#	ARTICLE	IF	CITATIONS
1	Torsion points on elliptic curves over function fields and a theorem of Igusa. , 2009, 27, 175-209.		12
2	The Iwasawa Main Conjecture for constant ordinary abelian varieties over function fields. Proceedings of the London Mathematical Society, 2016, 112, 1040-1058.	1.3	6
3	Selmer groups for elliptic curves in \mathbb{Z}_l^d -extensions of function fields of characteristic p . Annales De L'Institut Fourier, 2009, 59, 2301-2327.	0.6	6
4	Non-Archimedean Integration and Elliptic Curves over Function Fields. Journal of Number Theory, 2002, 94, 375-404.	0.4	5
5	The Iwasawa Main Conjecture for semistable abelian varieties over function fields. Mathematische Zeitschrift, 2016, 282, 485-510.	0.9	5
6	Characteristic ideals and Selmer groups. Journal of Number Theory, 2015, 157, 530-546.	0.4	3
7	Pontryagin duality for Iwasawa modules and abelian varieties. Transactions of the American Mathematical Society, 2018, 370, 1925-1958.	0.9	3
8	Iwasawa main conjecture for the Carlitz cyclotomic extension and applications. Mathematische Annalen, 2020, 376, 475-523.	1.4	3
9	Teitelbaum's exceptional zero conjecture in the function field case. Journal Fur Die Reine Und Angewandte Mathematik, 2006, 2006, .	0.9	2
10	Coleman's power series and Wiles' reciprocity for rank 1 Drinfeld modules. Journal of Number Theory, 2009, 129, 789-805.	0.4	2
11	An example of non-cotorsion Selmer group. Proceedings of the American Mathematical Society, 2015, 143, 2355-2364.	0.8	1
12	A note on the density of k -free polynomial sets, Haar measure and global fields. Quaestiones Mathematicae, 2022, 45, 1373-1397.	0.6	1
13	On the \hat{H}^1 -invariants of abelian varieties over function fields of positive characteristic. Algebra and Number Theory, 2021, 15, 863-907.	0.6	0
