

Joshua P Scallan

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2965064/joshua-p-scallan-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

27
papers

1,119

#	Paper	IF	Citations
27	Ileitis-associated tertiary lymphoid organs arise at lymphatic valves and impede mesenteric lymph flow in response to tumor necrosis factor. <i>Immunity</i> , 2021 ,	32.3	3
26	Foxo1 deletion promotes the growth of new lymphatic valves. <i>Journal of Clinical Investigation</i> , 2021 , 131,	15.9	5
25	VE-Cadherin and Vesicles Differentially Regulate Lymphatic Vascular Permeability to Solutes of Various Sizes. <i>Frontiers in Physiology</i> , 2021 , 12, 687563	4.6	1
24	Demonstration of Functional Deficiencies in Popliteal Lymphatic Vessels From TNF-Transgenic Mice With Inflammatory Arthritis. <i>Frontiers in Physiology</i> , 2021 , 12, 745096	4.6	2
23	Lymphatic Valves and Lymph Flow in Cancer-Related Lymphedema. <i>Cancers</i> , 2020 , 12,	6.6	8
22	VE-Cadherin Is Required for Lymphatic Valve Formation and Maintenance. <i>Cell Reports</i> , 2019 , 28, 2397-2412	10.2	438
21	Differences in L-type Ca channel activity partially underlie the regional dichotomy in pumping behavior by murine peripheral and visceral lymphatic vessels. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2018 , 314, H991-H1010	5.2	36
20	Induction of Microvascular Network Growth in the Mouse Mesentery. <i>FASEB Journal</i> , 2018 , 32, 573.6	0.9	
19	Lymphatic Vessel Network Structure and Physiology. <i>Comprehensive Physiology</i> , 2018 , 9, 207-299	7.7	108
18	Induction of microvascular network growth in the mouse mesentery. <i>Microcirculation</i> , 2018 , 25, e12502	2.9	6
17	Methods for Assessing the Contractile Function of Mouse Lymphatic Vessels Ex Vivo. <i>Methods in Molecular Biology</i> , 2018 , 1846, 229-248	1.4	5
16	Calcium and electrical dynamics in lymphatic endothelium. <i>Journal of Physiology</i> , 2017 , 595, 7347-7368	3.9	23
15	The Lymphatic System: Integral Roles in Immunity. <i>Annual Review of Immunology</i> , 2017 , 35, 31-52	34.7	156
14	Lymphatic pumping: mechanics, mechanisms and malfunction. <i>Journal of Physiology</i> , 2016 , 594, 5749-5768	9.9	160
13	Lymphatic vascular integrity is disrupted in type 2 diabetes due to impaired nitric oxide signalling. <i>Cardiovascular Research</i> , 2015 , 107, 89-97	9.9	79
12	FOXC2 and fluid shear stress stabilize postnatal lymphatic vasculature. <i>Journal of Clinical Investigation</i> , 2015 , 125, 3861-77	15.9	137
11	Constriction of isolated collecting lymphatic vessels in response to acute increases in downstream pressure. <i>Journal of Physiology</i> , 2013 , 591, 443-59	3.9	46

10	Genetic removal of basal nitric oxide enhances contractile activity in isolated murine collecting lymphatic vessels. <i>Journal of Physiology</i> , 2013 , 591, 2139-56	3.9	79
9	Permeability and contractile responses of collecting lymphatic vessels elicited by atrial and brain natriuretic peptides. <i>Journal of Physiology</i> , 2013 , 591, 5071-81	3.9	33
8	The unique and important role of the myogenic response in the lymphatic system 2013 , 27-31		
7	Depolarization of collecting lymphatic endothelium with acetylcholine or TRPV4 activation. <i>FASEB Journal</i> , 2013 , 27, 678.3	0.9	
6	Basal nitric oxide production in mouse collecting lymphatics does not enhance contractile activity. <i>FASEB Journal</i> , 2013 , 27, 681.9	0.9	
5	Independent and interactive effects of preload and afterload on the pump function of the isolated lymphangion. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2012 , 303, H809-24	5.2	48
4	Intrinsic increase in lymphangion muscle contractility in response to elevated afterload. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2012 , 303, H795-808	5.2	79
3	Lymphatic valve lock in response to modest gravitational loads: a contributing mechanism to peripheral lymphedema?. <i>FASEB Journal</i> , 2012 , 26, 677.2	0.9	
2	In vivo determination of collecting lymphatic vessel permeability to albumin: a role for lymphatics in exchange. <i>Journal of Physiology</i> , 2010 , 588, 243-54	3.9	61
1	Lymphatic vessels – absorptive sumps or leaky pumps? 2010 , 16-18
