

Huan-Zhong Shi

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2947795/huan-zhong-shi-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

87
papers

3,622
citations

#	Paper	IF	Citations
87	T Cell Receptor Repertoire Analysis Reveals Signatures of T Cell Responses to Human .. <i>Frontiers in Microbiology</i> , 2022 , 13, 829694	5.7	0
86	Prognostic biomarkers of malignant patients with pleural effusion: a systematic review and meta-analysis.. <i>Cancer Cell International</i> , 2022 , 22, 99	6.4	0
85	Single-cell analysis of diverse immune phenotypes in malignant pleural effusion. <i>Nature Communications</i> , 2021 , 12, 6690	17.4	5
84	Complement Component C1q as an Emerging Biomarker for the Diagnosis of Tuberculous Pleural Effusion. <i>Frontiers in Microbiology</i> , 2021 , 12, 765471	5.7	1
83	Pleural effusion-based nomogram to predict outcomes in unselected patients with multiple myeloma: a large single center experience. <i>Annals of Hematology</i> , 2021 , 100, 1789-1801	3	1
82	The role of ultrasound in determining the amount of pleural effusion. <i>Annals of Translational Medicine</i> , 2021 , 9, 972	3.2	0
81	Predicting Survival for Patients with Malignant Pleural Effusion: Development of the CONCH Prognostic Model. <i>Cancer Management and Research</i> , 2021 , 13, 4699-4707	3.6	1
80	A cluster of health care workers with COVID-19 pneumonia caused by SARS-CoV-2. <i>Journal of Microbiology, Immunology and Infection</i> , 2021 , 54, 54-60	8.5	43
79	Helper T cells in malignant pleural effusion. <i>Cancer Letters</i> , 2021 , 500, 21-28	9.9	3
78	Early Use of Corticosteroid May Prolong SARS-CoV-2 Shedding in Non-Intensive Care Unit Patients with COVID-19 Pneumonia: A Multicenter, Single-Blind, Randomized Control Trial. <i>Respiration</i> , 2021 , 100, 116-126	3.7	44
77	Clinical Characteristics and Risk Factors for Pleural Effusion in Patients with Multiple Myeloma. <i>International Journal of General Medicine</i> , 2021 , 14, 649-657	2.3	0
76	An update of the long-term outcome of patients with nonspecific pleurisy at medical thoracoscopy. <i>BMC Pulmonary Medicine</i> , 2021 , 21, 226	3.5	0
75	Nosocomial outbreak of COVID-19 pneumonia in Wuhan, China. <i>European Respiratory Journal</i> , 2020 , 55,	13.6	106
74	IL-10 promotes malignant pleural effusion by regulating T 1 response via an miR-7116-5p/GPR55/ERK pathway in mice. <i>European Journal of Immunology</i> , 2020 , 50, 1798-1809	6.1	2
73	Blood Eosinophilia and Its Stability in Hospitalized COPD Exacerbations are Associated with Lower Risk of All-Cause Mortality. <i>International Journal of COPD</i> , 2020 , 15, 1123-1134	3	10
72	Comparison of Hospitalized Patients With ARDS Caused by COVID-19 and H1N1. <i>Chest</i> , 2020 , 158, 195-205	9.5	197
71	Influence of age on the diagnostic accuracy of soluble biomarkers for tuberculous pleural effusion: a post hoc analysis. <i>BMC Pulmonary Medicine</i> , 2020 , 20, 178	3.5	3

70	TSA α Plays a Major Role in Myo9b-Mediated Suppression of Malignant Pleural Effusion by Regulating T1/T17 Cell Response. <i>Journal of Immunology</i> , 2020 , 205, 2926-2935	5.3	1
69	Salivary microRNAs show potential as biomarkers for early diagnosis of malignant pleural effusion. <i>Translational Lung Cancer Research</i> , 2020 , 9, 1247-1257	4.4	3
68	Predictors of mortality for patients with COVID-19 pneumonia caused by SARS-CoV-2. <i>European Respiratory Journal</i> , 2020 , 56,	13.6	18
67	Predictors of mortality for patients with COVID-19 pneumonia caused by SARS-CoV-2: a prospective cohort study. <i>European Respiratory Journal</i> , 2020 , 55,	13.6	820
66	Hospitalization and Critical Care of 109 Decedents with COVID-19 Pneumonia in Wuhan, China. <i>Annals of the American Thoracic Society</i> , 2020 , 17, 839-846	4.7	138
65	Diagnostic value of CD206CD14 macrophages in diagnosis of lung cancer originated malignant pleural effusion. <i>Journal of Thoracic Disease</i> , 2019 , 11, 2730-2736	2.6	7
64	IL-10 promotes malignant pleural effusion in mice by regulating T 1- and T 17-cell differentiation and migration. <i>European Journal of Immunology</i> , 2019 , 49, 653-665	6.1	10
63	Development and validation of the PET-CT score for diagnosis of malignant pleural effusion. <i>European Journal of Nuclear Medicine and Molecular Imaging</i> , 2019 , 46, 1457-1467	8.8	18
62	IL-17A-Producing $\gamma\delta$ T Cells Inhibit the Formation of Malignant Pleural Effusions. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2019 , 61, 174-184	5.7	6
61	IL-10-producing B cells regulate Th1/Th17-cell immune responses in Pneumocystis pneumonia. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2019 , 316, L291-L301	5.8	10
60	Diagnostic accuracy of interleukin 27 for tuberculous pleural effusion: two prospective studies and one meta-analysis. <i>Thorax</i> , 2018 , 73, 240-247	7.3	37
59	Malignant pleural mesothelioma: diagnostic value of medical thoracoscopy and long-term prognostic analysis. <i>BMC Pulmonary Medicine</i> , 2018 , 18, 56	3.5	9
58	Improved heart hemodynamics after draining large-volume pleural effusion: a prospective cohort study. <i>BMC Pulmonary Medicine</i> , 2018 , 18, 62	3.5	4
57	Activated naive B cells promote development of malignant pleural effusion by differential regulation of T1 and T17 response. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2018 , 315, L443-L455	5.8	12
56	Lethal (2) giant larvae regulates pleural mesothelial cell polarity in pleural fibrosis. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , 2018 , 1865, 1201-1210	4.9	6
55	Inhibition of angiotensin II and calpain attenuates pleural fibrosis. <i>Pulmonary Pharmacology and Therapeutics</i> , 2018 , 48, 46-52	3.5	4
54	Long-term outcome of patients with nonspecific pleurisy at medical thoracoscopy. <i>Respiratory Medicine</i> , 2017 , 124, 1-5	4.6	18
53	miR-18a-5p Inhibits Sub-pleural Pulmonary Fibrosis by Targeting TGF- β Receptor II. <i>Molecular Therapy</i> , 2017 , 25, 728-738	11.7	45

52	Diagnostic Accuracy of Combinations of Tumor Markers for Malignant Pleural Effusion: An Updated Meta-Analysis. <i>Respiration</i> , 2017 , 94, 62-69	3.7	40
51	Diagnostic value of medical thoracoscopy in malignant pleural effusion. <i>BMC Pulmonary Medicine</i> , 2017 , 17, 109	3.5	14
50	Diagnostic accuracy of tumor markers for malignant pleural effusion: a derivation and validation study. <i>Journal of Thoracic Disease</i> , 2017 , 9, 5220-5229	2.6	18
49	Immune Regulation of Toll-Like Receptor 2 Engagement on CD4 T Cells in Murine Models of Malignant Pleural Effusion. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2017 , 56, 342-352	5.7	8
48	Diagnostic value of medical thoracoscopy in malignant pleural effusion induced by non-Hodgkin's lymphoma. <i>Oncology Letters</i> , 2017 , 14, 8092-8099	2.6	3
47	Determination of Interleukin 27-Producing CD4(+) and CD8(+) T Cells for The Differentiation Between Tuberculous and Malignant Pleural Effusions. <i>Scientific Reports</i> , 2016 , 6, 19424	4.9	4
46	Clinical Value of Tumor Markers for Determining Cause of Pleural Effusion. <i>Chinese Medical Journal</i> , 2016 , 129, 253-8	2.9	18
45	Tuberculous pleural effusion. <i>Journal of Thoracic Disease</i> , 2016 , 8, E486-94	2.6	71
44	Activation of calpain by renin-angiotensin system in pleural mesothelial cells mediates tuberculous pleural fibrosis. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2016 , 311, L145-53	5.8	12
43	Diagnostic value and safety of medical thoracoscopy in tuberculous pleural effusion. <i>Respiratory Medicine</i> , 2015 , 109, 1188-92	4.6	40
42	Crosstalk between calpain activation and TGF- β augments collagen-I synthesis in pulmonary fibrosis. <i>Biochimica Et Biophysica Acta - Molecular Basis of Disease</i> , 2015 , 1852, 1796-804	6.9	29
41	Author's reply to "comments on HPV and lung cancer risk: a meta-analysis" [J. Clin. Virol. (in press)]. <i>Journal of Clinical Virology</i> , 2015 , 63, 92-3	14.5	2
40	Efficacy and safety of diagnostic thoracoscopy in undiagnosed pleural effusions. <i>Respiration</i> , 2015 , 90, 251-5	3.7	47
39	HPV and lung cancer risk: a meta-analysis. <i>Journal of Clinical Virology</i> , 2015 , 63, 84-90	14.5	50
38	Body Fluid Interferon- γ Release Assay for Diagnosis of Extrapulmonary Tuberculosis in Adults: A Systematic Review and Meta-Analysis. <i>Scientific Reports</i> , 2015 , 5, 15284	4.9	20
37	Toll-like receptor 4 signaling inhibits malignant pleural effusion by altering Th1/Th17 responses. <i>Cell Biology International</i> , 2015 , 39, 1120-30	4.5	9
36	Incidence of pleural effusion in patients with pulmonary embolism. <i>Chinese Medical Journal</i> , 2015 , 128, 1032-6	2.9	14
35	Immune Regulation of Interleukin-27 in Malignant Pleural Effusion. <i>Chinese Medical Journal</i> , 2015 , 128, 1932-41	2.9	3

34	Recruitment of IL-27-Producing CD4(+) T Cells and Effect of IL-27 on Pleural Mesothelial Cells in Tuberculous Pleurisy. <i>Lung</i> , 2015 , 193, 539-48	2.9	11
33	Interplay of Th1 and Th17 cells in murine models of malignant pleural effusion. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2014 , 189, 697-706	10.2	41
32	PD-1/PD-Ls pathways between CD4(+) T cells and pleural mesothelial cells in human tuberculous pleurisy. <i>Tuberculosis</i> , 2014 , 94, 131-9	2.6	9
31	Expert consensus on acute exacerbation of chronic obstructive pulmonary disease in the People's Republic of China. <i>International Journal of COPD</i> , 2014 , 9, 381-95	3	25
30	IL-27 and IL-27-producing CD4+ T cells in human tuberculous pleural effusion. <i>Tuberculosis</i> , 2014 , 94, 579-88	2.6	16
29	Efficacy and safety of talc pleurodesis for malignant pleural effusion: a meta-analysis. <i>PLoS ONE</i> , 2014 , 9, e87060	3.7	59
28	Recruitment and phenotypic characteristics of interleukin 9-producing CD4+ T cells in malignant pleural effusion. <i>Lung</i> , 2013 , 191, 385-9	2.9	16
27	Subpopulations of helper T lymphocytes in tuberculous pleurisy. <i>Tuberculosis</i> , 2013 , 93, 279-84	2.6	15
26	Regulation of CD4(+) T cells by pleural mesothelial cells via adhesion molecule-dependent mechanisms in tuberculous pleurisy. <i>PLoS ONE</i> , 2013 , 8, e74624	3.7	9
25	Combined detections of interleukin 27, interferon- γ and adenosine deaminase in pleural effusion for diagnosis of tuberculous pleurisy. <i>Chinese Medical Journal</i> , 2013 , 126, 3215-21	2.9	24
24	Differentiation and immune regulation of IL-9-producing CD4+ T cells in malignant pleural effusion. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2012 , 186, 1168-79	10.2	57
23	Interleukin 22-producing CD4+ T cells in malignant pleural effusion. <i>Cancer Letters</i> , 2012 , 326, 23-32	9.9	52
22	Differentiation and recruitment of IL-22-producing helper T cells stimulated by pleural mesothelial cells in tuberculous pleurisy. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2012 , 185, 660-9	10.2	43
21	Differentiation and recruitment of Th9 cells stimulated by pleural mesothelial cells in human Mycobacterium tuberculosis infection. <i>PLoS ONE</i> , 2012 , 7, e31710	3.7	52
20	Cell origins and diagnostic accuracy of interleukin 27 in pleural effusions. <i>PLoS ONE</i> , 2012 , 7, e40450	3.7	42
19	Diagnostic accuracy of T-cell interferon- γ release assays in tuberculous pleurisy: a meta-analysis. <i>Respirology</i> , 2011 , 16, 473-80	3.6	44
18	CD39+ regulatory T cells suppress generation and differentiation of Th17 cells in human malignant pleural effusion via a LAP-dependent mechanism. <i>Respiratory Research</i> , 2011 , 12, 77	7.3	40
17	Imbalance of Th17 cells and regulatory T cells in tuberculous pleural effusion. <i>Vaccine Journal</i> , 2011 , 18, 1608-15		34

16	CCL22 is involved in the recruitment of CD4+CD25 high T cells into tuberculous pleural effusions. <i>Respirology</i> , 2010 , 15, 522-9	3.6	28
15	Generation and differentiation of IL-17-producing CD4+ T cells in malignant pleural effusion. <i>Journal of Immunology</i> , 2010 , 185, 6348-54	5.3	113
14	CCL22 recruits CD4-positive CD25-positive regulatory T cells into malignant pleural effusion. <i>Clinical Cancer Research</i> , 2009 , 15, 2231-7	12.9	66
13	Diagnostic value of carcinoembryonic antigen in malignant pleural effusion: a meta-analysis. <i>Respirology</i> , 2008 , 13, 518-27	3.6	74
12	Diagnostic accuracy of adenosine deaminase in tuberculous pleurisy: a meta-analysis. <i>Respiratory Medicine</i> , 2008 , 102, 744-54	4.6	221
11	CD4+CD25+ regulatory T lymphocytes in tuberculous pleural effusion. <i>Chinese Medical Journal</i> , 2008 , 121, 581-586	2.9	24
10	Expression of soluble triggering receptor expression on myeloid cells-1 in pleural effusion. <i>Chinese Medical Journal</i> , 2008 , 121, 1656-1661	2.9	14
9	Expression of soluble triggering receptor expression on myeloid cells-1 in pleural effusion. <i>Chinese Medical Journal</i> , 2008 , 121, 1656-1661	2.9	4
8	Diagnostic value of interferon-gamma in tuberculous pleurisy: a metaanalysis. <i>Chest</i> , 2007 , 131, 1133-41	5.3	148
7	CD4+CD25+ regulatory T lymphocytes in malignant pleural effusion. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2005 , 172, 1434-9	10.2	54
6	Soluble CTLA-4 in Sera of Patients with Bronchial Asthma. <i>Journal of Asthma</i> , 2005 , 42, 133-139	1.9	14
5	Soluble CTLA-4 in sera of patients with bronchial asthma. <i>Journal of Asthma</i> , 2005 , 42, 133-9	1.9	5
4	Eosinophils function as antigen-presenting cells. <i>Journal of Leukocyte Biology</i> , 2004 , 76, 520-7	6.5	119
3	Regulatory CD4+CD25+ T lymphocytes in peripheral blood from patients with atopic asthma. <i>Clinical Immunology</i> , 2004 , 113, 172-8	9	64
2	Eosinophils in asthma. <i>Chinese Medical Journal</i> , 2004 , 117, 792-4	2.9	1
1	Effect of inhaled interleukin-4 on airway hyperreactivity in asthmatics. <i>American Journal of Respiratory and Critical Care Medicine</i> , 1998 , 157, 1818-21	10.2	79
