| #  | ARTICLE                                                                                                                                                                                                                           | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Cannulation Strategies for Minimally Invasive Cardiac Surgery. Innovations: Technology and Techniques in Cardiothoracic and Vascular Surgery, 2020, 15, 261-269.                                                                  | 0.9 | 18        |
| 2  | Lobectomy Versus Stereotactic Body Radiotherapy in Healthy Octogenarians With Stage I Lung Cancer. Annals of Thoracic Surgery, 2021, 111, 1659-1665.                                                                              | 1.3 | 17        |
| 3  | Early Outcomes for Surgical Minimally Invasive SAPIEN 3 Transcatheter Mitral Valve Replacement. Annals of Thoracic Surgery, 2021, 112, 494-500.                                                                                   | 1.3 | 11        |
| 4  | Recent advances in devices for minimally invasive aortic valve replacement. Expert Review of Medical Devices, 2020, 17, 201-208.                                                                                                  | 2.8 | 11        |
| 5  | Current Surgical Risk Scores Overestimate Risk in Minimally Invasive Aortic Valve Replacement. Innovations: Technology and Techniques in Cardiothoracic and Vascular Surgery, 2021, 16, 43-51.                                    | 0.9 | 10        |
| 6  | Implementation of an enhanced recovery after thoracic surgery care pathway for thoracotomy patientsâ€”achieving better pain control with less (schedule II) opioid utilization. Journal of Thoracic Disease, 2021, 13, 3948-3959. | 1.4 | 9         |
| 7  | Comparative Analysis of Robotic Segmentectomy For Non-Small Cell Lung Cancer: A National Cancer Database Study. Innovations: Technology and Techniques in Cardiothoracic and Vascular Surgery, 2021, 16, 280-287.                 | 0.9 | 7         |
| 8  | The State of Artificial Heart Therapy. Texas Heart Institute Journal, 2019, 46, 77-79.                                                                                                                                            | 0.3 | 7         |
| 9  | Preparing endâ€”stage heart failure patients and care providers in the era of climate changeâ€”driven hurricanes. Journal of Cardiac Surgery, 2021, 36, 3491-3493.                                                                | 0.7 | 4         |
| 10 | Effect of COVID-19 on the delivery of care for thoracic surgical patients. JTCVS Open, 2022, 10, 456-468.                                                                                                                         | 0.5 | 4         |
| 11 | Device exchange from Heartmate II to HeartWare HVAD. Journal of Cardiac Surgery, 2019, 34, 1204-1207.                                                                                                                             | 0.7 | 3         |
| 12 | Review of cerebral perfusion strategies for aortic surgery with application for minimally invasive approaches. Journal of Cardiac Surgery, 2020, 35, 3539-3544.                                                                   | 0.7 | 3         |
| 13 | Bioprosthetic valve battles: The destiny of the dysfunctional valve. Journal of Cardiac Surgery, 2021, 36, 4732-4733.                                                                                                             | 0.7 | 3         |
| 14 | Size does matter: Yet BMI extremes are manageable in minimally invasive cardiac surgery. Journal of Cardiac Surgery, 2022, 37, 124-125.                                                                                           | 0.7 | 3         |
| 15 | A Synthetic CardioCel Tube for Minimally Invasive Superior Vena Cava Bypass. Annals of Thoracic Surgery, 2019, 108, e283-e285.                                                                                                    | 1.3 | 2         |
| 16 | Transcatheter Aortic Valve Replacement for Alkaptonuria-Associated Aortic Stenosis. Annals of Thoracic Surgery, 2019, 108, e377-e379.                                                                                             | 1.3 | 2         |
| 17 | Commentary: Predicting False Lumen Enlargement Based on Fenestration Flow Velocity â€”to What Extent Should Computational Models be Incorporated?. Seminars in Thoracic and Cardiovascular Surgery, 2021, , .                     | 0.6 | 2         |
| 18 | Commentary: The mini-thoracotomy approach for descending aorta: Small, simple and safe!. JTCVS Techniques, 2021, 8, 31-32.                                                                                                        | 0.4 | 2         |

| #  | ARTICLE                                                                                                                                                                                         | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Minimally invasive, simplified double-layer left atrial appendage closure. <i>Journal of Cardiac Surgery</i> , 2020, 35, 1322-1324.                                                             | 0.7 | 2         |
| 20 | Are the outcomes of TAVR significantly riskier for solid organ transplant recipients than for the general population?. <i>Journal of Cardiac Surgery</i> , 2022, 37, 608-609.                   | 0.7 | 2         |
| 21 | Left Pulmonary Artery Patch Augmentation for Lung Transplant in a Patient With Situs Inversus. <i>Texas Heart Institute Journal</i> , 2021, 48, .                                               | 0.3 | 1         |
| 22 | Commentary: The Role of Less-Invasive Mitral Valve Surgery When the Mitral Annulus Is Calcified: When Less Is More. <i>Seminars in Thoracic and Cardiovascular Surgery</i> , 2022, 34, 510-511. | 0.6 | 1         |
| 23 | Commentary: Subvalvular procedures offer hope for better results in tricuspid valve repair. <i>JTCVS Techniques</i> , 2021, 10, 291-292.                                                        | 0.4 | 1         |
| 24 | Outcomes to Consider in the Surgical Implantation of Transcatheter Valves in Patients with Mitral Annular Calcification. <i>Annals of Thoracic Surgery</i> , 2021, 112, 2112.                   | 1.3 | 0         |
| 25 | Commentary: Battle of the bioprosthetic valve blood thinners. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2021, , .                                                                 | 0.8 | 0         |
| 26 | Commentary: Does facilitating left subclavian artery revascularization matter during zone 2 thoracic endovascular aortic repair?. <i>JTCVS Techniques</i> , 2021, 7, 41-42.                     | 0.4 | 0         |
| 27 | Commentary: Paving the way for less-invasive lung transplantation: Time to ditch the stitch?. <i>JTCVS Techniques</i> , 2021, 9, 188-189.                                                       | 0.4 | 0         |
| 28 | Commentary: Managing catastrophic antiphospholipid syndrome—do we have a way out?. <i>JTCVS Techniques</i> , 2021, 10, 278-279.                                                                 | 0.4 | 0         |
| 29 | Donation After Circulatory Death Donors for Lung Transplantation: the US and Worldwide Status. <i>Current Pulmonology Reports</i> , 2021, 10, 149.                                              | 1.3 | 0         |
| 30 | Commentary: Lasting durable bioprosthetic valves: Truth or fiction. <i>JTCVS Open</i> , 2022, , .                                                                                               | 0.5 | 0         |
