3093	3.1	2
10	Is There Evidence That Stimulus Parameters and Electrode Placement Affect the Cognitive Side Effects of Electroconvulsive Therapy in Patients With Schizophrenia and Schizoaffective Disorder?: A Systematic Review. <i>Journal of ECT</i> , 2021 , 37, 133-139	2	2
9	Adaptive current-flow models of ECT: Explaining individual static impedance, dynamic impedance, and brain current density. <i>Brain Stimulation</i> , 2021 , 14, 1154-1168	5.1	2
8	Plasma homovanillic acid in psychotic depression. <i>Depression</i> , 1993 , 1, 309-314		1
7	Clinical research challenges posed by difficult-to-treat depression.. <i>Psychological Medicine</i> , 2022 , 1-14	6.9	1
6	Staging and Combining Brain Stimulation Interventions: Vagus Nerve Stimulation and Electroconvulsive Therapy. <i>Journal of ECT</i> , 2021 , 37, 80-83	2	1
5	Should Tricyclic Antidepressants or Lithium Be Standard Continuation Treatment After ECT: An Alternative View. <i>Convulsive Therapy</i> , 1989 , 5, 180-183		1
4	ECT: Twice or Thrice a Week?. <i>Convulsive Therapy</i> , 1989 , 5, 362-364		1
3	A Reply to Swartz: Abortive Seizures and Subconvulsive Stimuli Are Apples and Oranges. <i>Convulsive Therapy</i> , 1990 , 6, 182-185		1

2 The Effects of Focal Electrically Administered Seizure Therapy Compared With Ultrabrief Pulse Right Unilateral Electroconvulsive Therapy on Suicidal Ideation: A 2-Site Clinical Trial. *Journal of ECT* , 2021, 37, 256-262 2 0

1 Effect of acute systemic baclofen on amphetamine stimulated striatal dopamine release as measured in rats with [3H]raclopride. *Journal of Cerebral Blood Flow and Metabolism*, 2005, 25, S614-S614³
