

Camille L Stagg

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2934028/camille-l-stagg-publications-by-year.pdf>

Version: 2024-04-17

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
44	Carbon Storage in the Coastal Swamp Oak Forest Wetlands of Australia. <i>Geophysical Monograph Series</i> , 2021 , 339-353	1.1	1
43	Potential for Carbon and Nitrogen Sequestration by Restoring Tidal Connectivity and Enhancing Soil Surface Elevations in Denuded and Degraded South Florida Mangrove Ecosystems. <i>Geophysical Monograph Series</i> , 2021 , 143-158	1.1	1
42	Hydrological Rehabilitation and Sediment Elevation as Strategies to Restore Mangroves in Terrigenous and Calcareous Environments in Mexico. <i>Geophysical Monograph Series</i> , 2021 , 173-190	1.1	2
41	The Importance of Wetland Carbon Dynamics to Society. <i>Geophysical Monograph Series</i> , 2021 , 421-436	1.1	
40	Summary of Wetland Carbon and Environmental Management. <i>Geophysical Monograph Series</i> , 2021 , 437-446		
39	Carbon Flux Trajectories and Site Conditions from Restored Impounded Marshes in the Sacramento-San Joaquin Delta. <i>Geophysical Monograph Series</i> , 2021 , 247-271	1.1	2
38	Soil and Aboveground Carbon Stocks in a Planted Tropical Mangrove Forest (Can Gio, Vietnam). <i>Geophysical Monograph Series</i> , 2021 , 229-245	1.1	1
37	Optimizing Carbon Stocks and Sedimentation in Indonesian Mangroves under Different Management Regimes. <i>Geophysical Monograph Series</i> , 2021 , 159-172	1.1	1
36	A Review of Global Wetland Carbon Stocks and Management Challenges. <i>Geophysical Monograph Series</i> , 2021 , 1-20	1.1	2
35	Long-Term Carbon Sinks in Marsh Soils of Coastal Louisiana are at Risk to Wetland Loss. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2021 , 126, e2020JG005832	3.7	1
34	Belowground productivity varies by assessment technique, vegetation type, and nutrient availability in tidal freshwater forested wetlands transitioning to marsh. <i>PLoS ONE</i> , 2021 , 16, e0253554	3.7	2
33	Extreme Precipitation and Flooding Contribute to Sudden Vegetation Dieback in a Coastal Salt Marsh. <i>Plants</i> , 2021 , 10,	4.5	3
32	Quantifying hydrologic controls on local- and landscape-scale indicators of coastal wetland loss. <i>Annals of Botany</i> , 2020 , 125, 365-376	4.1	14
31	Scaling responses of leaf nutrient stoichiometry to the lakeshore flooding duration gradient across different organizational levels. <i>Science of the Total Environment</i> , 2020 , 740, 139740	10.2	4
30	Modeling Soil Porewater Salinity Response to Drought in Tidal Freshwater Forested Wetlands. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2020 , 125, e2018JG004996	3.7	3
29	Tidal Wetland Gross Primary Production Across the Continental United States, 2000-2019. <i>Global Biogeochemical Cycles</i> , 2020 , 34, e2019GB006349	5.9	14
28	Rapid peat development beneath created, maturing mangrove forests: ecosystem changes across a 25-yr chronosequence. <i>Ecological Applications</i> , 2020 , 30, e02085	4.9	27

27	Stress gradients interact with disturbance to reveal alternative states in salt marsh: Multivariate resilience at the landscape scale. <i>Journal of Ecology</i> , 2020 ,	6	2
26	Restoration Affects Sexual Reproductive Capacity in a Salt Marsh. <i>Estuaries and Coasts</i> , 2019 , 42, 976-986.8		4
25	The Role of the Upper Tidal Estuary in Wetland Blue Carbon Storage and Flux. <i>Global Biogeochemical Cycles</i> , 2018 , 32, 817-839	5.9	56
24	Early growth interactions between a mangrove and an herbaceous salt marsh species are not affected by elevated CO ₂ or drought. <i>Estuarine, Coastal and Shelf Science</i> , 2018 , 207, 74-81	2.9	7
23	Vegetation Cover, Tidal Amplitude and Land Area Predict Short-Term Marsh Vulnerability in Coastal Louisiana. <i>Ecosystems</i> , 2018 , 21, 1335-1347	3.9	10
22	Resource competition model predicts zonation and increasing nutrient use efficiency along a wetland salinity gradient. <i>Ecology</i> , 2018 , 99, 670-680	4.6	8
21	Flooding Alters Plant-Mediated Carbon Cycling Independently of Elevated Atmospheric CO ₂ Concentrations. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2018 , 123, 1976-1987	3.7	20
20	Climate and plant controls on soil organic matter in coastal wetlands. <i>Global Change Biology</i> , 2018 , 24, 5361-5379	11.4	64
19	Direct and indirect controls on organic matter decomposition in four coastal wetland communities along a landscape salinity gradient. <i>Journal of Ecology</i> , 2018 , 106, 655-670	6	28
18	Macroclimatic change expected to transform coastal wetland ecosystems this century. <i>Nature Climate Change</i> , 2017 , 7, 142-147	21.4	99
17	A Landscape-Scale Assessment of Above- and Belowground Primary Production in Coastal Wetlands: Implications for Climate Change-Induced Community Shifts. <i>Estuaries and Coasts</i> , 2017 , 40, 856-879	2.8	30
16	Causal mechanisms of soil organic matter decomposition: deconstructing salinity and flooding impacts in coastal wetlands. <i>Ecology</i> , 2017 , 98, 2003-2018	4.6	48
15	Relationships Between Salinity and Short-Term Soil Carbon Accumulation Rates from Marsh Types Across a Landscape in the Mississippi River Delta. <i>Wetlands</i> , 2017 , 37, 313-324	1.7	26
14	Created mangrove wetlands store belowground carbon and surface elevation change enables them to adjust to sea-level rise. <i>Scientific Reports</i> , 2017 , 7, 1030	4.9	46
13	Climatic controls on the global distribution, abundance, and species richness of mangrove forests. <i>Ecological Monographs</i> , 2017 , 87, 341-359	9	156
12	Linear and nonlinear effects of temperature and precipitation on ecosystem properties in tidal saline wetlands. <i>Ecosphere</i> , 2017 , 8, e01956	3.1	59
11	Processes Contributing to Resilience of Coastal Wetlands to Sea-Level Rise. <i>Ecosystems</i> , 2016 , 19, 1445-1459	3.9	22
10	Marine ecoregion and Deepwater Horizon oil spill affect recruitment and population structure of a salt marsh snail. <i>Ecosphere</i> , 2016 , 7, e01588	3.1	9

9	Tidal saline wetland regeneration of sentinel vegetation types in the Northern Gulf of Mexico: An overview. <i>Estuarine, Coastal and Shelf Science</i> , 2016 , 174, A1-A10	2.9	12
8	Beyond just sea-level rise: considering macroclimatic drivers within coastal wetland vulnerability assessments to climate change. <i>Global Change Biology</i> , 2016 , 22, 1-11	11.4	163
7	Freshwater availability and coastal wetland foundation species: ecological transitions along a rainfall gradient. <i>Ecology</i> , 2014 , 95, 2789-2802	4.6	65
6	Sediment Accretion in Tidal Freshwater Forests and Oligohaline Marshes of the Waccamaw and Savannah Rivers, USA. <i>Estuaries and Coasts</i> , 2014 , 37, 1107-1119	2.8	32
5	Ecosystem Development After Mangrove Wetland Creation: Plant-Soil Change Across a 20-Year Chronosequence. <i>Ecosystems</i> , 2012 , 15, 848-866	3.9	132
4	<i>Littoraria irrorata</i> Growth and Survival in a Sediment-Restored Salt Marsh. <i>Wetlands</i> , 2012 , 32, 643-652	1.7	14
3	Controls on resilience and stability in a sediment-subsidized salt marsh 2011 , 21, 1731-44		43
2	Restoring Ecological Function to a Submerged Salt Marsh. <i>Restoration Ecology</i> , 2010 , 18, 10-17	3.1	55
1	Submergence Vulnerability Index development and application to Coastwide Reference Monitoring System Sites and Coastal Wetlands Planning, Protection and Restoration Act projects. <i>US Geological Survey Open-File Report</i> ,		4
