#	ARTICLE	IF	CITATIONS
1	Identification of MicroRNA-124 as a Major Regulator of Enhanced Endothelial Cell Glycolysis in Pulmonary Arterial Hypertension via PTBP1 (Polypyrimidine Tract Binding Protein) and Pyruvate Kinase M2. <i>Circulation</i> , 2017, 136, 2451-2467.	1.6	195
2	Marked Strain-Specific Differences in the SU5416 Rat Model of Severe Pulmonary Arterial Hypertension. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2016, 54, 461-468.	2.9	77
3	Proliferative Versus Degenerative Paradigms in Pulmonary Arterial Hypertension. <i>Circulation Research</i> , 2017, 120, 1237-1239.	4.5	32
4	Discordant Regulation of microRNA Between Multiple Experimental Models and Human Pulmonary Hypertension. <i>Chest</i> , 2015, 148, 481-490.	0.8	31
5	Occlusive Lung Arterial Lesions in Endothelial-Targeted, Fas-Induced Apoptosis Transgenic Mice. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2015, 53, 712-718.	2.9	25
6	Systematic Assessment of Strategies for Lung-targeted Delivery of MicroRNA Mimics. <i>Theranostics</i> , 2018, 8, 1213-1226.	10.0	20
7	Efficacy of treprostinil in the SU5416 hypoxia model of severe pulmonary arterial hypertension: haemodynamic benefits are not associated with improvements in arterial remodelling. <i>British Journal of Pharmacology</i> , 2018, 175, 3976-3989.	5.4	20
8	Lack of elevation in plasma levels of pro-inflammatory cytokines in common rodent models of pulmonary arterial hypertension: questions of construct validity for human patients. <i>Pulmonary Circulation</i> , 2017, 7, 476-485.	1.7	13
9	Systemic delivery of MicroRNA mimics with polyethylenimine elevates pulmonary microRNA levels, but lacks pulmonary selectivity. <i>Pulmonary Circulation</i> , 2018, 8, 1-4.	1.7	12
10	High circulating angiopoietin-2 levels exacerbate pulmonary inflammation but not vascular leak or mortality in endotoxin-induced lung injury in mice. <i>Thorax</i> , 2018, 73, 248-261.	5.6	10
11	Macro- and micro-heterogeneity of lung endothelial cells: they may not be smooth, but they got the moves. <i>Pulmonary Circulation</i> , 2017, 7, 755-757.	1.7	1
12	090 Inhibition of VEGFR2 is Sufficient to Produce Severe Plexogenic Pulmonary Arterial Hypertension in Rats. <i>Canadian Journal of Cardiology</i> , 2012, 28, S121-S122.	1.7	0
